Mr. MAGNUSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives in regard to House bill 7391.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H.R. 7391) to promote the conservation of migratory waterfowl by the acquisition of wet lands and other essential waterfowl habitat, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MAGNUSON. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MAGNUSON, Mr. ENGLE, Mr. BARTLETT, Mr. MCGEE, Mr. SCHOEPPEL and Mr. BUTLER the conferees on the part of the Senate.

AID TO FEDERALLY IMPACTED SCHOOLS—AMENDMENTS

Mr. MORSE submitted amendments, intended to be proposed by him, to the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas, and to provide for the application of such laws to American Samoa, which were ordered to lie on the table and to be printed.

Mr. HARTKE submitted amendments, intended to be proposed by him, to Senate bill 2393, supra, which were ordered to lie on the table and to be printed.

AMENDMENT OF EMPLOYMENT ACT OF 1946—ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of September 7, 1961, the name of Mr. Moss was added as an additional cosponsor of the bill (S. 2517) to amend the Employment Act of 1946 to provide more effective means for bringing to bear an informed public opinion upon price and wage increases which threaten economic stability, introduced by Mr. CLARK (for himself and other Senators) on September 7, 1961.

PROPOSED COINAGE OF GOLD MEDAL IN HONOR OF SPEAKER RAYBURN — ADDITIONAL COSPONSORS OF JOINT RESOLUTION

Under authority of the order of the Senate of September 7, 1961, the names of Senators ANDERSON, BARTLETT, BIBLE, BOGGS, BRIDGES, BURDICK, BUTLER, BYRD of West Virginia, CAPEHART, CARLSON, CARROLL, CASE of New Jersey, CASE of South Dakota, CHAVEZ, CHURCH, CURTIS, DODD, ENGLE, FULBRIGHT, HART, HICKEY, HOLLAND, JACKSON, JAVITS, JOHNSTON, JORDAN, KEATING, KEFAUVER, LONG of Missouri, LONG of Hawaii, LONG of Louisiana, MAGNUSON, MCCARTHY, MCGEE, MONRONEY, MORTON, MOSS, MUSKIE, PELL, PROUTY, RANDOLPH, SALTONSTALL, SCOTT, SMATHERS, SPARKMAN, SYMINGTON, WILLIAMS of New Jersey, and YOUNG of Ohio were added as additional cosponsors of the joint resolution (S.J. Res. 133) to provide for the coinage of a medal in recognition of the distinguished services of SAM RAYBURN, Speaker of the House of Representatives, introduced by Mr. YARBOROUGH (for himself and Mr. KERR) on September 7, 1961.

CONGRESSIONAL DISTINGUISHED SERVICE AWARDS OF 1961

Mr. MANSFIELD. Mr. President, last Friday, four distinguished Members of Congress—the Senator from Illinois, Mr. DOUGLAS; the Senator from Vermont, Mr. AIKEN; the Representative from Michigan, Mr. FORD; and the Representative from Missouri, Mr. BOLLING—received the 1961 Congressional Distinguished Service Awards from the American Political Science Association. The awards were presented at the annual meeting of that association, which was held in St. Louis, Mo.

Mr. President, I do not think four more outstanding Members of Congress could be selected to receive the awards. All of them are distinguished in their fields. All of them represent exceedingly well their States and their districts. All of them are a credit to the Congress and to those whom they have the honor and the privilege to represent.

I ask unanimous consent that the citations presented to these four outstanding Members of Congress be printed at this point in the RECORD.

There being no objection, the citations were ordered to be printed in the RECORD, as follows:

FOUR LEGISLATORS CITED BY APSA AT CONGRESSIONAL DISTINGUISHED SERVICE AWARDS LUNCHEON

(Release by the American Political Science Association)

ST. LOUIS, MO.—Two Senators and two Representatives were honored with the 1961 Congressional Distinguished Service Awards this afternoon by the American Political Science Association. Senator PAUL H. DOUGLAS, Democrat, of Illinois; Senator GEORGE D. AIKEN, Republican, of Vermont; Representative GERALD R. FORD, JR., Republican, of Michigan; and Representative RICHARD BOLLING, Democrat, of Missouri; received the awards during a luncheon meeting at the Sheraton-Jefferson Hotel in St. Louis where the association is holding its 57th annual meeting.

John D. Millett, president of Miami University at Oxford, Ohio, and chairman of the 1961 awards' committee, presented bronze plaques to the four legislators for their contributions to the 86th Congress. In making the awards, Millett read the following citations:

SENATOR PAUL H. DOUGLAS, DEMOCRAT, OF ILLINOIS

"Viewing his senatorial role in the progressive tradition of Norris and La Follette, PAUL H. DOUGLAS has kept on the Nation's current agenda many of those enduring problems which otherwise might be accidentally overlooked or deliberately ignored.

"Having established himself as one of this Nation's most respected economists, he brought to the Senate a breadth of understanding regarding the Federal Government's role in combating domestic economic and social problems combined with unsparing criticism of governmental waste and inefficiency.

"Reflecting the courage tempered by his distinguished military service, he has viewed the right to advocate unpopular but crucial causes as a personal duty and he has prophetically raised the eternal problems of human freedom and dignity in terms of our contemporary democratic society.

"The American Political Science Association is privileged to present this Congressional Distinguished Service Award to PAUL H. DOUGLAS, Democrat, of Illinois—rigorous intellect, responsible independent, defender of human rights, and consistent advocate of social progress."

SENATOR GEORGE D. AIKEN, REPUBLICAN, OF VERMONT

"Pursuing a highly independent course, GEORGE D. AIKEN has performed his senatorial duties with a responsibility that has resisted the extremism of both the right and the left. Making full use of his New England prerogative of not speaking unless he has something to say, he specializes in stripping away partisan pretension from the vital issues before Congress, substituting the oftmaligned but ultimately indispensable notion of the public interest. Particularly in the areas of foreign policy and agriculture, his facility for searching criticism tempered by commonsense provides one of the essential ingredients in the successful functioning of a representative democracy.

"The American Political Science Association takes great pleasure in presenting this Congressional Distinguished Service Award to GEORGE D. AIKEN, Republican, of Vermont—respected conciliator, effective legislator, rugged Yankee individualist, and symbol of bipartisan responsibility for this Nation's welfare."

CONGRESSMAN RICHARD BOLLING, DEMOCRAT, OF MISSOURI

"A master strategist who serves as crucial link between the House leadership and the Democratic liberal block and enjoys the complete confidence of both, RICHARD BOLLING is a political realist who, while recognizing the necessity for compromise, refuses to desert basic principles. A careful student of politics who clearly enjoys his active role within it, he has been able to build a unique role for himself as a bridge between the northern and southern wings of the Democratic Party and has become a trusted aid of Speaker RAYBURN. He has dedicated his career to building that vital area of consensus on which rests the fate of so much legislation.

"The American Political Science Association takes great pleasure in presenting this Congressional Distinguished Service Award to RICHARD BOLLING, Democrat, of Missouri—thorough technician, brilliant strategist, articulate congressional spokesman for liberal thought, and responsible custodian of power and influence."

CONGRESSMAN GERALD R. FORD, JR., REPUBLICAN, OF MICHIGAN

"With the continuing growth of executive power, the always important legislative function of control over the purse strings has assumed an even greater role in our democratic system.

"Occupying one of the most difficult, time-consuming, and important positions in the House as a ranking member of the Defense Appropriations Subcommittee, GERALD FORD has, through diligent application to committee work and mastery of highly complex defense matters, indeed earned the appellation of "Congressman's Congressman." A moderate conservative who is highly respected by his colleagues of both parties, he symbolizes the hardworking, competent legislator who eschews the more colorful, publicity-seeking roles in favor of a solid record of achievement in the real work of the House—committee work. Nonpartisan where the defense posture of the Nation is

concerned, he nonetheless occupies an important position in the national councils of his party and is a recognized leader of the Republicans in the House.

"The American Political Science Association is privileged to present this Congressional Distinguished Service Award to GERALD R. FORD, JR., Republican, of Michigan—party leader, responsible critic, respected participant in debate, conscientious, dedicated, and judicious committee member."

REQUEST FOR CONSIDERATION OF UNOBJECTED-TO CALENDAR MEASURES FOLLOWING MORNING HOUR DURING REMAINDER OF SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that it may be in order at any time during the rest of the session, at the conclusion of morning business, to call up the items on the calendar to which there is no objection.

Mr. LAUSCHE. Mr. President, at this time I object.

Mr. MANSFIELD. I wish the Senator from Ohio would give us a chance to explain. The calendar could be called right now. All I am trying to do is make it possible to bring up private bills and other measures on the calendar to which there is no objection, inasmuch as such measures can be quickly disposed of. My request relates only to the measures on the calendar to which there is no objection.

Mr. LAUSCHE. Mr. President, my purpose in objecting is as follows: I can already see the purpose of grinding out bills, and I would wish to know the contents of the bills to be considered and passed.

Mr. MANSFIELD. Mr. President, I withdraw my request.

Mr. LAUSCHE. It may be that later, after I talk with the Senator from Montana, I shall withdraw this blanket objection.

Mr. LAUSCHE subsequently said: Mr. President, if a request is made for permission for the Foreign Relations Committee to meet today during the session of the Senate, I shall object.

Mr. MANSFIELD. Mr. President, will the Senator from Ohio yield?

Mr. LAUSCHE. I yield.

Mr. MANSFIELD. I should like to call attention to the fact that we shall not object to the unanimous-consent request on that basis; and I should like the Senate to be on notice that from now on, no requests of that nature—that is, to interpose an indefinite objection to committee meetings—will be granted unless the Senator who is doing the protesting is here on the floor to object. I think that is a responsibility of every Senator, and I think the Senate is entitled to that courtesy.

Mr. LAUSCHE. Yes. I object reluctantly. However, it is on the following basis that I will raise the objection: 2 years ago there was debate concerning an international fair. The debate revolved about the issue of whether the fair should be held in Washington, D.C., or in New York. During the debate it was pointed out that New York has a very large population, and that if the fair were held in New York, the income would be adequate to finance it, and that the U.S. Government would not be asked to expend any funds in the development of the exhibition.

President Eisenhower appointed a Commission to study the subject; and the Commission recommended that the fair be held in New York.

When that subject was brought before the Foreign Relations Committee, I asked questions as to whether the Federal Government would be called upon to expend any money to further the program. The answer was repeatedly and firmly that no moneys would be expected of the Federal Government.

Today, there is pending before the Foreign Relations Committee a resolution calling for authority to expend $300,000 to make a study of what would be the participation of the Federal Government. Connected with that resolution, there already is a declaration by the promoters of the fair that the U.S. Government build a $30 million building as its participation in the fair—the $30 million reflecting $20 million for the building and $10 million for the equipment which would be exhibited.

Last week this subject was brought before the committee. It was pointed out that 2 years ago the proponents of the study assured that there would be no expenditure on the part of the Federal Government. In the meeting last week, because of those commitments made 2 years ago, the resolution was passed over—according to my understanding, for the present session.

Today, I learned that the committee contemplates taking up the resolution. I will not stand by—in this breach of the commitment, made 2 years ago, that no Federal Government moneys would be expended—when it now appears as a fact that a drive is being made for the expenditure of $30 million of Federal Government funds.

There are three expenditures of a similar nature which we should have in mind. One of them calls for $39 million for the Jame Madison Memorial. James Madison was a great American, and I have studied and followed his teachings. But I do not believe such an expenditure is essential though desirable. Twenty million dollars has been requested for the building of an aquarium. I cannot see the essentiality of it.

Thirty million dollars obviously will be requested for the building of a Federal structure at the New York Fair, which cannot be claimed to be a world fair, inasmuch as the World Fair will be held in Seattle the coming year. It is entirely apparent that the New York Fair cannot be a world fair, because a world fair must have the approval of the Bureau of International Expositions, a combination of 30 nations which declares whether there will be participation; and only when there is participation can the fair be a world fair.

That Bureau of International Expositions has declared that it will participate in the Seattle, Wash., Fair, and not the New York Fair.

It is on that ground that I reluctantly object to the consideration of the measure before the Foreign Relations Committee.

At this time I withdraw my objection to bills to which there is no objection being considered on the general calendar as proposed by the majority leader.

The VICE PRESIDENT. Is there objection to the request? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. I thank the Senator. I wish to assure him that, if a request is made and he is in the city, and not absent on official business, he will receive proper notification to that effect, so he can come to the Chamber and record his objection.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. LAUSCHE. I very reluctantly object to the Foreign Relations Committee meeting because there are some measures we ought to take up, but I cannot stand by with this breach of commitment.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business and consider the nominations on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to consider executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Joint Committee on Atomic Energy.

(For nominations this day received, see the end of Senate proceedings.)

The VICE PRESIDENT. If there be no reports of committees, the nominations on the Executive Calendar will be stated.

CALIFORNIA DEBRIS COMMISSION

The Chief Clerk read the nomination of Col. Arthur H. Frye, Jr., Corps of Engineers, to be president and senior member of the California Debris Commission.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

PUBLIC HEALTH SERVICE

The Chief Clerk proceeded to read sundry nominations in the Public Health Service.

Mr. MANSFIELD. Mr. President, I ask that those nominations be considered en bloc.

The VICE PRESIDENT. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed. Without objection, the President will be notified forthwith of the nominations today confirmed.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

THE SENATE'S RELUCTANT BOSS: SENATOR MIKE MANSFIELD, OF MONTANA

Mr. DIRKSEN. Mr. President, in the September issue of Sign magazine, there appeared an article by Paul F. Healy, Washington correspondent of the New York Daily News, under the caption "The Senate's Reluctant 'Boss'." I hope my distinguished friend heard that. The reference is to our distinguished majority leader, Senator MIKE MANSFIELD, of Montana. Excellent as the article is, it does not quite do justice to two outstanding attributes of the man from Montana. The first is his humility. Leadership is exercised in many different ways, but it reaches its highest level when it springs from humility, for humility is one of the essential components of love for one's fellow man.

His other great attribute is complete cooperation with his fellow Senators to accommodate the many intrusions and conflicts which are a part of public service. How often I have asked MIKE MANSFIELD to reschedule some measure because a Senator who had a particular interest in it would be unavoidably absent on that day. How often I have asked him to avoid a Saturday session, if possible, so that Members might catch up on the ever-increasing volume of correspondence and office work, and almost invariably he has obliged. How often I have asked him to defer a rollcall until the following day if Senators were away from the session, and seldom has he demurred at the request. These are intrinsic qualities which have truly endeared him to every Member of the Senate, and I salute him as a durable and inspiring friend whom I first came to know when he took the oath of office in the 78th Congress.

I ask unanimous consent that the article by Mr. Healy be made a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SENATE'S RELUCTANT "BOSS"

(By Paul F. Healy)

Senate Majority Leader MIKE MANSFIELD may well be unique in this respect: In Washington, D.C., where men pursue power the way other men pursue money, he is inclined to run from it.

The fact that the Montana Democrat has proved to be a highly effective leader during his first year on the job is an anomaly. Every leader of the Senate has his own style, but MANSFIELD is a startling departure from all previous patterns. He is a calm pipe-smoker, introverted, independent, dispassionate, philosophical, scholarly, reflective, and lacking in ego. He is not dynamic.

For MANSFIELD, being a Senator and a Member of the august Foreign Relations Committee is a rich enough life. He is one Senator who is believed by Washington correspondents when he says he has no desire to be President. He did not even yearn to run the Senate. It was the extremely rare case of the office seeking the man.

It all started like this: before the session opening in January 1957, then Senate Majority Leader LYNDON JOHNSON was casting about to find someone to fill the vacant post of Democratic "whip," or assistant leader. JOHNSON wanted a western Senator who was trusted, able, hard working, and moderately liberal. MANSFIELD measured up perfectly—except that he said he wasn't interested.

JOHNSON sought the aid of a political associate of MANSFIELD who was outside the Senate. This man went to MANSFIELD and urged him to reconsider his rejection of the post.

"I don't like it, I don't want it, and I won't take it," MANSFIELD told the emissary. The friend reported back to JOHNSON. They decided to make another try, with reinforcements. JOHNSON enlisted the aid of several influential Senators, and together they finally persuaded the Montanan to do his duty to the Democratic Party. For the next 4 years, JOHNSON and his quiet deputy made a harmonious and highly successful team in running the Senate.

Then, a few days after the election in November 1960, President-elect Kennedy telephoned MANSFIELD to say he was looking forward to seeing him succeed JOHNSON when the latter moved up to the Vice Presidency. MANSFIELD replied that he didn't think he should take the post. He was privately worried that if the first Catholic President was flanked by a Catholic Senate leader as well as a Catholic House leader (Representative JOHN MCCORMACK, of Massachusetts), it might stir up the professional anti-Catholics.

"You've got to take it, MIKE," the President-elect told him. "We need you."

MANSFIELD thereupon agreed to stand for the leadership post, and he was unanimously elected by his colleagues in January. In resisting the opportunity, he had not been shirking a responsibility or ducking a challenge. MANSFIELD does not scare easily. Indeed, it might be impossible to scare a man who survived the tough school of politics in Butte, Mont., mucked in the Butte copper mines, and served as an enlisted man in the Army, Navy, and Marine Corps (no other Member of Congress is a veteran of these three military branches).

MANSFIELD also has been a college professor, but there is nothing, aside from his ever-present pipe, to suggest an academic type. At 58, he carries a solid 175 pounds on his spare-looking, 5-foot-11-inch physique. His skin is white and his hair jet black above a high forehead. His face has the kind of bony plainness and strength which has been identified with American pioneer stock. As a speaker, he is without emotion or flamboyance.

Nonetheless, it was felt that the Senate Democrats would badly miss JOHNSON, whom many observers—including MANSFIELD—have called the most effective Senate majority leader in history. At the helm, JOHNSON had used every trick in the book—and some new ones—to coax, cajole, wheedle, and drive his troops into following his banner.

MANSFIELD has an instinctive distaste for backstage wheeling and dealing. Yet in its first exposure in the Senate, the bold Kennedy program in 1961 made progress at a pace that was steadier and faster than was generally anticipated. There were even signs that the old Southern Democrat-Republican coalition against liberal bills was broken. How has this been accomplished by MANSFIELD and his whip, Senator HUBERT HUMPHREY?

First, there was no twisting of arms, jabbing at chests, and whispering in ears a la JOHNSON. The new leader did not even ask Senators individually to swing their votes to him.

"They're sent here to do their own thinking," MANSFIELD explains, "and I hope by logic and understanding they'll do the right thing. I don't believe in arm twisting and high pressuring. The leader should not lay down by command or ukase what the Senators should do. Collectively, they are the ones who decide. There is no difference between Senators—all are on the same level. I am one among my peers."

He believes his job is "to get bills out of committee, secure some degree of cooperation in our party, and give consideration to difficult problems that confront Senators individually. All have been tolerant of me and cooperative, Republicans as well as Democrats. I've been pretty lucky."

Consideration is the key to MANSFIELD's character and effectiveness. Says one Senator: "He has much influence because he is completely considerate. He goes out of his way to make life more worth living in the Senate. Where JOHNSON loved to see the Senate in session, even late at night, MANSFIELD schedules sessions only when necessary, and he gets you home in time for dinner."

It is said that MANSFIELD gives a "quid" without demanding a "quo." Take the day last May when Comdr. Alan B. Shepard, Jr., the astronaut, was welcomed at the White House with all possible fanfare. MANSFIELD learned that the veteran Senator STYLES BRIDGES from Shepard's home State of New Hampshire had been invited to the ceremony but that BRIDGES' New Hampshire Republican colleague, NORRIS COTTON, had not. MANSFIELD was disturbed, because he knew COTTON will face a possibly difficult primary fight when he comes up for reelection in 1962.

MANSFIELD telephoned the White House and got COTTON an invitation. COTTON ended up sitting in the front row of VIP's and being photographed with Shepard, for the edification of hometown TV viewers and newspaper readers. Afterward, COTTON went to MANSFIELD and shook his hand. "Thank you, MIKE, I appreciate that," he said. Later that afternoon COTTON voted with MANSFIELD on an ambassadorial nomination which his own Republican leadership opposed.

MANSFIELD has a mental toughness which is not visible to the naked eye. In this sense, he is "a deceptive fellow," according to James Rowe, a Washington lawyer and onetime administrative assistant to President Franklin Roosevelt.

"I expect a certain toughness at first if I cross JOHNSON," explains Rowe, who is an intimate of both men. "But I would never take MANSFIELD on. This is a much tougher man. He can't have his mind changed, especially if he feels he is being pressured or pushed."

MANSFIELD is the son of Irish immigrants, Patrick and Josephine O'Brien Mansfield, who arrived in New York City in 1896. He was born in Greenwich Village on the day before St. Patrick's Day in 1903. His mother died when he was 6 and his father, a porter in a hotel, packed him and his two sisters off to two uncles in Great Falls, Mont. At 14, Michael Joseph—who officially has always called himself Mike—ran away and joined the Navy. He claimed he was 17 and forged his father's name to the application blank. The boy wanted to see the world—or at least the war—but the closest he got to either was seven peaceful crossings of the Atlantic in a cruiser.

Released in 1919, he next tried the Army, hoping for occupation duty in Germany. Instead, he became an orderly in the medical corps at Fort McDowell, near San Francisco. Mustered out in 1920, MANSFIELD walked around the corner in San Francisco and signed up for a 2-year hitch in the marines. This time he "hit the jackpot," as he puts it, by rising to private first-class and enjoying duty in the Philippines, China, and other Far Eastern places. It led to a lifelong preoccupation with developments in Asia.

MANSFIELD returned to Montana in 1922 and got the only job he could find—as a "mucker" far below the ground in the famed copper mines of Butte. It was grimy, grueling labor, and he saw men all around him dying of dust in their lungs. And he wanted most of all to have an education.

Though he lacked 15 high school credits, young MANSFIELD talked Montana State University into an arrangement whereby he could enroll; he was allowed to take his college courses while simultaneously proceeding through Butte High School. The result was that he was awarded his secondary diploma only 3 months before he got his bachelor of arts in 1933—at 30 years old. He had already married his high school teacher, pretty Maureen Hayes, a Butte girl and a graduate of St. Mary's College of Notre Dame.

In 1934 MANSFIELD earned a master of arts in political science and left the mines—where he had risen to assistant engineer—for good. For the next 9 years, he taught Latin American and Far Eastern history at Montana State. Then the inevitable happened: in Irish Catholic, politically conscious Butte, the popular professor was drawn into politics. In 1942 he was elected to Congress on the Democratic ticket. He has not known defeat since. In 1952 he was elected to the Senate and in 1958 he was reelected, polling a fantastic 76.2 percent of the total vote.

When he took his seat in the House, MANSFIELD's background as a Far Eastern history teacher won him an immediate appointment to the Foreign Affairs Committee. In the winter of 1944–45, he journeyed through the interior of China on a confidential mission for President Roosevelt. MANSFIELD's report on the "overall picture" of the confused developments there won him respect in high places and launched his reputation as an authority on the Orient.

MANSFIELD has visited 30 countries in the course of 18 trips to Asia, Europe, Africa, and South America. In so doing, he has the satisfaction of having had no less than five private audiences with Pope Pius XII.

But he dislikes traveling on a fixed schedule, or with a committee, and he hates being wined or dined. When he arrives in a foreign city, his technique is to let the Embassy know—and then disappear. He first seeks out a local American newspaperman and takes him to dinner to pick his brain. Then he roams the city, talking to people at random with the help of one interpreter. In a hot country, MANSFIELD is usually coatless, with sleeves rolled up.

MANSFIELD's assignment to the Foreign Relations Committee immediately upon entering the Senate in 1953 raised some eyebrows. For an incoming freshman to be awarded the choicest of all committee posts was an unprecedented honor. Soon, to the distress of some of his fellow committee members, MANSFIELD increasingly began to urge some tapering-off of the foreign aid program. It seemed to him that any government which took Uncle Sam's loans and grants should use every nickel of it for the good of its people.

"MIKE is continually offended by the morality of the foreign aid program," one puzzled liberal has complained. "It does no good to tell him that that's the morality of those people, and that there's nothing we can do about it."

In his continuing criticism of the aid program, MANSFIELD also argues that the United States could do "a great deal more with a great deal less" (money) if it eliminated the waste, overlapping, and inefficiency of the agencies administering it.

In his year as leader, MANSFIELD otherwise has shown his streak of independence by breaking with the Kennedy administration on its German policy. In a surprise speech in the Senate in late June, he proposed that there might be a "third way" to solve the deadlock between the United States and the Soviet Union. That would be to guarantee Berlin as a free city.

MANSFIELD made it clear he thought we should never be pushed or bullied on Berlin, but nonetheless he was promptly castigated by commentators, columnists, and letter-writers who hinted that he might be an appeaser. The furor only gave MANSFIELD satisfaction. His main purpose had been to stir up a national debate on the situation, and he had a good one going in the Senate for several days. His concern was that if the United States and the Russians remained frozen in their positions on Berlin, it would inevitably lead to war. Privately, he said: "All I want is for people to think when there is still time to think—not when it's too late. We must not doom ourselves to equating all change with defeat or retreat. Unless we are willing to change, we shall find ourselves in pursuit of the last car of a train that is always pulling away from us."

Though MANSFIELD made it clear the White House and State Department had no advance knowledge of his speech, his critics insisted that as majority leader his words would be interpreted abroad as either a trial balloon or a sign of disunity.

This loss of independence vexes MANSFIELD.

"My role is to represent the Senate to the President, and the President to the Senate," he points out. "I'm the Senate's agent primarily. It's kind of a spot and one of the reasons I didn't want the job."

As leader, MANSFIELD also was torn by his feelings on the controversial question of federal aid to schools. He believes that parochial schools "need help and deserve it because they make a great contribution to the security and welfare of the country." In 1960, he had voted for an amendment to give such aid, but it had failed. When, in 1961, the Kennedy administration sent to Congress a proposal to aid public schools only, his first impulse was to support a drive to add a parochial-private-school amendment to the bill.

But, after sounding out the sentiment of his colleagues, MANSFIELD decided to go along with administration's desire to have the two issues considered separately. He felt that the non-public-school amendment would stand a better chance of passage if it were taken up in connection with the extension of the National Defense Education Act—in which there already was a precedent for aiding Catholic education.

MANSFIELD regards solitude as a synonym for relaxation. His only recreation is knocking a golf ball around a course for an hour—alone—and listening to his hi-fi recordings of such piano artists as "Knuckles" O'Toole. His great pride and joy is his daughter, Anne, who graduated Phi Beta Kappa from Smith College in 1959.

LYNDON JOHNSON once said in the Senate that if he and Mrs. Johnson had had a son, "we would like to have had him become the kind of man MIKE MANSFIELD is." One story best illustrates the quality which has made MANSFIELD perhaps the best-liked Member of the Senate.

During his 1958 campaign for reelection, a well-intentioned admirer, one Jimmy Sullivan, insisted on stumping eastern Montana for MANSFIELD. Sullivan was militantly Irish, and eastern Montana is noted for being militantly non-Irish. The Senator's campaign lieutenants repeatedly pleaded: "For God's sake, MIKE, keep him out of there. He's killing us with that brogue."

MANSFIELD said nothing. Finally, he told his campaign manager: "When I came back from the Marines and had nowhere to go, Jimmy Sullivan was running a rooming house in Butte. He fed and clothed me for months. Now, if you think this Senate job is worth hurting Jimmy's feelings, you're crazy."

Mr. MANSFIELD. Mr. President, I wish to thank the distinguished minority leader for his unfailing courtesy, kindness, and consideration, and to say to him that I think I am extremely fortunate to have as a partner across the aisle in this body a man of the integrity, the understanding, and the tolerance of the distinguished minority leader, the Senator from Illinois.

REGULATION OF FARES FOR TRANSPORTATION OF SCHOOLCHILDREN IN THE DISTRICT OF COLUMBIA—MOTION FOR RECONSIDERATION

Mr. WILLIAMS of Delaware. Mr. President, on Friday, on the call of the calendar, the Senate passed S. 1745, the purpose of which was to provide a subsidy for the D.C. Transit System. I desire to file a motion to reconsider the bill. I understand the first procedure is to move that the Senate ask the House to return the bill to the Senate.

I enter a motion to reconsider S. 1745, and ask that the bill be returned to the Senate.

The VICE PRESIDENT. The motion to reconsider will be entered. It is now in order to move that the House be requested to return the bill to the Senate.

Mr. WILLIAMS of Delaware. I so move.

The VICE PRESIDENT. The Senator from Delaware moves that the House be requested to return the bill to the Senate.

The question is on agreeing to the motion.

The motion was agreed to.

Mr. MANSFIELD. Mr. President, is there further morning business?

The VICE PRESIDENT. Is there further morning business? If not, morning business is closed.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate go into executive session to consider the two treaties on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to consider executive business.

A TREATY OF FRIENDSHIP, ESTABLISHMENT, AND NAVIGATION BETWEEN THE UNITED STATES OF AMERICA AND THE UNITED KINGDOM OF BELGIUM—TREATY OF AMITY AND ECONOMIC RELATIONS BETWEEN THE UNITED STATES OF AMERICA AND THE REPUBLIC OF VIETNAM

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate, as in Committee of the Whole, proceed to the consideration of Executive J, a Treaty of Friendship, Establishment, and Navigation Between the United States of America and the United Kingdom of Belgium, Together With a Related Protocol; and Executive L, a Treaty of Amity and Economic Relations Between the United States of America and the Republic of Vietnam.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded

to consider the following conventions, which were, respectively, read the second time, as follows:

EXECUTIVE J, 87TH CONGRESS, 1ST SESSION—TREATY OF FRIENDSHIP, ESTABLISHMENT AND NAVIGATION BETWEEN THE UNITED STATES OF AMERICA AND THE KINGDOM OF BELGIUM

The President of the United States of America, and

His Majesty the King of the Belgians,

Desirous of strengthening the bonds of peace and friendship traditionally existing between their two countries and of encouraging closer economic and cultural relations between the two peoples,

Being cognizant of the contributions which may be made toward these ends by arrangements specifying mutually accorded rights and privileges and promoting mutually advantageous commercial intercourse and investments,

Have resolved to conclude a Treaty of Friendship, Establishment and Navigation, and for that purpose have appointed as their plenipotentiaries,

The President of the United States of America:

His Excellency Mr. William A. M. Burden, Ambassador Extraordinary and Plenipotentiary of the United States of America in Brussels;

His Majesty the King of the Belgians:

His Excellency Mr. Pierre Wigny, Minister for Foreign Affairs;

Who, having communicated to each other their full powers found to be in good and due form, have agreed as follows:

ARTICLE 1

Each Contracting Party shall at all times accord equitable treatment and effective protection to the persons, property, enterprises, rights and interests of nationals and companies of the other Party.

ARTICLE 2

1. Nationals of either Contracting Party shall, subject to the laws relating to the entry, sojourn and establishment of aliens, be permitted to enter the territories of the other Party, to travel therein freely, to reside and establish themselves at places of their choice. Nationals of either Party shall in particular be permitted to enter the territories of the other Party and reside therein:

(a) for the purpose of carrying on trade between the two countries and engaging in related commercial activities; or

(b) for the purpose of developing and directing the operations of an enterprise in which they have invested, or are actively in the process of investing, a substantial amount of capital.

2. Nationals of either Party and nationals of third countries en route to or from the territories of such Party shall, subject to the reservation in paragraph 1 of the present Article, be accorded freedom of transit for themselves and their baggage through the territories of the other Party by the routes most convenient for international transit. In particular, they shall be free from requirements that entail unnecessary delays and impediments. They shall be subject, however, to regulations with respect to their baggage that are applicable to aliens generally in order to prevent abuse of the transit privilege.

3. Nationals of either Party, within the territories of the other Party, shall enjoy freedom of conscience; and they shall be at liberty to hold religious services, both public and private, at suitable places of their choice.

4. Nationals of either Party shall be permitted, within the territories of the other Party, to gather information material for dissemination to the public abroad, and shall enjoy freedom of transmission of such material to be used for publication by the press, radio, television, motion pictures and other means; and they shall be permitted to communicate freely with other persons inside and outside such territories by mail, telegraph and other means open to general public use.

5. The provisions of the present Article shall be subject to the right of either Party to apply measures that are necessary to maintain public order and protect the public health, morals and safety.

ARTICLE 3

1. Nationals of either Contracting Party within the territories of the other Party shall be accorded full legal and judicial protection for their persons, rights and interests. Such nationals shall be free from molestation and shall receive constant protection in no case less than that required by international law.

2. To this end they shall in particular have right of access, on the same basis and on the same conditions as nationals of such other Party, to the courts of justice and administrative tribunals and agencies in all degrees of jurisdiction and shall have right to the services of competent persons of their choice.

3. The provisions of paragraphs 1 and 2 of the present Article shall extend and apply in the same manner to companies. It is understood, moreover, that the right of such access shall be enjoyed without any requirement of registration or domestication:

(a) in the case of Belgian companies not engaged in activities in the territories of the United States of America; and

(b) in the case of United States companies not established in the territories of the Kingdom of Belgium.

4. If a national of either Party is taken into custody within the territories of the other Party, the nearest consular representative of his country shall on the demand of such national be immediately notified and shall have the right to visit and communicate with such national without arbitrary delay. Such national shall:

(a) receive reasonable and human treatment in no case less than that required by international law;

(b) be formally and immediately informed of the charges against him; and

(c) be brought to trial as rapidly as is consistent with the proper preparation of his defense, for which he shall enjoy all reasonable means, including the services of competent counsel.

5. The dwellings, offices, warehouses, factories and other premises of nationals and companies of either Party located within the territories of the other Party shall not be subject to searches or measures other than those permitted by law and in execution of law. Official searches and examinations of such premises and their contents, when necessary, shall be made according to law and with careful regard for the convenience of the occupants and the conduct of business.

6. Contracts entered into between nationals and companies of either Party and nationals and companies of the other Party, that provide for the settlement by arbitration of controversies, shall not be deemed unenforceable within the territories of such other Party merely on the grounds that the place designated for the arbitration proceedings is outside such territories or that the nationality of one or more of the arbitrators is not that of such other Party. No award duly rendered pursuant to any such contract and final and enforceable under the laws of the place where rendered, shall be deemed invalid and denied effective means of enforcement by the authorities of either Party merely on the grounds that the place where such award was rendered is outside the territories of such Party or that the nationality of one or more of the arbitrators is not that of such Party.

ARTICLE 4

1. Property that nationals and companies of either Contracting Party own within the territories of the other Party shall enjoy constant security therein through full legal and judicial protection.

2. Neither Party shall take unreasonable or discriminatory measures that would impair the acquired rights and interests within its territories of nationals and companies of the other Party in the enterprises which they have established, in their capital, or in the skills, arts or technology which they have supplied.

3. Nationals and companies of either Party shall not be expropriated of their property within the territories of the other Party except for public benefit and with the prompt payment of just compensation. Such compensation shall be in an effectively realizable form and shall represent the full equivalent of the property taken. Furthermore, adequate provision shall have been made not later than the time of taking for the determination and payment thereof.

4. Nationals and companies of either Party shall in no case be accorded, within the territories of the other Party, less than national treatment with respect to the matters set forth in paragraph 3 of the present Article and in paragraph 5 of Article 3. Moreover, enterprises in which nationals and companies of either Party have a substantial interest shall be accorded, within the territories of the other Party, not less than national treatment in all matters relating to the taking of privately owned enterprises into public ownership and to the placing of such enterprises under public control.

ARTICLE 5

1. Nationals and companies of either Contracting Party shall be accorded, within the territories of the other Party, national treatment with respect to obtaining and maintaining patents of invention, and with respect to rights in trade marks, trade names, trade labels and industrial property of all kinds.

2. The Parties deem that it is highly desirable to further, through cooperative and other appropriate means, the interchange and use of scientific and technical knowledge, particularly in the interest of increasing productivity and improving standards of living within their respective territories.

ARTICLE 6

1. Nationals of either Contracting Party shall be permitted, within the territories of the other Party, to organize companies for gain upon the same conditions as nationals of such other Party. Nationals and companies of either Party shall be permitted to maintain subsidiaries, branches, agencies and offices within the territories of the other Party upon conditions no less favorable than those accorded nationals of such other Party.

2. Nationals and companies of either Party shall be accorded national treatment with respect to engaging in all types of commercial, industrial, financial and other activities for gain within the territories of the other Party. The provisions of the preceding sentence shall apply in the case of nationals to activities in an independent or dependent capacity.

3. Companies constituted under the applicable laws and regulations within the territories of either Party shall be deemed companies thereof and shall have their juridical status recognized within the territories of the other Party, provided that nothing in their charter or corporate purposes is contrary to the public policy of such other Party.

4. In the case of enterprises situated within the territories of either Party and controlled by nationals and companies of the other Party, such enterprises, whether in

the form of individual proprietorships, companies or otherwise, shall in all that relates to the conduct of the activities thereof be accorded treatment no less favorable than that accorded like enterprises controlled by nationals or companies of the country.

5. Each Party reserves the right to determine the extent to which aliens may establish, acquire interests in, or carry on enterprises engaged within its territories in communications, air or water transport, banking involving fiduciary or depository functions, or the exploitation of land or other natural resources. However, new limitations imposed by either Party on the extent to which aliens are accorded national treatment, with respect to carrying on such activities within its territories, shall not be applied as against enterprises which are regularly engaged in such activities therein at the time such new limitations are adopted and which are owned or controlled by nationals and companies of the other Party. Moreover, neither Party shall deny to transportation, communications and banking enterprises of the other Party the right to maintain branches and agencies to perform functions necessary for essentially international operations in which they are permitted to engage.

6. The provisions of the present Article shall not prevent either Party from prescribing special formalities in connections with the establishment of companies or enterprises within its territories which are managed or controlled by aliens; but such formalities may not impair the substance of the rights set forth in paragraphs 1, 2 and 4 of the present Article.

7. Nationals and companies of either Party shall be accorded national treatment with respect to engaging in scientific, educational, religious and philanthropic activities within the territories of the other Party. They shall be accorded the right to form associations, including non-profit associations, under the laws of such other Party for the purpose of engaging in the aforesaid activities. Nothing in the present Treaty shall be deemed to grant or to imply any right to engage in political activities.

ARTICLE 7

1. The Contracting Parties recognize that it is desirable for conditions of competitive equality to be maintained in situations in which publicly owned or controlled trading or manufacturing enterprises are in competition within the territories of either Party with privately owned and controlled enterprises of nationals or companies of the other Party.

2. Accordingly, such state-owned enterprises should not be given special economic privileges which could injure the competitive position of such private enterprises. However, this principle shall not be construed to prevent either Party from making such special concessions in aid of state-owned enterprises as it deems necessary during periods of economic crisis, especially to relieve unemployment. This principle, moreover, is without prejudice to special advantages given in connection with:

(a) manufacturing goods for government use, or supplying goods and services to the Government for Government use, or

(b) supplying, at prices substantially below competitive prices, the needs of particular population groups for essential goods and services not otherwise practically obtainable by such groups.

ARTICLE 8

1. Nationals and companies of either Contracting Party shall be permitted to engage, within the territories of the other Party the services of accountants and technical experts of all kinds, executive personnel, attorneys, agents and other specialists of their choice.

2. National and companies of either Party shall be permitted to engage the services of accountants and other technical experts regardless of the extent to which they may have qualified for the practice of a profession within the territories of the other Party, for the sole purpose of making examinations, audits and technical investigations and rendering reports in the private interest of such nationals and companies in connection with the planning and operation of their enterprises, and enterprises in which they have a finanical interest, within such territories.

ARTICLE 9

1. Nationals of either Contracting Party residing within the territories of the other Party, and nationals and companies of either Party engaged in trade or other gainful pursuit or in scientific, educational, religious or philanthropic activities within the territories of the other Party, shall not be subject to the payment of taxes, fees, or charges imposed upon or applied to income, capital, transactions, activities or any other object, or to requirements with respect to the levy and collection thereof, within the territories of such other Party, more burdensome than those borne by nationals and companies of such other Party in like situation.

2. With respect to nationals of either Party who are neither resident nor engaged in trade or other gainful pursuit within the territories of the other Party, and with respect to companies of either Party which are not engaged in trade or other gainful pursuit within the territories of the other Party, it shall be the aim of such other Party to apply in general the principle set forth in paragraph 1 of the present Article.

3. Nationals and companies of either Party covered by paragraph 2 of the present Article, shall not be subject, within the territories of the other Party, to the payment of taxes, fees or charges imposed upon or applied to income, capital, transactions, activities or any other object, or to requirements with repect to the levy and collection thereof, more burdensome than those borne by nationals and companies of any third country.

4. In the case of companies of either Party engaged in trade or other gainful pursuit within the territories of the other Party, and in case of nationals of either Party engaged in trade or other gainful pursuit within the territories of the other Party but not resident therein, such other Party shall not impose or apply any tax, fee or charge upon any income, capital or other basis in excess of that reasonably allocable or apportionable to its territories, nor grant deductions and exemptions less than those reasonably allocable or apportionable to its territories. A comparable rule shall apply also in the case of companies organized and operated exclusively for scientific, educational, religious or philanthropic purposes.

5. The provisions of the present Article shall not obligate either Party to extend to nationals and companies of the other Party tax advantages accorded to nationals and companies of any third country on the basis of reciprocity or by virtue of agreements for the avoidance of double taxation. Furthermore, each Party reserves the right to apply special provisions in extending advantages to its nationals and residents in connection with joint tax returns by husband and wife and in allowing to residents of contiguous countries exemptions of a personal nature in connection with income and inheritance taxes.

ARTICLE 10

1. Nationals and companies of either Contracting Party shall be accorded by the other Party the same treatment as nationals and companies of such other Party with respect to payments, remittances and transfers of funds or financial instruments between the territories of the two Parties as well as between the territories of such other Party and of any third country. This treatment shall be not less favorable than that accorded to nationals and companies of any third country in like situations.

2. Neither Party shall impose exchange restrictions as defined in paragraph 5 of the present Article except to the extent necessary to maintain or restore adequacy to its monetary reserves, particularly in relation to its external commercial and financial requirements. It is understood that the provisions of the present Article do not alter the obligations either Party may have to the International Monetary Fund or preclude imposition by either Party of particular restrictions whenever the Fund specifically so authorizes or requests.

3. If either Party imposes exchange restrictions in accordance with paragraph 2 of the present Article, it shall not fail, after making whatever provision may be necessary to assure the availability of foreign exchange for essential goods and services, to make provision to the fullest extent practicable in light of the level of the monetary reserves and its balance-of-payments, for the withdrawal in the currency of the other Party, of: (a) the compensation referred to in Article 4, paragraph 3(b) earnings, whether in the form of salaries, interest, dividends, commissions, royalties, payments for technical services, or otherwise, (c) amounts for amortization of loans, depreciation of direct investments, and, to the extent feasible, capital transfers, giving consideration to special needs for other transactions. If more than one rate of exchange is in force, the rate applicable to such withdrawal shall be a rate which is specifically approved by the International Monetary Fund for such transactions or, in the absence of a rate so approved an effective rate which, inclusive of any taxes or surcharges on exchange transfers, is just and reasonable.

4. Exchange restrictions shall not be imposed by either Party in a manner unnecessarily detrimental or arbitrarily discriminatory to the claims, investments, transport, trade and other interests of the nationals and companies of the other Party, nor to the competitive position thereof.

5. The term "exchange restrictions" as used in the present Article includes all restrictions, regulations, charges, taxes, or other requirements imposed by either Party which burden or interfere with payments, remittances, or transfers of funds or financial instruments between the territories of the two Parties.

6. Questions arising under the present Treaty concerning exchange restrictions affecting aliens are governed by the provisions of the present Article.

ARTICLE 11

Commercial travelers representing nationals and companies of either Contracting Party engaged in business within the territories thereof shall be accorded within the territories of the other Party treatment no less favorable than that accorded to commercial travelers representing nationals and companies of such other Party with respect to the exercise of their functions.

ARTICLE 12

1. Between the territories of the two Contracting Parties there shall be, in accordance with the provisions of the present Treaty, freedom of navigation.

2. Vessels under the flag of either Party, and carrying the papers required by its laws in proof of nationality, shall be deemed to be vessels of that Party, both on the high seas and within the ports, places and waters of the other Party.

3. The term "vessels" as used in the present Treaty, means all types of vessels, whether privately owned or operated, or publicly owned or operated, but this term does not include vessels of war.

ARTICLE 13

1. Vessels of either Contracting Party shall have liberty, on equal terms with vessels of the other Party and on equal terms with vessels of any third country, to come with their cargoes to all ports, places and waters of such other Party open to foreign commerce and navigation. Such vessels and cargoes shall in the ports, places and waters of such other Party be accorded in all respects national treatment and most-favored-nation treatment.

2. Vessels of either Party en route to or from the territories of the other Party shall be accorded national treatment and most-favored-nation treatment with respect to the right to carry all cargo that may be carried by vessel.

3. Goods carried by vessels under the flag of either Party to or from the territories of the other Party shall enjoy the same favors as when transported in vessels sailing under the flag of such other Party. This applies especially with regard to customs duties and all other fees and charges, to bounties, drawbacks and other privileges of this nature, as well as to the administration of the customs and to transport to and from port by rail and other means of transportation.

4. The coasting trade and inland navigation are excepted from the provisions of the present Article. However, the vessels of each Party shall be accorded by the other Party most-favored-nation treatment with respect to the coasting trade and inland navigation. Moreover, it is understood that vessels of either Party shall be permitted to discharge portions of cargoes at any ports, places or waters of the other Party open to foreign commerce and navigation, and to proceed with the remaining portions of such cargoes to any other such ports, places or waters and they shall be permitted to load in like manner in the same voyage outward, at the various ports, places and waters open to foreign commerce and navigation; but a right to engage in the coasting trade or inland navigation may not thereby be claimed.

5. Neither Party shall impose any measure of a discriminatory nature that hinders or prevents the importer or exporter of products of either country from obtaining marine insurance on such products in companies of either Party.

ARTICLE 14

If a vessel of either Contracting Party runs aground or is wrecked on the coasts of the other Party, or if it is in distress and must put into a port of the other Party, the latter Party shall extend to the vessel as well as to the crew, the passengers, the personal property of crew and passengers, and to the cargo of the vessel, the same protection and assistance as would have been extended to a vessel under its own flag in like circumstances; and shall permit the vessel after repairs to proceed with its voyage upon conformity with the laws applicable alike to vessels under its own flag. Articles salvaged from the vessel shall be exempt from all customs duties unless they pass into internal consumption; but articles not entered for consumption may be subject to measures for the protection of the revenue pending their exit from the country.

ARTICLE 15

1. In all ports of either Contracting Party the masters of vessels under the flag of the other Party, whose crews have ceased to be fully constituted on account of illness or for any other cause, shall be permitted to engage such seamen as may be necessary for the continuation of the voyage.

2. Nationals of either Party who are seamen may be sent to ports of the other Party to join national vessels, in care of consular officers, either individually or in groups on the basis of seamen's papers issued in lieu of passports. Likewise, nationals of either Party shall be permitted to travel through the territory of the other Party on their way to join vessels or to be repatriated on the basis of seamen's papers used in lieu of passports.

ARTICLE 16

The present Treaty shall not preclude the application by either Contracting Party of measures:

(a) regulating the importation or exportation of gold or silver;

(b) relative to its national fisheries and to the products thereof;

(c) relating to fissionable materials, to radioactive byproducts of the utilization or processing thereof, or to materials that are the source of fissionable materials;

(d) regulating the production of or traffic in arms, ammunition and implements of war, or traffic in other materials carried on directly or indirectly for the purpose of supplying a military establishment;

(e) necessary to fulfill the obligations of a Party for the maintenance or restoration of international peace and security, or necessary to protect its essential security interests;

(f) for the protection of national treasures having an artistic, historical or archeological value; or

(g) denying to any company in the ownership or direction of which nationals of any third country or countries have directly or indirectly the controlling interest, the advantages of the present Treaty, except with respect to recognition of juridical status and with respect to access to courts.

ARTICLE 17

1. The term "national treatment" means treatment accorded within the territories of a Contracting Party upon terms no less favorable than the treatment accorded therein, in like situations, to nationals, companies, products, vessels or other objects, as the case may be, of such Party.

2. The term "most-favored-nation treatment" means treatment accorded within the territories of a Party upon terms no less favorable than the treatment accorded therein, in like situations, to nationals, companies, products, vessels or other objects, as the case may be, of any third country.

3. As used in the present Treaty, the term "companies" means corporations, partnerships, companies and other associations, whether or not with juridical status, whether or not with limited liability and whether or not for pecuniary profit.

4. National treatment accorded under the provisions of the present Treaty to companies of the Kingdom of Belgium shall, in any State or possession of the United States of America, be the treatment accorded therein to companies created or organized in other States and possessions of the United States of America.

ARTICLE 18

1. The territories to which the present Treaty extends shall comprise all areas of land and water under the sovereignty or authority of each Contracting Party, other than the Trust Territory of Ruanda-Urundi in the case of the Kingdom of Belgium, and the Panama Canal Zone and the Trust Territory of the Pacific Islands in the case of the United States of America.

2. It is understood that the present Treaty does not apply to territories under the authority of either Party solely as a military base or by reason of temporary military occupation.

ARTICLE 19

1. Each Contracting Party shall accord sympathetic consideration to, and shall afford adequate opportunity for consultation regarding, such representations as the other Party may make with respect to any matter affecting the operation of the present Treaty.

2. Any dispute between the Parties as to the interpretation or application of the present Treaty, not satisfactorily adjusted by diplomacy, shall be submitted to the International Court of Justice, unless the Parties agree to settlement by some other pacific means.

ARTICLE 20

The present Treaty shall terminate the Treaty of Commerce and Navigation signed at Washington March 8, 1875, and the Convention concerning Trade Marks signed at Washington April 7, 1884.

ARTICLE 21

1. The present Treaty shall be ratified, and the ratifications thereof shall be exchanged at Washington as soon as possible.

2. The present Treaty shall enter into force one month after the day of exchange of the instruments of ratification.

3. The present Treaty shall remain in force for ten years and shall continue in force thereafter until terminated as provided herein.

4. Either Contracting Party may, by giving one year's written notice to the other Party, terminate the present Treaty at the end of the initial ten-year period or at any time thereafter.

In witness whereof the respective Plenipotentiaries have signed the present Treaty and have affixed hereunto their seals.

Done at Brussels, this 21st day of February one thousand nine hundred sixty one, in duplicate, in the French and English languages, both equally authentic.

For the United States of America:

WILLIAM A. M. BURDEN.

For the Kingdom of Belgium:

P. WIGNY.

PROTOCOL

At the time of signing the Treaty of Friendship, Establishment and Navigation between the United States of America and the Kingdom of Belgium the undersigned Plenipotentiaries, duly authorized, have further agreed on the following provisions, which shall be considered integral parts of the aforesaid Treaty:

1. The provisions of Article 2, paragraph 1, b), of the Treaty shall be construed as extending to persons who represent nationals and companies of the same nationality which have invested or are actively in the process of investing a substantial amount of capital in an enterprise in the territories of the other Party, and who are employed by such nationals and companies in a responsible capacity.

2. With reference to the provisions of Article 3, paragraph 2, each Party agrees that, within its territories, the nationals of the other Party shall be entitled to free legal aid on the same conditions as its own nationals.

3. With reference to Article 3, paragraphs 2 and 3, nationals of either Party having their permanent residence within the territories of the other Party and companies of either Party having their establishment, main or branch, within the territories of the other Party who appear as plaintiff or intervening party before the courts of such other Party shall be exempt from obligation to pose security for costs in such instances as nationals and companies of such other Party would be exempt.

4. The provisions of Article 4, paragraph 3, providing for the payment of compensation shall extend to interests held directly or indirectly by nationals and companies of either Party in property which is taken within the territories of the other Party.

5. The provisions of the present Treaty do not confer rights to engage in gainful activities except with the authorization to that effect required by the applicable laws and regulations. The two Parties are agreed, however, to entertain in a most considerate manner applications for authorization to engage in activities pursuant to the Treaty.

6. The provisions of Article 6, paragraph 2, do not extend to professions which, because they involve the performance of functions in a public capacity or in the interests of public health and safety, are state-licensed and reserved by law to nationals of the country.

7. The provisions of Article 6, paragraph 2, shall not extend to the activity of peddlers and itinerant artisans in the exercise of their occupations as such.

8. with reference to Article 6, paragraph 3, neither Party shall apply the term "public policy" so as to deny recognition to a company constituted under the laws of the other Party in any situation in which the former Party permits a company with like purposes to be constituted under its laws.

9. The benefit of the provisions of Article 6, paragraph 3, and of Article 9, paragraph 4, shall not be acquired within the territories of the Contracting Party whose law takes the main establishment into consideration for the recognition of companies, if such establishment is deemed to be within its territory.

10. The provisions of Article 6, paragraphs 2 and 7, shall not be construed to confer rights with respect to owning real property.

11. The treatment provided in Article 10, paragraph 1, is designed only to preclude discriminations on the ground of nationality but does not, for instance, preclude different treatment based upon residence requirements.

12. It is understood that the word "cargo" (or "cargoes") as used in Article 13 shall be deemed to comprehend passengers as well as goods.

13. The provisions of Article 13, paragraph 2, shall not apply to postal services.

In witness whereof the respective Plenipotentiaries have signed this Protocol and have affixed hereunto their seals.

Done at Brussels this 21st day of February one thousand nine hundred sixty one, in duplicate, in the French and English languages, both equally authentic.

EXECUTIVE L, 87TH CONGRESS, FIRST SESSION—TREATY OF AMITY AND ECONOMIC RELATIONS BETWEEN THE UNITED STATES OF AMERICA AND THE REPUBLIC OF VIETNAM

The United States of America and the Republic of Vietnam, desirous of promoting friendly relations between their peoples and of encouraging mutually beneficial trade and closer economic intercourse generally, have resolved to conclude a Treaty of Amity and Economic Relations, and have appointed as their Plenipotentiaries:

The President of the United States of America:

Mr. Elbridge Durbrow, Ambassador Extraordinary and Plenipotentiary of the United States of America at Saigon;

and

The President of the Republic of Vietnam:

Mr. Vu Van Mau, Secretary of State for Foreign Affairs;

Who, having communicated to each other their full powers found to be in due form, agree as follows:

ARTICLE I

1. Nationals of either Party shall, subject to the laws relating to the entry and sojourn of aliens, be permitted to enter the territories of the other Party, to travel therein freely, and to reside at places of their choice. Nationals of either Party shall in particular be permitted to enter the territories of the other Party and to remain therein for the purpose of: (a) carrying on trade between the territories of the two Parties and engaging in related commercial activities; or (b) developing and directing the operations of an enterprise in which they have invested or are actively in process of investing a substantial amount of capital. Each Party reserves the right to exclude or expel aliens on grounds relating to public order, morals, health and safety.

2. Nationals of either Party shall receive the most constant protection and security within the territories of the other Party, in no case less than that required by international law. When any such national is in custody, he shall in every respect receive reasonable and humane treatment; and, on his demand, the diplomatic or consular representative of his country shall be immediately notified and accorded full opportunity to safeguard his interests. He shall be promptly informed of the accusations against him, allowed ample facilities to defend himself, and given a prompt and impartial disposition of his case.

3. Nationals of either Party within the territories of the other Party shall, either individually or through associations, and so long as their activities are not contrary to public order, safety, or morals: (a) enjoy freedom of conscience and the right to hold religious services and engage in religious activities generally; (b) be permitted to engage in philanthropic, educational, and scientific activities; (c) have the right to gather and transmit information for dissemination to the public abroad; and (d) be permitted to communicate with other persons inside and outside such territories by mail, telegraph, or other means open to the general public.

ARTICLE II

1. Companies constituted under the applicable laws and regulations of either Party shall be deemed companies thereof and shall have their juridical status recognized within the territories of the other Party. As used in the present treaty, "companies" means:

(a) As concerns the United States of America, corporations, partnerships, companies, and other associations, whether or not with limited liability and whether or not for pecuniary profit.

(b) As concerns the Republic of Vietnam, sociétés de personnes, sociétés de capitaux, and, in general, other societies, associations, companies, foundations, legal entities or juridical persons, whether or not with limited liability and whether or not for pecuniary profit.

2. Nationals and companies of either Party shall have free access to the courts of justice and administrative agencies within the territories of the other Party, in all degrees of jurisdiction, both in defense and in pursuit of their rights. Such access shall be allowed upon terms no less favorable than those applicable to nationals and companies of such other Party or of any third country, including the terms applicable to requirements for deposit of security. It is understood that companies not engaged in activities within the country shall enjoy the right of such access without any requirement of registration or domestication.

3. Contracts entered into between nationals and companies of either Party and nationals and companies of the other Party, that provide for the settlement by arbitration of controversies, shall not be deemed unenforceable within the territories of such other Party merely on the grounds that the place designated for the arbitration proceedings is outside such territories or that the nationality of one or more of the arbitrators is not that of such other Party. No award duly rendered pursuant to any such contract, and final and enforceable under the laws of the place where rendered, shall be deemed invalid or denied effective means of enforcement within the territories of either Party merely on the grounds that the place where such award was rendered is outside such territories or that the nationality of one or more of the arbitrators is not that of such Party.

ARTICLE III

1. Nationals of either Party shall be accorded national treatment in the application of laws and regulations within the territories of the other Party that establish a pecuniary compensation or other benefit or service, on account of disease, injury or death arising out of and in the course of employment or due to the nature of employment.

2. In addition to the rights and privileges provided in paragraph 1 of the present Article, nationals of either Party within the territories of the other Party shall be accorded national treatment in the application of laws and regulations establishing compulsory systems of social security, under which benefits are paid without an individual test of financial need in the following cases: (a) sickness, including temporary disability for work, and maternity; (b) invalidity, or occupational disability; (c) death of father, spouse, or any other person liable for maintenance; (d) unemployment.

ARTICLE IV

1. Each Party shall at all times accord fair and equitable treatment to nationals and companies of the other Party, and to their property and enterprises; shall refrain from applying unreasonable or discriminatory measures that would impair their legally acquired rights and interests; and shall assure that their lawful contractual rights are afforded effective means of enforcement, in conformity with the applicable laws.

2. Property of nationals and companies of either Party, including direct or indirect interests in property, shall receive the most constant protection and security within the territories of the other Party. Such property shall not be taken except for a public purpose, nor shall it be taken without the payment of just compensation. Such compensation shall be in an effectively realizable form and without unnecessary delay, and shall represent the full equivalent of the property taken; and adequate provision shall have been made at or prior to the time of taking for the determination and payment thereof.

3. The dwellings, offices, warehouses, factories and other premises of nationals and companies of either Party located within the territories of the other Party shall not be subject to entry or molestation without just cause. Official searches and examinations of such premises and their contents shall be made only according to law and with careful regard for the convenience of the occupants and the conduct of business.

ARTICLE V

1. Enterprises which are or may hereafter be established or acquired by nationals and companies of either Party within the territories of the other Party and which are owned or controlled by such nationals and companies, whether in the form of individual proprietorships, direct branches or companies constituted under the laws of such other Party, shall be permitted freely to conduct their activities therein upon terms no less favorable than like enterprises owned or controlled by nationals and companies of such other Party or of any third country.

2. Nationals and companies of either Party shall enjoy the right to continued control and management of their enterprises within the territories of the other Party; shall be permitted to engage accountants and other technical experts, executive personnel, attorneys, agents and other specialized employees of their choice, regardless of nationality; and shall be permitted without discrimination to do all things normally found necessary and proper to the effective conduct of enterprises engaged in like activities.

3. Laws regarding qualifications for the practice of a profession shall not prevent nationals and companies of either Party from engaging accountants and other technical experts for making examinations, audits and technical investigations for internal purposes in connection with the planning and operation of their enterprises within the territories of the other Party.

ARTICLE VI

1. Nationals and companies of either Party shall be accorded national treatment, within the territories of the other Party with respect to: (a) leasing real property needed for their residence or for the conduct of activities pursuant to the present Treaty; (b) purchasing and otherwise acquiring personal property of all kinds, subject to any limitations on acquisition of shares in enterprises that may be imposed consistently with Article V; and (c) disposing of property of all kinds by sale, testament or otherwise. The rights set forth in (a) above shall be subject to compliance with the formalities prescribed in the legislation of such other Party, provided that such formalities shall not impair the substance of such rights.

2. Nationals and companies of either Party shall be accorded within the territories of the other Party effective protection in the exclusive use of inventions, trade marks and trade names, upon compliance with the applicable laws and regulations, if any, respecting registration and other formalities.

ARTICLE VII

1. Nationals and companies of either Party shall not be subject to the payment of taxes, fees or charges within the territories of the other Party, or to requirements with respect to the levy and collection thereof, more burdensome than those borne by nationals, residents and companies of any third country. In the case of nationals of either Party residing within the territories of the other Party, and of companies of either Party engaged in trade or other gainful pursuit or in nonprofit activities therein, such taxes, fees, charges and requirements shall not be more burdensome than those borne by nationals and companies of such other Party.

2. Each Party, however, reserves the right to: (a) extend specific tax advantages only on the basis of reciprocity, or pursuant to agreements for the avoidance of double taxation or the mutual protection of revenue; and (b) apply special provisions in extending advantages to its nationals and residents in connection with joint returns by husband and wife, and as to the exemptions of a personal nature allowed to non-residents in connection with income and inheritance taxes.

3. Companies of either Party shall not be subject, within the territories of the other Party, to taxes upon any income, transactions or capital not attributable to the operations and investment thereof within such territories.

4. The foregoing provisions shall not prevent the levying, in appropriate cases, of fees relating to the accomplishment of police and other formalities, if these fees are also levied on other foreigners. The rates for such fees shall not exceed those charged the nationals of any other country.

ARTICLE VIII

1. Neither Party shall apply restrictions on the making of payments, remittances, and other transfers of funds to or from the territories of the other Party, except (a) to the extent necessary to assure the availability of foreign exchange for payments for goods and services essential to the health and welfare of its people, or (b) in the case of a member of the International Monetary Fund, restrictions specifically requested or approved by the Fund.

2. If either Party applies exchange restrictions, it shall promptly make reasonable provision, taking into account its foreign exchange reserves and the extent of disequilibrium in its balance of payments, for the withdrawal, in foreign exchange in the currency of the other Party of: (a) the compensation referred to in Article IV, paragraph 2, of the present Treaty, (b) earnings, whether in the form of salaries, interest, dividends, commissions, royalties, payments for technical services, or otherwise, and (c) amounts for amortization of loans, depreciation of direct investments and capital transfers, giving consideration to special needs for other transactions. If more than one rate of exchange is in force, the rate applicable to such withdrawals shall be a rate which is specifically approved by the International Monetary Fund for such transactions or, in the absence of a rate so approved, an effective rate which, inclusive of any taxes or surcharges on exchange transfers, is just and reasonable.

3. Either Party applying exchange restrictions shall in general administer them in a manner not to influence disadvantageously the competitive position of the commerce, transport or investment of capital of the other Party in comparison with the commerce, transport or investments of any third country.

ARTICLE IX

1. Each Party shall accord to products of the other Party, from whatever place and by whatever type of carrier arriving, and to products destined for exportation to the territories of such other Party, by whatever route and by whatever type of carrier, treatment no less favorable than that accorded like products of, or destined for exportation to, any third country, in all matters relating to: (a) customs duties, as well as any other charges, regulations and formalities levied upon or in connection with importation and exportation; and (b) internal taxation, sale, distribution, storage and use. The same rule shall apply with respect to the international transfer of payments for imports and exports.

2. Neither Party shall impose restrictions or prohibitions on the importation of any product of the other Party, or on the exportation of any product to the territories of the other Party, unless the importation of the like product of, or the exportation of the like product to, all third countries is similarly restricted or prohibited.

3. If either Party imposes quantitative restrictions on the importation or exportation of any product in which the other Party has an important interest:

(a) It shall as a general rule give prior public notice of the total amount of the product, by quantity or value, that may be imported or exported during a specified period, and of any change in such amount or period; and

(b) If it makes allotments to any third country, it shall afford such other Party a share proportionate to the amount of the product, by quantity or value, supplied by or to it during a previous representative period, due consideration being given to any special factors affecting the trade in such product.

4. Either Party may impose prohibitions or restrictions on sanitary or other customary grounds of a noncommercial nature, or in the interest of preventing deceptive or unfair practices, provided such prohibitions or restrictions do not arbitrarily discriminate against the commerce of the other Party.

5. Either Party may adopt measures necessary to assure the utilization of accumulated inconvertible currencies or to deal with a strigency of foreign exchange. However, such measures shall deviate no more than necessary from a policy designed to promote the maximum development of nondiscriminatory international trade and to expedite the attainment of a balance-of-payments position which will obviate the necessity of such measures.

6. Each Party reserves the right to accord special advantages: (a) to products of its national fisheries, (b) to adjacent countries in order to facilitate frontier traffic, or (c) by virtue of a customs union or free trade area of which either Party, after consultation with the other Party, may become a member. Each Party, moreover, reserves rights and obligations it may have under the General Agreement on Tariffs and Trade, and special advantages it may accord pursuant thereto.

ARTICLE X

1. In the administration of its customs regulations and procedures, each party shall: (a) promptly publish all requirements of general application affecting importation and exportation; (b) apply such requirements in a uniform, impartial and reasonable manner; (c) refrain, as a general practice, from enforcing new or more burdensome requirements until after public notice thereof; (d) allow appeals to be taken from rulings of the customs authorities; and (e) not impose greater than nominal penalties for infractions resulting from clerical errors or from mistakes made in good faith.

2. Nationals and companies of either Party shall be accorded treatment no less favorable than that accorded nationals and companies of the other Party, or of any third country, with respect to all matters relating to importation and exportation.

3. Neither Party shall impose any measure of a discriminatory nature that hinders or prevents the importer or exporter of products of either country from obtaining marine insurance on such products in companies of either Party.

ARTICLE XI

1. Between the territories of the two Parties there shall be freedom of commerce and navigation.

2. Vessels under the flag of either Party, and carrying the papers required by its law in proof of nationality, shall be deemed to be vessels of that Party both on the high seas and within the ports, places and waters of the other Party.

3. Vessels of either Party shall have liberty, on equal terms with vessels of the other Party and on equal terms with vessels of any third country, to come with their cargoes to all ports, places and waters of such other Party open to foreign commerce and navigation. Such vessels and cargoes shall in all respects be accorded national treatment and most-favored-nation treatment within the ports, places and waters of such other Party; but each Party may reserve exclusive rights and privileges to its own vessels with respect to the coasting trade, inland navigation and national fisheries.

4. Vessels of either Party shall be accorded national treatment and most-favored-nation treatment by the other Party with respect to the right to carry all products that may be carried by vessel to or from the territories of such other Party; and such products shall be accorded treatment no less favorable than that accorded like products carried in vessels of such other Party, with respect to: (a) duties and charges of all kinds, (b) the administration of the customs, and (c) bounties, drawbacks and other privileges of this nature.

5. Vessels of either Party that are in distress shall be permitted to take refuge in the nearest port or haven of the other Party, and shall receive friendly treatment and assistance.

6. The term "vessels", as used herein, means all types of vessels, whether privately owned or operated, or publicly owned or operated; but this term does not, except with reference to paragraphs 2 and 5 of the present Article, include fishing vessels or vessels of war.

ARTICLE XII

1. Each Party undertakes (a) that enterprises owned or controlled by its Government, and that monopolies or agencies granted exclusive or special privileges within its territories, shall make their purchases and sales involving either imports or exports affecting the commerce of the other Party solely in accordance with commercial considerations, including price, quality, availability, marketability, transportation and other conditions of purchase or sale; and (b) that the nationals, companies and commerce of such other Party shall be afforded adequate opportunity, in accordance with customary business practice, to compete for participation in such purchases and sales.

2. Each Party shall accord to the nationals, companies and commerce of the other Party fair and equitable treatment, as compared with that accorded to the nationals, companies and commerce of any third country, with respect to: (a) the governmental purchase of supplies, (b) the awarding of concessions and other government contracts, and (c) the sale of any service sold by the Government or by any monopoly or agency granted exclusive or special privileges.

3. The Parties recognize that conditions of competitive equality should be maintained in situations in which publicly owned or controlled trading or manufacturing enterprises of either Party engage in competition, within the territories thereof, with privately owned and controlled enterprises of nationals and companies of the other Party. Accordingly, such private enterprises shall, in such situations, be entitled to the benefit of any special advantages of an economic nature accorded such public enterprises, whether in the nature of subsidies, tax exemptions or otherwise. The foregoing rule shall not apply, however, to special advantages given in connection with: (a) manufacturing goods for government use, or supplying goods and services to the Government for government use; or (b) supplying at prices substantially below competitive prices, the needs of particular population groups for essential goods and services not otherwise practically obtainable by such groups.

ARTICLE XIII

1. The present Treaty shall not preclude the application of measures:

(a) regulating the importation or exportation of gold or silver;

(b) relating to fissionable materials, the radioactive byproducts thereof, or the sources thereof;

(c) regulating the production of or traffic in arms, ammunition and implements of war, or traffic in other materials carried on directly or indirectly for the purpose of supplying a military establishment;

(d) necessary to fulfill the obligations of a Party for the maintenance or restoration of international peace and security, or necessary to protect its essential security interests;

(e) denying to any company in the ownership or direction of which nationals of any third country or countries have directly or indirectly the controlling interest, the advantages of the present Treaty, except with respect to recognition of juridical status and with respect to access to courts of justice and to administrative tribunals and agencies.

2. The present Treaty does not accord any rights to engage in political activities.

3. The most-favored-nation provisions of the present Treaty relating to the treatment of goods shall not extend to advantages accorded by the United States of America or its Territories and possessions, irrespective of any future change in their political status, to one another, to the Republic of Cuba, to the Republic of the Philippines, to the Trust Territory of the Pacific Islands or to the Panama Canal Zone, nor to advantages which the Republic of Vietnam may accord to third countries pursuant to agreements heretofore concluded with them. Each Party agrees that before applying any new preferential rates of duty affecting articles of substantial trading interest to the other Party, it will inform the other Party of its plans and afford it an opportunity for consultation.

4. The provisions of Article I, paragraph 1(b), shall be construed as extending to persons who represent nationals and companies of the same nationality which have invested or are actively in the process of investing a substantial amount of capital in an enterprise in the territories of the other Party and who are employed by such nationals and companies in a responsible capacity.

ARTICLE XIV

1. Each Party shall accord sympathetic consideration to, and shall afford adequate opportunity for consultation regarding, such representations as the other Party may make with respect to any matter affecting the operation of the present Treaty.

2. Any dispute between the Parties as to the interpretation or application of the present Treaty, not satisfactorily adjusted by diplomacy, shall be submitted to the International Court of Justice, unless the Parties agree to settlement by some other pacific means.

ARTICLE XV

1. The present Treaty shall be ratified, and the ratifications thereof shall be exchanged at Saigon as soon as possible.

2. The present Treaty shall enter into force one month after the day of exchange of ratifications. It shall remain in force for ten years and shall continue in force thereafter until terminated as provided herein.

3. Either Party may, by giving one year's written notice to the other Party, terminate the present Treaty at the end of the initial ten-year period or at any time thereafter.

IN WITNESS WHEREOF the respective Plenipotentiaries have signed the present Treaty and have affixed hereunto their seals.

DONE in duplicate, in the English and Vietnamese languages, both equally authentic, at Saigon this third day of April, one thousand nine hundred sixty-one.

For the United States of America:
ELBRIDGE DURBROW.

For the Republic of Viet-Nam:
VU VAN MAU.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the treaties may be voted on en bloc.

The VICE PRESIDENT. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at the conclusion of the debate on the two treaties, the Senate proceed to the consideration of other business, and that a yea-and-nay vote be taken at 10 minutes to 11.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, the treaties with Belgium and Vietnam represent the 20th and 21st modern agreements concluded by the United States since the current commercial treaty program was initiated in 1946. Both of these treaties contain provisions designed to provide protection for the property and interests of American citizens and companies in those countries.

Each treaty provides that the property of nationals and companies of either party is not to be taken except for a public purpose nor is it to be taken without the prompt payment of just compensation "in an effectively realizable form" representing the full equivalent of the property taken.

These treaties also provide that—

Any dispute between the Parties as to the interpretation or application of the present Treaty, not satisfactorily adjusted by diplomacy, shall be submitted to the International Court of Justice, unless the Parties agree to settlement by some other pacific means.

According to a memorandum on this subject prepared by the Department of State—see appendix of committee report—provisions relating to the International Court of Justice appear in 20 out of 21 of U.S. postwar commercial treaties. The only exception is the treaty with the Sultanate of Muscat and Oman, 86th Congress, 1st session.

Although these commercial treaties are similar to others which have been approved by the Senate, they do deviate from standard provisions which are normally included in treaties of this type. For instance, the treaty with Belgium does not contain provisions relating to the exchange of goods, because of Belgium's reluctance to enter into long-term commitments on this matter and because commercial relations with Belgium have been subject to the General Agreement on Tariffs and Trade. Moreover, social security provisions, as well as the customary clauses relating to the acquisition and tenure of real property, are excluded from the treaty for the reason that the provisions insisted on by Belgian negotiators would have been in conflict with U.S. Federal and domestic law.

In addition, the treaty with Vietnam does not provide for a specific right of entry and establishment of business enterprises, as does the agreement with Belgium. Vietnam's reluctance to accept such a provision is based on her concern about the possible effects of potential economic penetration from abroad. Rather, the provisions relating to the conduct of business activities are limited largely to the function of assuring nondiscriminatory treatment to such enterprises as are authorized to be established under domestic law.

I might add the executive branch witness, Mr. Peyton Kerr, Deputy Assistant Secretary of State for Economic Affairs, assured the committee that the provisions of these treaties "are based upon existing precedents and introduce no new commitments that raise problems as to their effects upon domestic law."

Mr. President, the Vietnam treaty has been ratified, but the Belgium treaty has not been ratified.

Mr. WILEY subsequently said: Mr. President, earlier today, while the treaties were being discussed, the question came to my mind, because I had received

several telegrams which raised the question, as to whether they were in violation of the Connally amendment. I immediately contacted Mr. Marcy, of the Foreign Relations Committee, and he explained the situation to me. I asked him to make the explanation in writing, which he did. While the provision violates the Connally amendment in only several particulars, referred to in the memorandum, it does not in general jurisdiction.

I ask unanimous consent that the memorandum be printed in the RECORD, at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM REGARDING APPLICABILITY OF CONNALLY AMENDMENT PRINCIPAL TO TREATIES WITH BELGIUM AND VIETNAM

The commercial treaties with Belgium and Vietnam both require that if any dispute regarding any provision of these conventions arises as between the parties, and if such dispute is not satisfactorily settled by other means, the dispute shall be submitted to the International Court of Justice.

It has been alleged that this provision has the effect of bypassing the Connally amendment because it does not retain for exclusive decision by the United States the question of whether a dispute arising under the treaty falls within the domestic jurisdiction of the United States.

The effect of the requirement that disputes be submitted to the court is to waive the Connally amendment requirement with respect to the limited category of disputes which might arise "as to the interpretation or application of" these two treaties. In other words, if the United States should feel that Belgium refuses to grant an American citizen the right "to enter" Belgium "for the purpose of carrying on trade," as provided in article II, and, if a dispute as to the applicability of this article were to arise, and if that dispute could not be settled by diplomatic means or any other method devised by Belgium and the United States, the dispute would be required to be referred to the International Court of Justice. At that point, the International Court, before it could take jurisdiction, would be required to find that its jurisdiction extended to the subject matter of the dispute.

Since World War II, the United States has concluded 21 commercial treaties along the general lines of those with Belgium and Vietnam. All of these treaties—most of which are now in effect—except a treaty with the Sultan of Muscat and Oman, contain provisions similar to the Court referral provision mentioned above.

Although a number of Members of the Senate, including members of the Committee on Foreign Relations, have opposed repeal of the Connally amendment, they have not objected to provisions of the type described above which confer on the International Court jurisdiction with respect to carefully delimited types of disputes which might conceivably arise under specific commercial treaties. Prior to the inclusion of the first provision of this type in a treaty signed with the Republic of China in 1946, the Committee on Foreign Relations, under the then chairman, Senator Connally, was consulted regarding the desirability of including provisions of this type in specific conventions. Members, at that time, who had supported inclusion of the Connally amendment in connection with the dispute of our ratification of the World Court statute did not object to the inclusion in treaties of this type of provision such as that quoted above.

Mr. MANSFIELD. Mr. President, it appears that the debate on the two agreements has been concluded.

Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. MANSFIELD. As I understand, the Senate agreed to vote en bloc on both these agreements at 10 minutes to 11.

The VICE PRESIDENT. The Senator is correct.

Mr. MANSFIELD. The vote will be a yea-and-nay vote?

The VICE PRESIDENT. The Senator is correct. Unless the Senator desires specifically to make the request, such a request is not necessary.

Mr. MANSFIELD. I shall make the request at the proper time.

The VICE PRESIDENT. If there be no objection, the treaties will be considered as having passed through their parliamentary stages up to and including the presentation of the respective resolutions of ratification.

The resolutions of ratification were read, as follows:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of a treaty of friendship, establishment, and navigation between the United States of America and the Kingdom of Belgium, together with a related protocol, signed at Brussels on February 21, 1961. (Executive J, Eighty-Seventh Congress.)

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of a treaty of amity and economic relations between the United States of America and the Republic of Vietnam, signed at Saigon on April 3, 1961. (Executive L, Eighty-seventh Congress.)

The VICE PRESIDENT. The question is on advising and consenting to the resolutions of ratification.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that further action on the treaties be suspended at this time.

The VICE PRESIDENT. Under the order, that will be done.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

DIVORCE, LEGAL SEPARATION, AND ANNULMENT OF MARRIAGE

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 863.

The VICE PRESIDENT. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 1761) to amend the act of March 3, 1901, relating to divorce, legal separation, and annulment of marriage in the District of Columbia.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to, and the Senate proceeded to consider the bill, which was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 971 of the Act entitled "An Act to establish a code of law for the District of Columbia", approved March 3, 1901 (31 Stat. 1189, 1345; D.C. Code, sec. 16–401), as amended, is amended to read as follows:

"SEC. 971. BONA FIDE RESIDENCE REQUIRED—TERMS.—No action for divorce shall be maintainable unless one of the parties to the marriage has been a bona fide resident of the District of Columbia for at least one year next preceding the commencement of the action; no action for annulment of a marriage performed outside of the District of Columbia shall be maintainable unless one of the parties has been a bona fide resident of the District of Columbia for at least one year next preceding the commencement of the action; nor shall any action for annulment of a marriage performed in the District of Columbia or for the affirmance of any marriage be maintainable, unless one of the parties is a bona fide resident of the District of Columbia at the time of commencement of the action."

(b) Section 966 of such Act (D.C. Code, sec. 16–403), as amended, is amended to read as follows:

"SEC. 966. CAUSES FOR DIVORCE A VINCULO AND FOR DIVORCE A MENSA ET THORO AND FOR ANNULLING MARRIAGES.—

"(a) A divorce from the bond of marriage or a legal separation from bed and board may be granted for adultery, actual or constructive desertion for one year, voluntary separation from bed and board for three consecutive years without cohabitation, or final conviction of a felony and sentence for not less than two years to a penal institution which is served in whole or in part. A legal separation from bed and board also may be granted for cruelty.

"(b) A final judgment of legal separation from bed and board may be enlarged into a judgment of divorce from the bond of marriage upon the application of the innocent spouse after the final separation of the parties has been continuous for one year next before the making of the application.

"(c) Marriage contracts may be declared void in the following cases:

"First. Where such marriage was contracted while either of the parties thereto had a former wife or husband living, unless the former marriage had been lawfully dissolved.

"Second. Where such marriage was contracted during the lunacy of either party (unless there has been voluntary cohabitation after the lunacy) or was procured by fraud or coercion.

"Third. Where either party was matrimonially incapacitated at the time of marriage and has continued so.

"Fourth. Where either of the parties had not arrived at the age of legal consent to the contract of marriage (unless there has been voluntary cohabitation after coming to legal age), but in such cases only at the suit of the party not capable of consenting."

(c) Section 980 of such Act (D.C. Code, sec. 16–415), as amended, is amended to read as follows:

"SEC. 980. MAINTENANCE OF WIFE AND MINOR CHILDREN—MAINTENANCE OF FORMER WIFE—ENFORCEMENT.—

"(a) Whenever any husband shall fail or refuse to maintain his wife and minor children, if any, although able to do so, or whenever any father shall fail or refuse to maintain his children by a marriage since dissolved, although able to do so, the Court,

upon proper application, may decree, pendente lite and permanently, that he shall pay reasonable sums periodically for the support of such wife and children, or such children, as the case may be, and the Court may decree that he pay suit money, including counsel fees, pendente lite and permanently, to enable plaintiff to conduct the case.

"(b) Whenever a former husband has obtained a foreign ex parte divorce, the Court thereafter, on application of the former wife and with personal service of process upon the former husband in the District of Columbia, may decree that he shall pay her reasonable sums periodically for her maintenance and for suit money, including counsel fees, pendente lite and permanently, to enable plaintiff to conduct the case.

"(c) The Court may enforce any decree entered under this section in the same manner as is provided in section 975 of the Act entitled 'An Act to establish a code of law for the District of Columbia', approved March 3, 1901, as amended (D.C. Code sec. 16–410)."

CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I move that the clerk continue to read consecutively through the calendar down to and including Calendar No. 885.

The VICE PRESIDENT. The question is on the motion of the Senator from Montana.

Mr. KEATING. Mr. President, is that motion debatable?

The VICE PRESIDENT. The Chair recognizes the Senator from New York.

Mr. KEATING. Mr. President, I withdraw my desire to speak.

The VICE PRESIDENT. The question is on the motion of the Senator from Montana.

The motion was agreed to.

INTERNATIONAL EXPOSITION FOR SOUTHERN CALIFORNIA

The joint resolution (S.J. Res. 132) extending recognition to the International Exposition for Southern California in the year 1966, and authorizing the President to issue a proclamation calling upon the several States of the Union and foreign countries to take part in the exposition, was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress hereby recognizes the International Exposition for Southern California in the year 1966 as an event designed to develop and intensify a climate of good will and understanding among men and nations, thereby promoting a lasting peace among all people on the planet of the earth.

SEC. 2. To implement the recognition declared in the first section of this Act, the President, at such time as he deems appropriate, is authorized and requested to issue a proclamation calling upon the several States of the Union and foreign countries to take part in the exposition.

Mr. KUCHEL subsequently said: Mr. President, I move that the Senate reconsider the vote by which Calendar No. 865, Senator Joint Resolution 162, was passed.

Mr. MANSFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILLS PASSED OVER

The bill (S. 970) to authorize the Secretary of the Interior to construct, operate, and maintain the Mid-State Reclamation Project, Nebraska, and for other purposes, was announced as next in order.

Mr. MANSFIELD. Mr. President, over.

The VICE PRESIDENT. The bill will be passed over.

WRIGHT BROTHERS DAY

The joint resolution (H.J. Res. 109) designating the 17th day of December 1961, as Wright Brothers Day was considered, ordered to a third reading, was read the third time, and passed.

CELEBRATION OF THE AMERICAN PATENT SYSTEM

The resolution (H.J. Res. 499) authorizing a celebration of the American patent system was considered, ordered to a third reading, read the third time, and passed.

REPRESENTATION ON THE JUDICIAL CONFERENCE OF THE UNITED STATES

The bill (H.R. 176) to amend section 331 of title 28 of the United States Code so as to provide for representation on the Judicial Conference of the United States was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H.R. 6690) to amend section 332 of title 28, United States Code, in order to provide for the inclusion of a district judge or judges on the judicial council of each circuit, was announced as next in order.

Mr. KEATING. Mr. President, is it in order to ask that a bill go over?

Mr. MANSFIELD. Yes, indeed.

Mr. KEATING. It was understood that the bill would not come up until after the Juridical Conference had acted on the question, which they expect to do on the 20th of September. I ask that the bill go over.

The VICE PRESIDENT. The bill will be passed over.

WIDOW OF JULIAN E. GILLESPIE

The bill (S. 1274) for the relief of the widow of Julian E. Gillespie was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of section 5 of the Act entitled "An Act to make certain increases in the annuities of annuitants under the Foreign Service retirement and disability system", approved May 1, 1956, as amended (22 U.S.C. 1079d), Julian E. Gillespie, who died on June 23, 1939, while serving as commercial attaché to the American Embassy at Istanbul, Turkey, shall be held and considered to have been a participant under the Foreign Service retirement and disability system at the time of his death.

SEC. 2. No annuity shall be payable as a result of the enactment of this Act for any period prior to the date of such enactment.

CWO JAMES M. COOK

The bill (H.R. 2816) for the relief of CWO James M. Cook was considered, ordered to a third reading, was read the third time, and passed.

LT. COL. WILLIAM C. WINTER, JR., U.S. AIR FORCE (MEDICAL CORPS)

The bill (H.R. 3606) for the relief of William C. Winter, Jr., lieutenant colonel, U.S. Air Force (Medical Corps) was considered, ordered to a third reading, was read the third time, and passed.

WOODY W. HACKNEY

The bill (H.R. 3863) for the relief of Woody W. Hackney of Fort Worth, Tex., was considered, ordered to a third reading, was read the third time, and passed.

HENRY JAMES TAYLOR

The bill (H.R. 4369) for the relief of Henry James Taylor was considered, ordered to a third reading, was read the third time, and passed.

CHARLES P. REDICK

The bill (H.R. 5182) for the relief of Charles P. Redick was considered, ordered to a third reading, was read the third time, and passed.

RALPH E. AND SALLY SWIFT

The bill (H.R. 5559) for the relief of Ralph E. Swift and his wife, Sally Swift, was considered, ordered to a third reading, was read the third time, and passed.

HARRY WEINSTEIN

The bill (H.R. 6996) for the relief of Harry Weinstein was considered, ordered to a third reading, was read the third time, and passed.

M. C. PITTS

The bill (H.R. 7264) for the relief of M. C. Pitts was considered, ordered to a third reading, was read the third time, and passed.

BILL AND RESOLUTION PASSED OVER

The bill (S. 521) for the relief of Charles J. Utterback was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The resolution (S. Res. 105) to create a Special Committee on National Fuels Study was announced as next in order.

Mr. MANSFIELD. Over, Mr. President.

The VICE PRESIDENT. The resolution will be passed over.

APPRENTICES AUTHORIZED FOR GOVERNMENT PRINTING OFFICE

The Senate proceeded to consider the bill (S. 2488) to increase the number of apprentices authorized to be employees of the Government Printing Office, and for other purposes, which had been reported from the Committee on Rules and Administration, with an amendment, in line 6, after the word "words", to strike out "six" and insert "four", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of January 12, 1895 (ch. 23, sec. 50, 28 Stat. 607, 608), as amended (44 U.S.C. 40), is amended by deleting in the first sentence the words "two hundred apprentices" and substituting the words "four hundred apprentices."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

PRINTING AS SENATE DOCUMENT CONVENTION OF AMERICAN INSTRUCTORS OF THE DEAF

The concurrent resolution (S. Con. Res. 40) authorizing the printing as a Senate document of the 40th biennial meeting of the convention of American Instructors of the Deaf; and providing additional copies was considered and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That the report of the proceedings of the fortieth biennial meeting of the Convention of American Instructors of the Deaf, held in Salem, Oregon, in June 1961, be printed with illustrations as a Senate document; and that four thousand additional copies be printed for the use of the Joint Committee on Printing.

MICROFILMING OF PAPERS OF PRESIDENTS OF THE UNITED STATES

The bill (H.R. 6667) to amend the act of August 16, 1957, relating to microfilming of papers of Presidents of the United States, to remove certain liabilities of the United States with respect to such activities was considered, ordered to a third reading, read the third time, and passed.

SPECIAL COMMITTEE ON NATIONAL FUELS STUDY

Mr. MANSFIELD. Mr. President, that concludes the call of the calendar as of today, with one exception. I ask unanimous consent that the Senate return to the consideration of Calendar No. 882, which I inadvertently asked to go over.

The VICE PRESIDENT. Without objection, it is so ordered.

The Senate resumed the consideration of the resolution (S. Res. 105) to create a Special Committee on National Fuels Study, which had been reported from the Committee on Interior and Insular Affairs with amendments, and subsequently reported from the Committee on Rules and Administration with additional amendments. The amendments of the Committee on Interior and Insular Affairs are as follows:

On page 2, line 1, after the word *"Resolved"*, to strike out "That there is hereby created a special committee to be known as the Special Committee on a National Fuels Study and to consist of nine Senators to be appointed by the President of the Senate as soon as practicable after the date of adoption of this resolution. The President of the Senate shall designate one such Senator as chairman of the committee. Six members of the committee shall be appointed from the majority party and three members from the minority party.

"SEC. 2. No legislative measure shall be referred to such committee, and it shall not have power to report any such measure to the Senate.

"SEC. 3. The said committee, or any duly authorized subcommittee thereof, is authorized to sit and act at such places and times during the sessions, recesses, and adjourned periods of the Senate, to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, to procure such printing and binding, and to make such expenditures as it deems advisable.

"SEC. 4. A majority of the members of the committee or any subcommittee thereof shall constitute a quorum for the transaction of business, except that a lesser number, to be fixed by the committee, shall constitute a quorum for the purpose of taking sworn testimony.

"SEC. 5. (a) The committee shall—"

And, in lieu thereof, to insert "That the Committee on Interior and Insular Affairs, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified in rule XXV of the Standing Rules of the Senate to—"; on page 4 at the beginning of line 6, to strike out "(1)" and insert "(a)"; at the beginning of line 12, to strike out "(2)" and insert "(b)"; at the beginning of line 25, to strike out "(b)" and insert "(c)"; on page 5, line 1, after "(a)", to insert "and subsection (b)"; on page 6, after line 19, to insert:

"SEC. 2. The President of the Senate, at the request of the chairman of the Committee on Interior and Insular Affairs, shall appoint three Senators, none of whom shall be members of the Committee on Interior and Insular Affairs, to participate in the study authorized herein and Senators so appointed shall serve with the committee in an ex officio capacity."

On page 7, line 3, to change the section number from "6" to "3"; in line 4, after the word "basis", to strike out "through January 2, 1963,"; in line 6, after the word "consultants", to strike out the colon and *"Provided,* That the minority is authorized to select one person for appointment, and the person so selected shall be appointed and his compensation shall be so fixed that his gross rate shall not be less by more than $1,400 than the highest gross rate paid to any other employee"; in 13, after the word "may," to strike out "employ on a reimbursable basis such executive branch personnel as it deems advisable" and insert "utilize the services, information, facilities, and personnel of any of the departments or agencies of the Government"; in line 17, to change the section number from "7" to "4"; in line 18, after the word "exceed", to strike out "$200,000" and insert "$25,000"; in line 21, to change the section number from "8" to "5"; and in line 24, after the word "date,", to strike out "but not later than January 2, 1963. The committee shall cease to exist at the termination of January 2, 1963."

The amendments were agreed to.

The amendments of the Committee on Rules and Administration are as follows:

On page 4, line 25, to strike out "(c)" and insert "SEC. 2."; on page 5, at the beginning of line 1, to strike out "subsection (a) and subsection (b) of this", and in the same line, after the word "section", to insert "1"; on page 6, line 20, to change the section number from "2" to "3"; on page 7, after line 2, to strike out:

"SEC. 3. For the purposes of this resolution, the committee is authorized to employ on a temporary basis technical, clerical, or other assistants, experts, and consultants. With the prior consent of the executive department or agency concerned and the Committee on Rules and Administration, the committee may utilize the services, information, facilities, and personnel of any of the departments or agencies of the Government."

After line 16, to strike out:

"SEC. 4. The expenses of the committee, which shall not exceed $25,000 during any fiscal year, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee."

After line 20, to strike out:

"SEC. 5. The committee shall report the results of its studies and investigations, together with such recommendations as it may deem advisable, to the Senate at the earliest practicable date."

On page 8, after line 2, to insert a new section, as follows:

"SEC. 4. For the purposes of this resolution the committee is authorized through January 31, 1962 (1) to make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government."

After line 12, to insert a new section, as follows:

"SEC. 5. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date."

And, after line 16, to insert a new section, as follows:

"SEC. 6. The expenses of the committee under this resolution, from the date of its agreement through January 31, 1962, shall not exceed $25,000 and shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee."

The amendments were agreed to.

The resolution, as amended, was agreed to.

The title was amended, so as to read: "Resolution to authorize a study of national fuels policy."

The preamble was agreed to.

Mr. RANDOLPH subsequently said: Mr. President, the adoption of Senate Resolution 105, to authorize the Committee on Interior and Insular Affairs to conduct a national fuels and energy study, represents responsible action in the national interest.

For myself and my conscientious colleague from West Virginia [Mr. BYRD] and the 61 other Senators who were cosponsors of the legislation, I desire to commend and thank the distinguished majority leader, Senator MANSFIELD, the distinguished minority leader, Senator DIRKSEN, and the able and diligent chairman of the Committee on Interior and Insular Affairs, Senator ANDERSON, for the leadership they so capably provided

in making possible the adoption of this resolution.

It is appropriate, Mr. President, to point out that Senate Resolution 105 is one of the most widely sponsored legislative measures of this or any other Congress. Likewise, it is one with a high degree of bipartisan support. Of the 63 cosponsoring Senators, 45 were from the majority side and 18 from the minority. This is consistent with the 1960 platforms of both national political parties.

The Democratic national platform declared:

> We support the establishment of a national fuels policy.

The Republican national platform included a declaration for "long-range minerals and fuels planning and programing."

Actually, these platform pronouncements go beyond the provisions of Senate Resolution 105. Whereas the party platforms call for support of a national fuels policy and for long-range minerals and fuels planning and programing, Senate Resolution 105 provides for a prerequisite study to ascertain facts relating to the fuels and energy resources of this country "with the view of determining what, if any, changes and implementation of existing policies and laws may be advisable in order to coordinate and provide an effective national fuels policy to assure the availability of fuels and energy adequate for an expanding economy and for the security of the United States."

The adoption of Senate Resolution 105, as amended by the Committee on Interior and Insular Affairs and by the Committee on Rules and Administration, is the successful culmination of a series of efforts started in the 86th Congress and continued in this 87th Congress to have the problems and status of the Nation's fuels and energy resources brought under study, hopefully as a prelude to the establishment of a national fuels policy.

In this successful effort we have had the stalwart and consistent support of the President of the United States, the Secretary of the Interior, the Secretary of State, the Atomic Energy Commission, the Office of Civil and Defense Mobilization, and the Interstate Commerce Commission.

As introduced, Senate Resolution 105 called for the establishment of a special committee of the Senate to conduct a fuels and energy study, but the Committee on Interior and Insular Affairs, after hearing much testimony and after careful study of the subject, reported the resolution with the recommendation that the study be authorized as an activity of that standing committee. The wisdom of this decision was not questioned by those of us with primary interest in having authorized a thoroughly impartial and objective study of the whole fuels and energy field in the United States. It is an area in which the Interior and Insular Affairs Committee has jurisdiction and there are numerous advantages inherent in having the study made by this committee, not the least of which is the obviating of the costs of special staffing.

A proper and adequate provision has been included in the resolution for the augmentation of the Interior and Insular Affairs Committee by the grant of authority to the President of the Senate to appoint as many as three Senators who are not members of that standing committee to serve in ex officio capacity for the purposes of the study authorized by Senate Resolution 105. I have been assured by the able chairman of the committee that the intent is to clothe the ex officio members with full participation and voting rights in all matters having to do with the national fuels and energy study, including recommendations to the Senate stemming from the study.

In appearing before the Committee on Interior and Insular Affairs as the principal sponsor of the resolution and as the authorized spokesman for the 62 cosponsoring Senators, I said on June 12, 1961, and I reaffirm now:

> The study, as we visualize it, should emphasize the national concept of the fuels and energy problem. We do not view this proposal as a "narrow conflict of industry interests" between competing fuels and energy sources. That some such conflicts would develop during the course of making an overall study would not be unexpected, but they would be secondary, not primary, considerations in the national aspect of the project.
>
> Because the results of the study proposed by S. Res. 105 will presumably determine whether or not the United States—not coal, oil, gas, hydroelectric energy, or atomic energy individually—needs a national fuels and energy policy, we believe there should be * * * understanding that individual fuels and energy industry interests are not the interests to be accommodated by the proposed study. Certainly their status and positions should be given fair and equitable consideration, but the broad national interest should be and must be the sole purpose served.

Mr. President, at this point in my remarks I ask consent to have printed in the RECORD a supplemental statement which I filed and which was made a part of the record of the Committee on Interior and Insular Affairs in its hearing on Senate Resolution 105.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR RANDOLPH

We are told by the population projection experts that our Nation will number more than 200 million persons by 1975—a scant 14 years from now. The additional 20 million people will have to be fed, clothed, housed, and provided with Federal, State, and local government services.

I respectfully suggest that this committee ponder for a moment how many items of food, clothing, housing, and Government services have no dependence on some form of energy to give them being. And I believe it is pertinent to inquire:

How many day-to-day conveniences—those which we Americans take for granted because of our high standard of living—would be available to us or will be available to those who come after us, if it should ever occur that the United States, for any reason, is faced with the fact that the presently unlimited supplies of low-cost energy we use so prodigally would suddenly be in short supply?

When I propounded this question to an executive of one of the major oil-importing companies recently, he replied, "But, Senator, that's the whole point; energy fuels are not in short supply. Why raise a hare when there's no need to chase it?"

The gentleman's response was accurate, in today's context.

In June 1961 the world—the United States included, of course—has available more energy fuels in the form of coal, oil and natural gas than currently we can use. In reference to oil, the word, I think, is "glut." From recent oil discoveries in north Africa, it would appear that there are still vast sources of supply that have not yet been discovered. Who knows what the continent of Africa may hold in the way of energy?

This is fine, but it is a small source of comfort and security to Americans living in Maine, Minnesota, or Montana that what might become an anti-American land has in her earth unlimited quantities of the same kind of energy fuels that are the very lifeblood of America. What guarantee do we Americans have that the African continent, or Venezuela, or Kuwait, or any of the other prolific oil areas of the world will constantly make their riches available to us? What good will Venezuelan oil be to the United States if Latin America embraces communism, or if Africa turns against us, or if the Soviet Union decides to effect a coup d'etat in the Middle East?

Every year that passes, in which we become more and more dependent on foreign oil to buttress our national economy and security perhaps is 1 year nearer disaster. What makes this all the more tragic is that it is unnecessary. The United States of America, the richest country the world has ever known, is, by its own complacency, gradually placing itself at the mercy of those it should most diligently guard against. By neglecting to apprise ourselves of the true, unbiased, realistic picture of our own energy wealth and stability, we are gambling with our country's future.

This Nation has a foreign policy, a defense policy, a farm policy, and the beginnings of a transportation policy. All are necessary and of first importance. But not one of them is so basic to our national security and economy as would be a national policy in respect of those energy fuels that make all of them possible and without which, or lacking an abundant available supply of which, would render all other national policies impotent and would disarrange our country industrially, economically, and militarily.

The leaders of the coal industry that means so much to the State I represent have been vociferously accused of selfish motives in their strong support of a study to determine whether this Nation needs a national policy in respect to our fuels and energy resources. They have been charged with "trying to recapture lost markets by Government fiat imposing end-use controls." They have been accused of "trying to get the Congress to do by legislation what the industry is incapable of doing by free and fair competition," and their accusers in practically every case have been spokesmen for competing fuels industries. I respectfully call attention to an excerpt from a speech made in San Antonio, Tex., to the Western Refiners Association, by Hon. John M. Kelly, Assistant Secretary of the Interior for Mineral Resources, a gentleman long associated with the domestic oil industry prior to his appointment to the Interior Department. Mr. Kelly said, "Let me also add this: Unthinking, blind opposition within the petroleum industry to an impartial, long-range study can easily leave the mistaken impression that the interests of the petroleum industry are somehow different from the interests of the Nation as a whole."

That is a most intriguing statement. It relates to a matter so vitally important to the future of our country that I feel strongly it should be studied with the utmost care and impartiality. I do not suggest that the implication of "profits before patriotism"

is a true implication. But I think that such an implication should be disproved without delay.

The leaders of the coal industry, like the leaders of the oil and natural gas industries, are proud of the significant part the energy industries play in the life of this Nation.

I believe a thorough, impartial study of the whole energy fuels field in the United States would remove misconceptions which may exist. In this connection it is pertinent that I note for the record that I, as a Senator from West Virginia, represent a State which has vital concern for the welfare of the gas and oil industries, as well as our basic coal industry. This is noted because of the following facts published in the March 2, 1961, Ritchie Gazette, a weekly newspaper published at Harrisville, W. Va.:

"According to a summary report just completed, on the gas and oil developments in West Virginia for 1960, by Mr. R. C. Tucker, assistant State geologist, 1,216 wells were drilled, an increase of 311 over 1959. Of these 794 were gas wells, 49 oil wells, 182 combination gas and oil wells, 49 were storage and other purposes wells, and 142 were dry holes; 529 wells were drilling at the close of the calendar year.

"These wells ranged in depth from 370 feet to 13,121 feet for a total of 2,908,817 feet. The wells had an average depth of 2,393 feet.

"The gas wells had a total initial daily open flow of 983,422 thousand cubic feet and ranged in size from 10,000 cubic feet to 10,284 thousand cubic feet.

"Total initial daily open flow of oil was 4,117½ barrels. The oil wells ranged in size from one-half barrel daily to 300 barrels daily.

"Lewis, Doddridge, Ritchie, Wayne and Gilmer Counties accounted for 52 percent of the total number of wells drilled.

"Lewis, Doddridge, Wyoming, and Kanawha accounted for 56 percent of the initial open flow of gas.

"Doddridge, Calhoun, Wetzel, Clay, and Lewis accounted for 78 percent of the new oil discovered.

"At the end of the year, there were 16,485 producing gas wells and 12,669 oil wells.

"The estimated gas production for 1960 was 207 million thousand cubic feet. The estimated oil production for 1960 was 2,300,000 barrels.

"Although some one dozen major oil and gas companies from other States are now actively engaged in investigating our State for deep-test drilling, the record number of wells drilled during 1960, was made by the companies that have operated in West Virginia for many years.

"The principal incentive for new drilling is a good market for gas at a good price."

As for the coal industry, on which much of the greatness of the American economy was built, we know that it no longer stands as the sole source of energy fuel. Our coal producers and miners are fully cognizant of the fact that oil and natural gas have made inroads on coal's once commanding position as the Nation's so-called powerplant. The coal industry does not resent the fact that, by vigorous development and the expenditure of billions of dollars, the oil and gas energy partners have built to the point of being coal's equals as contributors to the energy fuels complex of the Nation.

In fact, it is well that they have done so. America's energy demands today are so great and so varied that we need, and are fortunate to have all of our tremendous fossil fuels resources to supply them.

And we would be extremely negligent if we ignored the threat of economic deterioration now facing all of our natural resource fuels. Conditions today deter new domestic explorations and development of petroleum and natural gas in this country; they likewise endanger the production and transportation capacities of coal and its allied industries.

I do not wish to be misunderstood. I am confident that a study of our fuels resources and energy needs—such as is proposed in Senate Resolution 105—as well as the possible subsequent development and adoption of a national fuels policy, will result in benefits to the coal industry, to West Virginia. I am equally confident, however, that an impartial study and a sound fuels and energy policy will result in benefits to the domestic oil and gas producers and distributors as well—and inasmuch as we have substantial oil and gas interests in West Virginia our State will benefit here, too.

But far more important, I am certain that inestimable benefit will accrue to our whole country.

The coal industry and its many supporters in the Congress ask for no special favors. With respect to coal, and with respect to domestic oil and gas as well, all we ask is that before it is too late the United States of America, through a legislative branch study in which the executive branch would cooperate, determine whether a need exists for a sound, sane, forward-looking policy in respect of our most precious national asset—our domestic fuels and energy resources.

Mr. BYRD of West Virginia. Mr. President, the urgent need for passage of Senate Resolution 105 is well established. Today, we live in a sorely troubled world, plagued and harassed by the ruthless power greed of Russia and Red China. If present ominous international threats should erupt into actual war, it is highly questionable whether the various forms of energy, on which depends our ability to defend ourselves, will be available to us in fullest measure.

Time may yet be on our side, insofar as an established national fuels and energy resourses policy is concerned, and for this we should be thankful; but we would have been dangerously remiss in our duty to our Nation if we should have failed to adopt the important resolution before the Senate, for we must equate the exhaustability of each of our fuels not only with expanding industrial and commercial needs, but also with national defense needs. This, of course, will be the task of the committee making the fuels study.

It should be noted, however, that the problems which we face nationally with respect to all of our energy resources have an interrelationship which must be taken into account in a fuels study—and this is exactly what S. 105 proposes to do. Today, there is little or no awareness of this interrelationship, and each of our fuels is individually thought of in its own untrammeled way—each to be as fully exploited as possible in a competitive race against each other.

Thus, at the conclusion of the committee's study of our fuels, we should be far more agreeable than we are today as to which of our fuels should be wisely conserved for what superior purposes, and which fuels should be more fully developed for greater universal use through a program of accelerated production.

This does not mean that the study will indicate the need for straitjacketing any of our fuels and energy producers; rather, it means that the study can sapiently suggest a governmental course of action to protect each fuels resource from possible sickening circumstances. Our well-being as a Nation, and our very existence as a Nation, can certainly depend on the study committee's findings.

I urge Senators to vote for passage of Senate Resolution No. 105, because we cannot afford to delete a national fuels and energy resources study from our overall concern for our national defense. It is an important step which must be taken if we are to strengthen our posture of national preparedness against Communist imperialist aggression.

Mr. President, I wish to congratulate my colleague, Senator JENNINGS RANDOLPH, for his tireless efforts on behalf of Senate Resolution No. 105. I hope that his leadership in seeking such a Senate study of our fuels and energy resources will be recognized, and that he will be appointed to the committee which will be designated to make the study provided by the resolution.

PIPELINES AND OTHER WORK FOR AVONDALE, DALTON GARDENS, AND HAYDEN LAKE IRRIGATION DISTRICTS IN THE STATE OF IDAHO

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 764, S. 923.

The VICE PRESIDENT. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 923) to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho.

The VICE PRESIDENT. The question is on the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 2, line 4, after the word "over", to strike out "fifty" and insert "forty"; in line 9, after the word "Secretary", to insert "In the event works or capacity are provided hereunder at the request of the district in addition to those heretofore constructed by the United States and being replaced or improved under authority of this Act, such work may be undertaken by the Secretary at a cost not to exceed $125,000, and payment therefor shall be made concurrently with other annual payments as provided for herein." and on page 3, after line 3, to insert a new section, as follows:

SEC. 5. There are hereby authorized to be appropriated such sums, but not more than $1,611,000, as are necessary to carry out the provisions of this Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to replace lateral pipelines, perform interior lining of discharge pipelines, and to do other work he determines to be required in replacement, modification, or improvement of the facilities heretofore constructed by the

United States for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho.

SEC. 2. Each irrigation district, starting with the year following the completion of the work for the district under the authority of this Act, shall repay the United States toward the cost thereof over forty-year period annual installments which, when added to those payments required by existing repayment contracts between the United States and the district, will be equal to the amortization capacity of the lands of the district as that amortization capacity has been heretofore established by the Secretary. In the event works or capacity are provided hereunder at the request of the district in addition to those heretofore constructed by the United States and being replaced or improved under authority of this Act, such work may be undertaken by the Secretary at a cost not to exceed $125,000, and payment therefor shall be made concurrently with other annual payments as provided for herein.

SEC. 3. Prior to initiating actual construction of any of the work authorized in section 1 of this Act, the district shall be required to enter into a contract with the United States satisfactory to the Secretary to repay the United States toward the cost thereof as provided in section 2 of this Act.

SEC. 4. The remaining costs of the work completed hereunder for each district shall be returned to the reclamation fund within the period provided for in section 2 of this Act from revenues derived by the Secretary of the Interior from the disposition of power marketed through the Bonneville Power Administration.

SEC. 5. There are hereby authorized to be appropriated such sums, but not more than $1,611,000, as are necessary to carry out the provisions of this Act.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

LATIN AMERICA NEEDS PRIVATE ENTERPRISE

Mr. KEATING. Mr. President, the results of the recent meeting of the alliance for progress at Punta del Este have been disappointing to many of us who feel that the U.S. concentration on Government foreign aid programs cannot provide an answer for Latin America's long-term economic and social needs. The problems are so great, the need for capital so tremendous and the dangers of Communist subversion from Cuba and the Communist bloc so alarming that we cannot rely on just one avenue and just one approach to keep Latin America out of Communist hands.

Mr. President, one of the most important ways that we can help in the economic growth of Latin America is by encouraging private enterprise to meet the needs for capital and industrial development in Latin America. This can be done in a variety of ways through American investment guarantees, through multilateral arrangements, and through political agreements with the countries involved. Only private enterprise has the resources to provide all of the assistance Latin America needs if it is to move ahead toward a free and progressive economy. The present administration, sincere as is may be, is not helping Latin America or the free world if it permits Latin American countries to rely solely on Government aid for their development and if it permits Latin American countries to discriminate against or to discourage American private enterprise in that area.

Mr. President, a very interesting and perceptive analysis of Latin American needs has been prepared by the Foreign Policy Research Institute of the University of Pennsylvania. The institute has been engaged in a study of the political, socioeconomic, psychological and strategic practices now operative in Latin America with a view to devising policies to cope with the challenge confronting the United States in the Western Hemisphere. This article, which is a summary of material to be presented to the relevant congressional committees and the Departments of State and the Treasury, deserves careful study.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Evening Bulletin, Aug. 8, 1961]

FRESH START IN LATIN AMERICA?—OPPORTUNITIES AND PITFALLS OF THE PUNTA DEL ESTE MEETING

(EDITOR'S NOTE.—Great hopes for a new and closer relationship between the United States and its Latin American friends are being built upon the conference now in progress at Punta del Este, Uruguay. How valid are the hopes? What are the dangers? The Foreign Policy Research Institute of the University of Pennsylvania, which has been engaged in a study of the political, socioeconomic, psychological and strategic factors now operative in Latin America, with a view to devising policies "to cope with the challenges confronting the United States in that part of the Western Hemisphere," has provided the Bulletin with the accompanying report, summarizing some of the visible opportunities and pitfalls in the program now unfolding at Punta del Este. This report will go also to the Senate and House Foreign Affairs Committees, and to the Departments of State and the Treasury.)

The Inter-American Economic Conference at Punta del Este represents a significant effort to outline a 10-year program for Latin American economic and social development backed by the vast resources of the United States.

This important meeting will demonstrate dramatically that we have reached, in the words of President Kennedy, "a historic turning point in the life of the Western Hemisphere" and are ready to discuss realistically the economic problems confronting the Americas.

But it is equally important to bear in mind that no one international conference, however successful its deliberations might be, can lead quickly to drastic economic changes in the lives of scores of millions of people.

There are some indications that the Punta del Este Conference has already been oversold to the Latin Americans. Popular expectations have been raised so high that the Conference is saddled with an unfair burden. Many are bound to be disappointed in the results because they are unable to appreciate the gradual pace at which solidly founded economic growth must occur.

Moreover, elements are not lacking which will, through negativist propaganda, seek to aggravate existing frustrations and heap ridicule upon any responsible plans which are advanced to alleviate the real needs of the Latin Americans. The United States, therefore, should brace itself psychologically for a certain amount of unavoidable backlash and take prudent steps to minimize its harmful effects.

PRIVATE CAPITAL'S ROLE

Up until now those who have expounded upon the Alianza para Progreso have focused attention almost exclusively upon government-to-government aid. Certainly this type of assistance, at least in the amounts currently being discussed ($500 million) and perhaps an even greater amount, is essential to get the job underway. But government-to-government aid represents only a fraction of the total panorama of possibilities, and a minor fraction at that.

The tremendous amount of capital involved is not understood except in the most informed circles. Responsible United States and Latin American economic experts estimate, for example, that for steel and electric power alone, the area needs an amount of capital investment far greater than the entire Marshall plan.

When other priorities are considered, the total sum is completely beyond the willingness of the United States or any government to supply. The major portion of this development capital must come from nongovernmental sources.

It is incumbent upon the foreign enterprises already operating in Latin America to pursue policies which will make them fully acceptable in the society where they are operating.

The architects of the Alliance for Progress therefore need not draft their plan as if the U.S. Government must face the task of development alone. Few will question the necessity of governmental capital outlays for those projects which are prerequisite for helping economic activity but which do not attract capital from private markets.

BUILDING RIGHT CLIMATE

Rather, governments should chart their political course and tailor their development projects with a view toward creating an economic climate in which investment and trade can be accelerated and the standard of living of all peoples can be raised. One way of accomplishing this is for the government concerned to supply not only primary investment capital but also guarantee capital in forms which can have substantial multiplier effects.

The generation of psychological confidence is the foundation of sustained economic growth. The United States would do well to make at least a portion of its aid funds inspire the acceptance of a feasible system of private investment, ownership, and other financial guarantees by the governments of recipient countries.

Economic guarantees alone are not sufficient. Political guarantees are also necessary. In fact, businessmen are turned from investment less by the risk of economic loss, a factor which they are capable of calculating, than by the risk of political loss, which cannot be predicted.

The current reluctance on the part of U.S. venture capital to move to Latin America can be attributed almost entirely to fear of subsequent expropriation prompted by Castro's success in taking over foreign assets in Cuba.

The United States should seek to devise unilateral, bilateral, and multilateral approaches toward creating economic and political conditions which will contribute to an improved climate of commercial partnership between North and South America. Investors ought to be insured against obstacles, and confiscatory policies. Both through diplomatic channels and through less formal communications among public officials, econ-

omists and businessmen, much can be done to foster wholesome cooperation.

The United States, in furnishing unilateral guarantees, should not place U.S. businessmen at an unfair competitive advantage over their Latin American counterparts.

Protective cover probably should not extend to the full value of investment. Perhaps the optimum figure would be in the neighborhood of 75 percent. Furthermore, these insurance policies should be designed primarily to stimulate new or expanded capital investments in Latin America, not to attach retroactive guarantees to previous investments which have already brought a profitable return.

PRIORITY FOR HOUSING

Housing, more than land reform, is the most pressing problem confronting the mass of the people in Latin America. Furthermore, it is a problem which can be solved without arousing the kind of political opposition from landowners which so often delays social progress.

A large-scale housing program would have several advantages. It would bring genuine social gains which could be felt by the people, and hence it would diminish the attractiveness of radical socioeconomic solutions. Housing, too, is a unique sector of the economy where the satisfaction of consumer desires and the stimulation of productive growth meet.

Housing programs create not only jobs and purchasing power but whole new industries. Forest products, metals, plastics, factories for the production of prefabs, furniture, electrical powerplants, appliances, and many other lines of production are greatly stimulated by the building of homes in large numbers. Housing is politically attractive to all government sectors involved—local, regional, and national.

Finally, housing programs, by making human existence more attractive for large numbers of people, provide an incentive to construct stable political communities in which freedom and legal rights are respected. Both governmental and private capital programs should be directed toward the building of small homes for individual owners, or cooperative units in which each family could purchase its own apartment.

The area of housing is crucial, but this does not suggest that by itself it is a panacea. Housing programs must always be integrated with parallel programs of fiscal improvement, expansion of educational facilities, industrial development, administrative efficiency, and social modernization.

AN ATLANTIC ROLE?

In outlining the future economic program of Latin America, we should think in terms broader than the confines of the Western Hemisphere. It should not be forgotten that the whole economic future of Latin America, as indeed that of the United States, is intimately linked with the growing vitality of the Atlantic Community. Thriving trade, productive expansion, and the harmonization of international development plans and other foreign economic policies among the member countries are the objectives of the newly formed Organization for Economic Cooperation and Development.

By widening the membership of the OECD (the countries of Western Europe, Canada, and the United States) this Organization could constitute a major factor in the improvement of Latin America's economic position during the next quarter century. The United States should begin now to think of sponsoring some of the more industrially advanced Latin American countries such as Argentina, Brazil, Venezuela, Chile, and Mexico for membership in OECD. In this way Latin American views could be represented directly in the formulation of economic policy recommendations within the entire Atlantic Community of which Latin America is not only economically, but culturally and politically, a part.

Analyses of the Latin American situation frequently contain the misconception that the area is one in which virtually no responsible middle class leadership exists. This view sees a mass of poverty-stricken Latin Americans leading a hopeless life while a handful of incredibly wealthy and predatory families rule the nation. Such a picture distorts reality, weakens faith in evolutionary change, and increases the attraction of violent social solutions.

Poverty is a problem and one which cannot be ignored. Yet, a balanced view of Latin America today cannot overlook the large and growing middle class which has exerted and is exerting positive leadership. From this group there is emerging a substantial group of young men and women who are as socially responsible as their counterparts in any country in the free world.

Devoted to the system of private initiative which has contributed so much to the development of the United States, they see that the future of their area is in social responsibility and economic growth.

While spending an impressive amount of time and energy in halting the spread of communism in the hemisphere, they are also making every effort to bring their nations into full social maturity. The alliance for progress can only be effected in close and continuing cooperation with this democratic leadership.

The Inter-American Economic Conference will be a success if from it emerges the foundations of a development plan which takes full account of the realities. It will look to a dynamic partnership between government and private groups in all countries which will produce, in the coming decade, a flourishing New World of economic, political, social, and spiritual opportunity.

MORE DEFENSE CONTRACTS FOR NEW YORK

Mr. KEATING. Mr. President, over the last 3 months, New York State has made slight gains in the defense procurement picture as compared with the same period last year. In the April–June 1961 quarter, New York got 12.1 percent of military prime contract awards, as compared with 10.4 percent for the second 3 months of 1960. This is also an improvement over the figures for the first 3 months of 1961 when New York got only 10.6 percent of the Nation's total prime defense contracts. But since New York pays nearly 20 percent of the Nation's taxes, we still have a long way to go before we are breaking even, as it were.

Because of the very substantial drop in New York contracts in the first 3 months of this year, however, the percentage of all of 1961 so far computed, that is, January to June, is only 11.5 percent, as compared with 12.6 percent for both the first half of 1960 and the second half.

So the overall picture shows a very slight pickup, which I certainly hope will gain momentum as the year goes on. New York has a tremendous amount to offer defense-oriented industry. It has the manpower, the facilities, the transportation, and the know-how. What New York needs is continued aggressive sales policies for defense work and above all more of a break from defense procurement officers who still seem to favor western concerns over their eastern competitors. This is becoming an increasing problem since so much missile construction procurement work is being handled by officials on the west coast. It calls for continued vigilance by the Department of Defense in guaranteeing competition and a full and fair regard for all bidders, wherever they are located.

ROSH HASHONAH

Mr. HUMPHREY. Mr. President, at this time of Rosh Hashonah, the high holy days marking the beginning of a new year for Americans of Jewish faith, I want to give a traditional greeting to these fine Americans:

May you be inscribed in the book of life for a good year.

And may the God we share crown the coming year with the blessings of peace, the bonds of brotherhood, and the fruits of health and family well-being which all men seek.

As Jews throughout the world unite on Rosh Hashonah in praying for world peace, they will be voicing the aspirations of all who seek freedom and progress for themselves and their fellow men, the aspirations of all who respect human rights and human dignity.

GENERAL WALKER AND THE ACA INDEX

Mr. MUNDT. Mr. President, I make no pretext to being an authority on the case of General Walker and the treatment he has been accorded by the Pentagon as the result of charges made against the general by the smudgy, sexy, scandalous publication called Overseas Weekly. Astonishingly enough, it has now been disclosed that this cheap publication with its dubious backround and its filthy presentations is today being distributed to American troops in foreign posts by Stars and Stripes, an American publication officially connected with the Armed Forces.

Thus, we witness the curious paradox that while the United States concerns itself with pornography and obscenity by passing legislation to do something about sending it thru the mails of America and to curtail its distribution in this country, the Pentagon permits the Stars and Stripes to support the Overseas Weekly by utilizing its distribution service so this sexy journal can be made increasingly available to American boys and girls away from home. Obviously either the U.S. Senate or the Pentagon is wrong.

With regard to General Walker's accusers and the stern action taken against this distinguished fighting general, however, I am certain that one of the charges leveled against him is as phony as a three-dollar bill. Secretary McNamara told the Senate Armed Services Committee that General Walker was punished in part because he recommended that soldiers consult the Americans for Constitutional Action Index on how Congressmen and Senators have voted in order to acquaint themselves with the official positions of those representing them in Washington. If it is criminal or against public policy to recommend the widely

heralded and nationally recognized ACA Voting Index as a guidebook concerning what transpires in Washington and as to what the CONGRESSIONAL RECORD reveals throughout the year it must likewise be considered against present policy as defined by the Pentagon to recommend reading of the CONGRESSIONAL RECORD itself. Surely this is carrying the Pentagon's new fetish for secrecy to a ridiculous degree.

In connection with these remarks I invite attention to the column by Lyle C. Wilson, of the United Press, as published in today's edition of the Washington Daily News. After reading the Wilson column, I believe most Americans will agree that unless General Walker can successfully be charged with something more improper than recommending the reading of the ACA Voting Index the Pentagon should apologize to him publicly and restore him to an important command position in keeping with his abilities and with his performance record.

I ask unanimous consent that the Wilson article be printed as a part of these remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ACA INDEX

(By Lyle C. Wilson)

Defense Secretary Robert S. McNamara was saying that Maj. Gen. Edwin A. Walker was busted from his command in Germany for two reasons: His method of indoctrinating troops against communism; political activity forbidden by the Federal Hatch Act.

More specifically, Mr. McNamara said General Walker wrote for his division newspaper in 1960 a recommedation that his soldiers consult the Americans for Constitutional Action guidebook before voting. This guidebook more properly is known as ACA Index.

If any of General Walker's soldiers consulted the index and were convinced by it they surely voted against President Kennedy last year.

ACA is no John Birch Society. It is not primarily concerned with communism. The anxiety of ACA is about the Constitution of the United States. Adm. Ben Moreell, U.S. Navy (retired), is ACA chairman.

His ACA associate trustees include Herbert Hoover, Charles Edison, twice a Democratic Governor of New Jersey; Felix Morely, author and lecturer; Edgar N. Eisenhower, Ike's brother; Mrs. R. Templeton Smith, president of the Allegheny County (Pittsburgh, Pa.) League of Women Voters.

The ACA Index rates Members of Congress by rigidly conservative standards on their record of support of private enterprise. Admiral Moreel stated the purpose of the 1960 edition of the index, as follows:

"If anyone has wondered why the Socialist virus has been penetrating our oversized, centralized Government, resulting in higher and higher taxes, bigger and bigger public debt, and more people being pushed around by government than ever before in American history, he can find the answer in the ACA Index."

President Kennedy does poorly in the ACA ratings. On an analysis of selected Kennedy votes in the Senate classified by ACA as "for private ownership and against Government ownership," Mr. Kennedy was rated zero out of a possible 100 percent.

He was rated 11 percent "for individual liberty and against coercion"; zero again on national security.

The votes weighed in the national security estimate related to legislation dealing with communism, loyalty, sedition, States rights, and atomic energy.

Senator HARRY F. BYRD, Democrat, of Virginia, was rated 100, 88, and 90 percent, respectively, in the three categories.

ACA also provides a consistency index "For safeguarding the God-given dignity of the individual, and promoting sound economic growth, through strengthening constitutional government; against collective morality and socialized economy through centralized power."

LONG-RANGE IMPACT OF FOREIGN-AID-CREATED INDUSTRY ON DOMESTIC ECONOMY

Mr. WILEY. Mr. President, I have received a letter which relates to the difficulties a good many manufacturers are having in relation to imports. It is a letter which comes from Owensboro, Ky., the Electronic Components Division of the General Electric Co. The writer, Mr. Walter F. Greenwood, refers to certain comments I put into the CONGRESSIONAL RECORD. I ask unanimous consent that the letter may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GENERAL ELECTRIC CO.,
ELECTRONIC COMPONENTS DIVISION,
Owensboro, Ky., August 25, 1961.

Hon. ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILEY: Your statement on long-range impact of foreign-aid-created industry on domestic economy, reprinted on page 15405 of the August 10 CONGRESSIONAL RECORD, is the most penetrating and thoughtful consideration of this subject I have ever seen.

Although President Kennedy has stated that we must assist the growth of free economies throughout the world and do everything possible to maintain a vigorous domestic economy, too many of our leaders are concerned only about the foreign aid portion of the President's proclamation.

You, on the other hand, have directed your attention to the crux of the problem which so many others appear to be ignoring. Specifically, What action can we take to encourage growth abroad without laying waste to our own vital resources?

I have long been a strong supporter of the need for foreign aid and foreign trade. Frankly, however, I believe we have reached a point where we can no longer permit our foreign aid program to continue without instituting a system of control designed to maintain the vigorous economy on which the moneys for the aid are dependent.

Several times, in recent weeks, I have written to my Senators (THRUSTON B. MORTON and JOHN SHERMAN COOPER) requesting their support for this position by proposing an amendment to the foreign aid bill now under consideration.

My suggestions for such an amendment closely parallel the five recommendations you set forth in your statement on the floor of the Senate, although I fear my thoughts were not nearly so well stated as yours.

In my position as a manager of marketing in the Electronic Components Division of the General Electric Co., I can cite specific instances of the impact of foreign-aid-created industry on domestic industry. Let me cite, as an example, the crippling effect of imported receiving tubes from Japan on the domestic producers:

1. Imports in 1957 amounted to only 2 percent of domestic consumption. In 1961, we anticipate inroads of 16 percent (55 million tubes) and next year imports will reach approximately 22 percent (80 million tubes). In addition, over 10 million tubes come into the United States already installed in imported table radios.

2. Because of labor costs only one-eighth of ours, the average imported tube is less than half of the price we must charge to break even.

3. The 80-million-tube imports we anticipate next year will idle nearly 8,000 workers in the receiving tube industry.

4. Since imported Japanese tubes produce only 3 cents in tax revenue compared to 15 cents on an American-made tube, the tax loss resulting from 80 million tube imports will be over $9 million.

Americans everywhere should be grateful for the leadership you are providing on this vital subject. Please tell me what I can do to assist you.

Sincerely yours,

WALTER F. GREENWOOD,
Manager, Marketing.

ESTABLISHMENT OF A PERMANENT HOOVER-TYPE WATCHDOG COMMISSION ON FEDERAL EXPENDITURES

Mr. WILEY. Mr. President, in 1953 a 12-man bipartisan Commission was unanimously created by Congress to study and make recommendations for improving operations of the Federal Government. Headed by former President Herbert Hoover, the Commissions have made an invaluable contribution toward streamlining operations, as well as savings to the taxpayers. Following a report by the Commission, Mr. Clarence Francis, National Chairman of the Citizens Committee for the Hoover Report, stated:

> The greatest final value of the Hoover report, in fact, resides in its power to make citizens think about our Government and work unselfishly for its improvement. We are learning that we can't just hire a government, send it off about its business, and forget it. Our Constitution is not an eternal guarantee of freedom; it is simply a working franchise which must be renewed by the thought, and devotion, and good hard work of each new generation.

Now, I believe that the Nation would benefit from a permanent reactivation of the Hoover-type Commission to keep a watchful eye on Federal expenditures.

For the fiscal year 1962, the American taxpayer will be paying Federal bills amounting to about $88 billion to support necessary programs for defense, as well as for domestic progress. Mr. and Mrs. Citizen have demonstrated a patriotic willingness to bear a fair share of the responsibility.

With bigger and bulgier Federal budgets, however, there is definitely a need for a still more watchful eye on Federal spending. The establishment of a permanent Hoover-type watchdog Commission—acting as a guardian of the purse strings—could, I believe, perform a real service to the Nation. The objectives would include cutting out waste and duplication; stopping unnecessary competition among Federal agencies or services; eliminating activities that are nonessential or that could better be performed by: State and local governments; or private enterprise;

generally, to promote greater efficiency and economy.

Previous Hoover Commissions' recommendations have saved $3 to $4 billion annually.

I respectfully urge, therefore, that during the congressional recess the Senate Committee on Government Operations consider, and prepare recommendations for establishment of, a permanent watchdog committee to protect the interests of the taxpayer.

AVIATION DAY AT EPPLEY AIR TERMINAL, OMAHA, NEBR.

Mr. HRUSKA. Mr. President, on September 2 the city of Omaha celebrated Aviation Day with dedication of the new Eppley Air Terminal and with celebration of the 15th anniversary of Strategic Air Command with headquarters in Omaha.

On the evening of that day a formal banquet was held at which many notables were present. Among them was Gen. James H. Doolittle, whose remarks on the occasion were inserted in the RECORD on Friday, September 8. The master of ceremonies was the Honorable Arthur C. Storz, Sr., chairman of the Omaha Airport Authority, Air Force Association Man of the Year in 1955 and one of the Nation's aviation pioneers in his own right.

The remarks of Mr. Storz were very appropriate. I ask unanimous consent that the text of his message be printed in the RECORD.

There being no objection, the message was ordered to be printed in the RECORD, as follows:

TALK FOR SAC-AIRPORT DINNER, SEPTEMBER 2, 1961, BY THE HONORABLE ARTHUR C. STORZ

Today is an important day in Omaha's history. We are here tonight to give credit in general to the great strides made in aviation, both military and commercial; and I hope that many of you here tonight will get a better understanding of why it is so tremendously important for this great country of ours to keep on top and hold the No. 1 position in both categories. We can never afford any more to have another lapse take place and have our arch enemy, the Russian Communists, overtake us or surpass us in either of these fields.

Any references to the military side of this celebration will, I am sure, be more than amply covered by General LeMay, General Power, and Gen. Jimmy Doolittle, as there you have probably at least three of the most important and well informed people on this subject.

But I do want to repeat what I have said many times before, that Omaha is most fortunate in having the headquarters of the Strategic Air Command here and that it is probably the most important military base in the whole world. It means a great deal to Omaha in an economic way because of the large payroll and local expenditures made here. Most well informed people say that, economically, it means as much to Omaha as an additional city of 25,000 to 30,000 people would mean.

I hope that tonight we can have a real old-fashioned, patriotic revival on the part of our Omaha citizens. Too many of you have been willing to let someone else do the job that it was necessary to do—first, to get this great SAC Air Command for Omaha and then later to keep it here. Many of you oldtimers know that old Fort Crook, which was an old Indian post command, was the site of what later became Offutt Field. In 1941 the flying facilities were leased to the Glenn Martin, Nebraska bomber plant and during part of the following years it was occupied by the 2d Air Force. In 1948 the headquarters of the Strategic Air Command was moved to Omaha from Andrews Air Force Base in Maryland. With this new command came General LeMay who was the prime factor in bringing the Strategic Air Command up into its great importance where for years it has served as the most deterrent power on earth in keeping our Russian enemies at bay. Tremendous changes, of course, have been made in the Strategic Air Command and in our modern weapons since General LeMay brought it here in 1948.

A lot of Omaha people do not know, nor seem to realize, the great amount of effort it took to keep the SAC base here in Omaha. At certain times we had a lot of competition from other cities that wanted to grab this base from us. It took a lot of work and personal trips to Washington to see that important changes in barracks and living conditions and runway improvements and many other things were made so that it could remain a suitable and satisfactory base for this tremendous operation. So, I repeat, it just didn't happen. It took a lot of effort and it meant a lot of personal expenditure of time and money to get these things accomplished.

I am going to drop the SAC subject at this point because, as I said, I know other speakers will cover that point fully. I do want to say, however, that we are tremendously fortunate to have such a wonderfully capable man in charge of this operation as Gen. Tom Power. Many of you know that General Power spent quite a few years here previously as General LeMay's deputy and certainly he has done a tremendous job as General LeMay's successor as head of the Strategic Air Command.

At this point I know that you all want to join me in congratuling General LeMay on his appointment as Chief of Staff of the Air Force of the United States. I know that many of us are sleeping better nights when we know it is in the hands of such a capable, fearless, and aggressive person.

Transportation has always been of great importance in the development of our Nation. It began long ago, going back to the Pony Express which was at one time very important in this part of the country. Then followed the more important phase of the building and completion of railroads from coast to coast. No matter what people tell you and what other people may claim, at all times the methods and modes of transportation in this country were subsidized or partially subsidized by our Federal Government and this includes the steamship lines, the railroads, the truck and bus lines, and air transportation. Millions of acres of land were deeded to the railroads for right-of-way and not only were they given right-of-way land but they were given important adjacent lands to help make their venture pay out. Some of the railroads got valuable coal and mineral lands as well as oil lands, and this is a significant part of their revenue to this very day.

Bus and truck transportation, of course, couldn't become of any consequence until our highways were built to accommodate the tremendous number of automobiles that transport so many people all over the country. So Federal aid became necessary for our highways. When and as the airlines were developed over the last 40 to 50 years tremendous changes took place at airport facilities and landing places as, of course, an airplane couldn't land without a suitable landing area. This made Federal participation necessary in the development of a national system of airports and also a national system of air traffic regulations.

Omaha's history, as far as airports were concerned, was not too good and at times very bad. In the early days airport facilities in the shape of a good level cow pasture was adequate, but as the tremendous strides were made in aircraft corresponding strides had to be made in the development of satisfactory safe airport facilities—adequate to take care of the great advances and strides made in commercial aircraft.

I am sure that you all must be aware that an adequate system of airports is essential to a national air transportation system. To state the airport problem in its simplest form, each airport in the system must be able to accommodate safely the volume of traffic and the types of aircraft that can reasonably be expected to use it. Lacking that adequate airport capacity, there is on one hand the loss of the community to air commerce and on the other hand the loss of air transportation service to the community. General aviation is growing by leaps and bounds, including much greater use of larger aircraft. I am sure you are all aware that we are now experiencing all over the Nation wider airline use of the new jets, and we can surely expect rapid expansion of such use. Tomorrow and in the not far distant future the supersonic transport will enter the scene. To meet these demands we will have to continue to improve our airports and we will ultimately revolutionize our present system of air navigation and air traffic control.

Going back to the Omaha airport, let us stop to realize that in about 50 years' time air transportation has moved from the airplane that the Wright brothers first flew less than a block to the present status of where we already have in use commercial aircraft exceeding the speed of sound. We have four large aircraft manufacturers that are working on supersonic transport aircraft, which means aircraft of the future that will travel from 1,500 to 2,000 air-miles an hour. At least four of these manufacturers are represented here tonight and perhaps there may be more of them, but I do know that Douglas, Boeing, Lockheed, and Convair will have such commercial aircraft in the air within the next few years. And I want to emphasize again that an aircraft is no good in the air unless it has ample takeoff and landing facilities, and this means adequate airports.

Omaha had several airports in the very early days scattered in the area of Ak-Sar-Ben Field, also on North 16th, and also in the Fort Crook area, and about 35 years ago moved into our present area. The American Legion built the first very small hangar on this ground to take care of small aircraft that at that time had fabric wings. From that time on the airport lagged along, never catching up with the demands of aviation progress.

Omaha was fortunate in having been a town that was put on the route of United Air Lines which today is the country's largest airline and, of course, is transcontinental in scope. Throughout the years of development of the airlines, it was so hard to convince a great many people that the airlines would finally take over the greatest part of passenger transportation. Omaha, of course, was well known as a railroad center and many of the railroads did not want to acknowledge that this would be a fact. So, many of the railroads organized against anything that would help air transportation. The railroads took the same stand and opposed the development of our highways for bus and truck transportation and, of course, too, at times they fought the laying of pipeline for the moving of oil and fuel into various parts of the country. I suppose all of this was a natural thing for them to do. But our country was not the only country

that was making progress in air transportation, so regardless of what railroads or other people would have done, our country was faced either with helping the development of air transportation or taking a second place, worldwide, in air transportation. All of which spells out to the simple thing that you can't stop progress. When a country refuses to progress with the times, then it lapses into a second-rate country.

Some people, unfortunately, took the stand that I was opposed to the railroads and, of course, there is nothing further from the truth than this. Omaha was primarily, and still is, an important railroad center and the roalroads certainly meant a great deal in the development of our city. The railroads are, and probably will continue to be, the No. 1 factor in transportation. However; that transportation will probably be limited to the transportation of freight and not of passenger service. As a matter of fact, most railroads are dropping much of their passenger service wherever they can because it has not been profitable to them. I believe the railroads today are in agreement on the factor. I quote from the August issue of a Missouri Pacific News Reel pamphlet: "As is the case with all American industry, the opportunity to make a profit was the force that motivated the early railroad builders to risk their capital in stretching steel rails into the wilderness. They realized that the big profit would come from the transportation of freight. From a revenue standpoint the passenger business was always of secondary importance but it was a service they felt obligated to provide since the public needed and patronized it. Viewed in the light of modern-day retail merchandising, it was a sort of profitable sideline and it continued so until the arrival of the private automobile in the 1920's and the airlines in more recent years. There are some who contend that freight business can support unprofitable passenger trains. There was a time when passenger train losses could be absorbed by freight revenues but, with the decline in freight volume, this is no longer possible."

I could go on and quote additional information out of this railroad publication but, also, I could go on to tell of other important railroad changes such as the piggybacking of the U.S. mail and piggyback truck service, etc., all of which is comparatively new to the railroads. The railroads have many problems and they are working hard to correct them. Our country has a fine railroad system and I hope that our Government continues to support and give them all the help they need in working out their problems because certainly we do need the railroads now and in the future. I personally am for helping to make and keep them strong. Our country needs them strong.

But our country needs a strong system of air transportation. We need the finest, fastest, most dependable passenger carrying aircraft in the world. To meet this situation we need modern, improved airports. Airports are clearly a necessary part of the overall system of air transportation, and are needed for safe takeoff, flight, and the landing of fast, modern aircraft. They cannot be neglected now. They cannot be neglected in the future.

As new jet aircraft continues to improve and develop, new changes and improvements will have to be made in our airport. Airport construction is expensive. Building modern runways costs over $1,000 a running foot. A thousand feet of runway costs a million dollars or over. Our Omaha Airport is now extending our main runway 1,500 feet which means $1½ million.

When the Omaha Airport Authority was put together it was faced with almost insurmountable problems, the main one of which, of course, was money. Several bond issues which were voted on by the people were defeated by a well-organized minority. Revenue coming in from operations when we took over wouldn't allow the building of an airport any better than that of Billings, Mont., a city of about 35,000 people, and Omaha is 10 times that size. Many hours and days were spent in trying to raise and increase revenue so that we could do at least a reasonable job of construction. No matter how many times we figured it we always came up several million short.

One day at a meeting one of the members reminded me that I was a member of the Eppley Foundation and asked if I thought I could get the foundation to help us. One of them suggested asking for $250,000. I told them I didn't know what could be done but I thought we could get a million dollars as easily as we could get $250,000. So I set out to try to get a million dollars from the foundation. It wasn't an easy job because a majority of the foundation were not in favor at first. They pointed out that the Eppley Foundation charter was organized only for educational and charitable gifts or grants. I kept up a sales talk to the various members for over 6 months until I had a majority sold on a possible plan of amending our charter and getting the consent of the Internal Revenue Department for such as amendment.

You all know the result. The foundation granted the airport authority a million dollars. It was the first time the city of Omaha ever got a million dollars from anybody. That million dollars turned out to be worth about $3 million because we were able to get about $925,000 Federal matching money about 10 days before the old Airport Aid Act ran out. When the revenue bond people saw this new figure they extended our bond credit from $1,600,000 to $2,500,000 and our entire picture began to brighten and look more hopeful. Every possible source of revenue was carefully scanned, rents were raised, landing fees were raised, parking fee revenues were raised, advertising revenues were incorporated, and no source of possible income was overlooked. Then appropriate plans were drawn up to fit our income and cash position and the result is what you see out there today. A very fine, modern airport terminal building, not elaborate, but good. The walls are not even plastered. We didn't have the money so we painted the cement block walls. But I think you will be pleased with the result. From time to time I get questions from people who ask me, "Why didn't you do this?" or "Why didn't you do that?" and they all get the same answer, "We didn't have the money."

Right here I want to say a word of praise for all the members of the authority. We worked in entire harmony. After a matter was thoroughly talked out, the vote was always unanimous. Peter Kiewit was a wonderful help. His knowledge about building was invaluable. He gave us his engineers and his lawyers on many occasions. Often he made special trips from the west coast to Omaha to attend a meeting. Jim Moore also did a wonderful job. His advice on our financial problems was invaluable and he saved us large sums in our bond negotiations. He gave us much help from the legal staff of his organization. He is a great help in many ways. Mike Flannigan and Jim Regan were also of great help. All of these men gave much time away from their businesses to take care of airport matters. Many times a whole day was devoted to the cause. I want to thank them one and all for their wonderful cooperation. They are all here except Pete Kiewit who is in the hospital as the result of an accident on his ranch.

Another man picked out for special praise is Dick Mooney, our airport director, who has done an outstanding job. He has a fine knowledge of airport problems and has worked many extra days and extra hours without extra pay. He is a wonderful asset for us. I also wish to express a real word of praise for Leo Daly, our architect.

Our airport problems are solved for the present but not for the indefinite future. Omaha may have to assist moneywise in the future if more capital demands arise. You won't be able to "pass the hat" for funds like we did this time, nor should we.

I can say to you gentlemen that it takes a long time to condition a town for capital improvements. There must be a propitious time. There must be a consideration of other requirements as well as the airport. I think our city of Omaha is undergoing a conditioned change to the real needs of certain other capital improvements in our civic structure. But an airport, too, must take its place along with schools, sewers, and parks and streets and highways. The city of Omaha owns the airport just as they own our schools and parks, and they must accept the responsibility of its future demands.

There is a definite need for both civil and military airports. One complements the other. Commercial aircraft in the sky and in real trouble can always go to the nearest military airport for emergency landings. And, of course, in time of war, military aircraft can always make use of civilian airports.

Defense is our most important problem of this day and age, and don't ever forget it. We are in the state of real grave emergency today. We are at war, a war of many fronts. On the economic front the war is just beginning. On the military front we are still sparring. On the ideological and technological fronts we are in all-out conflict. Basic to our very survival and that of the free world is a military posture second to none in the decisive weapons of modern warfare, specifically the weapons of modern aerospace war. Our Nation is lagging behind the Soviet Union in many fields. We have a determined adversary who is tough and as energetic and as dynamic as our American people were 150 years ago.

I feel I cannot terminate my remarks here tonight without mentioning the Air Force Association. This is an organization made up of 60,000 citizens. It is not a military organization but it believes in total aviation activity—civilian and military, commercial and private, potential as well as existing—and this means aviation in its largest sense, including space flight. The Air Force Association takes a leading part in our space education, and it takes a leading part in our whole defense situation. I have been on the board of directors of the Air Force Association for quite a few years. We have here in Omaha the largest AFA squadron in the country. The Ak-Sar-Ben Squadron has taken an active part in this 3-day celebration and has helped to underwrite it. It is our hope that this 3-day activity, Omaha salutes aviation, will develop a new spirit of patriotism among more of our citizens. We must have it if our Nation is to survive as a free nation.

I am proud of my activity in behalf of SAC headquarters here and of working with them throughout the years so that our people might have a better understanding of their problems.

I am proud of the fact that my efforts over the years in trying to get a better airport have finally come to a successful conclusion. It meant a lot of hard work but I feel well repaid in the end result and in the many fine friends I have made in civil as well as military aviation circles. I have made many good friends both in and out of the service in almost every part of the United States and Europe and they are a great source of satisfaction to me. I feel I have been well repaid for all my efforts in the past and have many fine recollections of my various experiences.

Thank you.

ARMS CONTROL AND DISARMAMENT AGENCY

Mr. HRUSKA. Mr. President, the Senate last week cast an overwhelming vote in favor of establishing a U.S. Arms Control and Disarmament Agency for World Peace and Security. The Senator from Nebraska voted against enactment. The Senate defeated a motion by the distinguished minority leader which would have referred the bill to the Committee on Armed Services so that we could have the benefit of consideration by that committee. The Senator from Nebraska supported that motion, which was defeated.

Mr. President, establishment of a disarmament agency at this time is poorly timed, coinciding at it does with Premier Khrushchev's ominous threats to the free world, and his heavy resumption of atomic bomb tests.

It seems appropriate, Mr. President, to examine exactly what we have done. An editorial in the September 7 issue of the Omaha World-Herald maintains that we consorted with unreality. It terms our consideration of the bill an "ill-timed idiocy."

As a contribution to reflection upon our recent action, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ILL TIMED AND FOOLISH

Of all the ill-timed idiocies with which the Congress is confronted, the move to establish a disarmament agency is the worst.

Nikita Khrushchev torpedoed any hope of slowing the arms race when he resumed nuclear testing. Even the most determined of wishful thinkers can understand that.

Therefore, to talk and act as if disarmament were possible in September 1961 is to consort with unreality. Yet the babblers in Washington and at the United Nations keep on promoting H.R. 7936, the bill to set up a disarmament bureaucracy.

FEDERAL EXPROPRIATION OF PRIVATE UTILITY TRANSMISSION LINES LINKED TO UPPER COLORADO PROJECT TRANSMISSION LINE FIGHT

Mr. BENNETT. Mr. President, this is the week in which the House of Representatives will decide whether or not the development and conservation of water under the upper Colorado River storage project will be sacrificed on the altar of public power.

At issue is the question of who should build the transmission lines to serve the upper Colorado project, private industry or the Federal Government. Acceptance of the private utility offer will result in a savings to the taxpayers of an initial investment cost of at least $136 million. On the other hand, if the Federal Government builds the lines, fully two-thirds of them will duplicate existing private lines. Under the private utility offer, over $122 million more will be made available for irrigation projects over the next 54 years, as compared with the amount available if the Federal Government builds the transmission lines. Even at the end of the Bureau of Reclamation's 86-year study, over $14 million more would be made available for irrigation if private lines rather than Federal lines are built. Moreover, the Bureau of Reclamation has recently added additional transmission lines to its proposal, and the Upper Colorado River Commission has determined that these additions will reduce the irrigation assistance to States by an additional $50 million.

In view of the many advantages of private construction of the lines, and since power will be delivered to the load centers in the upper basin States at 6 mills under both proposals, it has been apparent that there is more than meets the eye in the strident opposition of the public power groups to private construction of the lines. This was confirmed by a letter which I received from I. W. Patterson, manager of the Empire Electric Association, Inc., of Cortez, Colo., one of the principal public power groups fighting for Federal construction of the lines. Enclosed with the letter from Mr. Patterson was a copy of the August 15 issue of the Electrical West Industry News Letter. In referring specifically to an article on the front page of the newsletter, Mr. Patterson states:

It appears that the people of Canada are developing their own rivers and not allowing the power companies to interfere. It is a deplorable situation when five profit-hungry utilities attempt to dictate to the U.S. Government on the development of a great river basin. The privately financed utilities would do better to develop their own lines and leave this river development to the people who were authorized to build it.

I immediately read the newsletter and discovered that Mr. Patterson expressed approval of and impliedly endorsed the action taken by the Canadian Government to nationalize and expropriate the property of the British Columbia Electric and Peace River Power Development Cos.

It is apparent, therefore, that Mr. Patterson and his association approve not only of river development by the Governnemt of British Columbia, but also the nationalization of private utilities. This is precisely what many people have feared would happen if public power groups, aided and abetted by Secretary of Interior Stewart L. Udall, obtain the vast nationalized power transmission grid, which is unquestionably and avowedly their aim. That is why they are willing to sacrifice water development to power for themselves and at the same time ignore the economics of the project. Most of the public power people look upon the upper Colorado project transmission lines as a vital link in a great nationwide power grid, paid for initially by the Federal taxpayers. Once this goal is obtained, our country will be only a step or two away from complete nationalization of power.

The transmission lines which Mr. Patterson wants the Federal Government to build would link the Hoover, Parker, Davis projects and the Central Valley project of California with Federal lines in the Missouri and Mississippi Basins and, of course, with TVA. Couple this with the uneconomic Hanford atomic energy generators, which were proposed principally to justify additional Federal transmission lines, making possible the linking of the Pacific Northwest with California, and the basic outline of the nationwide grid is revealed.

I hope that my colleages will now realize that a nationalized transmission grid is one of the principal issues in the fight over who should build the upper Colorado project transmission lines. I ask unanimous consent that Mr. Patterson's letter, together with the article to which he referred, may be placed in the RECORD at the conclusion of my remarks.

There being no objection, the letter and article were ordered to be printed in the RECORD, as follows:

EMPIRE ELECTRIC ASSOCIATION, INC.,
Cortez, Colo, August 30, 1961.

Hon. WALLACE FOSTER BENNETT,
U.S. Senate,
New Senate Office Building,
Washington, D.C.

DEAR SIR: Enclosed is a copy of the August 15 issue of the Electrical West Industry News Letter. We would like to call your attention especially to the article on the front page.

It appears that the people of Canada are developing their own rivers, and not allowing the power companies to interfere. It is a deplorable situation when five profit hungry utilities attempt to dictate to the U.S. Government on the development of a great river basin. The privately financed utilities would do better to develop their own lines and leave this river development to the people who were authorized to build it.

We urgently request your vote for the all-Federal transmission system for the Colorado River storage project.

Very truly yours,

I. W. PATTERSON,
Manager.

MIDMONTH REPORT TO THE WESTERN ELECTRICAL INDUSTRY

Government seizure of British Columbia Electric and Peace River Power Development Cos. was approved without a dissenting vote by the British of Columbia Legislative Assembly in special session August 3. Nationalization, made retroactive to August 1, reportedly came as a surprise to utility management.

Although rumors of expropriation had been voiced during political bickering between Ottawa and the Provincial government over Columbia River development, apparently British of Columbia Premier Bennett's threat of a takeover was generally thought to be a bluff.

Ironically, while Bennett was proclaiming British Columbia Electric a crown corporation, a funeral service was being held in Vancouver for Dal Grauer, chief executive of the utility and its parent, British of Columbia Power Corp. Dr. Grauer, who died July 28 of leukemia, masterminded British Columbia Electric's $650 million postwar expansion.

The takeover was effected by enactment of bill 5 or the Power Development Act of 1961. Although existing legislation would have allowed the seizure, Bennett considered the extraordinary implications warranted a special act.

The new bill empowered the Government to convert British Columbia Electric into a crown corporation through (1) purchase of British Columbia Electric common shares,

held by the parent corporation, for $110,985,045; (2) issuance of $100 million in special Government bonds to replace British Columbia Electric shares; (3) assumption of British Columbia Electric debts estimated at about $399 million.

The Government promised it would, if necessary, take over other assets of the parent corporation, including British Columbia Engineering and Western Development & Power. British Columbia Power Corp. may demand that British Columbia Electric buy it out at $38 a share, which would require an additional $67,014,955.

Peace River Development Co. will receive the amount spent on engineering studies and surveys, estimated at between $5 and $7 million.

Under provisions of the act, all directors in the private company were dismissed. A new six-man board is headed by Dr. Gordon Shrum, former dean of graduate studies at the University of British Columbia and the Premier's hydro troubleshooter since 1958, President Harry Purdy was asked to continue in office and has disassociated himself with British Columbia Power Corp.

In San Francisco August 9 for the opening of British Columbia House, Premier Bennett declared the Province friendly to private enterprise and said that the Federal tax on private utilities resulted in high-cost power. (For some months he had been pressing Ottawa for abolishment of the special Federal tax on privately owned power corporations or for a larger share for British Columbia. Last March British Columbia got $260,000 as its share of taxes, estimated at $1,700,000.)

British Columbia cities have had no assurance as yet of what, if any, "in lieu" taxes they can expect. Vancouver alone received some $1,800,000 annually from British Columbia Electric.

Bennett said that the Peace River project would be started immediately. A Columbia start is further away because the treaty must be ratified by Ottawa and financing arrangements have still to be made. The Premier has indicated, however, that he expects the Federal Government to allow export of power to the United States and while in San Francisco he spoke of possible sale in California.

Although the British Columbia Energy Board in its report made no firm recommendation that the Peace and Columbia be developed simultaneously, it said such a procedure was feasible, if export were allowed. The energy board said further that both are sound from an engineering viewpoint and cost would be almost identical if they were Government developed. Its estimate: Columbia, 4.4 mills; Peace (private), 6.59 mills; Peace (public), 4.37 mills.

As presently planned British Columbia Electric and British Columbia Power Commission will be kept separate, with the former developing the Peace and the latter the Columbia. Bennett said, however, that if Ottawa permanently blocked the Columbia development the two would be merged.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. METCALF in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PIPELINES AND OTHER WORK FOR AVONDALE, DALTON GARDENS, AND HAYDEN LAKE IRRIGATION DISTRICTS IN THE STATE OF IDAHO

The Senate resumed the consideration of the bill (S. 923) to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho.

Mr. CHURCH. Mr. President, I appreciate the opportunity to make a brief statement on behalf of the bill.

These irrigation districts are located a few miles north of Coeur d'Alene, Idaho, and together comprise 3,283 irrigable acres. Water is pumped from Hayden Lake for the projects. The facilities—constructed by the Government to replace an existing inadequate system—include pumping plants, storage tanks and distribution facilities. The three districts are made up of many relatively small and intensively developed full and parttime farms.

At the time the systems of these districts were rehabilitated on an emergency basis, bare steel pipe was installed, which was justified by careful consideration of soil and water conditions, and a review of the long and successful life of other bare steel pipe installations in the area. Previous studies had shown the soils in the project area to be free draining and nearly acid free. One existing galvanized and uncoated steel pipe system which had seen extensive use in the area for nearly 50 years was still in good serviceable condition. The Armco Steel Corp. recommended the use of its bare steel pipe at the sites in question.

Works were completed in 1955 for the Avondale and Dalton Gardens Irrigation Districts. The first leak developed 3 years later. In 1960, the Bureau of Reclamation completed a corrosion survey report for the three districts which confirmed that excessive corrosion was greatly shortening the life of the pipelines. Several failures have been experienced with light-gage pipe, and it is anticipated that more will occur in 1961. While these failures were disheartening, they benefited other areas. As a result, designs for such projects as the greater Wenatchee division of the Chief Joseph Dam project, now under construction, have been improved and the pipe systems involved will have a far longer life. Designs for the recently authorized Spokane Valley project, originally to have included bare steel pipe, are being modified to avoid a repetition of the Hayden Lake failures. Since benefits from the knowledge gained are widespread, the Department of the Interior believes the costs should be shared and not made an obligation to be assumed only by the three small irrigation districts for which the first extensive closed pipe systems were constructed. Since the original work was authorized under authority of the appropriation acts, authorizing legislation as well as appropriation of funds will be required before the work can be done.

Of the total cost for the replacement and lining work estimated at $1,486,000, water users would repay about $160,000. However, total repayment by the three districts should be compared with total expenditures by the United States for project works now estimated at $2,499,238. Total repayment by the water users is expected to be around $1,217,000, or approximately 50 percent of total costs. The proposed repayment arrangements thus compare very favorably with other recently authorized irrigation projects. Those costs not paid by the irrigators would be returned from power revenues of the Bonneville Power Administration.

The cost of extensions, additions and improvements, exclusive of replacement or lining of facilities previously installed by the United States, would be repaid in addition by the irrigation districts. Such work would be undertaken only at the request of the districts. Prior to approving construction of such works, the Secretary would ascertain that adequate additional amortization capacity would be generated to enable the necessary further repayment by the districts.

It has been the determination of the Department that any extensions or additions contemplated to be made under this section would result in additional payment capacity by the lands of the district at least equal to the additional payments which would be required.

Mr. President, I feel this is a very important bill, and, as amended, it meets the approval of the Department of the Interior, and the Bureau of the Budget has no objection to its enactment. I hope the Senate will act favorably upon it.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I yield.

Mr. WILLIAMS of Delaware. Am I correct in understanding that the proposed work is required because of a faulty job which was done about 5 years ago?

Mr. CHURCH. The Senator from Delaware is correct.

Mr. WILLIAMS of Delaware. Was that the result of bad engineering or of the use of poor material?

Mr. CHURCH. I think it is acknowledged now that the Bureau of Reclamation engineers made a mistake of judgment. They say, in their defense, that the bare steel pipe which had previously been used in the area had proved to be very satisfactory.

Mr. WILLIAMS of Delaware. Are we to understand that the material which was used was not up to standard?

Mr. CHURCH. As I understand, the material was up to standard, but the soil and water characteristics were not as the engineers thought them to be. The result was that corrosion of the pipe, which it had been thought would last for a long period of time, took place in very short order.

Mr. WILLIAMS of Delaware. Then, the fault was the result of bad engineering?

Mr. CHURCH. It was a case of mistaken judgment.

Mr. WILLIAMS of Delaware. Who is responsible for the engineering work at this time? The same engineers as handled the original job?

Mr. CHURCH. I could not say as to the individual engineers; but, of course, the original planning was done by the Bureau of Reclamation, and the revised planning under the bill has also been done by the Bureau.

Mr. WILLIAMS of Delaware. As I understand, this work was originally planned to be amortized by the users over a period of 40 years. The pipe has gone bad in 5 years. What will happen to the amortization? Will the users have to continue to pay for 35 years for the old pipe and for the new as well?

Mr. CHURCH. The original obligation of the water users remains the same. Any additions to the system which may result from the bill now under consideration would be fully paid for by the water users. But the cost of replacement will be largely borne by the Government, due to the fault of the Government in the first instance.

Mr. WILLIAMS of Delaware. If the Government made a mistake, I can understand its standing back of its agreement and paying for the mistake. But I wonder if we are not letting the same persons who made the original mistake do the job over again. Certainly some competent engineers should be engaged now. It seems to me somebody blundered by planning a project designed to last 40 years, but which has gone bad in 5 years. I am a little concerned that the same employees may be out there now and may make a similar mistake. Of course, we cannot legislate against mistakes, but we should make certain that competent engineers are now in charge of the work.

Mr. CHURCH. I understand the Senator's concern. In defense of the Bureau, I must say that the use of the bare steel pipe in adjoining areas had proved satisfactory in previous years; and it was on the basis of that experience that it was thought the bare steel pipe would be satisfactory in this case. However, I am told that because of the peculiarities of the soil and the water, rapid deterioration of the pipe resulted.

Mr. WILLIAMS of Delaware. Should not a competent engineer take those factors into consideration when he made the original recommendation?

Mr. CHURCH. I would say that on the basis of experience they had had at the time when the original project was approved, all indications were that the bare steel pipe would prove satisfactory; and this was the judgment not only of the Bureau's engineers, but also of the Armco Steel Corp.

Mr. WILLIAMS of Delaware. What is expected to be the total cost of replacing this work—both the material cost and the labor cost?

Mr. CHURCH. I call the Senator's attention to the first page of the committee report, wherein it is stated that the bill authorizes that there be appropriated not more than $1,611,000. This represents the anticipated replacement cost, plus the cost of any new additions to the pipeline system.

Mr. WILLIAMS of Delaware. The original project cost $1,010,662; is that correct?

Mr. CHURCH. That is correct.

Mr. WILLIAMS of Delaware. And it will now cost $1,611,000 to correct a blunder made by the engineers 5 years ago—60 percent more to replace the work than to have done the job correctly in the first place. Is that correct?

Mr. CHURCH. It is substantially correct, due to the increased costs which have occurred in the interim and also to the fact that the pipe system has been installed underground, and so the replacement costs are high.

Mr. WILLIAMS of Delaware. Of course it will cost something to tear it out and put it back again. But I see no assurance that the same engineers who made the blunder will not be the ones in charge of this new project. Is that correct?

Mr. CHURCH. I think the Senator from Delaware can be assured that, on the basis of the past experience, the proper kind of pipe will now be installed, and that the judgment of the Bureau will be corroborated by the judgment of very competent engineers of private companies retained to do the work.

Mr. WILLIAMS of Delaware. But my question is whether the same engineers—insofar as the Bureau of Reclamation is concerned—who made the blunder 5 years ago will be in charge of the new project.

Mr. CHURCH. I cannot answer that question, except to say that in all likelihood there has been the normal turnover in the 5-year period. But the Bureau continues to be responsible for the project; and therefore the Bureau will lay out the standards for the replacement, as the Bureau laid out the original standards.

Mr. WILLIAMS of Delaware. The Senator from Idaho states that the Bureau of Reclamation is responsible for the project. It would be plainer language, I believe, to say that the Bureau is now being held responsible for its earlier irresponsibility, with the result the taxpayers are being "stuck" for $1,611,000. What is worse, apparently the ones who made the blunder will still be in charge.

Personally, I think the committee should have given some consideration to checking as to the type of engineers who will be allowed to continue with this work, because I see no way in which the Government will be repaid the $1,611,000 provided for in the bill. It seems to me that the taxpayers are being called upon to pay $1,611,000 for the blunder made 5 years ago, to replace a project which was improperly handled from the beginning.

Mr. MANSFIELD. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I yield.

Mr. MANSFIELD. In view of the valid statements made by the senior Senator from Delaware, it is my view that the Bureau of Reclamation will read this debate and will proceed accordingly. I also anticipate that the Senator from Idaho, who is in charge of the bill, but who was not here when the original work was undertaken, will seek to ride herd on the project, this time, through contacts and correspondence with the Department of the Interior, and, it may be, through personal trips to the site of the installation, in order to see that the work done, now, 5 years after the original project, is properly done.

Mr. WILLIAMS of Delaware. Under the circumstances, I suppose that is about all that can be done. But I believe some consideration should be given to the question of whether those who made the blunder are still on the payroll and would be used again for this work.

Mr. KUCHEL. Mr. President, will the Senator from Idaho yield?

Mr. CHURCH. I yield.

Mr. KUCHEL. I should like to point out that in the committee report which has been filed in support of the bill, it is stated:

> The total cost of the work previously performed under the authority of the appropriation acts is $1,010,662 and the districts are presently obligated to pay this amount in full.

I think it might be helpful to have the context of the committee's statement in the report made a part of the RECORD.

Mr. CHURCH. I thank the Senator from California, and I ask unanimous consent that the substance of the committee report be printed at this point in the RECORD.

There being no objection, excerpts from the report (No. 781) were ordered to be printed in the RECORD, as follows:

> The purpose of S. 923 is to authorize the Secretary of the Interior to replace lateral pipelines, perform interior lining of discharge lines, and do other work he determines to be required in the replacement, modification, or improvement of facilities heretofore constructed by the United States for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho.
>
> NEED
>
> Replacement of pipelines or lining of existing pipelines serving the three districts is necessary because of accelerated interior and exterior corrosion and deterioration of such pipelines. Corrosion has penetrated the pipe in numerous places and it is estimated that 50 percent or more of the surface area of the lighter gage pipe will be penetrated before 1963 and the situation will grow progressively worse. Considering that the fact that the livelihood of a large number of farmers is dependent upon the proper functioning of this distribution system, the need for replacement is considered urgent.
>
> BACKGROUND
>
> The three irrigation districts comprise a total of 3,283 irrigable acres—914 acres in the Avondale Irrigation District, 944 acres in the Dalton Gardens Irrigation District, and 1,425 in the Hayden Lake Irrigation District. The

districts are located a few miles north of the town of Coeur d'Alene. They contain many small, intensively cultivated farms. Over 500 ownerships are involved, most of which are under 10 acres in size. Water is pumped from Hayden Lake into the all-closed pipe distribution system.

The irrigation works, including pumping plants, storage tanks, and distribution facilities, were constructed by the United States in 1954, 1955, and 1957 for the three districts on an emergency basis to replace existing inadequate and badly deteriorated systems. The work was accomplished under authority of the Interior Department Appropriation Acts of 1954 and 1955 and the Public Works Appropriation Act of 1957. The decision of the Bureau of Reclamation that the installation of bare steel pipe would satisfactorily meet the project requirements was made after careful consideration of soil and water conditions and review of the long and successful life of the other bare steel pipe installations in the area. Studies and analyses of the soils in the project area at that time showed that the soils were free draining and nearly acid free. Existing galvanized and uncoated steel pipe in extensive use in the area for nearly 50 years was found to be in good serviceable condition. The Armco Steel Corp. recommended the use of its bare steel pipe at the sites in question. There were other indications that bare steel pipe would be adequate.

Although there was every indication that bare steel pipe would be satisfactory when the designs and estimates were prepared for the Dalton Gardens and Avondale projects, the cost estimates were prepared for three alternatives—bare steel pipe, coated and wrapped steel pipe, and asbestos cement pipe. Because the estimates were higher than had been expected, only the estimate of the bare steel pipe came within the cost limitation provided in the appropriation acts, and this was an additional factor which contributed to the decision to use bare steel pipe for the Dalton Gardens and Avondale projcets. Although the Hayden Lake system was constructed 2 years later, a corrosion survey was determined to be unnecessary because, in the interim, such a survey had been made in the Spokane Valley which had comparable soils and that survey also provided evidence that bare steel pipe would be satisfactory. Therefore, bare steel pipe was also used in the Hayden Lake system.

Within a few years after construction of the first two systems many leaks developed. Field investigations revealed excessive corrosion of both the inside and outside surfaces of the pipe. The Chief Engineer of the Bureau of Reclamation completed a corrosion survey report in 1960 for the three districts which confirmed the fact that excessive corrosion was greatly shortening the life of the pipelines. The report concluded that the external corrosion probably was caused by the presence of highly cathodic mill scale and was aggravated by variable soil conditions. The report also indicated that internal corrosion was related to the presence of oxygen at a saturation level in the water with a sufficient amount of chloride and sulfate ions to accelerate corrosion.

WORK TO BE PERFORMED

The plan for rehabilitation calls for replacement of all the lighter gage pipe and lining of the larger diameter and heavier gage main lines and pumping plant discharge lines. Replacement would be with asbestos cement pipe or mortar-lined and coated pipe which will withstand the corrosive effects of the water and the overlying soils. In addition to the replacement or lining, limited extensions and improvements of the facilities would be authorized.

COMMITTEE AMENDMENTS

The committee adopted the amendment recommended by the Department of the Interior which limits the amount which can be spent for extensions, additions, and improvement to $125,000.

The committee also changed the repayment period for the contract covering the new work to 40 years instead of 50 years. Since repayment is based upon the ability of the water users to repay, the annual payments would remain the same under the amendment and the total amount repaid would be reduced with a corresponding increase in the amount paid from power revenues of the Bonneville Power Administration.

The other amendment adopted by the committee places a limitation on the amount authorized to be appropriated. The amount is $1,611,000 and is based upon the estimates furnished by the Bureau of Reclamation.

FINANCIAL ASPECTS

The total cost of the work previously performed under the authority of the appropriation acts is $1,010,662 and the districts are presently obligated to pay this amount in full. The total cost of the replacement and lining work authorized by S. 923 is estimated at $1,486,000. The bill provides for repayment to the United States toward the cost of the new work in amounts equal to the repayment ability of the water users. Before construction is started the districts would be required to enter into a contract whereby they would continue to pay for 40 years from the date of completion of the work. It is estimated that during the 40-year contract period the districts would repay about $160,000 toward the cost of the new work. The districts would, of course, continue to meet their obligations under the present contract. The remaining amount of about $1,326,000 for new work which is beyond the ability of the water users to repay would be returned from power revenues of the Bonneville Power Administration. Current financial studies of the Bonneville power system indicate that surplus power revenues to repay this amount would be available for this purpose in 1994.

The cost of extensions, additions, and improvements would be limited, under language of the bill, to $125,000 and this amount would constitute an additional obligation of the districts, and payment thereof would have to be made concurrently with the other annual payments.

In summary, the districts would repay about 50 percent of the total expenditures of the United States.

Mr. WILLIAMS of Delaware. Mr. President, the Senator has pointed out that the $1,010,662 is to be repaid over a period of 40 years. But the pipe has now gone bad in 5 years. We are already replacing the entire project.

Mr. CHURCH. I wish to express my appreciation for the comments made by the Senator from Delaware. I am very mindful that a mistake was made. It occurred prior to the time I had any connection with the project. But the mistake has to be rectified; and I personally will take a very special interest in the work that is done, and will do everything possible to satisfy myself that the new project is competently engineered, so there will be no repetition of past mistakes in the future.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The amendments were agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 923) was ordered to be engrossed for a third reading, and was read the third time.

Mr. CHURCH. Mr. President, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from the further consideration of House bill 4458, and that the Senate proceed to the consideration of that bill.

Mr. KUCHEL. Mr. President, reserving the right to object, let me ask the Senator from Idaho whether the ranking minority members of the committee have been contacted in regard to this matter.

Mr. CHURCH. Let me say that the House bill is identical to the Senate bill.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered; and the Senate will proceed to the consideration of House bill 4458.

The Senate proceeded to consider the bill (H.R. 4458) to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho.

The PRESIDING OFFICER. Let the Chair inquire if there is any difference between the two bills.

Mr. CHURCH. No; they are identical.

The PRESIDING OFFICER. House bill 4458 is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 4458) was ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 923 will be indefinitely postponed.

THE SHAME OF A NEUTRAL

Mr. ERVIN. Mr. President, Dr. Frederick Brown Harris has written an outstanding article entitled "The Shame of a Neutral." The article was published in the Washington Star of September 10.

All Members of the Senate who are privileged to have daily association with Dr. Harris are well acquainted with the depth of his wisdom and the eloquence of his words. I am so much impressed by the excellence of this article that I ask unanimous consent that it be printed in the body of the RECORD.

I wish to add that the article illustrates anew the everlasting truth that the only men who make any contributions of value to this earth are those who prefer to die upon their feet, rather than to live upon their knees.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SPIRES OF THE SPIRIT—THE SHAME OF A NEUTRAL

(By Dr. Frederick Brown Harris, Chaplain of the U.S. Senate)

A neutral is a human chameleon. A chameleon is a colorful little animal which makes its hue fit into its environment. It changes to match its surroundings. That is nature's way to keep this crawling creature out of danger. Neutrality is its protection.

But a man is not a concealing lizard. Yet, who has not known smooth and agreeable folk who proceed cautiously across all areas of life taking on a different tint or hue according to the situation in which they find themselves? They choose no color of conviction and maintain it against all odds.

But today's heights have not been achieved by human chameleons. Civilization has climbed up the ascending years held together by convictions which are more dear than mortal life. No man has really lived until he bets his life on some principle for which he would die.

Robert Ingersoll used to convulse great audiences with his clever castigations of conventional religion as he ridiculed the sins of the saints. But on more than one occasion when, because of his irreverent jibes, laughter had swept his audience, he paused and said solemnly, "But, ladies and gentlemen, do not forget that tonight we are not naked savages dancing around some campfire, because back there were men and women, our ancestors, who were willing to die for the things they believed."

An outstanding religious leader was speaking out of the deepest admiration concerning certain native Christians who had given their lives rather than to deny their faith. Then, with a touch of facetiousness, he added, "But if I had been in their place, with a sword held over my neck and had been told that I could confess my faith and die, or deny it and live, I greatly fear that I would have said to the tormentors, 'If you let me up for 10 minutes I think I can make a statement satisfactory to all concerned.' "

Statements satisfactory to all concerned are the bane of this so-called tolerant day when neutralism and appeasement are becoming more and more a moral fashion. There is dire danger that one may become so tolerant of everything that he will defend nothing to the death with the specious defense "a man must live." The worth of a conviction not for sale was instilled in countless plastic lives by the old-fashioned golden-text colored Sunday school card. One was a Bible figure of long ago about whom childish lips sang lustily. This man refused to buy safety in alien Babylon when he was told he could have it by bowing down to pagan gods. This was the verse we sang.

"Dare to be a Daniel,
Dare to stand alone,
Dare to have a purpose true
And dare to make it known."

Who has not encountered those whose motto is comfort and safety first and whose favorite seat in any contest is the fence? Such persons aim to please all sides by not taking sides. They seem to choose the permanent role of being an inquiring neutral.

This is true even with regard to the titanic global struggle now going on between decency and deviltry, between honesty and chicancery, between freedom and slavery, and between a loving God and blind force. Such neutrality is the gateway through which the Trojan horse of destruction enters into the city of compromise.

The shame of a neutral may be branded upon the brow even of those who are cataloged by the community as good. To be really good is to be good for something. Genuine goodness always possesses a sword—and there are times when the sword is unsheathed and grasped by a hand unafraid. It has been truly said that by superior energies, and by a firmer faith in their unhallowed objectives, the bad often win over the weak and vacillating.

In a day like this, above all else, we need those with convictions who go valiantly as far down the road of faith as did the three young men facing the fiery furnace and who said with its hot breath scorching their faces, "Our God whom we serve is able to deliver us." Then comes those steel-ribbed words, "But If Not"—still they would make no detour. Here then is the conclusion of the whole matter. The fact is that it is shameful to be neutral about the vital issues of life, broadminded about all creeds but committed to none, agreeable for safety's sake to compromise with evil, liberal about all ideas by holding no personal convictions which are not for sale and which like steeples point to the sky.

"Yes," says one, "that is all very high sounding, but after all a man or a country must live." Ah, that is the shame of the neutral.

"But is it so? Pray tell me why
Life at such cost you have to buy?
In what religion were you told a man must live?
There are times when a man must die.
Imagine for a battle cry this coward's whine,
This liar's lie—a man must live!
The Saviour did not live. He died—
But in His death was life for all mankind."

NORTH CAROLINA BEAUTY CROWNED MISS AMERICA

Mr. ERVIN. Mr. President, on last Saturday evening, at Atlantic City, N.J., one of North Carolina's fairest daughters, Miss Maria Beale Fletcher, of Asheville, was selected as Miss America.

Her beauty, charm, grace, intelligence, and talent certainly justified the decision of the judges.

I ask unanimous consent that there be printed in the body of the RECORD, as a part of my remarks, a portion of the news item concerning her selection which appeared in the Washington Sunday Star of yesterday, September 10, 1961, and I thank the Senator from Montana for withholding his suggestion of the absence of a quorum.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NORTH CAROLINA BEAUTY CROWNED MISS AMERICA

ATLANTIC CITY, N.J., September 9.—Maria Beale Fletcher, a hazel-eyed, brown-haired North Carolina beauty, tonight was chosen Miss America of 1962.

The 19-year-old Miss North Carolina, winner of a preliminary swimsuit competition, succeeded Nancy Anne Fleming, of Montague, Mich., as holder of the world's oldest and most famous beauty crown.

The new queen, from Asheville, is 5 feet 5½ inches tall, weighs 118 pounds, and measures 35–24–35.

A former member of the Radio City Rockettes in New York, she hopes for a career in the entertainment field after completing college.

Maria has had 13 years of training in dancing, 3 years of voice training, and 2 years of dramatics.

Runnersup in the pageant in the order in which they finished were:

Miss Arkansas, Frances Jane Anderson, of Pine Bluff.

Miss Utah, Carolyn Deann Lasater, of Salt Lake City.

Miss Texas, Linda Jacklyn Loftis, of Fort Worth.

Miss Minnesota, Nancee Ann Parkinson, of West St. Paul.

Miss North Carolina has won 14 talent awards in contests sponsored by various civic clubs in Asheville. Her first award came at the age of 7. She completed A. C. Reynolds High School in 3 years instead of 4, and graduated in 1960 with a scholastic average of 93.

She is the first girl from North Carolina ever to win the title. Another North Carolina girl, Ann Farrington Herring, of Winston-Salem, won third place in last year's pageant.

Miss North Carolina has won many dancing trophies before but had never been in a beauty pageant until she entered the one at Asheville which started her on the road to being Miss America.

Mr. MANSFIELD. Mr. President, any time that any more beauties are selected from North Carolina, I shall always be delighted to yield the floor to the distinguished representatives of the people of that State.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF LAW ESTABLISHING THE INDIAN REVOLVING LOAN FUND—CONFERENCE REPORT

Mr. CHURCH. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1540) to amend the law establishing the Indian revolving loan fund. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1540) an act to amend the law establishing the Indian revolving loan fund having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its disagreement to the amendments of the House and agree to the same with an amendment as follows:

"In lieu of the language inserted by the House amendment insert the following: 'That the appropriation authorization in section 10 of the Act of June 18, 1934 (48 Stat. 986), is hereby amended by increasing it from $10,000,000 to $20,000,000.' "

FRANK CHURCH,
ERNEST GRUENING,
QUENTIN N. BURDICK,
BARRY GOLDWATER,
GORDON ALLOTT,
Managers on the Part of the Senate.

JAMES A. HALEY,
ED EDMONDSON,
THOMAS G. MORRIS,
E. Y. BERRY,
HJALMAR C. NYGAARD,
Managers on the Part of the House.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. CHURCH. Mr. President, as passed by the Senate, S. 1540 would have amended the revolving credit loan fund,

established by the act of June 18, 1934, by increasing the authorization from $10 million to $35 million. The bill also provided for the merging of the general loan fund, the Navajo-Hopi fund, and the Oklahoma fund into one revolving fund.

The House amended the Senate bill by striking all after the enacting clause and providing for an increase in the authorization in the 1934 act from $10 million to $15 million. All the language with respect to consolidating funds is deleted.

At the meeting of the conferees on September 7, it was agreed that the differences in the bill would be compromised in the following manner. The revolving credit loan fund would be increased by $10 million, that is, raising the authorization from the present $10 million limit to $20 million. It was also agreed that we would eliminate all language relating to the consolidation of the three existing loan funds.

I draw this to the attention of the Appropriations Committee, which has consistently suggested that the funds be merged into one fund. While the conferees have eliminated that provision, we do have an understanding that this consolidation proposal will be the subject of further legislation during the second session of this Congress.

While the sum which the conferees have agreed upon is substantially less than that passed by the Senate, it is the intention of our committee and the House Interior Committee to consider additional legislation next year to provide a greater authorization than is afforded under the present bill. We hope to include that in legislation to resolve the heirship land problem. In the meantime, the $10 million that would be added to the fund will meet all of the anticipated needs for this fiscal year.

For these reasons, Mr. President, I move that the Senate adopt the conference report.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The report was agreed to.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISPOSITION OF CERTAIN WATERFOWL FEATHERS AND DOWN

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 752, H.R. 7447.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 7447) to amend the Strategic and Critical Materials Stock Piling Act to provide for the immediate disposition of certain waterfowl feathers and down.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. SYMINGTON. Mr. President, I desire to make a short statement regarding H.R. 7447 which would waive the statutory requirement for a 6-month waiting period before the Administrator of General Services is authorized to dispose of approximately 2 million pounds of waterfowl feathers and down from the national stockpile.

The stockpiling law requires the Director of the Office of Civil and Defense Mobilization to determine the materials that should be stockpiled and the stockpile objectives for these materials. If the Director determines that the amount on hand is in excess of the objective, he may propose disposal of the excess by publishing a notice in the Federal Register and transmitting this notice to the Congress. The disposal may not be made until 6 months after publication and transmission of the notice of disposal. If the disposal is proposed because the material is obsolescent for use in time of war, express congressional consent is not required. If the disposal is proposed only because the quantities on hand are in excess of the stockpile objectives, express congressional approval of the disposal is required.

In March of this year the stockpile objective for waterfowl feathers and down was revised downward. The reasons for the revision were:

First. The planning basis for stockpiling has been reduced from a 5- to a 3-year potential emergency.

Second. A new process that could be used in an emergency permits the treatment of chicken feathers so that these feathers may be satisfactorily combined for use with waterfowl feathers.

If the feathers and down that are the subject of H.R. 7447 were being proposed for disposal only because of the reduced stockpile objective, express congressional approval in the form of a concurrent resolution would be required. It happens, though, that the particular feathers and down that are proposed for disposal are in a deteriorated condition and no longer meet specfications. For this reason the materials are obsolescent for use in time of war, and thus they may be sold 6 months after publication of notice of disposal. Notice of disposal was published on April 6, 1961. Even if H.R. 7447 is not approved, the feathers and down can be disposed of beginning October 6, 1961.

The simple purpose of the bill is to shorten the waiting period. It is obvious that the waiting period would be shortened by less than 1 month.

The reason for shortening the waiting period is that market conditions are favorable, owing to a shortage of supply on a worldwide basis. The committee was informed that although the feathers and down now in excess are in poor condition, industrial users may clean and reprocess these materials and thus put them to satisfactory use.

The average cost of all the feathers now held in the stockpile was $2.25 a pound, and the average cost of all the down was $6 per pound. On the most recent Government sales of these materials in August 1961, the Government received an average of $1.04 per pound for feathers and $3.37 per pound for down. Let me emphasize that these prices were for deteriorated materials that did not meet specification requirements.

It is obvious that the price the Government can expect to receive from sale of these materials is less than the average cost of acquisition. It should be pointed out, however, that the average cost of acquisition applies to all of the feathers and down in the stockpile including that which meets specifications and that the prices I have quoted are for deteriorated materials. The committee was informed that the Government should recover more than $2 million from the sale of these materials.

Mr. President, that concludes my statement. I ask that the bill be passed this morning.

The PRESIDING OFFICER. The bill is open for amendment.

Mr. WILLIAMS of Delaware. Mr. President, I shall not object to the passage of the bill. If we do not need the feathers, we might as well go ahead, pass the bill, and sell them. However, I should like to comment briefly on the policy of the stockpile program in general. Call it mismanagement or stupidity, there is a lot of money being wasted in our stockpiling program. It needs an overhauling.

As evidence of this let us go back to the beginning of the program on this particular commodity. What I have to say is not in criticism of the Senator from Missouri; he has been as critical of some of these stockpiling arrangements as I have been.

The feathers were originally bought 8 to 10 years ago. Why we needed to stockpile them at that time, and why we do not need them on the eve of the Berlin crisis, I am at a loss to understand. But we are now told that we do not need the feathers—they have become obsolete or are not needed in the stockpile program.

To go back to the beginning, we find that immediately prior to the Korean war, waterfowl feathers were selling at about 90 cents a pound. The Korean war broke out and all of a sudden the stockpiling agency decided that they not only had to buy what we needed for the Korean war, but we had to stockpile feathers for years to come. Such a large quantity was stored that the price of feathers shot up to $2.25 and $2.50 a pound.

Not only the quantity of feathers needed during that period were bought, but enough feathers were bought to last us throughout the Korean war and during the intervening period until the present time. Now it is proposed that we even have a surplus of the feathers that we purchased 8 to 10 years ago. I believe no feathers have been bought in the last 7 years.

Mr. SYMINGTON. The Senator is correct. None have been bought for 7 years.

Mr. WILLIAMS of Delaware. In the purchase of the feathers, the agency be-

came so panicky that they wanted to buy them notwithstanding the fact that the market was at an alltime high during the Korean war. The agency apparently wanted to buy the feathers before the market went down. In doing so, they bought feathers of an inferior grade and paid the regular price for them. No adjustments or refunds of the purchase price because of inferior grades were asked for. No refunds were collected until the Comptroller General moved in with a strong report denouncing the whole procurement policy. Then the agency did make some adjustments.

Furthermore, the procurement agency of the Government went out and bought the feathers during the Korean war at a time when we had price controls operating, and they even bought them in the black market. In some instances they paid 20 to 30 percent over the price ceilings. Yes, they bought some of the feathers in the black market. No action was taken concerning the payments over the ceilings until after the Comptroller General had come in and in effect said, "At least the Government should live up to its own laws and not violate its own price ceilings."

Here we had an agency of the Government buying supplies for the Government in the black market, closing its eyes to the price ceilings laws, yet telling everybody else to obey the law.

Significantly, on the advisory board were representatives of most of the companies selling feathers to the United States. They were giving advice as to how the Government could buy them. Apparently we had no one in the agency with enough sense not to accept the kind of advice the advisers were giving.

I would like to read briefly some of the comments made by the Comptroller General at the time the feathers were bought. I quote from his report on these transactions:

> 2. GSA–EPS authorized the delivery of, and accepted goods which did not comply with, the stockpile specifications established by the Munitions Board.
>
> 3. GSA–EPS failed to reduce the price on 63,922 pounds of feathers and down to applicable ceilings, which resulted in the Government incurring excessive costs of $22,161.50.
>
> 4. Acceptance of the price increases in the amendment violated OPS CPR–87 and increased the Government's cost by $6,856.50.
>
> An aggravated instance applicable to points 3 and 4 involves the pricing of 11,000 pounds of European goose down (lots F–16, F–17) at $8 in the amendment when the OPS had previously restricted the contractor to delivering 10,000 pounds at $8. This reflects a culpable disregard for the Government's interests.

In other words, we stockpiled inferior products at a price much higher than the legal ceiling price. Today the market has returned to a low level. The feathers will now be sold as an inferior product. Many are surprised that the feathers we have in the stockpile today are an inferior products. There is nothing strange about it. The agency bought the feathers of an inferior grade in the first place.

Mr. SYMINGTON. Mr. President, will the Senator yield back to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. SYMINGTON. I compliment the able Senator from Delaware for his thoughts on this subject. He is correct with respect to some of the operations of the stockpile. It is but a further illustration of some of the problems we have in this field.

Because of the shortage of time, I should like to report to the Senator another problem that has arisen within recent days. Many of us are anxious not to see a rise in steel prices. Not too long ago the committee on which the distinguished Senator from Delaware [Mr. WILLIAMS] and I have the privilege of serving discussed the problems of a particular country. We started to talk about how much tin we could buy to help that country.

I asked, "Why do we want to buy more tin? We do not have to always consider the purchase of tin as the only way to handle the problems of that country. We have too much tin on hand already.

Within 48 hours someone told the representatives of that country what I had said. They called me up and assured me that I was incorrect, that there was not enough tin, that tin was in short supply. I apologized for my mistake. Then I found that, in our stockpile, we have more than double the amount of tin anyone believes is needed in case of war; hundreds of millions of dollars more than considered necessary.

We know tin is probably utilized more for galvanized sheet and strip steel than for any other purpose. Interestingly enough, last week one of the representatives of one of the leading steel corporations called me to say that in the Federal Register he had noted a request that 50,000 tons of tin be released from stockpile. That is a great deal of tin, but does not by any means represent the excess in the stockpile. This steel company said that if that tin were released from stockpile, it would contribute to their ability, if there was the ability plus the desire, to hold down prices of steel products.

As everyone knows, the tin market is a world cartel, and has been for many years. The current price of tin is rising steadily. What a ridiculous situation we now find ourselves in. With the price moving up steadily and with the American people owning far more tin than will ever be needed, even in time of war, we should review the way in which this problem has been handled. The facts are withheld from the American people. It takes a long time, under present regulations, to obtain the tin in order to put it on the market as a way of holding down increased tin prices. These raised tin prices can only be a justification for what we do not want—increased steel prices.

I place this situation in the RECORD, and compliment my friend from Delaware, who is a watchdog of the people's money in this instance as well as in others.

I agree with him that in the future we should handle the whole problem of stockpiling more in the public interest than it has been handled in the past.

Mr. WILLIAMS of Delaware. I thank the Senator. The stockpiling program is an essential project, but the materials that are stockpiled should be bought on the basis of our actual need. The program is not to be operated as a price-support program, nor is it supposed to be operated to create a speculator's paradise or to regulate markets.

Mr. SYMINGTON. As chairman of the Stockpiling Subcommittee of the Committee on Armed Services, I have tried for many years to get the facts of this program declassified, but am always told that the agencies involved did not want to declassify said information. When I talk personally with these agencies, however, they say they today have no objection, in fact some volunteer it would be a good idea that stockpile information be declassified. If it were declassified that would make it impossible for some of the actions to happen which the Senator from Delaware and the Senator from Missouri have been talking about. If that were done, many of these things would not have happened in the past, and would not occur in the future.

Mr. WILLIAMS of Delaware. In the light of what they are doing, I suppose we should not blame them for trying to keep the information classified, because if the American people found out about these operations, these people would not stay in office very long.

I agree fully that there is entirely too much secrecy surrounding this kind of operation. For instance, I was told that it would be a great disservice to our national security to tell me how many feathers we have in the stockpile. I suppose they think Mr. Khrushchev could win the cold war if he found out how many feathers we have in the stockpile. How much more ridiculous can one get in this kind of situation? Are they expecting us to engage in a pillow fight over Berlin? Anyone can take the figures presently appearing in the commerce journals on any of these commodities and get a fairly accurate estimate of our inventory. I could tell them within 5 percent of what they have on hand in the stockpile. Anyone else can do the same thing if he wants to take the trouble to run down the figures.

Certainly there is nothing world shaking about the amount of feathers they have on hand. They are reducing the stockpile requirements from 5 years to 3 years, and cutting the required amount by 4 million pounds of feathers. Yet they say they cannot tell anyone how many they have on hand. I should like to read one sentence from this report:

> However, I believe the information you want would be the difference in the inventory amount between the two dates.

Much of this secrecy is apparently nothing more than an excuse to hide their mismanagement. I read further from the Comptroller's report, at page 38:

> GSA–EPS failed to reduce the price on 63,922 pounds of feathers and down to applicable ceilings, which resulted in the Government incurring excessive costs of $22,161.50.

I will not go through all of this report. However, Mr. President, here is an

agency of the U.S. Government, during the period when we were at war, when we had price controls, violating their own price controls and operating in the black market, while at the same time they were criticizing the American people for any participation in the black market, and called them unpatriotic. It was indefensible on the part of this agency to violate these laws. Again I quote from the Comptroller General's report on the feather procurement program:

Our investigation developed information of possible violations by the contractor of 18 United States Code 1001 by reason of false statements made to OPS in applying for authority to effect deliveries at above-ceiling prices, and a potential violation by the contractor of the price warranty clause under the contract and the amendment. These matters were referred to the Office of Price Stabilization and to the Department of Justice on March 23, 1953.

How can they explain their buying of feathers at such exorbitant prices during the war, prices which were in excess of the ceiling prices? They even bought a product which did not meet standards at the time they were bought. They bought the inferior product at exorbitant prices on the advice of a committee which was composed of the very people who were selling them the product.

Mr. SYMINGTON. Mr. President, I ask unanimous consent that at this point there be printed in the RECORD a letter dealing with this subject matter, written by OCDM to the Senator from Delaware, signed by the Honorable Frank Ellis, Director of the Office of Civil and Defense Mobilization.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SEPTEMBER 7, 1961.

Hon. JOHN J. WILLIAMS,
U.S. Senate, Washington, D.C.

DEAR SENATOR WILLIAMS: This is to confirm information given you over the telephone by Mathias W. Niewenhous of my staff in reference to your letter of August 28, 1961, and additional information requested by telephone concerning the proposed sale of excess feathers and down in the stockpile.

1. To give you inventory on dates requested would reveal stockpile objectives which have a secret classification. However, I believe the information you want would be the difference in the inventory amounts between the two dates which was 1,406,000 pounds less as of June 30, 1961.

(a) The stockpile was set up on a basis of 60 percent feathers and 40 percent down. The average cost of feathers in the stockpile was $2.25 a pound and the average cost of the down was $6 per pound. The average costs of feathers and down combined was $4.15 a pound.

2. No feathers and down were purchased during the past 3 years.

3. The quantity of feathers and down from the stockpile sold for Government use during the past 3 years amounted to 1,532,600 pounds.

4. All the feathers and down in the stockpile were purchased during the years 1952, 1953, and 1954. No purchase have been made since the middle of 1954.

5. No plans are contemplated to replace the feathers and down sold or to be sold.

6. In December 1959, GSA was authorized to prepare a plan for the disposal of 1,900,000 pounds of feathers and down which was excess of mobilization needs. This was deteriorated material which did not meet specification requirements. All but 75,000 pounds have been sold. The last sale took place in August 1961, and the price paid to the Government averaged $1.04 a pound for the feathers and $3.37 for the down. The great bulk of this material (1,532,600 pounds) was transferred to the Quartermaster Department of the Army by GSA for governmenal use.

7. The Government should recover $2 million-plus for the feathers and down to be sold under the pending bill. It is difficult of course to forecast market prices in the future, as the proposed sale may take place over a period of months.

Enclosed is a summary of sales and delivery figures.

If any further information is desired, I will be glad to discuss the matter with you personally.

Sincerely,

FRANK ELLIS, *Director.*

Summary of sales and delivery figures

	Pounds
Reduction in inventories between Jan. 1, 1958, and June 30, 1961 (deliveries on sales)	1,406,000
Sales from inventories between December 1959 and August 1961	1,875,000

(There were no sales or deliveries between Jan. 1, 1958, and Dec. 31, 1959.)

Sales and deliveries January 1960 through August 1961

	Pounds	Actual deliveries, pounds
Sales for Government use	1,532,000	1,152,000
Sales for commercial use	293,000	254,000
Total	1,825,000	1,406,000

Mr. SYMINGTON. The letter states that:

All the feathers and down in the stockpile were purchased during the years 1952, 1953, 1954. No purchases have been made since the middle of 1954.

There may have been some reason for purchases being made in 1952, when we were in a war in Korea; and also during part of 1953. That feathers should have been purchased after the Korean truce, in 1954, however, especially under the conditions the able Senator from Delaware has presented this morning, is incredible.

With respect to these figures, of course the Senator from Delaware is entitled to know what the classified figures on feathers are in the stockpile. I have them with me, and would be very glad to show them to him at his convenience.

Mr. WILLIAMS of Delaware. I appreciate the Senator's statement. The only explanation for the purchase of these feathers in 1953 and 1954 was that it was a bailout operation. The war was over and market prices would naturally decline so the Government took over the dealers' inventory at the inflated prices. They took the entire inventory on hand, and what had been contracted for.

The fact that part of the merchandise was an inferior product did not in the least bother these bureaucrats spending taxpayers' money.

An examination of the billion-dollar operation of this agency is long overdue.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to a third reading, was read the third time, and passed.

THE WILDERNESS BILL

Mr. CHURCH. Mr. President, I ask unanimous consent that a summary of the major provisions of S. 174, the wilderness bill, be printed in the RECORD at this point.

There being, no objection, the statement was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE MAJOR PROVISIONS OF S. 174—THE WILDERNESS BILL

1. What is the purpose of the bill? To establish a national wilderness preservation system for the permanent good of the whole people, before our shrinking wildlands entirely disappear.

2. What may be included in the wilderness system? The system would be limited to Federal land already withdrawn for recreational use; made up from the following components:

(a) Areas in national forests classified as "wilderness," wild, or canoe, on effective date of act.

(b) Areas in national forests classified as primitive, on effective date of act.

(c) Areas in national parks and monuments, embracing at least 5,000 acres without roads, on effective date of act.

(d) Selected portions of wildlife refuges and game ranges established prior to effective date of act.

3. When and how would these areas become part of the wilderness system? Each of the four categories listed above are treated separately under the bill. Thus:

(a) Wilderness, wild, or canoe areas would become part of the system upon enactment of the bill.

(b) Primitive areas would be temporarily incorporated into the system upon enactment of the bill. However, the Forest Service would review each of these areas, during the 10 years following enactment, to exclude any part found to be more suitable for lumbering, mining, or other commercial use. Those parts having predominant wilderness values would then be recommended by the President to Congress for permanent retention in the system. Either the House or Senate could veto any such recommendation.

(c) Roadless areas within national parks and monuments will be incorporated into the system, during the 10 years following enactment, as recommended by the President to Congress, subject to veto by either House or Senate.

(d) Selected portions of wildlife refuges and game ranges will be incorporated into the system, during the 10 years following enactment, as the President may recommend to Congress, subject to the same congressional veto.

Once the wilderness system has been established as above provided, no new additions may be made to it, except by an affirmative act of Congress.

4. What restrictions would apply within the wilderness system? Subject to existing rights, there would be no commercial enterprise within the system, no roads, no buildings, and no use of motor vehicles, motorboats, or aircraft. However, these restrictions are subject to the following special exceptions:

(a) Aircraft and motorboats may continue to be used, wherever the practice has become established.

(b) Guides, with their pack strings, boats, and camping equipment, may continue to

furnish their services for recreational purposes.

(c) Within national forest and public domain areas included within the wilderness system:

1. The grazing of livestock shall continue, wherever well established.

2. The President may authorize, within specific areas, prospecting, mining, reservoirs, water conservation works, transmission lines, and such roads as may be essential to develop and use them, wherever he determines such use will better serve the public interest than its denial.

5. What general exceptions are made by the bill? The bill expressly allows for the following:

(a) Such measures may be taken within the wilderness system as may be necessary in the control of fire, insects, and disease.

(b) The jurisdiction of the States with respect to fish and wildlife in the national forests is left untouched by the bill.

(c) Within national forest and public domain areas in the wilderness system, any activity, including prospecting, for the purpose of gathering information about mineral or water resources, will be lawful, if carried on in a manner not incompatible with the preservation of the wilderness environment.

(d) Application of State water laws within the wilderness system are not affected by the bill.

(e) The jurisdiction of the Federal Power Commission to license dam construction is not affected by the bill.

EMPLOYMENT OF CERTAIN ADULT INDIANS ON OR NEAR INDIAN RESERVATIONS

Mr. CHURCH. I am about to ask the Chair to lay before the Senate certain amendments of the House of Representatives to Senate bills.

Mr. MANSFIELD. Mr. President, have these matters been cleared with the minority leadership?

Mr. CHURCH. Yes; they have all been cleared with the minority leadership.

I ask first that the Chair lay before the Senate the amendment of the House to Senate bill 200.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 200) to amend the act entitled "An act relative to employment for certain adult Indians on or near Indian reservations", approved August 3, 1956, which was, to strike out all after the enacting clause and insert:

That section 2 of the Act entitled "An Act relative to employment for certain adult Indians on or near Indian reservations", approved August 3, 1956 (70 Stat. 986), is amended by striking out "$3,500,000" and inserting in lieu thereof "$7,500,000" and by striking out "$500,000" and inserting in lieu thereof "$1,000,000".

Mr. CHURCH. Mr. President, as passed by the Senate, the bill would have repealed the $3.5 million annual authorization to carry out vocational training and on-the-job training programs and make the amount of the annual appropriation subject to the normal budgetary process. The House has amended the Senate version by striking all after the enacting clause and inserting language to increase the present $3.5 million limit to $7.5 million, and increase the $500,000 limit on administrative costs to $1 million.

It had been my hope that we could have an open-end authorization on this program because it has been one of the most useful and worthwhile programs in the Bureau of Indian Affairs, and I feel confident that more and more Indians will wish to take advantage of this kind of training as time goes on. However, there are at this time more applicants for training than there is money available, and we are very anxious that an authorization bill be enacted in this session so that additional funds may be obtained through the supplemental appropriations bill.

The Department of the Interior assures me that the bill in its amended form is satisfactory.

Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

Mr. CHURCH. Mr. President, I now ask the Chair to lay before the Senate the amendment of the House to Senate bill 1719.

AMENDMENT OF TITLE 23, UNITED STATES CODE, RELATING TO INDIAN RESERVATION ROADS

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1719) to amend title 23 of the United States Code with respect to Indian reservation roads, which was, on line 10, after "roads" insert "and bridges".

Mr. CHURCH. Mr. President, the purpose of this bill is to amend title 23 of the United States Code to authorize the Secretary of the Interior to accept the cooperation of any State, county, or local subdivision in connection with the construction of Indian reservation roads. The House has amended the bill to include bridges. I believe this is a desirable addition to the bill and conforms with the appropriate section of title 23. It is also acceptable to the Department of the Interior which initiated this legislation in an executive communication.

Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

Mr. CHURCH. I now request that the Chair lay before the Senate the amendment of the House to Senate bill 1768.

RESTORATION TO INDIAN TRIBES OF CERTAIN PAYMENTS OF TRIBAL TRUST FUNDS

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 1768) to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds, which were, on page 1, line 8, after "law," insert "and any interest earned on such share that is properly creditable to the individual"; on page 2, line 6, after "share" insert "and interest", and on page 2, after line 8, insert:

SEC. 2. The Secretary shall not restore to tribal ownership or deposit in the general fund of the Treasury any funds pursuant to this Act until sixty calendar days (exclusive of days on which either the Senate or the House of Representatives is not in session because of an adjournment of more than three days to a day certain) after he has submitted notice of his proposed action to the Committees on Interior and Insular Affairs of the Senate and House of Representatives unless each of said committees has theretofore notified him that it has no objection to the proposed action.

Mr. CHURCH. Mr. President, the purpose of this legislation is to restore to Indian tribes unclaimed per capita and other individual payments from tribal trust funds and certain other sources that are still in the Federal Treasury—there by reason of the fact that owners cannot be located. The bill provides that the funds will go to the tribes.

As amended by the House, the bill would also cover interest earned on amounts to which the individual Indians may have been entitled, and also provides that prior to restoring unclaimed funds to tribal ownership or depositing them in the general fund of the Treasury, a 60-day notification shall be given to the Committees on Interior and Insular Affairs of the House and the Senate. I understand this amendment is satisfactory to the Department of the Interior which initiated this legislation and it is also acceptable to me.

Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

Mr. CHURCH. I ask that the Chair lay before the Senate the amendment of the House to Senate bill 1807.

DISPOSITION OF CERTAIN LAND AT CHILOCCO, OKLA.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1807) to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla., which was, on page 1, line 3, strike out all after "That" down through and including "The" in line 11, and insert "the".

Mr. CHURCH. Mr. President, the primary purpose of S. 1807 was to authorize the Secretary of the Interior to dispose of lands no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla. The bill also permitted two homestead sites in the same area to be conveyed to the homesteaders when their contracts are completely paid in 1963 and 1965 respectively.

The House has amended the Senate bill by deleting the authority for the Secretary to dispose of the surplus acres at the school and restricting it to an authorization for the Secretary to convey title to the two homesteads. I understand there is a desire on the part of some House Members to hold hearings on the desirability of permitting the lands at the school site to be disposed of. Under the circumstances, I am agreeable to

the amendments, and I understand that the Department of the Interior, which submitted this legislation to the Congress, has no objection.

Mr. President, I move that the Senate concure in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

Mr. CHURCH. I request the chair to lay before the Senate the House amendment to Senate bill 2241.

DONATION OF CERTAIN LAND TO THE JICARILLA APACHE TRIBE OF THE JICARILLA RESERVATION, N. MEX.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 2241) to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned land, which was on page 3, after line 4, insert:

SEC. 2. The Indian Claims Commission is directed to determine in accordance with the provisions of section 2 of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act should or should not be set off against any claim against the United States determined by the Commission.

Mr. CHURCH. Mr. President, the House has amended this legislation by adding a new section 2, directing the Indian Claims Commission to determine, in accordance with the Indian Claims Commission Act of 1946, the extent to which the value of the title conveyed by this act should or should not be set off against any claim the tribe may have. This language has been adopted consistently by the Senate in bills making gifts of Federal lands to Indian tribes. I know of no objection to its inclusion in this piece of legislation, and it is satisfactory to the sponsor, the junior Senator from New Mexico [Mr. ANDERSON].

Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of executive business.

The motion was agreed to; and the Senate resumed the consideration of executive business.

TREATY OF FRIENDSHIP, ESTABLISHMENT, AND NAVIGATION BETWEEN THE UNITED STATES OF AMERICA AND THE UNITED KINGDOM OF BELGIUM, TOGETHER WITH A RELATED PROTOCOL—TREATY OF AMITY AND ECONOMIC RELATIONS BETWEEN THE UNITED STATES OF AMERICA AND THE REPUBLIC OF VIETNAM

The PRESIDING OFFICER. The hour of 10:50 o'clock having arrived, the Senate will proceed in executive session to the further consideration of the two treaties.

Mr. MANSFIELD. Mr. President, on the vote on the treaties, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. MANSFIELD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the resolutions of ratification of Executive J—87th Congress, 1st session—a Treaty of Friendship, Establishment, and Navigation Between the United States of America and the United Kingdom of Belgium, Together With a Related Protocol, and Executive L—87th Congress, 1st session—a Treaty of Amity and Economic Relations Between the United States of America and the Republic of Vietnam?

Under the unanimous-consent agreement, the resolutions of ratification will be deemed to be agreed to, respectively, by the same vote.

The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Virginia [Mr. BYRD], the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON] and the Senator from New Mexico [Mr. CHAVEZ] are absent because of illness.

I further announce that, if present and voting, the Senator from New Mexico [Mr. ANDERSON], the Senator from Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from New York [Mr. JAVITS], and the Senator from Vermont [Mr. PROUTY] are necessarily absent.

The Senator from Maryland [Mr. BUTLER] and the Senator from Kansas [Mr. SCHOEPPEL] are detained on official business.

If present and voting, the Senators from Maryland [Mr. BEALL and Mr. BUTLER], the Senator from New York [Mr. JAVITS], the Senator from Iowa [Mr. MILLER], and the Senator from Vermont [Mr. PROUTY] would each vote "yea."

The yeas and nays resulted—yeas 83, nays 0, as follows:

[EX. No. 1]

Chavez	Long, Mo.	

The PRESIDING OFFICER. Two-thirds of the Senators present having voted in the affirmative, the resolutions of ratification are agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the approval of these treaties.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

MEXICAN FARM LABOR PROGRAM

The PRESIDING OFFICER. Under the unanimous-consent agreement entered on Friday, the Chair now lays before the Senate House bill 2010.

The Senate resumed the consideration of the bill H.R. 2010 to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota [Mr. MCCARTHY]. Under the agreement, 20 minutes are available for the consideration of this amendment, to be divided equally.

Mr. MANSFIELD. Mr. President, I should like to ask the Senator from Minnesota how he intends to use the time under his control.

Mr. McCARTHY. On this amendment, 10 minutes are available to each side. However, the agreement relates to both my amendment and the amendment of the Senator from New York [Mr. KEATING], and the question is, Which is to be considered first? I think there was no agreement as to that on Friday; but I shall be glad to have my amendment considered first, and to have it followed by consideration of the amendment of the Senator from New York.

Mr. MANSFIELD. Mr. President, will the Senator from Minnesota yield 2 minutes to me?

Mr. McCARTHY. I yield.

Mr. MANSFIELD. Mr. President, some confusion has become evident as to whether the proposed amendment to section 505, the amendment of the Senator from Minnesota [Mr. McCARTHY], would confer upon the Secretary of Labor the authority to fix wages for either domestic or Mexican national agricultural workers.

This amendment, rather than conferring authority upon the Secretary of Labor in the area of agricultural wages, is a limitation upon the broad authority he presently has under Public Law 78. Under section 503 of that act he may now prescribe wage criteria, which he finds necessary, in the determination of whether the employment of Mexican nationals in an area will adversely affect the wages and working conditions of our agricultural workers similarly employed. He now has authority to prescribe the same test of adverse effect as is proposed by this amendment.

Secretary Goldberg stated before the Senate Committee on Agriculture and Forestry that he does presently possess such authority. He is, however, advocating that a congressional standard be written into the law to relieve him from the litigation and the pressures and protests of users of Mexican labor whenever he has taken any steps to give meaning and effect to the mandate of the Congress that he must not permit the employment of Mexican workers in any area unless he has assured himself that their employment will not adversely affect the wages, hours, and working conditions of our own workers.

The Secretary of Labor believes that congressional guidelines are necessary for effective and fair administration of this authority.

If this amendment is not adopted, let there be no future criticism of the Secretary of Labor if he prescribes similar tests administratively. The Secretary of Labor has advised the Congress that he has found clear indications of adverse effect and will feel constrained in carrying out his statutory responsibilities to take steps beyond those already taken. It should also be remembered that this amendment would affect only users of Mexican labor.

I personally believe that this Mexican labor program cannot be continued unless wage standards are incorporated which will eliminate the wage depression it imposes on U.S. migratory workers. The McCarthy amendment consists of such wage standards.

RETURN TO THE SENATE OF SENATOR CARLSON, OF KANSAS, AFTER ILLNESS

Mr. KUCHEL. Mr. President, will the Senator yield me 30 seconds without its coming out of the allotted time?

Mr. McCARTHY. I yield for that purpose.

Mr. MANSFIELD. Mr. President, I object. There is a time limitation in effect. I suggest that the Senator from Minnesota yield 30 seconds to the Senator from California out of his time.

Mr. McCARTHY. I yield 30 seconds to the Senator from California.

Mr. KUCHEL. Mr. President, I inform the Senate that the junior Senator from Kansas [Mr. CARLSON] has returned to the Senate. He had an operation which was successful. He is one of us, and I am sure all of us are delighted to welcome him back. [Applause, Senators rising.]

Mr. McCARTHY. Mr. President, I am glad the Senator from Kansas is back, and I hope his first official act will be to vote for my amendment.

MEXICAN FARM LABOR PROGRAM

The Senate resumed the consideration of the bill H.R. 2010 to amend title V of the Agricultural Act of 1949, and for other purposes.

Mr. McCARTHY. Mr. President, I thank the majority leader for having placed in the RECORD the views of the Secretary of Labor with respect to workers of Mexican nationality who are brought into this country under contract.

There seems to be a point of great significance to many Members of Congress, and I believe it has been taken up by outside groups who are opposed to this amendment as the key point in their opposition.

They are arguing that the amendment gives the Secretary of Labor authority to fix wages for farmworkers and that this is a new departure and that this establishes a precedent.

As a matter of fact, this is not the case at all. The Secretary of Labor now has authority to fix wages for Mexican nationals who are brought into this country under contract. He has authority, by agreement with the Mexican Government, to provide that a grower cannot pay such Mexican workers less than 50 cents an hour. In addition, the Secretary has the responsibility of fixing the wages of those workers on the basis of the prevailing wage for similar work in the same area. So he does have authority.

Those who are opposing the amendment on principle do not, therefore, have an argument. All my amendment does is establish a somewhat different base, and a clearer base, upon which the Secretary of Labor can determine what wage shall be paid to Mexican laborers brought into this country under contract. Instead of using the base of the prevailing wage for similar work, the amendment provides that he would use as the criterion 90 percent of the average wage paid to farmworkers in the entire State or Nation, whichever is lower. But, in terms of basic authority, there is no difference in the proposal from that which exists in the present law. The only difference is in the standard or criteria which are to be used. That is the point of my amendment.

As a matter of fact, those who are opposed to my amendment on principle should know that section 505 as reported in the committee bill contains a departure in a limited way. Under the committee bill as reported, the Secretary of Labor is given authority to fix wages of American farmworkers; this he has not had in the past. It does not give him much authority, but under present practice, an American worker chopping cotton in Arkansas, let us say, can be paid 30 cents an hour. That is the prevailing wage for chopping cotton in certain counties in Arkansas, according to reports. Mexican nationals cannot be employed at a rate of 30 cents an hour, because under the agreement with the Mexican Government they must be paid a minimum of 50 cents an hour. Under the existing situation of Mexicans being paid 50 cents an hour and American workers being paid 30 cents an hour, the Secretary of Labor has no power to fix the wage of the American cotton chopper getting 30 cents an hour today.

The bill as reported from the committee has this language, in section 505: "pays to both domestic and foreign workers not less than the prevailing wage paid in the area to domestic workers engaged in similar work".

So the language of the bill itself would give the Secretary authority to require an employer to pay Americans at least 50 cents an hour. Both types of workers would have to be paid the prevailing wage, and the American worker could not be paid less than the Mexican worker would be paid.

So those who are concerned about establishing a principle and precedent ought to be more concerned about the language of section 505 in the bill as reported by the committee than they should be over my amendment. My amendment applies only to Mexican nationals and it provides that they must be paid 90 percent of the average farm wage being paid in the State or Nation, whichever is lower.

This should simplify the problem. If those who oppose the provision are concerned about the principle involved, they ought to be against the language of the committee. If they are concerned about growers paying adequate wages, then they should vote for the bill. But they should not use the argument of principle in voting against my amendment since the committee amendment involves the same question of principle to a greater extent than my amendment.

Let me point out that the amendment would not affect the States which have been paying, in a relative sense, decent wages to American migrant workers and Mexican migrant workers. It would chiefly affect those States in which, on the record, growers have been paying 50 cents, 55 cents, and 60 cents an hour, and in consequence of that fact, have forced their own people to move farther

north, west, or east, in search of better conditions of employment.

Texas employs approximately 123,000 Mexican nationals. I do not have the exact figures, because exact statistics are not available, but about the same number of Texans are moving out of Texas seeking work in other States. As a matter of fact, if we were to be realistic about this question, we probably ought to have an airlift from Mexico, let us say, to Michigan. This would save the tragedy of dislocations across the country.

We have not come to that point yet. I am hopeful that, if the amendment is adopted, the result will be to require Texas growers who are now using Mexican workers at about 50 cents an hour to pay them about 70 cents an hour.

This might encourage them to hire their own people, to hire Texans. If there were a shortage in some other place in the country, we could provide direct transportation from Mexico to these areas in other States, and thus avoid the dislocation which takes place all the way across many Western and Mountain States in consequence of this practice.

The PRESIDING OFFICER (Mr. PELL in the chair). The time of the Senator from Minnesota has expired.

Mr. KUCHEL rose.

The PRESIDING OFFICER. Does the Senator from California desire to speak?

Mr. KUCHEL. The Senator from North Carolina controls the time, I believe, but I would appreciate it if he would yield to me.

Mr. JORDAN. Mr. President, have the 10 minutes allotted to the other side been used?

The PRESIDING OFFICER. The 10 minutes allotted to the Senator from Minnesota have expired.

Mr. JORDAN. I yield to the Senator from California.

Mr. KUCHEL. Mr. President, according to the 1960 census recently concluded, I represent the most urbanized State in America. Eighty-six percent of the residents of California live in urbanized areas. Yet, California is also the leading agricultural State in our Nation. Since 1950, California continuously has ranked first among the States in the value of agricultural commodities produced which go to all parts of our Nation and the world. Farming in my State is almost a $3 billion annual business.

I am deeply concerned about the welfare of workers not only in industry but in agriculture. For a long time, I have been shocked by the plight in which the so-called "excluded American," the domestic migrant worker, finds himself. Consequently I have favored the passage by the Senate of those bills recently reported by the Senate Subcommittee on Migratory Labor dealing with agricultural child labor, migrant worker education, crew leader registration, migrant health standards, and the establishment of a National Citizens Council on Migratory Labor. I believe that much more remains to be done. I favor a national agricultural minimum wage, congressionally sanctioned, which would apply equally to all areas of our land regardless of the prevailing wage which might exist in a particular area.

As each of us knows, Mr. President, if we have dealt in any detail with agriculture, there is not just a farm problem, but rather there are many farm problems depending on the commodity we are talking about and the section of the country in which it is grown. So, too, there is not one farm labor problem, but there are many farm labor problems. Each demands treatment appropriate to its nature.

Before us is a measure to extend once again, this time for a period of 2 years, Public Law 78, which authorizes the Mexican farm labor program. This program originated because of a need to provide supplemental labor which could not be procured domestically to prepare and to harvest crops during relatively short periods of time. To delay for a day in certain field or fruit crops can mean a loss of millions of dollars not only to the farmer but to consumers throughout America. We all know that the farmer cannot control his production as can the industrial manager. One does not roof over a field whether it ranges in extent from a few acres to many thousands of acres and then control the environment underneath.

California is second only to Texas in its need for and the use of foreign labor under Public Law 78. California pays the highest wages in America for domestic and foreign farm labor. In 1960, the California average hourly farm wage rate without room or board was $1.23. The national average was 97 cents. The most common wage for those workers brought in under Public Law 78 was $1 an hour, the highest in the Nation.

We have heard a lot about the fact that less than 2 percent of the farms in the United States use some foreign labor. What is important is that 52 percent of our farms use no hired labor, either domestic or foreign, because of the nature of their operations.

And next, we must ask the question, What percentage and what type of the Nation's agricultural produce are represented by the 2 percent of the Nation's farms which use foreign labor? In the case of California, the expansion of field crops is the most important agricultural development which has occurred in my State in the last three decades. Total output has more than doubled since the 1930's. California now ranks second to Texas in cotton production. In 1958, California contributed 8.2 percent of the national total of cash receipts from farming with only 2.6 percent of the farms and 3.3 percent of all the land in farms. We grow over 140 crops. More than a third of our farming is in perishable crops. We supply 30 percent of the Nation's fresh market vegetables and melons, 38 percent of the principal processing vegetables; 37 percent of the tree fruits, nuts, and grapes and two-fifths of strawberries and over one-tenth of the potatoes. Truly astounding is that California leads all other States in the production of 32 perishable crops and that we account for "over 90 percent of the Nation's production in 14 of these crops, 50 to 90 percent of another 11, and 25 to 50 percent of the remaining 7," according to the United States and California Departments of Agriculture.

Above all, we do not have an agriculture dominated by absentee landlords. Whereas three-quarters of California's farms were operated by owners and part owners in the 1930's by the decade of the 1950's this ratio had increased to almost nine-tenths. The farmer's continued livelihood is dependent on his ability to harvest his crop and his ability to attract both domestic and foreign workers to aid him in that task.

I do not believe that a single foreign worker should be imported into this country if it adversely affects our domestic work force. I congratulate the Senate Committee on Agriculture for reporting out an extension of this program with amendments which would tighten up loopholes which are known to exist in the present program. The committee has specified that Mexican workers will not be available in any area unless reasonable efforts have been made to attract domestic workers at wages, standard hours of work, and working conditions comparable to those offered to Mexican workers. Mexican workers, under the bill now before the Senate, will not be available for employment in other than temporary or seasonal occupations or to operate or maintain power-driven machinery, unless a determination is made by the Secretary of Labor that to do otherwise would invoke an undue hardship. Particularly important is the provision that Mexican workers will not be made available unless the employer pays both domestic and Mexican workers not less than the prevailing wage paid in the area to domestic workers engaged in similar work. The bill also prohibits the furnishing of Mexican workers for some processing activities.

If, in the implementation of the Mexican labor program, domestic workers are being adversely affected, then there is something wrong not with the Congress but with the administration of that program by the Department of Labor. The Secretary of Labor is not to certify and authorize the use of foreign labor if such importation would adversely affect the employment opportunities for domestic workers. I believe that the amendment offered by the able Senator from Minnesota [Mr. MCCARTHY] would not remedy what needs to be remedied in the farm labor area.

Article 15, "Wages," of the Migrant Labor Agreement of 1951, as amended, entered into between the Governments of Mexico and the United States of America, already provides, in part:

> The employer shall pay the Mexican worker not less than the prevailing wage rate paid to domestic workers for similar work at the time the work is performed and in the manner paid within the area of employment, or at the rate specified in the work contract, whichever is higher. The determination of the prevailing wage rate shall be made by the Secretary of Labor.

The action of the Senate Committee on Agriculture in amending this legislation reinforces these provisions.

The passage of the amendment offered by the Senator from Minnesota [Mr. McCARTHY] would not establish a minimum wage for agriculture with equal application across the United States. The passage of that amendment would mean a pseudo-minimum wage only where foreign labor is utilized. The passage of that amendment would mean the adoption of an escalator device through use of the Mexican labor program which would maintain the present farm wage inequalities which exist in various parts of our land.

While the addition of such an amendment would not hurt California economically, indeed, would not even affect it, I think that the adoption of the procedure suggested by the Senator from Minnesota is not appropriate in terms of what it seeks to achieve. I think it would mark a setback and an excuse for inaction in which is truly needed, which is a nationwide minimum wage standard for agriculture. As I stated, I support such a national agricultural minimum wage. The Republican Party of California in its last statewide convention announced its support of a national agricultural minimum wage of $1 an hour. What is needed is to remove the exemption for agriculture from the Fair Labor Standards Act. This is a matter which should be rapidly and, in my opinion, favorably considered by the Senate Committee on Labor and Public Welfare.

Why should the Secretary of Labor be permitted to set wages for the farmworker through the vehicle of the Mexican labor program, when he cannot set them for the industrial sector of our economy under the Fair Labor Standards Act? While it is true that Congress has given the Secretary the authority to determine the prevailing wage for an area under the Davis-Bacon Act when Federal construction contracts are involved and for an industry under the Walsh-Healey Act when Federal supply contracts are involved, it is also true that it has not given the Secretary of Labor the authority to set minimum wages in the guise of an escalated percentage formula.

What is needed besides appropriate action by the Committee on Labor and Public Welfare is a more carefully defined criteria of adverse effect by the Department of Labor and its Bureau of Employment Security so that the hundreds of local employment office officials who must participate in the process of authorizing the importation of foreign labor would have a clearer idea of what is meant by the term. Are local domestic workers adversely affected based merely on the total number of unemployed in a particular area or in an adjacent State? There is substantial evidence to indicate that domestic workers willing to work are hired and the number of foreign laborers in an area reduced when the domestic workers become available.

I agree with the Senator from New York [Mr. KEATING] that it is inconceivable that we treat foreign workers better than we treat our domestic farmworkers. I would add that to me it is inconceivable that we treat domestic farmworkers differently than we treat industrial and service workers of comparable education, experience, and skill. I would hope that the Senate might tackle this great problem on its own merits and explore it in the manner in which it deserves to be explored following the necessary hearings and action by the Committee on Labor and Public Welfare. Such action will have my wholehearted support. But, meanwhile, the amendment before us ought to be voted down.

Mr. JORDAN. Mr. President, I yield two minutes to the Senator from Louisiana.

Mr. ELLENDER. Mr. President, I cannot agree with the statement of the distinguished majority leader as to what the amendment would provide. The amendment would give full authority to the Secretary of Labor to fix wages to be paid to Mexican workers at 90 percent of the average for the State or 90 percent of the average for the Nation.

I wish to say that we have tightened up the law in the bill, in that no Mexican laborer can be employed to run tractors or to run any kind of machines. If employers were to pay the Mexican laborer 90 percent of what the average farmworker is paid in the State where the Mexican laborer is employed, this would mean it would be necessary to take into consideration the amount paid for tractor work and for other work with machines, which the Mexican laborer is prohibited from pursuing.

Mr. President, under the bill the Secretary of Labor must make a decision that there are not enough local people to do the stoop labor. He cannot let the Mexican laborers come in unless he finds that local labor will not do the stoop work.

On the other hand, no Mexican worker can be brought in under the program unless the Secretary of Labor states that the labor is needed.

Succinctly stated, Mr. President, there is provision for only supplementary work. The decision as to a need for laborers must be made by the Secretary of Labor before any Mexican labor can come in.

All of this comes about under an agreement between our Government and the Government of Mexico. Who pays all the expenses? The employer pays them. The employer is taxed at up to the rate of $15 per person and must assume all expenses, except for a small amount for compliance activities.

I hope the amendment will be rejected, because if it is adopted it will kill the bill.

Mr. JORDAN. Mr. President, I yield 1 minute to the Senator from Kentucky [Mr. COOPER].

Mr. COOPER. Mr. President, I am a member of the subcommittee of the Committee on Agriculture and Forestry which considered the bill. I oppose the amendment offered by the Senator from Minnesota.

This problem does not affect substantially my State, for in 1960 only 76 Mexican workers were employed in Kentucky, by individuals, and about 190 by associations.

I oppose the amendment because I believe the Secretary of Labor has adequate authority to provide for the welfare of the Mexican workers under the present law, and to protect domestic farm labor against the unnecessary use of Mexican labor if he will exercise that power.

I oppose the amendment also because I believe this would be the first step toward giving the Secretary of Labor the power to fix wages for American farmworkers, because it will have an effect upon such wages.

I have supported minimum wage laws for industrial workers. I cannot say that at some time in the future the Congress will consider its application to agriculture workers, but I oppose delegating the authority to fix farm wages to the Secretary of Labor. I should like to see one group in this country, the farmers, remain free and out from under the control of the Government. I look upon this amendment as a first step toward authorizing the Secretary of Labor to fix wages for farm labor, and I oppose it.

The PRESIDING OFFICER. The time of the Senator from Kentucky has expired.

Mr. JORDAN. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from North Carolina has 2 minutes remaining.

Mr. JORDAN. Mr. President, I conducted the hearings on the bracero bill. We held 2 days of hearings. I think I know the subject pretty well.

North Carolina does not use any Mexican labor, so this is not a personal matter with me in any respect whatsoever. The larger States of California, Texas, and some others use most of the labor, and a few States use a moderate amount of it.

We would liberalize the present law to give to the Secretary of Labor the right to provide equal labor standards for both Mexicans and Americans, because none of us wishes to see the American migrant laborer mistreated or underpaid or anything like that.

There is a vast difference in the approach. The Mexican laborer can only be used after the Secretary of Labor determines that there are not sufficient American laborers to do whatever must be done. These Mexican farm laborers work the berry crops, work in the fields of Arizona harvesting the lettuce, and they work in Oregon, Washington, Kansas, and other States. These laborers can only be brought to the United States because of the fact that there is not a sufficient domestic labor supply to do the work.

As has been said, the bill provides that the laborers must be paid an equal wage for the same kind of work in the same area.

If we were to give the Secretary of Labor the right to fix wages on the escalator basis which is proposed in the McCarthy amendment, we would fix the farm wage at 90 percent of the lower of the State average or the National average. That average would take in machine operators, including tractor drivers, who make considerably higher wages than those engaged in stoop labor, which is the main kind of labor that Mexicans are used for.

The bill would eliminate the practice of using Mexican nationals for that purpose and make it compulsory that the Secretary of Labor not permit Mexicans to operate tractors or trucks, to maintain them, or engage in like work. In other words, the Mexicans would be confined strictly to nonmachine labor. They would be removed from the labor of packing. In effect the amendment would give the Secretary of Labor the power to fix the price of labor on the basis of a constantly rising average. I do not think Congress ever intended to give the Secretary of Labor or anyone else the power to fix the wages of any particular group of people.

Any farmer would be foolish to hire Mexican labor if he could find sufficient domestic labor available to harvest his crop, because he is required to pay the transportation of Mexicans from Mexico, the premiums on insurance, and the cost of returning the Mexicans after he is through harvesting his crop. There is a great deal of difference between that type of labor and domestic labor which is available nearby a farmer's operation, labor which is free to come and go at will.

Another provision of the Mexican farm agreement referred to a few moments ago is that under the contract Mexican laborers must perform the duties prescribed for them or they are sent back to Mexico.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JORDAN. I hope the Senate will reject the amendment of the Senator from Minnesota.

The PRESIDING OFFICER. All time for debate has expired. The question is on agreeing to the amendment of the Senator from Minnesota. The yeas and nays having been ordered, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LAUSCHE (when his name was called). Mr. President, on this vote I have a pair with the Senator from Oklahoma [Mr. KERR]. If the Senator from Oklahoma were present, he would vote "nay." If I were at liberty to vote, I would vote "yea." I therefore withhold my vote.

The rollcall was concluded.

Mr. LONG of Louisiana (after having voted in the negative). On this vote I have a pair with the junior Senator from Oregon [Mrs. NEUBERGER]. If she were present, she would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withdraw my vote.

Mr. MANSFIELD (after having voted in the affirmative). On this vote I have a pair with the senior Senator from New York [Mr. JAVITS]. If he were present, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withdraw my vote.

Mr. HUMPHREY. I announce that the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON] and the Senator from New Mexico [Mr. CHAVEZ] are absent because of illness.

On this vote, the Senator from Massachusetts [Mr. SMITH] is paired with the Senator from Arizona [Mr. HAYDEN]. If present and voting, the Senator from Massachusetts would vote "yea," and the Senator from Arizona would vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from New York [Mr. JAVITS], and the Senator from Vermont [Mr. PROUTY] are necessarily absent.

The Senator from Maryland [Mr. BUTLER] is detained on official business.

On this vote, the Senator from Maryland [Mr. BEALL] is paired with the Senator from Nebraska [Mr. CURTIS]. If present and voting, the Senator from Maryland would vote "yea," and the Senator from Nebraska would vote "nay."

On this vote, the Senator from Vermont [Mr. PROUTY] is paired with the Senator from Iowa [Mr. HICKENLOOPER]. If present and voting, the Senator from Vermont would vote "yea," and the Senator from Iowa would vote "nay."

The result was announced—yeas 42, nays 40, as follows:

[No. 193]

YEAS—42

Aiken	Gore	Metcalf
Bartlett	Gruening	Monroney
Bible	Hart	Morse

NOT VOTING—18

Anderson	Hayden	Long, La.
Beall	Hickenlooper	Mansfield
Bridges	Javits	Miller
Butler	Kerr	Neuberger
Chavez	Lausche	Prouty
Curtis	Long, Mo.	Smith, Mass.

So Mr. MCCARTHY's amendment was agreed to.

Mr. MCCARTHY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MANSFIELD. I move to lay that motion on the table.

Mr. HUMPHREY. I move to lay that motion on the table.

Mr. KUCHEL. I ask for the yeas and nays on the motion to lay on the table.

The yeas and nays were ordered.

Mr. KUCHEL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KUCHEL. Will the Chair state the question upon which the yeas and nays have now been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered on the question of laying on the table the motion to reconsider the vote by which the Senate adopted the McCarthy amendment.

Mr. KUCHEL. So if a Senator wishes an opportunity to vote on the merits of the question, he will vote "nay" on the motion to lay on the table.

The PRESIDING OFFICER. The Senator is correct.

Mr. MCCARTHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MCCARTHY. As I understood the inquiry of the Senator from California, it was that if a Senator wished to vote on the merits of the amendment, he would vote "nay." That is not a parliamentary inquiry.

Mr. KUCHEL. I said no such thing. I said if one wanted to vote——

Mr. MANSFIELD. Mr. President, I call for the regular order.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. LAUSCHE. On this vote I have a pair with the Senator from Arizona [Mr. HAYDEN.] If he were present, he would vote "nay." If I were at liberty to vote, I would vote "yea." I therefore withhold my vote.

Mr. HUMPHREY. I announce that the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], the Senator from Massachusetts [Mr. SMITH], and the Senator from Utah [Mr. Moss], are absent on official business.

I also announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ] are absent because of illness.

On this vote, the Senator from Oklahoma [Mr. KERR] is paired with the Senator from Utah [Mr. Moss]. If present and voting, the Senator from Oklahoma would vote "nay," and the Senator from Utah would vote "yea."

I further announce that, if present and voting, the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from New York [Mr. JAVITS], and the Senator from Ver-

mont [Mr. PROUTY] are necessarily absent.

The Senator from Maryland [Mr. BUTLER] is detained on official business.

If present and voting, the Senator from New York [Mr. JAVITS] would vote "yea."

On this vote, the Senator from Maryland [Mr. BEALL] is paired with the Senator from Nebraska [Mr. CURTIS]. If present and voting, the Senator from Maryland would vote "yea," and the Senator from Nebraska would vote "nay."

On this vote, the Senator from Vermont [Mr. PROUTY] is paired with the Senator from Iowa [Mr. HICKENLOOPER]. If present and voting, the Senator from Vermont would vote "yea," and the Senator from Iowa would vote "nay."

The result was announced—yeas 42, nays 41, as follows:

[No. 194]

Curtis	Long, Mo.	

So the motion to lay on the table was agreed to.

Mr. McCARTHY. Mr. President, I ask for the regular order.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. KEATING. Mr. President, I call up my amendments designated "8–29–61—A." I ask unanimous consent that their reading be dispensed with.

The PRESIDING OFFICER. Without objection, the reading will be dispensed with; and without objection, the amendments will be printed in the RECORD.

The amendments are as follows:

On page 2, line 7, after the term "working conditions", add the words "and other terms and conditions of employment".

On page 2, line 8, after the term "foreign workers", add the following:

"For the purposes of this section the term 'other terms and conditions of employment comparable to those offered foreign workers' includes only—

"workmen's compensation or insurance against occupational hazards reasonably comparable to those afforded Mexican workers;

"guarantee of the opportunity to work during at least three-quarters of the workdays in the agreed term of employment;

"provision of basic subsistence when the opportunity to work is not available for extended periods;

"provision of transportation (for the worker only) from place of recruitment and return, or provision of reimbursement for such cost, in the ratio that the number of weeks worked bears to the total agreed term of employment and not to exceed a maximum of $3 per week of employment."

The PRESIDING OFFICER. Debate on the amendment is limited to 10 minutes to each side.

Mr. KEATING. Mr. President, I shall try to be very brief. The time on this amendment is limited to 10 minutes to each side, but it may not be necessary to use all the time.

I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. KEATING. Mr. President, this amendment is very simple. It is backed by both the present administration and the previous administration, and is strongly urged by the Secretary of Labor, Mr. Goldberg, and by the former Secretary of Labor, Mr. Mitchell.

In substance, the amendment gives to U.S. workers the same privileges, insofar as working conditions are concerned, as those provided for Mexican workers, with the exception that the amendment does not provide for housing for American workers, which is provided for in the case of Mexican workers. With this exception, the amendment provides that as regards other working conditions, American workers are to receive the same treatment that Mexican workers receive. Specifically, there are four categories: The first is comparable insurance of workmen's compensation; the second is a work guarantee for an agreed term of employment, to which both the employee and the employer must adhere; the third is a guarantee of basic subsistence when no work is available; and the fourth is transportation of not to exceed $3 a week per worker for work for any one employer.

In my opinion it is only simple justice that we offer American workers the same conditions of work that are required to be offered to Mexican workers under Public Law 78.

This amendment is strongly back by a large number of organizations, including the following: The National Council of Churches of Christ of the U.S.A. and many Protestant denominations; National Catholic Rural Life Conference and many other Catholic organizations; the AFL–CIO and its affiliated unions; the National Farmers Union; the Unitarian Fellowship for Social Justice, National Child Labor Committee; the National Consumers League; Department of Rural Education, National Education Association; National Advisory Committee on Farm Labor; National Council on Agricultural Life and Labor.

This proposal is not new. It grew out of the work of former Secretary of Labor Mitchell. I introduced it with his help in 1960 as an amendment to Public Law 78, which was extended for 6 months at that time. In offering it today—I have the support of the junior Senator from Minnesota, Senator MCCARTHY, who also recommended this proposal as a part of the Mexican farm-labor bill supported by the new administration.

Why do we need to amend Public Law 78? This program was originally passed in a period of labor shortage during the Korean war. Since then it has been extended with no real revisions. The number of Mexicans working in the United States has in fact increased significantly. To a large part, this has simply meant bringing into the country a captive labor force that depresses the wages of American migrant farmworkers. Both Labor Secretary Goldberg and former Secretary Mitchell testified to this effect.

Who is hurt? American farmworkers are hurt. They are mostly Negroes. Many have limited educations. They have no homes and no roots. They are oppressed and mistreated in many instances.

Who else is hurt? American farmers in many parts of the country are hurt. They are producers in areas in which farmworkers receive better treatment and more protection. The higher costs of these advantages make it difficult to compete with regions in which wages are unrealistically low because of the Mexican program. Many eastern farmers, including farmers in New York State, suffer because of the competitive advantage of regions in which a readily available supply of Mexican workers forces down wage rates. Wages for migrants in parts of the South and Southwest are as low as 30 cents per hour. The most common rate in Texas, Arkansas, and Tennessee is 50 cents per hour. In these States, foreign workers represent about 30 percent of total seasonal employment. Average wages in the Rochester, N.Y., area are 80 cents to $1 per hour. The Middle Atlantic States average is 89 cents; New England, $1.

My amendment is not a sweeping mandate for Federal control. I repeat that it affects only farmers who use Mexicans. It is limited to four conditions. It completely excludes housing, which Mexicans get free of charge. It places a reasonable ceiling of $3 per employer per week on transportation costs.

Mr. President, I am firmly convinced this amendment should be adopted if Public Law 78 is allowed to continue.

Mr. President, this amendment has nothing to do with fixing wages. Senators who were opposed to the preceding amendment said it would cause the Government to intrude into the matter of fixing wages. But all that the pending amendment does is provide that American workers shall be entitled to the same working conditions—except one—that Mexican workers are entitled to.

It is difficult for me to understand why this amendment would not receive strong support, and I hope it does.

Mr. President, I reserve the remainder of the time available to me.

Mr. McCARTHY. Mr. President, will the Senator from New York yield?

Mr. KEATING. I yield.

Mr. McCARTHY. I wish to join the Senator from New York in urging the Senate to adopt this amendment, which really proposes that American workers be treated about half as well as Mexican workers are treated.

Mr. KEATING. The Senator from Minnesota has stated the matter better than I have. Very frankly, knowing the opposition to any change in Public Law 78, we have framed this amendment in such a way that, as the Senator from Minnesota has said, the amendment would do only about half as much for American workers as now is done under this law for Mexican workers. Actually, I believe that American workers should have every bit as much protection as Mexican workers have. It is only because of the practicalities of the situation that the amendment has been drawn in the way it is.

Mr. JORDAN. Mr. President, how much time remains available?

The PRESIDING OFFICER. The Senator from New York has used only 5 minutes of the time under his control.

Mr. JORDAN. Does the Senator from New York wish to yield further time on his amendment?

Mr. KEATING. Mr. President, I think perhaps the Senator from North Carolina, who has charge of the time available to those in opposition, would like to use some of that time now. I have reserved the remainder of my time.

Mr. JORDAN. Perhaps the Senator from New York should continue to use his time.

The PRESIDING OFFICER. The Senator from New York is not compelled to use his time at this point.

Mr. JORDAN. Mr. President, from the time available to those in opposition to the amendment, I yield 1 minute to the Senator from California.

Mr. KUCHEL. First, I should like to ask the Senator from North Carolina whether this amendment was considered in the Committee on Agriculture and Forestry.

Mr. JORDAN. No, it was not.

Mr. KEATING. Mr. President, will the Senator from North Carolina yield?

Mr. JORDAN. I yield.

Mr. KEATING. I understood that the amendment was considered during the deliberations of the Committee on Agriculture and Forestry.

Mr. McCARTHY. Yes, that is right. It was incorporated as one of the major amendments to my bill, S. 1945, which was considered as part of the hearings, and there was testimony on it.

Mr. KEATING. That is my understanding.

Mr. JORDAN. The amendment of the Senator from New York was not specifically considered there.

Mr. KEATING. As offered by me, it was not. But it happens to be identical to a bill which I introduced this year and last at the request of Secretary Mitchell. It was offered in the committee by the Senator from Minnesota [Mr. McCARTHY], and he was the one who pushed it in the Agricultural Committee, of which I am not a member. But, as I understand, it was considered by the Committee on Agriculture and Forestry.

Mr. JORDAN. It was partially considered. The provisions of S. 1945 were somewhat different from this amendment.

Mr. McCARTHY. The question of consideration of the amendment may depend on what is considered to be consideration. There was discussion of it and there was testimony on it.

Mr. KUCHEL. Mr. President——

Mr. JORDAN. I yield.

Mr. KUCHEL. Mr. President, in the State from which I come there are many small farmers who do not find available American citizens to do the stoop labor and the other necessary farmwork during the short harvest seasons. Under the law, they are not permitted to obtain any temporary employment from abroad unless the Secretary of Labor determines there are no American citizens available for the work. That will continue to be the law if we have, in some fashion, a continuation of Public Law 78. But to tie down the additional requirements that the Senator from New York would write into this legislation, in the amendment before us, could conceivably almost prevent the small American farmer in the State from which I come, for example, from harvesting his crops. No one wants cheap domestic labor coming into this country from abroad. We in my State pay $1.23 an hour, if my recollection serves me correctly, for agricultural employees.

The amendment should be voted down.

Mr. JORDAN. Mr. President, I yield 2 minutes to the Senator from Texas [Mr. TOWER].

Mr. TOWER. Mr. President, at this very moment Hurricane Carla is making her capricious and devastating way to our Texas coast. She will lay waste farms and counties that rely substantially on bracero labor. It will take a year to rebuild the farms. Now it is proposed to further hamstring these farmers in their efforts by amending the bracero bill in such a way that it will have the effect of killing the bill and killing the bracero program. We shall be doing a heartless thing to these farmers if we adopt the amendment of the Senator from New York.

Mr. KEATING. I yield half a minute to the Senator from Minnesota [Mr. McCARTHY].

Mr. McCARTHY. Mr. President, I do not think the hurricane in the Galveston area really has great bearing on the consideration of the bill. I would be glad to support a relief measure for Galveston, but I do not think we ought to provide for the exploitation of American and Mexican labor.

Mr. JORDAN. Mr. President, the possibilities of working out provisions somewhat along the lines of those contained in the Keating amendment were discussed, not only in the subcommittee, but in the full committee. The Committee on Agriculture and Forestry could not arrive at a solution of how the amendments could work.

The members of the Committee on Agriculture and Forestry and those who are supporting the bill certainly have no desire to hurt American migrant labor. Nobody thinks they are getting as much as they should or that their living conditions are all that they should be. But that has nothing to do with this bill. The bill before the Senate is a Mexican migratory labor bill which deals with Mexicans only. The Secretary of Labor must certify that American labor is not available before Mexican workers can be certified to work in this country.

One further thing should be pointed out as to what the amendment of the Senator from New York would do. Domestic labor can now come from 1 mile, 10 miles, or 1,000 miles away. There is no telling where they come from. A great many come in their own automobiles. Some travel in trailers and bring their whole families. Some come in busloads and travel from farm to farm. Domestic migrant laborers do not operate under contract, as Mexicans do. Mexicans are under contract with whoever hires them, in cooperation with the U.S. Government and employment agencies of the States, and they work for fixed sums. If the Mexican fails to live up to the terms of the contract which he has entered into, he is returned to Mexico. He has no choice about it. But farmers in this country do not make contracts with domestic migrant laborers. They are the type of people who help neighbors on their farms. They may go to an adjoining farm. But they are under no obligation to remain any definite period of time. So it would be impossible for those farmers to take out insurance and comply with the other conditions set forth in the amendment of the Senator from New York. The Secretary of Agriculture or the Secretary of Labor could not arrive at regulations to handle that situation.

Most of the States have adopted regulations which concern sanitation, housing, insurance, transportation, and a great many other conditions. Recently we passed in the Senate five bills introduced by the Senator from New Jersey [Mr. WILLIAMS] which will go a long way toward remedying some of the conditions under which migratory domestic laborers operate. We know those conditions are bad. We do not argue that they are not. One bill will provide schools in areas where migrant laborers may stop for 1 day, or a week, or whatever time they may be there. We have gone a long way.

However, I do not think the Secretary of Labor, the Secretary of Agriculture, or the State authorities could possibly operate a program such as is proposed by the Keating amendment, and I think it would be a detriment to domestic labor to put the amendment into effect.

I oppose the amendment.

Mr. KEATING. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from New York has 4 minutes remaining.

Mr. KEATING. I shall not consume the entire 4 minutes. I wish to answer the argument made by the distinguished Senators from California and Texas. The argument made by the Senator from North Carolina is natural, because he is defending the bill. In my judgment, it is lacking in substance, though I have deep affection for the Senator from North Carolina.

The arguments made by the Senator from Texas and by the Senator from California were that this amendment would hit at the small operators. Those who employed braceros, for the most part, are the large corporate farms. The number of small farmers who employ braceros is very small indeed. They are employed mostly by the large corporate farms and associations.

Second, any farmer who employs braceros now must go through the process of first making a showing that he cannot get domestic workers. He must file an order for U.S. workers with the U.S. employment office. There must be known in some detail the terms of the job, along with the available housing, transportation facilities, the wage, and the content and duration of the job. If the amendment is adopted, it would not impose any further additional burdens upon any farmer, large or small.

The amendment would do one thing which it is difficult for me to see how the Congress of the United States can refuse to do, and that is give to U.S. workers on these farms the same consideration as to working conditions that are given to Mexican workers. The Senator from Minnesota has said it gives them half as much as the Mexican workers. Perhaps it is more than that, but it does not provide for domestic workers with regard to housing or wage rates.

If Members of the Senate will examine the amendment, they will see that it refers to four specified working conditions, every one of which we provide to Mexican workers.

All I ask is the same consideration for domestic workers that is given the foreign workers.

Mr. JORDAN. Mr. President, I yield 2 minutes to the Senator from Florida [Mr. HOLLAND].

Mr. HOLLAND. Mr. President, I oppose strongly the pending amendment. I recognize the good motives of the Senator who proposed it, but he simply does not know his subject. If Senators will look at the first condition applicable to the employment of domestic workers at the bottom of the first page, the language requires "workmen's compensation or insurance against occupational hazards reasonably comparable to those afforded Mexican workers." This is an impossible condition because the domestic migratory farmworker is not employed for a definite period of time. He picks beans today on one farm, on another farm the next day, and on a third farm the next day. He goes wherever he wishes to go. He is not under a contract which holds him in one place, subject to being sent home if he does not observe the contract.

This is a perfectly impossible condition placed in the amendment.

The second provision is equally impossible. It says that the farmer must furnish a "guarantee of the opportunity to work during at least three-quarters of the workdays in the agreed term of employment."

Mr. President, there is not any agreed term of employment. There is simply the employment, from day to day, of such workers as may be available to supplement the regular Mexican workers whom the Government, in its wisdom, has permitted the particular farmer to employ.

There is no way in the world to work out that particular condition, when there is no fixed agreement and there is not a fixed term of employment.

The able Senator places in the amendment the provision of a guarantee of the opportunity to work during at least three-quarters of the workdays in the agreed-upon term of employment, before domestic workers can be secured. Mr. President, the Senator, with all good motives and every good intention, has presented an amendment which is simply impossible of performance because of the nature of the workers and the nature of the work they perform.

I hope the Senate will reject the amendment.

Mr. KEATING. Mr. President, how much time remains on this side?

The PRESIDING OFFICER. The Senator from New York has 1 minute remaining.

Mr. KEATING. Mr. President, the answer to the argument made by the distinguished Senator from Florida is simply that both conditions—all four of the conditions—are already required for the Mexican workers.

If these provisions are not workable with respect to U.S. workers, then they are not workable with respect to Mexican workers.

In order to take advantage of the program the employers must provide for the Mexican workers the workmen's compensation or insurance against occupational hazards. They must provide for the Mexican workers a guarantee of the opportunity to work during at least three-quarters of the workdays. They must provide for the Mexican workers basic subsistence when the opportunity to work is not available.

All I ask is that there be provided for the U.S. workers what is to be provided for the Mexican workers.

Mr. HOLLAND. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. The time of the Senator from New York has expired. The Senator from North Carolina has 1 minute remaining.

Mr. JORDAN. Mr. President, I yield 1 minute to the Senator from Florida.

Mr. HOLLAND. I should like to ask the Senator from New York if he does not realize that the Mexican workers come to the United States for a fixed term of employment under a contract which is, in effect, a contract between the Government of Mexico and our Government. Of course such things as workmen's compensation and an agreement that the workers will be paid for at least three-fourths of the time covered by the contract may be worked out in those circumstances. However, there are such things as peonage laws in our country. There is no assurance at all that any worker employed on a farm one day doing seasonal work—picking beans, hoeing cotton, hoeing corn—will be there the next day.

The amendment simply does not fit in with the American way of dealing with domestic farm employees, who can come and go as they wish, and who do exactly that.

Mr. KEATING. Mr. President, then the amendment would not apply. If there were not an agreed term of an employment the amendment would not apply.

The PRESIDENT OFFICER. All time for debate has expired.

The question is on agreeing to the amendment offered by the Senator from New York [Mr. KEATING]. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. DIRKSEN (when his name was called). On this vote I have a pair with the distinguished Senator from New York [Mr. JAVITS]. If he were present and voting he would vote "yea." If I were at liberty to vote I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. HUMPHREY. I announce that the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON], and the Senator from New Mexico [Mr. CHAVEZ] are absent because of illness.

On this vote, the Senator from Arizona [Mr. HAYDEN] is paired with the Senator from Massachusetts [Mr. SMITH]. If present and voting, the Senator from Arizona would vote "nay," and the Senator from Massachusetts would vote "yea."

On this vote, the Senator from Oklahoma [Mr. KERR] is paired with the Sentor from Oregon [Mrs. NEUBERGER]. If present and voting, the Senator from Oklahoma would vote "nay," and the Senator from Oregon would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from New York [Mr. JAVITS], and the Senator from Vermont [Mr. PROUTY] are necessarily absent.

The Senator from Maryland [Mr. BUTLER] is detained on official business.

If present and voting, the Senator from Nebraska [Mr. CURTIS], and the Senator from Iowa [Mr. HICKENLOOPER] would each vote "nay."

On this vote, the Senator from Maryland [Mr. BEALL] is paired with the Senator from Vermont [Mr. PROUTY]. If present and voting, the Senator from Maryland would vote "yea," and the Senator from Vermont would vote "nay."

The result was announced—yeas 35, nays 49, as follows:

[No. 195]

YEAS—35

Boggs	Carroll	Douglas

Bridges	Hickenlooper	Prouty
Butler	Javits	Smith, Mass.
Chavez	Kerr	
Curtis	Long, Mo.	

So Mr. KEATING's amendment was rejected.

Mr. KUCHEL. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The committee amendment in the nature of a substitute is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question now is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

Mr. GORE. Mr. President, I ask for the yeas and nays on the passage of the bill.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] are absent on official business.

I also announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ] are absent because of illness.

I further announce that, if present and voting, the Senator from New Mexico [Mr. ANDERSON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from Massachusetts [Mr. SMITH] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from New York [Mr. JAVITS], and the Senator from Vermont [Mr. PROUTY] are necessarily absent.

The Senator from Maryland [Mr. BUTLER] is detained on official business.

If present and voting, the Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from New York [Mr. JAVITS], and the Senator from Vermont [Mr. PROUTY] would each vote "yea."

The result was announced—yeas 76, nays 9, as follows:

[No. 196]

YEAS—76

Butler	Javits	Prouty
Chavez	Kerr	Smith, Mass.

So the bill (H.R. 2010) was passed.

Mr. JORDAN. Mr. President, I ask unanimous consent that the bill as passed be printed with the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JORDAN. Mr. President, I move that the Senate insist upon its amendments, ask for a conference thereon with the House, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. JORDAN, Mr. ELLENDER, Mr. JOHNSTON, Mr. HOLLAND, Mr. AIKEN, Mr. YOUNG of North Dakota, and Mr. HICKENLOOPER conferees on the part of the Senate.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. What is the pending business before the Senate?

The PRESIDING OFFICER. There is no unfinished business.

Mr. MANSFIELD. I move that the Senate proceed to the consideration of Calendar No. 719, S. 2393.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

Mr. MORSE. Mr. President, in view of the interest in the impacted areas legislation and the expectation that a number of Senators will participate in the debate on both sides of the aisle, I ask unanimous consent that all staff members of the Senate Committee on Labor and Public Welfare be admitted to the floor to assist Senators. I further ask unanimous consent that Dr. Samuel Halperin, consultant to the Subcommittee on Education, be given floor privileges to assist me.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

CLARIFICATION OF STATUS OF CIRCUIT AND DISTRICT JUDGES RETIRED FROM REGULAR ACTIVE SERVICE

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H.R. 5255) to clarify the status of circuit and district judges retired from regular active service, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. EASTLAND. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. EASTLAND, Mr. JOHNSTON, and Mr. HRUSKA conferees on the part of the Senate.

THE MOTION PICTURE "THE ANGRY SILENCE"

Mr. GOLDWATER. Mr. President, in their persistent and unrelenting assault on many of our Nation's most cherished traditions, American liberals have unceasingly sung the praises of "nonconformity." They have defended every effort to transform our most precious and venerable institutions with the loud

assertion that these manifestations of "nonconformity" must be protected if free thought, intellectual vigor, and mental initiative are to survive in the United States.

Interestingly enough, this enthusiastic zeal for the preservation of "nonconformity" never seems to extend to any proposition or activity that is contrary to any well-established liberal shibboleth. One of the most cherished of these shibboleths is that labor unions and labor union leaders are generally—except for a few atypical specimens like Jimmy Hoffa—on the side of the angels; that what they do is good, and that those who oppose or even criticize them are moved by evil or sinnister motives.

Mr. President, my purpose in speaking at this time is to call the attention of the Senate, and of the public, to a motion picture which has just opened at the Ontario Theater in Washington. At the beginning of the year this film had run for a few weeks in New York City and had received the universal plaudits of the critics. Its reception in the Capital has been equally enthusiastic in the local press.

The picture is called "The Angry Silence." It was produced in Great Britain and is performed by actors unknown to me—at any rate, the cast includes no big-name film stars. It deals with an episode in the life of a British rank-and-file union member and his relations with his union. He is the hero of the film, and he is a true nonconformist. In what does his nonconformity exist? Does he shout the defeatist slogan "Better Red than dead?" No. Is he demanding an increase or expansion of socialized medicine? No. Is he loudly advocating any of the usual causes so dear to the liberal heart? No.

To the contrary, he opposes a strike involving his union. He refuses to believe that his employer is an unqualified devil, and those who lead his union, the most perfect of saints or angels. He is what the liberals and labor bosses would call a "scab." This is the hero of "The Angry Silence," a hero who because of his nonconformity suffers what most of us would call martyrdom, inflicted by his union, its leaders, and the most fanatical adherents.

I think all of us should see this film as a necessary corrective to the stereotyped image of labor unionism which the liberals have fostered and have attempted to impose on the country.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD reviews of "The Angry Silence" which have been published in the local press—yes, even that pillar of liberal and conformist "nonconformity," the Washington Post.

There being no objection, the reviews were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 8, 1961]

"ANGRY SILENCE" AT ONTARIO—TIGHT LITTLE TEAM CREATES GOOD DRAMA

(By Leo Sullivan)

As a screenplay, "The Angry Silence" is sort of Reginald Rose out of John Galsworthy. The British import at the Ontario poses the individual against the mob in a setting of labor union strife. It takes time, but once the story's forces of conflict come into focus, the film becomes a gripping, even exciting drama.

Admirably put together, the production seems to be the work of a tight little creative team. It has been coproduced by Richard Attenborough, who also costars with Pier Angeli, and Bryan Forbes, who wrote the script from an original story by Richard Gregson and one of the film's featured players, Michael Craig. It has been directed by Guy Green, the strength of whose work comes from terse editing which gradually accelerates the film's pacing.

Perhaps the unpretentiousness of "The Angry Silence" is the result of this absence of filmdom's big guns. Certainly the occasionally sticky earnestness of its conviction as to the rights of the individual can be explained by the closeness of this small, dedicated group.

THE LONE DISSENTER

What happens is this: when the union at a small English tool factory pulls out its men on strike, one member refuses to stop work. Tom is not alone at first. Several older workers share his view and continue to report for a few days. Before long, however, his allies fall away, leaving him the sole "scab."

His reasons are as simple as his action is brave. Tom's wife Anna has just told him that their third child is on the way, so he can't afford a period of unemployment. Besides, the strike is a "wildcatter," since the union bosses have refused to sanction it.

That the man, standing upon his rights, has no higher principle than this and, in fact, seems hardly intelligent enough to think through his purpose, strikes me as a weakness in the script. However, one is hard put not to admire his courage.

A DOSE OF COVENTRY

The punishment for such independence, ordained by the works committee, is silence. Tom is sent off to Coventry, as his coworkers put it. Even after the strike is temporarily halted and the men return to the shop, they refuse to speak to Tom. He is ignored, unheard, unseen.

Only when a couple of juvenile delinquents in the plant take it upon themselves to "get" him does Tom falter. His household is threatened, his son harmed and, finally, he himself is almost fatally injured before the workers come to their senses.

Attenborough is wholly believable as Tom. Stockily built, attired in flannel shirt and cord pants, he plays the inarticulate factory worker quietly, surely. And Miss Angeli is greatly appealing as his Italian wife who already had felt the chill of loneliness as a foreigner even before Tom's action made her an outcast.

In fact, it is a splendid cast, with each actor furthering the aim of writer and director to turn a flaring light on management, labor, press—even a "Commie" infiltrator down from London.

Arthur Ibbetson's camera is ever probing through the cold light of overcast days to capture the look of anger. Filmed in Ipswich, the picture offers American audiences a different view of an English factory town from that of the usual midlands.

What's more, "The Angry Silence" is constructed on a plot which should appease those disappointed by the rather similar "Saturday Night and Sunday Morning."

[From the Washington Daily News, Sept. 8, 1961]

ONTARIO'S "THE ANGRY SILENCE" REALLY DESERVES YOUR ATTENTION

(By James O'Neill, Jr.)

"The Angry Silence," at the Ontario, is an honest, searching, and dramatic account of what happens in a labor-management dispute when union leadership is weak and stupid, management is blind, and the evil influence of Communists perverts issues, endangers life, and generally commits its historic abuses to civilization.

British-made, the film exudes an honesty and a determination, which makes it entirely believable as it lines out parallel evils in both management and labor—though certainly the abuses of organized labor, in this instance, are the greater of the two.

Richard Attenborough, a fine young English actor, coproduced the picture with screenwriter Bryan Forbes, and if "The Angry Silence" is any indication, this pair should stay in business. They could teach some of our embryonic American producers a few things about the making of intelligent films.

THE SETTING

The picture is set in a dreary industrial city in England, where the majority of the factory hands seem dejected, tired, and extremely angry.

Mr. Attenborough, a young man with two children and an expectant wife, refuses to be bullied into a strike which is senseless, Communist-inspired, and led by a local union cretin who has a lead ring in his nose.

The labels "scab" and "black-leg" are applied to Mr. Attenborough, and his life, and that of his family, is made a living hell. Putting a man "in Coventry," they call it English, but here it would be recognized as "the silent treatment." His coworkers refuse to talk to him, and when this painful silence fails to have a punishing effect on him, more forceful and brutal tactics are used.

THE PLOT

The plot has to do with the settling of this unfortunate matter, which is not helped by the presence of some homicidal teenage types in motorcycle jackets and sideburns.

The acting is uniformly good and the production, while rather stark, fits the story perfectly. There is a defeatist attitude in these people, and while there is a lot of things wrong with their society and their mode of living, violence, and baseless labor disputes are not the way to right these wrongs.

The dialog is extremely good, and while it may be picturesquely broad, it is necessary to set the mood and demonstrate the backgrounds of protagonist and antagonist.

"The Angry Silence" is an extremely thoughtful, forceful, and dramatic motion picture. It deserves your attention.

SOLUTION OF JUVENILE DELINQUENCY CONTROL PROBLEMS

Mr. HILL. Mr. President, I ask that the Chair lay before the Senate the amendment of the House of Representatives to S. 279.

The PRESIDING OFFICER (Mr. PELL in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 279) to provide Federal assistance for projects which will demonstrate or develop techniques and practices leading to a solution of the Nation's juvenile delinquency control problems, which was, to strike out all after the enacting clause and insert:

That this Act may be cited as the "Juvenile Delinquency and Youth Offenses Control Act of 1961".

FINDINGS AND POLICIES

SEC. 2. (a) The Congress hereby finds and declares that juvenile delinquency and youth offenses diminish the strength and vitality of the people of our Nation; that such delinquency and offenses are increasing in both urban and rural communities;

that such delinquency and offenses occur disproportionately among school dropouts, unemployed youth faced with limited opportunities and with employment barriers, and youth in deprived family situations; and that prevention and control of such delinquency and offenses require intensive and coordinated efforts on the part of private and governmental interests.

(b) The policy of the Federal Government is to assist in developing techniques for the prevention and control of juvenile delinquency and youth offenses, and to encourage the coordination of efforts among governmental and nongovernmental educational, employment, health, welfare, law enforcement, correctional, and other agencies concerned with such problems.

DEMONSTRATION AND EVALUATION PROJECTS

SEC. 3. (a) For the purpose of demonstrating improved methods for the prevention and control of juvenile delinquency or youth offenses (which, for the purposes of this Act, includes treatment of juvenile delinquents and youthful offenders), the Secretary of Health, Education, and Welfare (hereinafter in this Act referred to as the "Secretary") is authorized to make grants for projects for the evaluation, or demonstration of the effectiveness, of techniques and practices which in the Secretary's judgment hold promise of making a substantial contribution to the prevention or control of juvenile delinquency or youth offenses, including techniques and practices for the training of personnel and for developing or securing more effective cooperation among public and other nonprofit agencies, organizations, and institutions.

(b) Such grants may be made to any State, local, or other public or nonprofit agency, organization, or institution; and to the extent he deems it appropriate, the Secretary shall require the recipient of any grant to contribute money, facilities, or services for carrying out the project for which such grant was made.

(c) The Secretary is further authorized to enter into contracts for any such projects with public or other agencies, organizations, or institutions, and with individuals.

(d) The full amount (as determined by the Secretary) of any grant for a project made under this section shall be reserved from the appropriation for the fiscal year in which the grant is made; and payments on account of such grant in that and subsequent fiscal years may be made only from the amount so reserved.

(e) Payments under this section may be made in installments, and in advance or by way of reimbursement, as may be determined by the Secretary, and shall be made on such conditions as he finds necessary to carry out the purposes of this section.

TRAINING OF PERSONNEL

SEC. 4. (a) For the purpose of training personnel employed or preparing for employment in programs for the prevention or control of juvenile delinquency or youth offenses, the Secretary is authorized to make grants for programs for such purpose which in his judgment hold promise of making a substantial contribution to the prevention or control of juvenile delinquency or youth offenses. Such programs may include, among other things, the development of courses of study, and the establishment of short-term traineeships with such allowances for travel and subsistence expenses, as the Secretary may determine to be necessary.

(b) Such grants may be made to any Federal, State, local, or other public or nonprofit agency, organization, or institution; and to the extent he deems it appropriate, the Secretary shall require the recipient of any grant to contribute money, facilities, or services for carrying out the program for which such grant was made.

(c) The Secretary is further authorized to enter into contracts for any such programs with public or other agencies, organizations, or institutions, and with individuals.

(d) The full amount (as determined by the Secretary) of any grant for a program made under this section shall be reserved from the appropriation for the fiscal year in which the grant is made; and payments on account of such grant in that and subsequent fiscal years may be made only from the amount so reserved.

(e) Payments under this section may be made in installments and in advance or by way of reimbursement, as may be determined by the Secretary, and shall be made on such conditions as he finds necessary to carry out the purposes of this section.

TECHNICAL ASSISTANCE SERVICES

SEC. 5. (a) The Secretary is authorized to make studies with respect to matters relating to the prevention or control of juvenile delinquency or youth offenses, including the effectiveness of projects or programs carried out under this Act, to cooperate with and render technical assistance to State, local or other public or private agencies, organizations, and institutions in such matters, and to provide short-term training and instruction in technical matters relating to the prevention or control of juvenile delinquency or youth offenses.

(b) The Secretary is authorized to collect, evaluate, publish, and disseminate information and materials relating to studies conducted under this Act, and other matters relating to prevention or control of juvenile delinquency or youth offenses, for the general public or for agencies and personnel engaged in programs concerning juvenile delinquency or youth offenses, as may be appropriate.

AUTHORIZATION OF APPROPRIATIONS

SEC. 6. There is hereby authorized to be appropriated to the Secretary for the fiscal year ending June 30, 1962, and each of the two succeeding fiscal years, the sum of $10,000,000 for carrying out this Act.

MISCELLANEOUS

SEC. 7. (a) (1) The Secretary is authorized to appoint such technical or other advisory committees to advise him in connection with prevention or control of juvenile delinquency or youth offenses as he deems necessary.

(2) Members of any such committee not otherwise in the employ of the United States, while attending meetings of their committee, shall be entitled to receive compensation at a rate to be fixed by the Secretary, but not exceeding $75 per diem, including travel time, and while away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 73b-2) for persons in the Government service employed intermittently. The provisions of section 1003 of the National Defense Education Act of 1958 shall apply to members of such committees.

(b) The Secretary shall consult with the President's Committee on Juvenile Delinquency and Youth Crime on matters of general policy and procedure arising in the administration of this Act, and shall consider the recommendations, if any, of such Committee on program applications submitted under section 3 or 4 and on proposed studies or other actions to be undertaken pursuant to section 5.

(c) As used in this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

Mr. HILL. Mr. President, the purposes of S. 279 and the House amendment are substantially identical. The differences are in the amount of appropriations, the length of the program and the administrative devices which are used.

First. Both programs authorize demonstration and study projects in the juvenile delinquency field. These projects would be made in the form of grants to States and municipalities and other public or private nonprofit agencies. The Secretary of Health, Education, and Welfare, who has general supervision over the program, is empowered to require matching funds.

Second. Both programs provide for the training of personnel employed or preparing for employment in juvenile delinquency programs. The Secretary would be empowered to develop courses of study and establish short-term traineeships with expense allowances. The training programs would be made in the form of grants to governmental or nonprofit private agencies or institutions. The Secretary may also require matching funds.

Third. Both bills authorize the Secretary to make studies, investigations and reports under the heading of "Technical Assistance Services" based upon the information derived from the other programs authorized by the bill.

The Senate bill was a 4-year program, the House amendment is for 3 years. The Senate bill provided an allocation of $2,500,000 for the demonstration projects and $2,500,000 for the training of personnel. Amounts of money for the technical assistance services were to be appropriated under the general funds to the Department of Health, Education, and Welfare authorized by the Congress.

The House amendment contains an authorization for all the programs spelled out in the bill at $10 million per year. The total amount contemplated by the House amendment is therefore $30 million. The total amount contemplated by the Senate bill would be $20 million plus additional amounts for administration and technical services not specifically authorized by the bill.

The Senate bill would have established a National Advisory Council on Juvenile Delinquency which specifically would channel all grants requested by local public or private agencies to the Secretary with the Council's recommendations. The House amendment authorizes the Secretary to appoint technical or advisory committees and requires that the Secretary shall consult with the newly formed President's Committee on Juvenile Delinquency and Youth Crime. The Secretary is required to consider the recommendations of the President's Committee on program applications. The report of the House committee in its analysis of section 7 reads as follows:

> It is contemplated that such technical and other advisory committees will review the projects, programs, and studies under the act and make recommendations.

Mr. President, I move that the Senate concur in the amendment of the House.

The motion was agreed to.

Mr. CLARK subsequently said: Mr. President, earlier today the Senate concurred without debate in the House amendment to S. 279, which in effect is the administration's bill to authorize

the appropriation of the relatively small amount of money to search for cures to the problem of juvenile delinquency.

Two years ago the Senator from Alabama, the chairman of the Committee on Labor and Public Welfare [Mr. HILL] and I jointly introduced and had passed by the Senate a bill to accomplish approximately the same purposes. Our bill was passed as S. 279 early in this session.

I am happy to note the passage by the House and now by the Senate of the bill, known as the Juvenile Delinquency and Youth Offenses Control Act of 1961, which will now go to the White House for signature.

There is very little difference between the House amendment and the bill passed by the Senate. I am happy my colleague from Alabama accepted the House version, which caused the bill to be approved by the Senate without debate.

The purposes of each proposal were: First, to authorize the appropriation of money for demonstration and study projects in the field of juvenile delinquency. Second, to provide for the training of those now engaged in the field of juvenile delinquency programs, or to be employed in it. Third, to render technical assistance to local, State, and private agencies which are endeavoring to cope with this problem, which is bothering not only the cities but also the towns and rural districts as well.

The only difference between the House amendment and the Senate bill is that the Senate bill provided an authorization of $5 million a year for 4 years whereas the House bill provided an authorization of $10 million a year for 3 years. The money is to be distributed by grants to Federal, State, local, or other public or nonprofit agency, organization, or institution, as determined by the Secretary of Health, Education, and Welfare, upon recommendation by his advisory committee.

I am happy indeed that the bill is now on its way to the White House. I am confident it will soon be enacted into law. I believe the Congress has taken a perceptible step forward in the effort to assist in the solution of this most difficult problem of juvenile delinquency.

HEALTH CARE FOR THE AGED

Mr. HILL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4998, the Community Facilities bill.

The PRESIDING OFFICER (Mr. PELL in the chair) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H.R. 4998) to assist in expanding and improving community facilities and services for the health care of aged and other persons, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HILL. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. HILL, Mr. YARBOROUGH, Mr. WILLIAMS of New Jersey, Mr. PELL, Mr. JAVITS, and Mr. CASE of New Jersey conferees on the part of the Senate.

RESUMPTION OF NUCLEAR TESTING

Mr. DODD. Mr. President, as President Kennedy has stated, the Soviet decision to resume nuclear testing left us with no alternative but to resume testing, ourselves. I am sure this decision enjoys the unanimous support of both parties and of the overwhelming majority of the American people.

In resuming nuclear tests, it is my earnest hope that we shall not resume them on a business-as-usual or testing-as-usual basis. We have lost 3 precious years of technological leadtime in the critical field of nuclear weapons. The rapid fire series of tests which the Kremlin is now conducting is proof positive that it has been conducting clandestine tests from the very first day of the moratorium.

I believe it can be taken as axiomatic that the new weapons they are now testing are not crude prototypes, based on nothing but theory, but are weapons that have been developed and perfected through underground testing.

Mr. President, the moratorium on nuclear testing may not only have cost us our technological lead in nuclear weapons; it may have enabled the Soviets to achieve a technological lead which will gravely imperil our national security.

I am not reassured by the knowing statements of scientists and of scientific panels, which have repeatedly assured us that there is no evidence the Soviets have jumped into the lead or have staged any major technological breakthrough. The hard fact is that neither our scientists nor our intelligence predicted that the Kremlin would have the A-bomb when it did, nor predicted that it would have the H-bomb when it did. In the case of the H-bomb, top-ranking scientific advisers, such as Dr. Hans Bethe, took the stand, almost until the last minute, that it "could not be made and should not be made."

We have to face the frightening fact that the Kremlin has shown an ability to conduct massive developmental programs without the knowledge of our scientific community or of our intelligence community. In the light of this fact, any assurance that the Soviets have not staged a major technological breakthrough in nuclear weapons is as meaningless as it is presumptuous.

Mr. President, now that the Soviets have openly resumed testing in the atmosphere, I hope that we shall commit ourselves to our own testing program with all the earnestness and all the expedition at our command. We must spare no effort. We must place no limit on costs. We have 3 years of lost time to make up, and our survival as a nation may be at stake.

The importance of nuclear technology to our national security is forcefully described in an article, in the current issue of Reader's Digest, by Adm. Lewis L. Strauss, former Chairman of the U.S. Atomic Energy Commission. No one is more qualified to speak on this subject than is Admiral Strauss. Although his article was written before the resumption of testing by both sides, it retains all of its validity, both as a guide to future policy and as a critical examination of our recent follies.

Mr. President, I ask unanimous consent that the article by Adm. Lewis L. Strauss, entitled "Why Nuclear Testing Is a Must for Freedom," be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY NUCLEAR TESTING IS A MUST FOR FREEDOM

(By Lewis L. Strauss, former Chairman, U.S. Atomic Energy Commission)

In 1957 an official British white paper on defense stated, "The free world is today mainly dependent for its protection upon the nuclear capacity of the United States." At the time, this was a valid assumption. The American lead in the development of nuclear strength was commanding. This superior position was the bulwark of the safety not only of ourselves and our allies but of the neutral nations as well.

Today the nuclear capacity of the United States has been impaired by 3 years of voluntary suspension of U.S. nuclear testing. While the present relative strength of the United States and the Soviet Union is unknown, the test moratorium certainly has not worked to the advantage of the free world.

This is true whether or not the Soviets have been testing nuclear weapons clandestinely—which has been their consistent custom since 1949. The important point is that world peace and security now depend upon a stockpile of U.S. nuclear weapons some of which are 3 or more years old, and have not been proof-tested. Their "readiness" is therefore unknown.

Let me cite a parallel from recent history. When I reported for duty in the U.S. Navy Bureau of Ordnance in March 1941, I was astonished to learn that the torpedoes in our stockpile were in most respects the same sort of torpedoes we had used in World War I. The Navy had been so stinted for funds that not a single torpedo with a live warhead had been fired in more than 20 years.

After Pearl Harbor, U.S. submarines in the Pacific fired these untested torpedoes against enemy ships. Through their hydrophones our men could hear them strike Japanese hulls. But the torpedoes failed to explode. This was a serious setback in our early operations in the Pacific.

I think the moral is plain: No stockpile of weapons can be considered dependable unless random specimens are taken from it and subjected to periodic tests.

The United States was maneuvered into the suspension of nuclear testing largely by world opinion—skillfully manipulated by Soviet propaganda—which confused suspension with actual nuclear disarmament and control. Now world opinion is being engulfed by another wave of Soviet propaganda, directed this time against the resumption of nuclear tests by the United States.

The U.S. position on real nuclear disarmament has been clearly and consistently stated since 1954. Shortly after the first atomic bombs were used against Japan,

President Truman announced the willingness of the United States to place atomic energy under the rigid control of an international authority. This policy was endorsed by our British and Canadian allies.

On June 14, 1946, Bernard M. Baruch, as head of the U.S. delegation, placed the American proposal before the United Nations Atomic Energy Commission, opening his address with the somber statement: "We are here to make a choice between the quick and the dead." The proposal called for the creation of an International Atomic Development Authority "to which should be entrusted all phase of the development and use of atomic energy." The Authority was to have ownership of raw materials; control or ownership of all atomic-energy activities potentially dangerous to world security; power to inspect and license all other activities, including the development of the beneficial uses of atomic energy; and responsibility for developing means to enable it to detect misuse of atomic energy. Baruch called this "a program not composed merely of pious thoughts but of enforcible sanctions—an international law with teeth in it."

Viewed as history, this daring proposal, made at a time when the Western allies had a monopoly on atomic weapons, appears as an act of altruism without parallel. It was made in good faith, and it was clearly intended to avert a disastrous arms race. But the Soviets, for all their professed interest in disarmament and the control of atomic energy, would have no part of any plan which required inspection and control. They opposed the U.S. proposal in the U.N. General Assembly and then, when it passed to the Security Council, exercised their veto.

For the next few years the Western World felt secure under what was considered a U.S. atomic monopoly. Many responsible people thought that this security might even last for a generation. The development of the atomic weapon, they maintained, would have been impossible but for our advanced science and technology and highly developed industrial resources—all of which the Soviets lacked.

This comfort I found impossible to share. In 1947, shortly after being appointed to the newly formed U.S. Atomic Energy Commission, I suggested to my colleagues that some kind of system should be set in motion to monitor possible atomic-weapons tests within Soviet territory. They agreed that this could be accomplished by aircraft equipped with devices for sampling the atmosphere well outside the Soviet borders. Since such an operation was beyond the statutory responsibility of the AEC, I proposed the program to my friend James Forrestal, then Secretary of the Navy, who was shortly to become our first Secretary of Defense.

The plan was eventually put into operation, and in August 1949 our monitors detected what was, so far as we know, the first Soviet atomic explosion. We detected further Soviet tests of atomic weapons in 1951.

Meanwhile, against bitter opposition within our own Government and among its scientific advisers, we had gone ahead with the development of the far more potent thermonuclear weapon (the H-bomb), which was tested successfully in November 1952. Less than 1 year later, in August 1953, the Soviet Union tested its own thermonuclear weapon.

The Soviet atomic-weapons program benefited initially from the espionage activities of Alan Nunn May, the Rosenbergs, Pontecorvo, Maclean, Burgess, and others. Klaus Fuchs, who worked on British atom projects and in our Los Alamos laboratory, apparently gave the Soviets the facts about the thermonuclear bomb.

When President Eisenhower took office in 1953, he was determined to make every effort to banish the specter of atomic war. On December 8, 1953, he went before the General Assembly of the United Nations and offered his atoms for peace plan. The atom, he said, "must be put into the hands of those who will know how to strip its military casing and adapt it to the arts of peace." The Soviet delegation joined in the enthusiastic applause. But when Secretary of State Dulles began conversations with the Russians, it soon became evident that they wanted nothing of the sort. It took from 1953 until 1957 to get the International Atomic Energy Agency organized, with the Russians delaying and sabotaging the project at every step. Thanks to Moscow, the IAEA is today a denatured body, unlikely to execute the major part of the atoms for peace plan.

Meanwhile, the Soviet Union, although engaged actively in testing of atomic and thermonuclear weapons, was exploiting an ingenious new propaganda line. The keynote was fallout—the alleged contamination of the earth's atmosphere with supposedly lethal radiation resulting from nuclear testing.

The nightmare of fallout had been with us ever since the first atomic bomb was exploded in a test at Alamogordo, N. Mex., in 1945 atop a steel tower. The heat of the explosion vaporized the steel tower, and wind carried radioactive debris until it fell upon a herd of cattle grazing a few miles away. The cattle at first lost some hair from their backs. Later, they were moved to Oak Ridge for observation. There they lived and reproduced—to the fifth or sixth generation, when I last saw them—and the progeny were normal animals.

But the propagandists found more abundant material with the advent of the thermonuclear weapon. In March 1954 we tested, in the Pacific Proving Ground, several thermonuclear weapons, one of which had a larger yield of radioactive material than anticipated. Some of the material, carried downwind, fell upon two inhabited atolls and upon a Japanese fishing vessel, the *Lucky Dragon*, which had disregarded published warnings and sailed into the zone of possible fallout.

The islanders developed no casualties; the women had no stillbirths, bore no abnormal children. The fishermen aboard the *Lucky Dragon*, however, became a cause celebre—in connection with which there have been two puzzling factors. American scientists were not permitted to inspect the vessel or the crew until weeks after the incident had occurred. And at no time were we allowed to interrogate the skipper, a man who had never been in command of the ship before. There are still those who believe that the *Lucky Dragon* was sent into the forbidden area for reasons other than fishing.

A cry was heard round the world that fallout from U.S. nuclear tests was jeopardizing the future of the human race. In 1954 the Atomic Energy Commission arranged for an independent investigation of radiation and its effect on human life to be made under the auspices of the National Academy of Sciences, an agency completely indepedent of the Government, financed by the Rockefeller Foundation. A simultaneous study was made in Great Britain by the Medical Research Council. The findings agreed.

The National Academy of Sciences reported that the average individual, over a 30-year period, receives a dose of 4.3 roentgens from inescapable natural radiation (cosmic rays, radioactivity in the soil, etc.), plus an additional dose of 3 roentgens from medical and dental X-rays. The NAS report further stated—and this was the nub of it—that if the nuclear testing done during the period 1951–56 were continued at the same rate indefinitely, the average person's 30-year dose of radiation would be increased by only one-tenth of a roentgen or less.

Despite the publication of this evidence, the outcry over fallout and radioactivity continued. Then, in June 1957, while this hysteria was at fever pitch, Dr. Edward Teller, the late Dr. Ernest O. Lawrence, and the late Dr. Mark M. Mills, all distinguished scientists, came to Washington with gratifying news. The laboratories at Los Alamos, N. Mex., and at Livermore, Calif., had been working on a nuclear-weapon design which would reduce radioactive fallout by about 95 percent. Given 4 or 5 years of testing, they hoped to construct a weapon from which radioactive fallout would be negligible.

This was a momentous development. Among many other things, it would make possible powerful defensive weapons—such as antiaircraft and anti-missile-missiles—which could be used over our own or friendly territory without subjecting the inhabitants to the hazards of fallout. The scientists testified before the U.S. Congress Joint Committee on Atomic Energy, and later described their work to President Eisenhower. The President arranged a press conference at which Drs. Teller, Lawrence, and Mills told their story. The weapon became known popularly as the "clean bomb."

But some scientists and Congressmen ridiculed the proposed weapon as an impossibility. Others were convinced that the scientists had dreamed up the "clean" weapon for the sole purpose of scuttling the movement to outlaw nuclear testing permanently.

Meanwhile, the Russians had been testing their nuclear bombs since 1951 with increasing frequency. They tested secretly, without advance announcement, and excluded international observers from the testing sites. Occasionally, news came from Moscow only after the United States had detected the Soviet explosion and announced the event. Yet the outcry against nuclear testing was directed not against the U.S.S.R. but against the United States.

President Eisenhower resolutely resisted the increasing pressure to suspend nuclear tests unilaterally. And he knew that even if a suspension of testing could be achieved by agreement with the Russians, there was still no method of control or detection available to insure against clandestine testing. Nuclear explosions on the earth's surface, in the atmosphere or underseas can be detected by fairly reliable methods; but explosions below the earth's surface or in outer space cannot be reliably detected even today.

Late in 1957 a development connected with one of our tests in the Nevada desert caused considerable controversy. A small nuclear charge was detonated in a tunnel dug in a mountain, and a seismic station in College Point, Alaska, 2,300 miles away, registered the shock wave on its seismograph. Some people who were determined that U.S. nuclear testing must stop seized upon this fragment of evidence as proof of absolute detectability.

Appearing before a Senate committee in 1958, I testified, however: "I am informed by the experts that this signal would have been reported as a small earthquake had not the Atomic Energy Commission given advance notification of the location and probable burst time." I also stated the reasons for my absolute conviction that weapons could be tested secretly and without much possibility of detection by any nation determined to do so.

Early in 1958 the Soviets, after concluding a lengthy series of nuclear tests, announced that they were then prepared to suspend testing if the United States would do likewise. President Eisenhower proposed a Geneva conference of United States, Soviet, British, French, and Canadian technicians

to discuss detection and inspection systems. By August these experts agreed that it was possible to set up a system capable of detecting underground bursts as small as five kilotons. On October 31, 1958, the United States announced the voluntary suspension of nuclear testing for 1 year, and called upon the Soviet Union to do likewise.

Negotiations looking toward a treaty banning nuclear tests permanently had just begun in Geneva when news arrived from Washington. Underground tests in the recently completed Hardtack series showed that even a 20-kiloton nuclear explosion might be seismically indistinguishable from an earthquake. Seismic signals from weapons tests could be greatly reduced or even effectively concealed.

The Geneva negotiations soon demonstrated that the Soviets had no desire to reach any agreement that would provide real control and inspection. For example, the technical experts on both sides had agreed in August that any seismic event recorded by the control stations and suspected of being a nuclear explosion would have to be inspected on the site. More than 100 such events—which could be either earthquakes or the tests of sizable weapons—occur within Soviet territory every year.

The Soviets haggled over the number of suspicious events that might be inspected each year. We made concession after concession, finally offering to settle for as few as 12 onsite inspections per year. Abruptly, without accepting our offer, the Soviets introduced a new condition, calling for a three-man control commission (the "troika") to consist of one Russian, one neutral and one representative of the West. But no inspection could be undertaken except by a uanimous vote of this commission. Thus, the Russians would have a veto of any inspection.

By late 1959 the Geneva negotiations had been going on for 14 months, and still no agreement was in sight. Whereas the United States made constant concessions, the Russians countered with increasingly impossible demands. On December 29 President Eisenhower expressed his impatience. "We will resume negotiations," he announced, "[but] the voluntary moratorium on testing will expire on December 31. Although we consider ourselves free to resume nuclear-weapons testing, we shall not resume tests without announcing our intentions in advance of any resumption."

In the autumn of 1960, President Eisenhower told various members of his administration that, in his opinion, the time had come to resume nuclear tests, either underground or in outer space, where there would be no fallout problem. However, he added, such action would necessarily extend beyond his administration, and he considered it proper to leave the incoming President a free hand.

This was the decision that President Kennedy faced when he took office last January. In his Vienna talks with Khrushchev in June, the new President tried to persuade the Soviet premier to end the Geneva deadlock, but failed. Two weeks later, through the Soviet delegate at Geneva, Khrushchev issued to the United States what was virtually an ultimatum. We must accept the Soviet "troika," with its built-in veto on inspections, or else merge the nuclear-test cessation talks with the even less promising negotiations on general disarmament.

What the Soviets obviously were seeking was an indefinite continuance of the nuclear-test moratorium without inspection. President Kennedy rejected the Soviet note in an emphatically worded reply. "For almost 3 years," he said, "the United States has been willing to assume the risk of not testing nuclear weapons without the certainty that the Soviet Union has likewise stopped its testing. The national security and the defense of the free world do not allow this risk to be assumed indefinitely."

Now, specifically, why is the resumption of nuclear testing by the United States so vital to the free world at this time?

First, if there is any validity to the belief that the U.S. stockpile of nuclear weapons is the free world's only effective deterrent to Soviet aggression, then the weapons in that stockpile must be in a state of constant readiness—which can only be ascertained by periodic testing.

Second, nuclear science—its peaceful applications as well as weapons development—will not stand still; yet advances cannot be made without nuclear testing.

Several sophisticated new nuclear weapons were on the drawing boards when we suspended nuclear testing in 1958. Whereas earlier weapons were indiscriminate in their destruction, these new devices are designed for specific types of targets—enemy missiles in the atmosphere or in outer space, missile-launching sites deep underground, lurking submarines, etc.

The basic point, however, is this: Ultimately, the destructive potentials of nuclear energy must be placed in the custody of an absolute and foolproof international authority—a goal which the United States has advocated consistently since the dawn of the atomic era, and which the Soviet Union has as doggedly resisted. Until such an authority is created, the United States and the Western democracies must be free to develop all the potentialities of nuclear power—for its control can make the deserts bloom or, in Communist hands, could end freedom on earth.

RACIAL PROBLEMS NO GEOGRAPHIC MONOPOLY

Mr. MORSE. Mr. President, the Catholic Sentinel of Portland, Oreg., has published in its issue of September 7, 1961, an editorial entitled "Interracial Justice—North and South." It accurately describes some of the racial problems of the North and the failure of many northern communities to deal adequately with them. I ask unanimous consent to have it printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

INTERRACIAL JUSTICE—NORTH AND SOUTH

Two events reported in Oregon newspapers on the same day last week underline an important fact: the race problem is not limited to the South. The events:

1. Black Muslims organize activities in Portland;

2. Atlanta, Ga., high schools integrate without incident.

For too long it has been the fashion for newspapers in the North to play up the racial tensions in the South and ignore serious problems at home. There is discrimination in Oregon. Some cities (legally or illegally) exclude Negroes completely. Others let them know that they are not wanted.

In Portland, the home of the vast majority of Oregon Negroes, most colored people are crowded into the Williams Avenue Ghetto. The tragic fact is that religion seems to have little to do with people's attitudes toward members of racial minorities. Pious people, active in their churches, too often follow the same patterns of racial prejudice as their unchurched neighbors. The Christian who refuses to be stampeded by the rumor, or the fact, of a nonwhite family's moving into the neighborhood, is still too rare a phenomenon.

The Negro Muslim group is a symptom of racial bias. It is a reaction to the myth of "white supremacy." The Muslims maintain the opposite myth of "black supremacy." They apparently do not approve of the word "Negro." (As a matter of fact their entire terminology is more than a bit confusing to one who is searching for accuracy in reporting. The word "Muslim" is a variant spelling of "Moslem," which is the preferred title for a follower of the religion of Islam taught by Mohammed. The Black Muslims have no connection with any Moslem group in the United States; the attitude of international Islam toward them has not been clarified.)

Responsible interracial groups, such as NAACP and the Urban League, are in agreement that the Black Muslims are a fringe group and that they represent a very small minority of the Negro community. Nevertheless their existence witnesses to a growing impatience among Negroes with the slow progress of racial justice in the North.

The second item is of equal significance. The city of Atlanta in the Deep South State of Georgia has demonstrated that southerners can face the racial facts of life. The mayor and other civic leaders of Atlanta deserve the support of all those who are concerned about human rights. We in the North have been quick to shake our heads over mobs in Little Rock and New Orleans. Now we must be as eager to shake the hands of those who represent the responsible majority of decent white people south of the Mason-Dixon line.

Even though religious people have not lived up to their belief in the brotherhood of man in the past, there is hope for the future. The struggle for human decency in the South has been led by religious leaders. The consciences of Sunday Christians have been disturbed. It has become increasingly difficult for a Christian to convince himself that Christ would approve of discrimination.

Discrimination takes various forms in different parts of the country. Every Christian, no matter where he lives, must reexamine his conscience in the light of Christ's commandment of universal love.

COINAGE OF MEDAL IN RECOGNITION OF DISTINGUISHED SERVICES OF SPEAKER SAM RAYBURN

Mr. YARBOROUGH. Mr. President——

Mr. MORSE. I yield to the Senator from Texas, provided I may do so without losing my right to the floor.

The PRESIDING OFFICER (Mr. PELL in the chair). Without objection, it is so ordered.

Mr. YARBOROUGH. Mr. President, I thank the distinguished Senator from Oregon for yielding to me. On September 7 I introduced Senate Joint Resolution 133, which proposed that there be coined a medal in recognition of the distinguished services of SAM RAYBURN, Speaker of the House of Representatives. The resolution is cosponsored by 49 other Senators; in short, it is sponsored by a total of 50 Senators.

The chairman of the Senate Banking and Currency Committee, the Senator from Virginia [Mr. ROBERTSON] has advised me that he had planned to hold a hearing on this measure tomorrow.

Mr. President, I am in receipt of a telegram from the Speaker of the House, the Honorable SAM RAYBURN, of Bonham, Tex., in which he states:

I appreciate your friendship and the generosity displayed by you in this matter—

But he states—

it would be embarrassing to me if it were passed, and I trust you will regard my wishes in this matter.

Mr. President, in view of the wishes of the distinguished Speaker of the House, we have transmitted that information to the chairman of the Banking and Currency Committee; and he has stated that the hearing planned for tomorrow will not be held.

I ask unanimous consent to have printed at this point in the RECORD a copy of Senate Joint Resolution 133, with the names of the 50 Senators who have joined in sponsoring it. I know, from statements made, that other Senators had planned to join in sponsoring it, in addition to these 50. The telegram from Speaker RAYBURN is but a further illustration of the modesty of this great American.

There being no objection, the resolution with the list of sponsors was ordered to be printed in the RECORD, as follows:

SENATE JOINT RESOLUTION 133—87TH CONGRESS, 1ST SESSION

Joint resolution to provide for the coinage of a medal in recognition of the distinguished services of SAM RAYBURN, Speaker of the House of Representatives

Mr. YARBOROUGH (for himself, Mr. KERR, Mr. ANDERSON, Mr. BARTLETT, Mr. BIBLE, Mr. BOGGS, Mr. BRIDGES, Mr. BURDICK, Mr. BUTLER, Mr. BYRD of West Virginia, Mr. CAPEHART, Mr. CARLSON, Mr. CARROLL, Mr. CASE of New Jersey, Mr. CASE of South Dakota, Mr. CHAVEZ, Mr. CHURCH, Mr. CURTIS, Mr. DODD, Mr. ENGLE, Mr. FULBRIGHT, Mr. HART, Mr. HICKEY, Mr. HOLLAND, Mr. JACKSON, Mr. JAVITS, Mr. JOHNSTON, Mr. JORDAN, Mr. KEATING, Mr. KEFAUVER, Mr. LONG of Missouri, Mr. LONG of Hawaii, Mr. LONG of Louisiana, Mr. MAGNUSON, Mr. MCCARTHY, Mr. MCGEE, Mr. MONRONEY, Mr. MORTON, Mr. MOSS, Mr. MUSKIE, Mr. PELL, Mr. PROUTY, Mr. RANDOLPH, Mr. SALTONSTALL, Mr. SCOTT, Mr. SMATHERS, Mr. SPARKMAN, Mr. SYMINGTON, Mr. WILLIAMS of New Jersey, and Mr. YOUNG of Ohio) introduced the following joint resolution; which was read twice and referred to the Committee on Banking and Currency:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in recognition of the distinguished public service and outstanding contribution to the general welfare of SAM RAYBURN, Speaker of the House of Representatives, the Secretary of the Treasury is authorized and directed to cause to be struck and presented to Speaker SAM RAYBURN a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary, but to include the phrase "For services rendered to the people of the United States". There is authorized to be appropriated the sum of $2,500 to carry out the purposes of this section.

SEC. 2. The Secretary of the Treasury is authorized and directed to cause duplicates in bronze of such medal to be struck and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor). The proceeds of the sale of such bronze medals shall be reimbursed to the appropriation then current for the expenditure of the Bureau of the Mint chargeable for the cost of the manufacture of medals.

PREPARATIONS IN CONNECTION WITH HURRICANE CARLA

Mr. YARBOROUGH. Mr. President, as we read the news item about Hurricane Carla and its impact on the gulf coast, the people, and the economy of Texas, I believe that thanks are in order to the Federal agencies which have tracked this powerful hurricane across the Gulf of Mexico and have given so much advance warning to the people of Texas and Louisiana. But for the Federal tracking agencies, the warning agencies, the Navy fliers who penetrated the eye of this very powerful hurricane—the most powerful in the 20th century, and the reporting services to the people, the loss of life would already have gone into the thousands, whereas up to the latest report, no single loss of life has been reported from the coast of Texas, despite the fact that the winds have reached a speed of 170 miles an hour, and the tides have ranged higher than any ever before known, at some points on the Texas gulf coast.

Mr. President, last Saturday I was in contact with the Director of Civil Defense, Mr. Frank Ellis, and with the State disaster control headquarters, at Austin, who reported the steps being taken and the agencies coordinating. There is complete coordination between the State and local authorities, and between the headquarters here and the State disaster control center at Austin, and also coordination in connection with the availability of Government relief of various types, the availability of surplus food from the Department of Agriculture, and the availability of help through the armed services for the evacuation and treatment of people. All these Federal agencies have operated with the utmost efficiency up to this time, and I commend them for it.

Terrific losses to the economy of Texas are in prospect. The rice crop was ready for harvest, and it is estimated to have a value of $100 million. The State faces the loss of the entire rice crop and the loss of large portions of other crops. The agricultural loss alone to Texas will probably amount to some $200 million for the crops in the field. It is estimated that for each dollar value of a crop in the field, there is an additional $7 value to the State's economy through manufacturing, because the agricultural products are largely processed in the State. The largest single segment of the Texas manufacturing economy is comprised of the processing of agricultural products, and their value raw from the fields before processing, each year, is about $2,400 million. So this loss will be a staggering blow to the economy of Texas.

In listening to the various news reports and from direct contacts I have had with persons in Texas, I have everywhere been impressed with the unsung hero of this hurricane, and that hero is the American citizen. About half a million people have been evacuated from their homes in Texas, but there have been no reported instances of looting or attempted looting, and there has not been a single instance of panic or reported panic. The evacuation has been done with the utmost calm and discipline, without the wringing of hands or the shedding of tears over the fact that the life savings—sometimes the savings of generations—of the people there are at stake, and threatened with destruction within 24 hours. I think the people have shown the calmness of which all Americans are proud, and it is in keeping with the traditions of our people through the centuries, as they have moved westward. The disasters which have befallen the American people have not stopped their forward progress, and this disaster will not stop the growth and progress of the coastal areas of Texas.

Mr. President, at the disaster control office in Austin, Tex., there are representatives of the Federal and the State Governments. Yesterday, I sent telegrams there, and also to the mayors of Houston, Beaumont, Freeport, Galveston, Port Arthur, Texas City, Orange, Baytown, Corpus Christi, Post Lavaca, Palacios, Aransas Pass, Port Aransas, Port Isabel, and Port Neches, advising them that I had appointed as my two representatives in Texas, Larry Goodwyn and Tom Black, of Austin, Tex., to work with the State disaster control headquarters, at Austin, in helping meet all needs in this emergency. Throughout the storm they will be my coordinating representatives in the State of Texas, with other State and Federal officials, in rendering all possible assistance. My own office in Washington remained open yesterday and last night to help secure any needed cooperation, both before and after the disaster strikes.

A valuable piece of work has been done in this connection, helpful in all civil disasters, by the Committee on Government Operations. At the request of the distinguished senior Senator from Minnesota [Mr. HUMPHREY] the Government Operations Committee printed, as a committee print of the first session of the 86th Congress, the Federal Disaster Relief Manual. It was printed on August 19, 1959; and this morning I mailed copies of it to mayors, county judges and other representatives of governmental units. The manual shows the various fields in which Federal aid is available. That information is greatly needed at this time. While a few of the cities have had all their communications facilities cut off and no mail is being delivered, in most of the cities the mail can still be delivered; and when cleaning up operations are begun, after this hurricane, this manual will be found to be very helpful, indeed.

Mr. President, as shown in this document and the laws of the land, a good deal of aid will be available when the rehabilitation starts, about tomorrow. The Farmers Home Administration Division of the Department of Agriculture makes loans of different types, emergency loans to help farmers tide themselves over the winter and help them get new crops in the ground. The U.S. Department of Commerce has authority to provide funds for reconstruction loans for roads and bridges and for primary and secondary highways on which Federal aid was used. The Small Business Administration makes available loans to rebuild business places that will be wiped out by this storm. It is possible that some of the smaller cities will not have a business house or residence standing. Departments under the FFHA can make available loans for the rebuilding of homes. I shall not go into the many special types of disaster relief

available under the commodity stabilization program and many other Federal programs. Surplus food stocks are already built up.

Reports from the Air Force of less than 15 minutes ago were to the effect that winds had reached 100 miles an hour at Austin, 160 miles from the coast. All air transportation has been cut off there.

The Coast Guard and other agencies are doing a fine job. Each of them is living up to the finest traditions of their branch of service. On behalf of the people of my State, I thank them for their great services.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. YARBOROUGH. The Senator from Oregon has the floor.

Mr. MORSE. I yield to the Senator with the understanding that I do not lose the floor.

Mr. HUMPHREY. Mr. President, I merely wanted to say to the Senator that I am sure his local officials will find that manual very helpful. The manual, which was prepared by the Subcommittee on Reorganization of the Committee on Government Operations, came about as a result of what we found to be a lack of information on the part of local officials as to what was available from their Federal Government in such an emergency as the Senator has referred to which exists in Texas, Louisiana, and other parts of the country. We found that when flood conditions took place, frequently our local and governmental officials and private citizens had no real information as to what was available under present law. Therefore, the manual was prepared. The Library of Congress was very helpful in getting the information together, as were other agencies of Government. The manual is very helpful.

I am glad the Senator has sent the manual to the mayors whose cities will be so terribly affected by the storm moving in on Texas and parts of Louisiana.

May I make one further suggestion to the Senator? I hope when the executive department representatives review this colloquy, a careful reexamination will be made as to the adequacy of the emergency funds, particularly in the Department of Agriculture, because, if the reports of this storm are accurate—and I imagine they are—the loss of property will be tremendous and there will be a need for prompt emergency assistance, particularly in the form of loans, for the areas that will be so seriously damaged by the impact of the storm.

I hope the Senator himself, as well as the executive agencies that have emergency authority, will examine into the adequacy of the provisions that relate to loans and other forms of assistance.

Mr. YARBOROUGH. I thank the distinguished Senator from Minnesota for his suggestion in that regard. We had contemplated doing that. We contemplate going to Texas just as soon as the winds diminish to the point that the damage can be surveyed. The Air Force informs us that we could not land at Austin, which is located 160 miles from the coast, at this time.

We plan to ask for a disaster survey and for all types of assistance available. If there is any lack in the present authority, we will ask for a supplemental appropriation bill, or emergency measures for supplemental authority.

We are also sending copies of the manual to individuals in the affected areas, so this information will be available to those portions of counties not included within incorporated areas.

This disaster relief manual is an extremely helpful manual, listing 75 or more types of assistance available under Federal Law. For example, under the U.S. Coast Guard, even while these disasters are impending and going on, more than 15 types of measures can be taken, for relief. One for example, authorizes the Coast Guard to reduce contamination in the water supply.

This is one of the most valuable disaster manuals ever compiled in this country. The civil defense authorities are using it.

The Senator from Minnesota may be interested in knowing that the civil defense authorities in Washington and the southwestern control headquarters at Denton, Tex., where they have their underground control, and at the State control headquarters at Austin, use this manual, and it is proving invaluable in the disaster which is striking us.

U.S. MILK LEGISLATION

Mr. HUMPHREY. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. Mr. President, I yield to the Senator from Minnesota with the understanding that I do not lose my right to the floor.

Mr. HUMPHREY. Mr. President, I am a sponsor, along with my colleague the Senator from Minnesota [Mr. MCCARTHY] and the Senators from Wisconsin [Mr. PROXMIRE and Mr. WILEY], of Senate bill 212 relating to nationwide standards for milk sanitation. The importance of this bill lies in the fact that it would eliminate the use of arbitrary health standards as trade barriers against the shipment of high quality milk in interstate commerce. The House has been holding hearings on this bill and the Senate will commence hearings in January.

The Minneapolis Star, one of the great metropolitan newspapers in the country, points out editorially in its September 2, 1961, issue the wisdom of nationwide milk sanitation standards as criteria for the elimination of artificial health barriers. I ask unanimous consent that this editorial be printed at this point in the body of the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

U.S. MILK LEGISLATION

When Orville Freeman was Governor of Minnesota he strongly supported Federal legislation to set up nationwide standards for milk. This would do away with the artificial health barriers erected by some cities and States to keep out milk from other areas, such as Minnesota.

When Freeman became Secretary of Agriculture he indicated he would have to take another look at such matters. There was speculation that he would reverse his position and oppose a Federal measure. But now, over eastern protests, he has endorsed a bill which would allow dairy farmers to ship their milk anywhere.

This seems a sensible view for either a Minnesota Governor or an Agriculture Secretary. Some additional markets should be opened for milk from Minnesota and other surplus regions if the bill becomes law.

But the effect is likely to be small while Federal milk marketing orders remain in effect. These orders, covering most of the large markets, say that milk distributors must pay the same price whether the milk is produced in New York State or Minnesota. Thus there is no inducement for a distributor to seek Minnesota milk.

These orders not only exclude Minnesota fluid milk from eastern markets; they tend to restrict the outlet for manufacturing milk, used in butter, dried skim, etc.

Farmers near the big city markets keep pushing up production to take advantage of the high price for class 1 (fluid) milk. During some periods of the year they produce more than the fluid market will absorb. The amount left over goes into manufacturing milk at a price sometimes lower than is paid for the same kind of milk in Minnesota.

Also, if the eastern markets become more receptive to outside milk, Minnesota may not benefit greatly. For there is much surplus milk produced between here and New York City, say, which could be transported at a lower cost than Minnesota milk.

But the bill Freeman favors is a step in the right direction. If it passes, the next move should be further examination of Federal marketing orders which do as much as artificial health standards to put an embargo on milk from a distance.

STATESMANSHIP AT TUNIS

Mr. HUMPHREY. Mr. President, in this morning's Washington Post there appears an excellent editorial commending President Bourguiba of Tunisia for his statesmanlike action in offering to withdraw the objections of his country to continued French use of the naval base near Bizerte "during the present world crisis."

I was deeply saddened by the violent dispute which arose recently between the French and the Tunisians over the issue of French evacuation of the Bizerte naval base. It is indeed tragic that two such fine and democratic countries should be at sword's point at a time when the entire free world is being severely challenged and threatened by the Soviet Union.

Our Ambassador to the United Nations, Adlai Stevenson, appealed to both sides to negotiate their differences in the interest of world peace. I am most heartened, therefore, at President Bourguiba's conciliatory move, which would indicate that he is willing to extend the hand of friendship and to negotiate.

I want to say, in behalf of President Bourguiba, that this particular move of conciliation should be looked upon as a real contribution to the cooperation of the free countries in the present crisis. He has performed a very statesmanlike act. It is well understood that President Bourguiba is under great pressure in his own country to have the French out of the naval base.

The President of Tunisia has strong legal grounds for his claim of requiring French evacuation.

It is my hope, therefore, that France will accept Tunisia's offer, and work toward a just solution to this dispute. The critical world crisis demands that the free-world nations stand united. Every effort must be made to heal differences which may exist between such nations in this trying time.

Mr. President, I ask unanimous consent that the Washington Post and Times Herald editorial to which I have referred be inserted at this point in the RECORD. Also, that an article by Mr. Thomas F. Brady in the New York Times, entitled "Bourguiba Eases Stand on Bizerte," be printed.

There being no objection, the editorial and article were ordered to be printed in the RECORD, as follows:

[From the Washington Post]

STATESMANSHIP AT TUNIS

There is statesmanship in President Habib Bourguiba's offer to withdraw the objections of Tunisia to continued French use of the base near Bizerte "during the present world crisis." President de Gaulle of France had prepared the way for compromise in his recent news conference when he spoke of negotiations on use of the base "during the dangerous period through which the world is passing." Such a formula would allow both countries to save face and to serve the common interest by strengthening Western defenses.

A large measure of conciliation on both sides will still be necessary to work out the details of an accord. The first step taken is an exchange of prisoners captured during the tragic clash between French and Tunisian forces. The next step may be evacuation of the city of Bizerte. It is to be hoped too that normal diplomatic relations will soon be reestablished and that an amicable agreement can be reached on the period during which French forces shall continue to use the base.

President Bourguiba reasonably insists that the decision as to when the emergency ends cannot be left wholly to the discretion of France. Some means will have to be found for the achievement of a joint decision or arbitration of this issue. The Tunisian President is very unrealistic, however, when he suggests that the international crisis which justifies continued use of the base may not last more than a few weeks. No informed observer of the international scene seems to share that optimism.

The greatest hope for solution of the tragic Franco-Tunisian flareup would seem to lie in a firm commitment for use of the base as long as the present emergency lasts and an equally firm commitment for withdrawal of the French as soon as the emergency has passed. It is especially significant that President Bourguiba, who recently returned from the Conference of the uncommitted powers at Belgrade and who was ardently wooed by Moscow during his troubles with the French, is once more thinking in terms of defense of the free world.

[From the New York Times]

BOURGUIBA EASES STAND ON BIZERTE—TUNISIAN TERMS DE GAULLE TALK "POSITIVE"—SEES NEW HOPE OF AGREEMENT

(By Thomas F. Brady)

TUNIS, September 6.—President Habib Bourguiba returned to Tunis tonight from the Belgrade Conference of uncommitted nations in an unexpected mood of conciliation toward President de Gaulle of France. It suggested the possibility of a negotiated solution of the Bizerte impasse.

In an interview with the Tunis radio recorded in the Yugoslav capital but broadcast after his arrival here, Mr. Bourguiba said:

"It appears that General de Gaulle has finally recognized the principle of evacuation of Bizerte. * * * Thus it is possible for us to come to an understanding on an evacuation timetable. We have never asked for evacuation today or tomorrow."

FRENCH NOTE REPORTED

The tone of optimism was particularly surprising after General de Gaulle's tough declaration on the Bizerte question yesterday and after incidents in the city itself in which at least three Tunisians were killed when French troops opened fire.

The change in the Tunisian line was linked with a report of a conciliatory note from the French Foreign Ministry delivered here this morning by the Swiss Chargé d'Affaires, who has looked after French interests since Tunisia broke off diplomatic relations in July, following fighting in Bizerte.

The most important element, according to observers here, was the probable decision by Mr. Bourguiba that the Bizerte crisis had cost Tunisia too dearly in lives and in economic and educational dislocation.

Mr. Bourguiba's optimistic statement was apparently based on General de Gaulle's declaration yesterday that someday it would be necessary to negotiate the withdrawal of French troops, but that the present world situation did not permit France to do so now.

Nevertheless, the rest of General de Gaulle's comment on Bizerte was extremely disobliging to Tunisia and to Mr. Bourguiba personally. The first reaction here had been one of extreme antagonism and discouragement.

General de Gaulle said that when he had seen Mr. Bourguiba in France last spring, "I told him in the clearest way that the situation being what it was, France could not and would not quit Bizerte."

"After our conversations," General de Gaulle continued, "he spread himself in friendly declarations about us. Then, for reasons which probably concern what goes on in the Arab universe, the Tunisian Republic changed its tone and its song. There were menaces and demands and then the aggression."

The fact that 24 hours later, Mr. Bourguiba decided to base his reaction on the positive elements of General de Gaulle's declaration was seen as an indication of a return to the old policy known as Bourguibism, or gradual achievement of goals by diplomatic means.

But the Tunisian leader warned that the situation at Bizerte remained grave and that the Tunisians would be "obliged to respond to provocations by French military forces."

President Bourguiba flew home from the Belgrade Conference 24 hours ahead of schedule to deal with the Bizerte issue.

Tension in the northern seaport town was said to be extremely high today, after yesterday's shooting.

Mr. HUMPHREY. Mr. Bourguiba was one of those in attendance at the meeting at Belgrade, Yugoslavia, of the so-called uncommitted or neutral nations. According to the reports we have received, this fine man, the President of Tunisia, a friend of freedom, who has been a good friend of the United States, was one of the forceful voices in behalf of the position of this Government. He was one of those who took strong exception to the resumption of nuclear tests by the Soviet Union.

These actions of some of our friends all too often go unnoticed. The actions of those with whom we disagree seem to gain the headlines all too often. We seem to enjoy reading the bad news in this country rather than, occasionally, taking encouragement and hope from some of the good news from some of our good friends.

I think the RECORD of the U.S. Senate at least ought to carry a word of appreciation to friends of the United States who stand up for us when they believe we are right and who have the courage of their convictions when they believe we are wrong. A good friend is not necessarily one who always says "Yes," though the facts do not justify such a response. A good friend is, one who in difficult times, will go out of his way to try to heal differences, to breach a gap which might exist between nations, and to stand up for what is right in the conferences in which the United States is all too often under severe attack.

I for one, wish to express my appreciation to this statesman who recently visited our shores, who was received by President Kennedy and who addressed the Congress, who has demonstrated a quality of leadership much needed in the present world.

Mr. President, I have one other item, and I thank the Senator from Oregon for permitting me to use this time.

SETTLEMENT OF DUTCH FARMERS IN BRAZIL

Mr. HUMPHREY. Mr. President, one of the most encouraging developments which has come to my attention in the field of successful agricultural development projects in Latin America is the program for the settlement of Dutch farmers in Brazil.

I know the Senator from Oregon [Mr. MORSE], and the Senator from Vermont [Mr. AIKEN], are much interested in this, because of their leadership in respect to Latin American affairs.

The pattern of Dutch agriculture is such that many of the younger sons of Dutch farmers find it impossible to continue farming in the Netherlands because of the severe shortage of farmland. Yet these young farmers want to make a career of farming, and they are highly trained and highly skilled people.

I said to one of the parliamentarians who recently visited us from the Netherlands that the greatest export of the many fine exports from Holland—the best of all—was their people. We in America, and I am happy to say we in the State of Minnesota, have had the privilege of receiving many of these fine people from the Netherlands. They have strengthened our Nation and strengthened our respective communities. They are good people.

The Dutch Government, therefore, has wisely developed a positive emigration program, which has the effect of a vigorous technical assistance program for those countries fortunate enough to secure the settlement of these Dutch farming families.

While our attention is focused on the current political situation in Brazil, it may be well to point out that there are many positive, constructive and hopeful developments at the grassroots in Brazil which should not be forgotten.

First. There are at present seven settlements of Dutch farmers in Brazil. Carambei—Parana—is the oldest. The others were organized since 1948. Carambei, Castrolanda—Parana—and Holambra—São Paulo—are the largest. Monte Alegre—Parana—Nao me toque—Rio Grande do Sul—and Tronco—Parana—are much smaller. In development are Arapoti—Parana—and Holambra II—São Paulo.

The total number of the people accommodated by the settlements is still limited. Including Brazilians who in the course of the years have joined the settlements, the number is approximately 3,000. Completion of Arapoti and Holambra II in the coming years will increase the number to approximately 8,000.

The procedure of establishing a settlement is usually as follows: A "cooperativa agro-pecuaria" is organized. The cooperative purchases a suitable tract of land. The cooperative develops the land, puts in roads, clears and improves it with drainage and irrigation, and subdivides it in family sized farms on which necessary buildings are erected. The settler purchases his farm from the cooperative.

The cooperative plays a prominent role in the economic and social system of the settlement. Purchasing of supplies and equipment; stockraising of purebred cattle; processing and packing of agricultural products, and social and educational services are organized by the cooperative, or by rather independent sections or subsections thereof.

Small as the numbers of settlers are, the impact on technical, economic, and social development in a wide area is spectacular.

Technical: The Dutch settlers are introducing modern agricultural production methods which so far were practically unknown in the areas. This includes introduction of new crops, diversification and rotation of crops, proper use of chemical fertilizers, modern machinery, introduction of better livestock and expert stockbreeding, pest and insect control, application of proper drainage and irrigation methods, et cetera. They establish a close working contact with Brazilian agricultural research and extension services. Their methods are followed on an increasingly large scale by Brazilian farmers, who so far mainly depended on old-fashioned and uneconomical farming methods.

Mr. President, this is technical assistance, but it is the kind of technical assistance which is enduring. The technicians of whom I speak are the farmers themselves, who come not only with their technical know-how and great competence in agriculture but also with their families. They stay and they build communities. I believe this is good news for the cause of freedom.

Recently we have heard much bad news. I wished to brighten up this day by reciting a little good news. All is not lost. Much is being done that is very, very good.

Mr. AIKEN rose.

Mr. HUMPHREY. I yield to the Senator from Vermont.

Mr. AIKEN. I am interested in what my colleague from Minnesota is saying. We do need all the good news we can get. The Senator has given us good news.

I believe in the future more good news will come from the south, particularly from Brazil. After the resignation of President Quadros I could not become too much alarmed over the situation, because I knew the Brazilian people would work out their problem without interference from other countries and would work it out so as to be of the greatest future benefit to the future of Brazil.

Brazil is already one of the greatest countries of the world. The population is almost 70 million today, and is growing.

Brazil has financial troubles, but the financial troubles are due to growing pains and the necessity for financing, up to now, long-term development programs with short-term money.

One of the things which makes Brazil's future so bright is the readiness with which immigrants assimilate into the affairs of the country, taking part in the social and political affairs as well as the economic affairs of that great country.

When one goes to see the Brazilian Congress, one finds people of different nationalities and even different colors serving in the Legislative Assembly. They become people of that country and work for the good of that country.

Although Brazil has troubles and will continue to have troubles, the greatest trouble is that Brazil is not yet able to develop the tremendous resources she possesses as fast as they are needed. We hope the future holds more in store for the people of Brazil. Agriculturally, Brazil has tremendous possibilities.

They have water. They do not make the fullest use of the water on the land in many places and in as large areas as they would like. They are adopting modern agriculture as rapidly as possible. One can go into that country and see great 100-acre and 500-acre plantations of coffee growing in the open. Such plantations used to be under trees. Of course, they have overproduced coffee and must develop new markets for it.

I am in full accord with what the Senator from Minnesota has said about the Dutch. They, along with the Danes, are among the finest farmers in the world. I should include the farmers in some of the other smaller countries of Western Europe. But they have the same troubles that we have here. In order to provide increasing social standards and higher levels for their families, they must have more land, and they do not have it. So those people are migrating to other countries, where land is readily available. I am sure they will do their part in feeding and clothing the populations of the future, which are bound to increase greatly, unless some weak heads of state, such as Russia appears to have had, get us into trouble. I shall not discuss Russia today except to say that if Mr. Khrushchev wants to prove himself a strong man and a good man he should abandon the course that leads inevitably to war. Any fool in his official position can start a war, but it takes a strong man and a good man to work for peace. I have been worried about that situation, but that is getting too far away from the subject.

Mr. HUMPHREY. I wish to say to the Senator from Vermont that what he has said is very much on the subject. His words are the kind that should be stated in the Senate Chamber.

Mr. AIKEN. If Mr. Khrushchev is a strong man, he will cease taking steps that will lead inevitably to war. If he is a weakling, he will continue along the course which he is now traveling.

Mr. HUMPHREY. I thank the Senator.

Mr. President, I was mentioning that at the time of purchase the land is normally used for grazing purposes, giving a low yield per acre, or it is deteriorated plantation land. The intensive soil improving agriculture introduced by the Dutch increases the yield per acre many times over, thus adding to the economic growth of Brazil. The introduction of cooperative purchasing, processing and selling gives the producer a greater margin of profit and allows the settlements to make the necessary capital goods available to the settlers. The cooperative approach enabled the producers to extend their markets over a much wider area. They even opened their own sales offices hundreds of miles away, that is, in Curitiba, Campinas, São Paulo, and Rio de Janeiro. Because of quality their products are sold at a premium. They export coffee to Europe at the highest world market price. The purebred cattle is shipped for stock improvement to all the States of Brazil.

Social and educational: In close cooperation with the authorities the settlements organize general educational systems, agricultural and home economics courses, art classes, and establish mutual social and health services.

The total impact of these settlements is clearly visible in a wide area. Brazilians are taking over agricultural methods, joining the cooperatives, are settling in or as close as possible to the settlement, so that often the original border of the settlement cannot be distinguished any more. They make use of educational and social provisions resulting from the establishment of the settlements. Great numbers of authorities from other Brazilian areas visit the settlements to study their methods for application elsewhere. State authorities are organizing courses in the settlements in other areas.

The settlements demonstrate the value of a strong cooperative organization combined with private ownership of the individual farms, thereby stimulating the incentive to produce the best.

They also demonstrate that the family farm unit is possible and probably the best answer to many of the serious problems of Brazilian rural development.

The family farm concept—a farm big enough to provide a decent standard of living and not bigger than can be managed by a farmer and his family with a hired man—is rapidly showing its great advantages in Brazil, both from a productive and social point of view.

The establishment of agricultural settlements is consistent with the President's program as expressed in his message, "Alliance for Progress," and more recently confirmed by the Congress of the United States in Public Law 87–41, inter-American social and economic cooperation program, in which it specifically authorizes the extension of credits for agricultural settlement in Latin America.

The joining of Dutch and Brazilian farmers in the same agricultural settlements fulfills the desire to promote technical, economic and social development of Brazil, hence it is consistent with the view of the United States, Brazilian, as well as the Netherlands Governments.

The total number of settlers is still too small to assure sufficient economic and spiritual growth. A regular expansion through the intake of new Dutch settlers is imperative because only in this way can sterility, which threatens every small and isolated community, be prevented.

In order for these agricultural settlements to provide the greatest assistance in technical, economic and social development of Brazil, as well as for the settlers themselves, they must undertake an expansion program for many years to come. Expansion is also necessary to provide new and challenging frontiers for the present settlers and their children and to provide the nucleus to stimulate the population to develop the surrounding areas.

Thus the pattern of expansion, selection of the people, and the financing, have to be developed on a sound basis.

Every new settlement should be sufficiently close to an existing settlement, so that the older settlement can provide experience, marketing, purchasing, and other facilities through the established cooperatives. Moreover, the new settlement will then be in a position to support the older one with new blood, new ideas, and increased production, and help to maintain and strengthen the ties with the Western World.

This pattern would create a string of settlements through the country, thus stimulating the development in an ever increasing area.

Each settlement should consist of at least 60 families, preferably more. For the settlement of each family, an initial investment of approximately $15,000 per farm is required for preliminary investigation; purchase of land; clearing and soil improvement; road construction; water supply; drainage; construction of necessary buildings; purchase of stock and equipment, seed, fertilizers, and fodder; and expenses for the settlers' subsistence during the first months.

Heretofore the selection of new settlers has been based to a large degree on the financial requirement that each Dutch family have at least $6,000 available. Additional funds were provided by the Brazilian and United States Governments.

The $6,000 requirement excludes from consideration a great number of people, both Dutch and Brazilians, who are otherwise eminently qualified—for instance, the second, third, and so forth, son of a family farmer. The limited financial resources of many young Dutch farmers are not surprising as about 60 percent of the farms are between 2½ and 25 acres only, and 52 percent of the total farm area in the Netherlands is rented and not owner occupied. On the whole, farmers with considerable means are also less inclined to migrate than those with ability but who, because of lack of capital and general shortage of land in the Netherlands, are unable to purchase their own farms in the Netherlands.

Sufficient land for carrying out such a program is available, as large low-producing land tracts are frequently offered for sale.

An additional difficulty so far has been, however, that no funds were earmarked in advance for this program. Consequently, when a suitable tract of land was available for purchase, the required funds still had to be found. To arrange for the financing of the purchase often took too much time and the options expired.

An established financing policy should make funds available whenever a purchase opportunity presents itself.

To promote the extremely successful and viable settlements as mentioned above, it will be necessary to find sources of financing which will make possible a selection of new settlers on ability and potential, and not on the accidental financial capability.

As mentioned above, an initial investment of approximately $15,000 is required to purchase a farm in a settlement. Figures supplied by existing settlers prove that the settler can repay the investment of his farm within 15 to 20 years.

It is clear, therefore, that the Netherlands Government is already making a contribution to Dutch emigrants by supplying free services and facilities and bearing part of the cost of transportation.

I understand that the Netherlands Government will also be prepared, in addition to this assistance, to investigate the possibility of a limited participation in the financing of the settlements themselves if cooperation could be obtained from the Inter-American Development Bank and then through the extended use of local currency funds generated by Public Law 480 in Brazil, in order to finance the initial required investment of up to $15,000 per family.

I would think that such a cooperative effort would be precisely what the American Government would find most encouraging. The more multilateral and joint, combined operations which can be undertaken by the advanced nations of the West in order to help the underdeveloped nations, the better.

I would wish to encourage the pursuit of this cooperative effort, and I am calling this matter to the attention of the Secretary of State.

My only purpose in bringing this program to the attention of the Senate is to arouse a greater interest on the part of our State Department and our aid administration, the Inter-American Bank, in this kind of program. I offered in the Senate an amendment to the foreign aid bill that we should utilize wherever possible and practical the cooperative approach on some of these agricultural problems to try to encourage credit unions to make available low-cost credit in the amounts that many people require, and also to promote loan associations, so far as possible.

I serve notice in a most friendly and cooperative manner that I intend to pursue this subject matter until we see results. I wish to make sure that we get our aid program down to the people in the rural areas of these countries, the people who really need it. I wish to make sure that the business enterprises in the smaller communities or, indeed, in the larger cities, are given an opportunity for credit and development. That is the spirit of America, and we need very much to get that idea very clearly inplanted in our foreign aid program and our Inter-American Bank program.

I have a feeling that unless some of us in the Senate are willing to keep at it relentlessly and pursue a course of constant vigilance to oversee activities in the respective agencies, we may fall back into the old pattern of doing too little too late and ignoring the real basic needs of the people whom we say we are trying to help.

I cannot help but recall that only a few months ago we were told that the State Department did not have a single person working in that cooperative area. I wish to make sure that that does not happen again. As one who is rather persistent and occasionally a little stubborn and even relentless and persevering, I wish to give a friendly and cooperative warning that there will be a watchful eye on these matters, even when the Senate is not in session.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. AIKEN. I wish to endorse the Senator's remarks with regard to the promotion of cooperatives and loan associations, because they hold a hope that the ordinary people, the people who do not have the means to establish themselves in business or agriculture by themselves, will have an opportunity to do so in company with others.

While I am on my feet, I wish to express regret at the rumors that have been prevalent lately that Mr. Henry Labouisse is not to be the head of the AID agency, because when we approved the foreign aid bill, confidence of Senators and Representatives in Congress in Mr. Labouisse had much to do with the enactment of that legislation in as good shape as it finally came through. I think it came through in pretty good shape. We shall not know finally until the appropriation bill clears both Houses of Congress and is signed by the President. But I think it is coming through in pretty good shape after all. I was terribly disturbed that the administration did not wait for the appropriation to get through before announcing that Mr. Labouisse, in whom we all have a great deal of confidence, was to be replaced.

Mr. HUMPHREY. I have a great deal of confidence in Mr. Labouisse. I consider him to be one of the outstanding Americans. He has shown remarkable qualities as a Government official. He has a great quality which I think the aid programs need, namely, a spirit of understanding. I see that the Senator from Vermont has put his hand over his heart. He has the quality of heart as well as mind.

Mr. AIKEN. I think he has a heart and is strictly honest.

Mr. HUMPHREY. I fully agree. Our aid programs must now be directed toward the people we seek to help. The aid programs are designed primarily to help people in the Latin American areas, the African areas, the Asian areas, and in areas where there is mass poverty, great illiteracy, severe problems of disease, and where social development has been held up or retarded.

If we are to make an impact, the impact that we seek to make, it will not be done merely on the big loans with the big people, but it will have to be made in the social development with the people themselves. I know that I speak for many Members of the Senate when I say that we look upon the foreign aid program now as an effort to get in touch with the people, to help people lift themselves to a better life, particularly in some of the areas of the world where the problems of poverty are almost beyond human comprehension or understanding.

Mr. MORSE. I wish to associate myself with the remarks made during the past 5 minutes by the Senator from Vermont [Mr. AIKEN] and the Senator from Minnesota [Mr. HUMPHREY], in respect to two subject matters upon which they commented.

The first is the need for a greater development of our cooperative movement as a part of our foreign aid program, including the development of a building and loan association program in many parts of the world, particularly with respect to the problems in Latin America.

I have been working very closely, as has the Senator from Vermont and the other members of the Subcommittee on Latin American Affairs, with various building and loan association officials in our country, particularly one project under the leadership of Mr. Courshan, of Hollywood, Fla., who is president of one of the building and loan associations in that State, and who did two very important special jobs for the ICA in regard to the matter of homeownership in connection with the development of building and loan associations, one in Africa and one in Latin America. I do not know of any aid we could possibly make available in either Africa or Latin America which would be more effective in stemming the tide of communism as would a program which ends up with people owning the roof over their heads. We do not have to worry about people supporting economic freedom if they have cause to support it, and they have cause to support economic freedom when they are the beneficiaries of economic and political benefits of a free system of economic and political freedom.

Mr. President, it is very interesting that there should be woven into these discussions the statement of the Senator from Minnesota with regard to Brazil and the large number of young Dutch farmers who are interested in devoting themselves to the life of farming.

Given private homeownership in the city and family farm homeownership in the country, we do not have to worry whether people in that kind of society will come over to the cause of freedom and support it. The sad fact is that we have not done it in Latin America. We have not done enough of it in Africa. The sad fact is that a majority—and I wish Senators to note what I say—a majority of the agricultural producers of Latin America do not own a square foot of the soil they cultivate. The sad fact is that much of Latin America is a serfdom as far as the workers and the soil are concerned. They are living under a feudal system.

Unless we insist on land reform in the country and those reforms in the city which will make it possible for the people to own their home, the Alliance for Progress program is doomed to failure. In my judgment the Alliance for Progress program has no hope of success in Latin America unless it is able to bring about economic and political and legislative reforms necessary to give the people of Latin America land reform, carrying with it the opportunity to own the soil they till and the opportunity in the cities, through building and loan associations, through co-ops, through credit unions, through what the Senator from Minnesota has talked about, at least a chance to own their homes.

That brings us right into grips with this whole problem of insisting on putting the loan program on the basis of interest rates that the people can afford to pay. The usurious, shakedown financial system of Latin America has to go. If we want to fight for economic freedom in Latin America, we cannot hope to win the people over to the cause of freedom if they have to pay 12 percent, 13 percent, 14 percent, and, yes, as high as, in some spots, 24 percent interest. It is a shocking thing. There is no chance of homeownership and there is no chance of farm homeownership until the governments of Latin America rise to some of their responsibilities. That means, of course, they will have to be strong enough to withstand the influence of the great powerful families of Latin America. It is true that a large percentage of the wealth of Latin America is owned by such a few. But frequently the few have not demonstrated the great social conscience approach that the Senator from Minnesota has been talking about and that the Senator from Vermont has been talking about.

I wished to make these additional comments on the subject the Senators have discussed this afternoon, because I believe their approach is unanswerably correct, and is one which will have to be made if we are to win the cause of freedom through the Alliance for Progress program in Latin America.

The Senator from Vermont disturbs me very much. I do not know where I have been, but I was not aware that there is a probability that Mr. Labouisse will not continue to be Director of ICA. As a member of the Committee on Foreign Relations—and the Senator from Vermont is a member of that committee also—and I see on the floor the Senator from Wisconsin [Mr. WILEY] who is also a member of the committee—I wish to say that if what the Senator from Vermont has alluded to is correct—and I am sure it is, or it would not come from the lips of the Senator from Vermont, and he must have a good basis for the announcement he made a few moments ago—my recommendation is that the Committee on Foreign Relations had better have a consultation at a very early hour with the State Department on this subject.

The Senator from South Dakota [Mr. CASE] has just handed me a clipping which shows where I have been. I have not been reading the papers on this subject.

Mr. AIKEN. Mr. President, the report is that Mr. Labouisse is to be replaced by Mr. Woods, of the First Boston Corp., who received considerable publicity at the time of the Dixon-Yates involvement with the Federal Government. It is very interesting to note that the newspapers of last week announced that finally the Dixon-Yates matter had been "laid to rest."

Mr. MORSE. What does the Senator mean by "laid to rest"?

Mr. AIKEN. I suggest that the Senator ask the person who wrote the story.

Mr. MORSE. If that is what the report states, then the matter has just been resurrected again. Over the weekend I have been pursuing my agricultural pursuits, and I was unaware of this matter. I shall not comment on it further until I have talked to the State Department about it. Certainly, I urge my colleagues on the Committee on Foreign Relations that we have a consultation in committee in regard to this matter. I agree with the Senator from Vermont that Mr. Labouisse made a very favorable impression on us throughout all of our hearings in connection with the ICA program.

I had a feeling that we could count on Mr. Labouisse to go into those parts of the world where ICA has not been doing too well, where some abuses have developed, where the evidence is quite clear that there is shocking waste, and that we could count on him to take the necessary reform steps to make certain that ICA would carry out its intended purposes to a greater degree than in some instances it has been carrying them out.

Then, too, we were impressed by the sound arguments he made for an extended program, for a time program which would permit him, at least in the hiring of personnel, to commit himself beyond a year, which I thought was so important, and which I think is possible under the provisions of the bill we passed. I felt the case he made for strengthening the personnel of ICA, after he had been given the administrative authority to make appointments and had been

given some assurance of tenure beyond a year, was a very hopeful sign, too.

I was very much disturbed to hear the Senator from Vermont indicate that we might lose the services of this very able Government official, who I think has made a remarkably fine impression in the short time he has been with the administration. I am now doubly disturbed both by the statement of the Senator from Vermont and the statement of the Senator from South Dakota [Mr. CASE], who has handed me a newspaper clipping which I have just scanned. I wish to be very careful to make certain that I have all my facts before I say anything further, so I shall withhold further comment until I have studied the subject.

Mr. AIKEN. I am certain the Senator from Oregon will have something further to say after he finishes his reading on the subject; but I reiterate that it was confidence on the part of the committee members, including myself, that Mr. Labouisse would do his utmost to make certain that the aid money which Congress would provide would reach the people for whom it was intended, that enabled us to pass as good a bill as we did. I have repeatedly said that we should not legislate for the man, but for the program. In spite of that, we did legislate to a considerable extent for Mr. Labouisse, but if he is not to occupy the position, then I feel that my decision to oppose the long-term borrowing authority has been fully justified.

Mr. CASE of South Dakota. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. CASE of South Dakota. I would not expect or ask the senior Senator from Oregon to comment upon the newspaper item to which reference has been made. However, I should like to ask unanimous consent, if I may do so with the Senator's indulgence, that following his remarks the article may be printed in the RECORD, in order that the substance of it may appear in orderly fashion for reference purposes.

Mr. MORSE. I think it should be placed in the RECORD at this point.

Mr. CASE of South Dakota. Very well.

Mr. President, I ask unanimous consent that the article entitled "Naming of Woods May Reopen Scars," written by Marshall McNeil, and published in the Washington Daily News of recent date, may be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DIXON-YATES CASE—NAMING OF WOODS MAY REOPEN SCARS

(By Marshall McNeil)

A replay of the old Dixon-Yates conflict-of-interest story is in prospect in the Senate if President Kennedy nominates George David Woods of New York as head of his new Foreign Aid Agency.

Mr. Woods, 60, a Republican, is chairman of the First Boston Corp., one of the country's leading security houses. He is nationally known as an investment expert and internationally known as a banker and conciliator.

In 1953, as head of First Boston, he offered to send into the U.S. Budget Bureau his vice president, Adolphe Wenzell. Joseph Dodge, then Budget Director, wanted advice from a banker and utility expert about proposed expansion of the Tennessee Valley Authority. He hired Mr. Woods' nominee.

Mr. Wenzell's two-hat operation—one for his company, the other for the Government—led to a Senate investigation and charges of conflict of interest.

These charges were upheld last January by the U.S. Supreme Court. It struck down a Court of Claims award of about $1.8 million Dixon-Yates claimed when their power contract with the U.S. Atomic Energy Commission was canceled. AEC had contracted to have Dixon-Yates build a $100 million generating plant near Memphis. First Boston was to help in financing the project, without fee, Mr. Woods said.

The New York financial district, it has since been reported, believes the Dixon-Yates affair left its stamp on the "thoughtful side" of Mr. Woods.

NO CONFIRMATION

Although it has been widely reported that Mr. Woods has been chosen as Administrator for the new Agency for International Development (AID), there was no confirmation of this at the White House.

Chairman J. W. FULBRIGHT, of the Senate Foreign Relations Committee, said he heard Mr. Woods was one of several men being considered. Pierre Salinger, the President's press secretary, has said only that "nothing has been determined" about the AID directorship.

Mr. CASE of South Dakota. Mr. President, I share the views of the Senator from Oregon and the Senator from Vermont with respect to the hard work of Mr. Labouisse. He has tried to do a good job, and he has done so to the extent of his ability and under the restrictions which he encountered in the course of his work.

I am somewhat disturbed by the suggestion that he may be replaced—or perhaps I had better put it the other way around: that the director of the new organization, to be known as AID, should be someone else. I do not know why that should be; I am not in the counsels of the administration. I saw some reference to this proposal in a newspaper article a couple of days ago; but when I saw it today, and in the absence of any definitive comment from the White House on the subject, naturally I have some question in my mind as do other Senators. So I thought the item should be brought into the open and the actual newspaper article be printed in the RECORD.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House insisted upon its amendment to the bill (S. 902) to amend the Small Business Investment Act of 1958, and for other purposes; disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. SPENCE, Mr. PATMAN, Mr. RAINS, Mr. MULTER, Mr. MCDONOUGH, Mr. WIDNALL, and Mr. DERWINSKI were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1653) to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises.

The message further announced that the House insisted upon its amendments to the bill (S. 2237) to permit the entry of certain eligible alien orphans, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WALTER, Mr. FEIGHAN, Mr. CHELF, Mr. POFF, and Mr. MOORE were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 8762) to amend the Small Business Act to increase the amount available for regular business loans thereunder; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. SPENCE, Mr. PATMAN, Mr. RAINS, Mr. MULTER, Mr. MCDONOUGH, Mr. WIDNALL, and Mr. DERWINSKI were appointed managers on the part of the House at the conference.

The message further announced that the House had agreed to the amendment of the Senate to the bill (H.R. 2883) to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker pro tempore had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the Vice President:

S. 48. An act to authorize the Secretary of the Army to modify certain leases entered into for the provisions of recreation facilities in reservoir areas;

S. 203. An act to declare that the United States holds trust for the pueblos of Santa Ana, Zia, Jemez, San Felipe, Santo Domingo, Cochiti, Isleta, and San Ildefonso certain public lands;

S. 322. An act to make certain funds available to the Nez Perce Tribe of Idaho;

S. 344. An act to amend the Seneca Leasing Act of August 14, 1950 (64 Stat. 442);

S. 541. An act to amend the act of June 1, 1948 (62 Stat. 281), to empower the Administrator of General Services to appoint nonuniformed special policemen;

S. 685. An act to amend the Coast and Geodetic Survey Commissioned Officers Act of 1948, as amended, and for other purposes;

S. 931. An act to repeal that part of the act of March 2, 1889, which requires that grantors furnish, free of all expenses to the Government, all requisite abstracts, official certifications and evidence of title;

S. 935. An act for the relief of certain members of the Army National Guard of the United States and the Air National Guard of the United States;

S. 1368. An act to amend the Shipping Act, 1916, to provide for licensing independent

ocean freight forwarders, and for other purposes;

S. 1501. An act to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs;

S. 1518. An act providing for the disposition of judgment funds of the Omaha Tribe of Indians;

S. 2016. An act to give to the Walker River Paiute Tribe the reserved minerals underlying its reservation;

S. 2216. An act to authorize the transfer of three units of the Fort Belknap Indian irrigation project to the landowners within the project;

S. 2224. An act to grant minerals, including oil, gas, and other natural deposits, on certain lands in the Northern Cheyenne Indian Reservation, Mont., to certain Indians, and for other purposes;

S. 2395. An act to amend the Railroad Retirement Act of 1937 to provide reduced annuities to male employees who have attained age 62, and for other purposes;

S. 2422. An act concerning the White House and providing for the care and preservation of its historic and artistic contents;

H.R. 2021. An act to extend for 2 years the definition of "peanuts" which is now in effect under the Agricultural Adjustment Act of 1938;

H.R. 2877. An act to authorize the Director, Office of Civil and Defense Mobilization, to approve a financial contribution for civil defense purposes to the State of Oklahoma;

H.R. 6302. An act to establish a teaching hospital for Howard University, to transfer Freedmen's Hospital to the university, and for other purposes;

H.R. 6309. An act to amend title VI of the Merchant Marine Act, 1936, as amended, in order to increase certain limitations in payments on account of operating-differential subsidy under such title;

H.R. 6732. An act to amend the Merchant Marine Act, 1936, as amended, to encourage the construction and maintenance of American-flag vessels built in American shipyards;

H.R. 6969. An act to amend title 38, United States Code, to increase dependency and indemnity compensation in certain cases;

H.R. 6974. An act to amend section 607(b) of the Merchant Marine Act, 1936, as amended;

H.R. 7043. An act to extend to employees subject to the Classification Act of 1949 the benefits of salary increases in connection with the protection of basic compensation rates from the effects of downgrading actions, to provide salary protection for postal field service employees in certain cases of reduction in salary standing, and for other purposes;

H.R. 7622. An act to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia;

H.R. 8406. An act to further amend Reorganization Plan No. 1 of 1958, as amended, in order to change the name of the office established under such plan, and for other purposes;

H.R. 8466. An act to authorize the construction of a railroad siding in the vicinity of Taylor Street NE., District of Columbia;

H.R. 8719. An act to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard; and

S.J. Res. 98. Joint resolution to provide for the observance of the centennial of the enactment of the Homestead Act.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. MORSE. Mr. President, we are about to open the debate on proposed legislation for impacted areas, together with, possibly, the proposed amendments to the National Defense Act, proposed amendments adding to S. 2393, the school construction bill, and possibly amendments covering the many other issues involved with the education problem which confronts us.

The schoolrooms of America are overcrowded—except for this Senate schoolroom. I do not propose to be the leader of this schoolroom, but I have entered into an agreement that when we begin the discussion of this subject matter, there would be a quorum call. I suspect that in all probability, most of the debate today will be for the record; but it is a record which needs to be made. I should like to have as many Senators participate in the making of the record on this legislation as care to do so. I think they will discover that there is much interest in the subject back home.

Mr. President, I ask unanimous consent that there may be a quorum call, with the understanding that after the quorum call I will have the right to the floor to begin the debate on the impacted areas bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MORSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Mr. President, in opening the debate on S. 2393, I may say that I do not intend to speak at great length, although at the outset I announce that I do not expect that the Senate will vote today. The reason I do not expect the Senate to vote today is that several members of the subcommittee of which I am chairman could not possibly be here today, and they will have very important contributions to make to the debate.

I think it is also very clear that undoubtedly several amendments which deserve thorough consideration will be offered. I hope it will be possible to vote on the bill tomorrow, but I have notified the leaders that I think the prospects of voting today, if the Senate is to be in session a reasonable length of time, are poor, for probably we shall take most of the afternoon in making the record on the issues involved.

Furthermore, I believe it desirable that some of the material which will be offered this afternoon during the debate be available in printed form, so that Senators can study it before they make up their minds as to how they will vote. I suspect, however, that in many cases Senators have already made up their minds. On the other hand, there is always the possibility and the hope that at least some minds will be made up on the basis of the facts and the evidence presented during the debate. At any rate, certainly, those of us who are in charge of this measure have the duty of making pertinent information available to Senators during the course of the debate. I shall now proceed to do my part in that connection.

Senators will recall that during the floor debate on S. 1021, the general Federal aid to education bill, which passed the Senate on May 25 of this year, the impacted area programs were discussed many times in connection with title II of S. 1021 which was concerned with an extension of Public Laws 815 and 874.

In order that we may refresh our recollection of the provisions of these statutes and in order to gain an understanding of the accomplishments of these programs, since their enactment in September of 1950, I ask unanimous consent that an article entitled "Two Billion Dollars in a Decade: Public Laws 814 and 874," which appeared in the April 1961 issue of School Life, to be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TWO BILLION DOLLARS IN A DECADE: PUBLIC LAWS 815 AND 874

If any law is passed by the Congress this year to authorize Federal aid for building and operating public elementary and secondary schools, it will not be the first. For 10 years now, plus some months, two laws have been in operation which together have provided nearly $2 billion to individual school districts. About half of this money has been appropriated for constructing buildings; the rest, for meeting current operating expenses, which includes teachers' salaries.

These two laws were enacted a week apart, in September 1950, by the 81st Congress. They have always been known by only their numbers—Public Law 815 and Public Law 874—for they have not had the advantage of a definitive name like the one the 85th Congress gave 8 years later to Public Law 864—"The National Defense Education Act of 1958." In the Office of Education, however, which administers the funds for 815 and 874, they have gone by the name of SAFA, an acronym formed from key words in this identifying phrase, "School Assistance to Local Educational Agencies in Federally Affected Areas."

The words "in federally affected areas" define the limits of these two laws: both laws authorize payments to local school districts principally on one basis only—that within the State or near the district there is Federal property on which school children live or their parents work. Any school district applying for assistance under either law must identify this property and also must show that the existence of this property has put a certain amount of strain on the local schools, either because it has cut substantially into the total tax "take" or because it is responsible, to a degree, for the presence of a substantial number of school-age children. The laws also authorize payments to the Federal Government itself, to help it build and operate schools on Federal property, such as military bases, forts, and airfields, wherever

State or local educational agencies are unable to do so.

The full history of SAFA is being written in the reports which the U.S. Commissioner of Education makes each year to the Congress. These reports include the name of every local educational agency receiving funds under each of the two laws.

The 10th annual report, sent to the Congress in January of this year, not only covers the 10th year in detail but gives a summary of the entire decade. Like the earlier reports, it has been published for public distribution; it is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., for $1.

PUBLIC LAW 815

In the first 10 years of Public Law 815 the Congress has appropriated $962.6 million for assisting in the construction of minimum school facilities for federally connected children. (The term "minimum facilities" has been interpreted to mean instructional and auxiliary rooms together with initial equipment, but not single-purpose auditoriums and gymnasiums or built-in spectator space.) Most of this money has been reserved for local school districts which have been eligible to receive aid on one or both of these grounds: (1) They have substantial increases in school membership as a result of Federal activities; (2) they have a substantial number of pupils who reside on tax-exempt Federal properties (principally Indian reservations).

The greatest activity under Public Law 815 took place in the first half of the decade, when an exceptional effort was needed to meet the backlog of schoolhousing needs that had accumulated during World War II. School districts applying for assistance in the first years of the program were permitted to go as far back as 1939 to count their increased enrollments of federally connected children.

The first 2 years of the program brought out such overwhelming evidence of need that in 1953 the Congress appropriated $195 million, the largest amount it has provided in any one year. In the second half of the decade, with much of the backlog met, funds have been provided in decreasing amounts. All together, the first 10 years under the act have seen $948.5 million reserved for 4,733 construction projects (out of 8,290 filed), to provide an estimated 50,511 classrooms for 1,468,139 children.

By the end of this fiscal year the current program for constructing military family housing on Federal property will be virtually completed; and it is reasonable to expect that, if no marked changes are forthcoming in the nature and location of Federal activities, the need for assistance for school construction in federally affected areas soon will level off.

Public Law 815: Federal funds appropriated for assisting local educational agencies of the Federal Government to construct facilities for public elementary and secondary schools, 1951–60

[In millions of dollars]

1951	96.5
1952	50.0
1953	195.0
1954	125.0
1955	118.5
1956	33.9
1957	108.5
1958	98.7
1959	75.4
1960	61.1

PUBLIC LAW 874

Last year—fiscal year 1960—3,963 local educational agencies in the 50 States, Guam, and the Virgin Islands applied for Federal funds under Public Law 874 to help them defray current expenditures for their schools. All but 142 were found eligible. The total amount to which they were entitled—$177.6 million—was based on their having more than 1½ million federally connected children—15 percent of their total average daily attendance. But federally connected children were not the only beneficiaries: the recipient districts put the funds under Public Law 874 with their other funds for current expenditures and thereby passed the Federal aid along to all 10 million of their pupils. In other words, one out of every three children in the Nation's public elementary and secondary schools benefited. Ten years earlier, in 1951, only 2.9 million pupils benefited—1 out of every 8.

Still other comparisons of 1960 figures with those of a decade earlier indicate how much the program under Public Law 874 has grown in its first decade. Since 1951 the number of districts eligible for payments has more than trebled, the number of federally connected pupils has almost trebled, and net entitlements under the act have increased nearly six times:

	1950–51	1959–60
Number of eligible districts	1,172	3,821
Number of federally connected pupils	512,050	1,502,432
Net entitlements of eligible schools	$29,700,000	$177,600,000

There are several reasons for these increases. Federal activities have multiplied. Liberalizing amendments have extended the coverage of the law and increased its benefits: The definition of "federally connected children" has been broadened to include, for instance, Indian children under one subsection of the act and, under another, children of parents in the Armed Forces; the definition of "Federal property" also has been made more generous; and the average rate of payment per pupil has been raised. Both school population and school expenditures have increased, and local and State school officials have become better informed about the provisions of the law and more interested in taking advantage of the aid they offered.

These increases notwithstanding, the program has had its stable side. Federal payments under the act have remained at a fairly constant ratio to the total operating expenses of the eligible districts: the average has been 4.94 percent, ranging between a low of 4.52 percent in 1958 and a high of 5.69 percent in 1951. The number of federally connected children in average daily attendance in the eligible districts, though now three times as large as at the beginning, has deviated but little from its original relation to the total number of children in those districts: it began at 17.23 percent, rose slightly in the next 2 years, and then dropped slightly, to remain just under 15 percent from 1955 on. What is more, payments under the various sections of the act have stayed in approximately the same relation to each other.

Public Law 874: Federal funds appropriated for assisting local educational agencies with the cost of maintaining and operating public elementary and secondary schools, 1951–60

[In millions of dollars]

1951	28.7
1952	51.6
1953	60.5
1954	72.4
1955	75.0
1956	90.0
1957	113.1
1958	127.0
1959	157.4
1960	186.3

Federal funds for local educational agencies under Public Laws 815 and 874: Totals for 1st 10 years, by States, 1951–60

State	Public Law 815: Funds reserved as of Sept. 30, 1960	Public Law 874: Net entitlements as of June 30, 1960

Federal agencies	[1] 103,082,116	[2] 44,607,872
Total	948,471,691	945,251,312

[1] Funds reserved for certain Federal installations for constructing school facilities on Federal property.

[2] Funds transferred directly to certain Federal agencies for maintaining and operating schools for children living on Federal property if no local agency is able to do so.

Size of school districts eligible for assistance under Public Law 874

School districts receiving assistance under Public Law 874 (for defraying their current expenditures) come in all sizes but most of them are large, according to an analysis the Office of Education has made of eligible applicant districts in the school year 1959–60:

Size of district, by enrollment	Total districts in United States (number) [1]	Districts eligible under Public Law 874	
		Number	Percent of total
25,000 and over	123	58	47.2
12,000 to 24,999	230	101	43.9
6,000 to 11,999	629	244	38.8
3,000 to 5,999	1,409	419	29.7
1,200 to 2,999	3,147	827	26.3
600 to 1,199	3,170	661	20.9
300 to 599	3,635	653	18.0
150 to 299	3,436	456	13.3
50 to 149	4,791	313	6.5
1 to 49	14,842	89	.6
Nonoperating	7,017		
Total	42,429	3,821	9.0

[1] From Bureau of the Census, "Public School Systems, 1960."

Mr. MORSE. Mr. President, the Committee on Labor and Public Welfare ordered reported S. 2393, which is a simple 1-year extension of the existing law—Public Laws 815 and 874—after having defeated in committee an amendment to extend the life of the legislation for 3 years.

The 1-year extension is proposed—and I wish to be perfectly frank about this—in order to continue to provide temporary financial assistance to federally impacted school districts and in order to prevent possible severe economic dislocation to those school districts heavily impacted with a high proportion of federally connected children until sound public school general aid legislation is passed by the Congress.

The will of the Senate has been ascertained by the votes on S. 1021; it is that a majority of the Senate favors both general Federal aid to education and specific special assistance for a limited time to enable continued legislative supervision of federally impacted areas aid.

S. 2393 is a straightforward bill to reemphasize the desire upon the part of the Senate that until a general aid bill encompassing impacted area aid is adopted, no school district presently assisted shall suffer.

As I have indicated, more than a 1-year extension at this time of Public Laws 815 and 874 could involve the Senate in a legislative ambiguity which would be most unfortunate.

The draft legislation submitted by the administration contained recommendations for a cutback in these programs. Evidence to support this position was presented to the committee. After careful consideration, both in colloquy during the hearings and in executive session of the Education Subcommittee in the first instance, and in full committee at a later date, the conclusion was reached that the cutback proposals were not fully justified on the basis of the evidence provided.

It was for that reason—and it is set forth in the committee report—that title II of S. 1021 contained a provision, section 204, for a full report, from the Commissioner of Education, for transmission to the Congress, upon the operations of these two impacted area laws, which would also take into account the effect of the money provided under title I, the salaries, construction and operation and maintenance portion of the bill.

I ask unanimous consent that section 204 of Senate bill 1021 and also the committee's comment in its report be printed at this point in the RECORD.

There being no objection, the excerpt from the report (No. 743) was ordered to be printed in the RECORD, as follows:

Section 204 of S. 1021 reads as follows:

"The Commissioner shall submit to the Secretary of Health, Education, and Welfare for transmission to the Congress on or before January 1, 1963, a full report of the operation of Public Laws 815 and 874, as extended by this Act, including an analysis of the relation between Federal payments under these laws and Federal payments under title I of this Act, and his recommendations as to what the future relation between these laws and that title should be if they are further extended."

It is the view of the majority of the committee that a 1-year extension of the impacted areas legislation is warranted upon the basis of the justification presented in the following sections of the report. It is further the considered judgment of the majority of the committee that only a 1-year extension of the programs, at this time, is advisable. This position is based upon the belief that the special needs of the impacted areas should be related to the provisions of a general Federal-aid-to-education measure, designed as was title I of S. 1021 to provide broad-purpose financial assistance to school districts through the education agencies of the 50 States. It was for this purpose that section 204 of S. 1021 was drafted. Since it is the belief of a majority of the committee that, within the life span of the 87th Congress, S. 1021, or a similar measure, will be enacted into law, an extension of the impacted areas legislation for longer than a 1-year period is not warranted.

Mr. MORSE. Mr. President, if the Senate were now to adopt more than a 1-year extension of the impacted area laws, it would be reversing itself, in effect, with respect to this important aspect of sound congressional control over the operations of the agency which administers these programs. It would be putting off for a 3- to 4-year period the needed detailed review of the operations under this legislation.

Mr. President, to document this point, I refer now to a report which was received from the Comptroller General under date of June 12, 1961. I note in passing, Mr. President, that this information was received by the committee subsequent to the passage on May 25 of S. 1021, title II, of which extended Public Laws 815 and 874 for a 3-year period, but which most significantly contained provisions requiring that a full report be submitted to the Congress within an 18-month period.

In fact, Mr. President, I think I should point out that during the early days of the consideration of Senate bill 1021, the members of the Education Subcommittee, with the distinguished Senator now presiding over the Senate [Mr. RANDOLPH] participating, joined in a series of conferences with the Department of Health, Education, and Welfare. Sometimes the conference included representatives of the Bureau of the Budget, and sometimes it included representatives of the White House.

I believe it is well known in the Senate, that during those weeks of discussion on Federal aid to education legislation, and prior to the committee's taking its official position on the measure it recommended to the Senate, by an overwhelming majority vote of the committee, spokesmen for the committee had held conferences with top Government officials, including those in the White House itself.

We are talking about a subject matter this afternoon to which there has been given a great deal of thought and study, and about which there have been many, many conferences. Yet, and let us face up to it, we are now confronted with a drive—a pressure drive—that is being put on to extend impacted areas legislation beyond the provisions of S. 2393. There is even some pressure to extend Federal aid beyond the time provided in S. 1021, which the Senate has already voted for, again with a substantial majority.

Mr. President, the reason why we so strongly recommended, the addition of section 204 to S. 1021, I want to make clear early in the debate this afternoon, was that, in many instances, the administration can make a case against a continuation of Federal aid to the so-called federally impacted school districts, on the ground that there is no justifiable proof of continuing need for some of the school districts.

It is not fair, it is not equitable and just, to continue without adequate justification a Federal aid program. Impacted area aid was granted in the first instance on the basis of the allegation that the Federal Government itself was responsible for greatly increasing the school population of a school district by establishing a Federal installation in the area. This resulted in bringing into that area many workers and personnel with children. Property was taken off the tax rolls because the property became, in some instances, Federal property and therefore not subject to local taxes.

There are still thousands of school districts which, in my judgment, are entitled to such aid. The difficulty is, in a situation such as this, that there is a tendency to blanket them all together. Of course, sometimes too there is a tendency to do a little back scratching in getting funds. Those with weak cases in some school districts are all the more anxious, I am sorry to say—but it has been my experience, at least—to join in to support a movement to get Public Laws 815 and 874 extended for as many years as possible, so there will be less probability of the Congress reversing itself when a report is made similar to the one in S. 1021 which was to be made at the end of 18 months.

It is pretty well known in the Senate that I led the fight against my own administration in the early days of the session in respect to its recommendations concerning a tapering off of the programs involving Public Laws 815 and 874. I thought to curtail programs without notice was a mistake. The administration had failed to produce before my subcommittee evidence which, in my judgment, justified as drastic a curtailment of the program as the administration was recommending. I took the position that we ought to extend the program for the time being, until we could get the facts. That is why there was included an amendment adopted in the subcommittee, which the full committee accepted, which provided for the 18-month study and the submission of an official report at that time.

I wish to say, to the everlasting credit of the administration and to the great leadership that the Secretary of Health, Education and Welfare, Mr. Ribicoff, has extended to this administration throughout this year, in connection with the troublesome education bills, once we presented our case to the administration, it accepted our recommendation.

We are beyond that point this afternoon. Today there is a great drive from back home in many States, upon many Senators, to try to get the law extended far beyond 1 year; and to bring in as amendments to the National Defense Education Act language which would extend it far beyond a year.

Very early in this debate I wish to say I think that to do so is a mistake. I think it is just as great a mistake for us to seek to extend these NDEA programs far beyond a year as I thought it was a mistake last January or February when the administration wanted to make a blanket, across the board tapering off of aid to impacted areas.

I believe that the February and March position of the administration may have scared some Senators and Members of the House. They perhaps became frightened because they thought they saw some handwriting on the wall. They may have thought the action of the administration might lead to the withdrawal of aid to some school districts in which such a withdrawal of aid would not be justified. That is understandable.

All I can say to such Senators, on behalf of my committee—and I think I can speak for the full committee—is that they do not have to worry about what the Subcommittee on Education would do in such circumstances. The committee has no intention of supporting any proposal which would take aid away from school districts that can justify the aid. But I do not think it is fair to our committee, for the Senate to act, in the manner suggested by Senators who want to get this matter, as is said in the cloakroom, "bottled up once and for all," or, as some have said, "buttoned up." Those are Senators who want to get just as much as they can get now so the bill will be behind us. This would postpone our taking a look at it until after 1963 or 1964. These are interesting dates. They are after 1962.

I want to be frank with my colleagues. I think we ought to get the facts before the election of 1962. I think the American people always ought to be in a position to pass judgment on the facts.

Therefore, I am opposed to an extension of more than 1 year, because a 1-year extension will give us a chance to get the facts. It will also give the American people a chance to pass judgment on the matter.

I have already referred to the Comptroller General's report. I want, in support of what I have said, to state that in some instances his findings make it very doubtful as to whether impacted area aid in some locations can be justified.

On page 22 of the report the Comptroller General's report states:

HOW ONE SCHOOL DISTRICT ESTABLISHED FEDERAL CONNECTIONS

The school district involved in our field inspection was located in a suburban area of a large western city. The community was primarily residential in character with very little industry. School officials advised us that the residents enjoyed better than average incomes; information from the local chamber of commerce showed average income of $7,000 a year and a large number of professional people. This school district applied for a grant and predicted in November 1956 what the increase in federally connected pupils would be by 1958, but for various reasons the increase eventually used was not established until April 1958 and was then based on actual enrollment. The increase so established was used to determine the grant of $970,987.50 to the school district, which consisted of $616.50 for each of the 1,575 additional pupils alleged to have a Federal connection.

We reviewed the procedure used by the school district to establish the increase in the number of children claimed to have Federal connections. The net increase was the difference between the number of pupils with alleged Federal connections in average daily membership for the base year 1955–56 and the number of children claimed to have a Federal connection and who were in actual school membership as of April 1958. The questioning conducted by the school district started by asking the parents of all children in their schools to supply the school district with the names and addresses of their employers. After receipt of the names of employers, a "Survey of Firms Engaged in Government Defense Contracts" form, consisting of the following five questions, was mailed to all the employers of the parents:

1. Do you have a direct contract with the Federal Government? ------ (Yes or No.)

2. Do you have a contract with a firm which has direct contracts with the Federal Government? ------ (Yes or No.)

3. List materials produced or services rendered which would qualify your firm as a defense plant, if this is permissible: ------

4. Did you have a direct contract with the Federal Government in May 1956? ------ (Yes or No.)

5. Did you have a subcontract in May 1956 with a firm which had direct contracts with the Federal Government? ------ (Yes or No.)

In the replies to these questionnaires, many of the employers answered "Yes" on one or all of questions 1, 2, 4, and 5. Some of the employers stated on the questionnaire that they answered "Yes" because they sold such things as stationery, welding service, sand and gravel, and insurance directly to some Federal bureau or to some other company that sold something to some Federal bureau. In some instances local employers notified the school district that all of their Federal contracting was handled by their home offices located in other parts of the United States. In that event, the school district then requested the information from the out-of-town office. Still other local employers forwarded the questionnaires to their home offices for direct reply to the school district.

After the completed questionnaires were received from the employers, the school district learned that SAFA wanted contract or subcontract numbers as additional evidence of Federal connection. For the most part, this additional information was obtained from the employers by telephone.

We inspected 139 of the replies submitted by the 458 contractors or employers determined by the school district and the field representative of SAFA to be carrying on Federal activities. Despite the fact that contract numbers were supplied in most instances, the basis accepted by SAFA as establishing a Federal connection in our opinion was insufficient, especially when considered in the light of the contemplation in law that the contended increase in school membership must be shown to have resulted from activities of the United States. Of the replies reviewed, we refer to 26 because of the nature of comments offered by the employers in replying to the school officials.

One of the employers indicated that he did not qualify as a defense plant and that his main office several miles away provided office supplies to all Government agencies. There were several other replies of a similar nature. A reply was received from a company supplying water and power services to the school district area and environs. The company explained that, under Federal contract, it shared in the operation of a Government-owned powerplant several hundred miles away from the school district. None of the parents of children in the school district worked at the powerplant. Nevertheless the school district claimed Federal connection for 41 children and thereby received assistance of $25,277 because in addition to helping operate the powerplant the company had service activities in the neighborhood of the applicant school district.

Mr. President, I shall give a few more examples, but I pause to discuss this one a bit.

This school district seems to be getting $25,277 which it does not deserve. If so, that is a shakedown of the taxpayers of the United States.

I wish Senators would read the Comptroller General's report before they vote on the bill. The Comptroller General points out in his report ample evidence in support of the section of S. 1021 calling for a thorough examination and review of Public Laws 815 and 874.

Oh, I know there are many local interests which do not wish to have a review. There are many local school districts which would wish to continue receiving a handout that they do not now deserve. How many of those districts are there? I do not know. I hope it is not many. The Comptroller General fears that it is a substantial number.

Mr. President, there is no doubt in the mind of the senior Senator from Oregon that Public Laws 815 and 874 may have become honeycombed with many abuses. I fear that many school districts may be getting money from the Federal Government under the pretext that they are federally impacted, when in fact they are not federally impacted or when in fact they are not federally impacted to the degree claimed. If so, such districts are putting their hands into the till of the Federal Treasury and getting hundreds of thousands of dollars which do not belong to them.

For what are we asking? We are asking to continue the program for 1 year so that we can get the facts, so that a review can be made. What is wrong with that?

It is too bad that it is necessary to extend the law at all with respect to any school district which is "shaking down" the Federal Government. It will not be easy to ferret out those districts in the course of this debate.

I wish to make perfectly clear, Mr. President, while the Senator from Michigan [Mr. MCNAMARA], the Senator from West Virginia [Mr. RANDOLPH], and the Senator from Montana [Mr. METCALF] are on the floor, that, as they know, I fought against any tapering off of the program until we could get the facts.

I said to the administration:

You have not given us enough facts to justify the blanket tapering off of the program which you propose.

I think we have worked out a fair compromise, if we wish to call it that; a legislative procedural compromise for solving the problem.

I wish to make it perfectly clear for the benefit of any Senator who has any doubt that I am satisfied that in a substantial majority of the cases the school districts are entitled to what they are getting under the terms and the original intent of Public Laws 815 and 874. Such districts are heavily federally impacted areas. Many others, in my judgment, do not qualify under the original intent and purpose, and I do not think we ought to freeze such districts into the program for 2 or 3 years, or, as I understand some will propose by an amendment, 4 years.

We shall not hurt a single school district by extending the law for 1 year.

We would not hurt a single schoolchild by extending the law for 1 year. But in my judgment we would do great damage to the taxpayers of this country in many instances if we were to extend it beyond 1 year. We know that the Senate desires a thorough study. We know that both the Department of Health, Education, and Welfare and the Comptroller General's office will give this question further study. If S. 1021 is enacted they will give us the facts and the evidence that we have called for in support of the contentions. The Comptroller General has already given us some.

I wish the Senate to consider another example. In the appendix to the Comptroller General's report, he has said:

> A municipal flood control district replied that it had no direct contracts with the Federal Government but since 1936 had provided the funds for all rights-of-way and for bridge and highway construction required by the projects constructed by the Corps of Engineers. On the basis of this connection, the school district claimed an increase of 22 children and thereby received $13,563 for school construction assistance.
>
> The school district claimed 25 children as being federally connected, and thereby received assistance of $15,412, because a sand and gravel company occasionally sold rock, sand, etc., to the contractors performing construction or road work for the Federal Government.

We ought to be honest with the taxpayers on this subject. When Public Laws 815 and 874 were passed, it was never contemplated that a school district would receive $15,412 because in a district there is a sand and gravel company which would sell sand and gravel occasionally for the purpose of some Federal construction—for use on a road, a reservoir, or whatnot—not located in the school district.

Yet, that is what the Comptroller General is telling us. But can Senators imagine what that particular school district is saying to its U.S. Senators these days? There is not a Senator present in the Chamber or absent from the Chamber who cannot show piles of telegrams on this subject. Perhaps the old human frailty of downright selfishness is taking over in many of the school districts of this country. They are proceeding to seek funds on one alibi or another. The attitude is, "Everybody else is getting it. Let us get ours." That is an attitude which we see between the lines of many of the telegrams that we receive.

Before I am through I expect to put into the RECORD the information about which I am about to speak. As a Senator from a State which has many federally impacted school districts, or at least, many school districts which receive federally impacted area money, I hope an investigation would show that they have it coming. But there is no reason why the school districts in my State should not be investigated by the Department of Health, Education, and Welfare and by the Comptroller General to find out whether or not they are entitled to the money, in keeping with the purpose and the intent of the bill when it was first passed. They will not like it if they lose the money and they will not hold any testimonial banquet for their Senator in that school district if they lose the money. But I say to every school district in my State, "If you do not have it coming on the basis of the law, I shall do everything I can to see to it that you do not get it, because I sit here representing, in the first instance, not the people of Oregon, but the people of the United States, elected by the people of Oregon."

I did not teach constitutional history for years to walk out on it because I walked into the Senate.

That is the obligation of a U.S. Senator. I do not want any school district in my State to get money under Public Laws 815 or 874 if the Comptroller General or the Department of Health, Education, and Welfare can show it is not entitled to it. Yet I have been very much surprised at some of the cloakroom argument I have heard in support of an extension of the laws beyond 1 year. Such arguments do not recommend themselves to me. For example, one of the fallacious bromides that under the foreign aid program there is a great deal of waste, and therefore we should countenance a great deal of waste under Public Laws 815 and 874. That is an argument made in all earnestness and seriousness. It is a lot of rot. What every Senator ought to do is to give us help to eliminate the waste from the foreign aid program and also the waste under Public Laws 815 and 874, or any other law that is being administered by this Government.

The argument that because there is waste elsewhere, therefore we ought to put on blinders to overlook what the Comptroller General tell us in the report is the worst basis which could possibly be adopted for the passage of legislation in the Senate.

Let us consider another example. I wish to buttress my argument as to our need to obtain the facts before we extend the law beyond a year.

The report of the Comptroller General continued:

> Following are comments of the school district and of certain companies with contracts or subcontracts for Federal activities which companies were included in the claim by the school district for assistance in school construction without conclusive evidence that the increased school membership was a result of such Federal activities. The comments were taken from the original forms submitted by the employers, which were on file in the school district, and were paraphrased by the General Accounting Office.

Then follows a table, which I ask unanimous consent to have printed at this point in my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

How one school district established Federal connections

Type of material and service and remarks by companies and school district	Number of children claimed to be federally connected		Amount of grant
	1956	1958	
Stamps and supplies	0	2	$1,233
By company: Our firm would not qualify as a defense plant. Ours is primarily a service company to defense plants and the Government, both Federal and local. (See note 1 for General Accounting Office comment.)			
Adhesive labels	11	16	3,082
By company: No defense plant. We manufacture pressure-sensitive labels (removable and nonremovable).			
Dairy products	0	7	4,316
By company: Dairy products, ice cream. By school district: Military subsistence.			
Aircraft bolts	0	2	1,233
By company: Manufacture aircraft bolts. (See note 1 for General Accounting Office comment.)			
Multigraph supplies	0	2	1,233
By company: Currently have contracts covering goods of our regular manufacture so we do not come under the heading of defense plant.			
Office machines	0	1	616
By company: Ballistic missile guidance systems, air defense data processing machines. By school district: Write letter to ..... for contract number.			

How one school district established Federal connections—Continued

Type of material and service and remarks by companies and school district	Number of children claimed to be federally connected		Amount of grant
	1956	1958	
Smelting	0	1	$616
By company: Lead and zinc mining and smelting. By school district: What do they do? Write to above address for contract number. (See note 1 for General Accounting Office comment.)			
Metals	5	11	3,699
By company: Aluminum sheet, plate, wire, rod, bar, etc. Our company handles all orders from Government sources through our sales office.			
Containers	0	1	616
By company: We occasionally supply paper containers to a Government agency under a specific contract number and also occasionally supply containers to firms with Government contracts. However, this does not represent a significant portion of our business.			
Instruments	3	6	1,851
By company: We sell considerable numbers of instruments to Government agencies and prime contractors but not on a contract basis.			
Printing	0	4	2,466
By company: We lithographed Army maps during World War II and have done subcontract work in our machine shop; however, at the present time we do not have any direct or subcontracts although we do a lot of printing for the aircraft and missile plants.			
Rock and sand	0	25	15,412
By company: Production and distribution of rock, sand, gravel, and transit-mixed concrete. (See note 2 for General Accounting Office comment.)			
Stationery	0	3	1,851
By company: Furnish office supplies and printing. By school district: Subcontract.			
Cans	0	6	3,699
By company: Not a subcontract as such but we did manufacture products for firms which had direct contracts with the Federal Government.			
Surgical supplies	0	2	1,233
By company: We sell surgical supplies to many firms who have contracts with the Federal Government.			
Adhesives	0	1	616
By company: Although we do not have contracts with the Government, we do sell adhesive coating to the Government on a competitive basis.			
Acoustics	0	2	1,233
By company: Factory has had Government contracts for several (15 to 20) years.			
Telegraph and telephone	60	115	33,908
By company: We have prime contracts with all branches of the Federal, State, and local governments and contracts with subcontractors serving these agencies. The purchase orders for the military alone would be too numerous to list.			
Water and power	0	41	25,277
By company: Operation of power dam. By school district: Advised by company that project is not listed by contract number. (See note 1 for General Accounting Office comments.)			
Truck carrier	0	5	3,082
By company: Truck transportation of Government goods. By school district: Operating freight for Government, machinery tariff No. ——.			
Municipal flood control district	0	22	13,563
By company: No direct contract with any Federal agency. However, the district cooperates with the Department of the Army, Corps of Engineers, in the construction of major flood control projects. The district provides the funds for all rights-of-way and for bridge and highway construction required by the projects constructed by the Corps of Engineers. The total program, which has been underway since 1936, is not yet completed.

NOTE 1.—Although sales to a Government agency were made by the company or organization employing parents of schoolchildren calmed to have a Federal connection, the sales of products or services were found to have been made by a division or part of the company located far distant from the applicant school district area where the parents worked. In no cases was it stated that the parents involved had any direct relation with the production of products or the services sold to a Federal agency.

NOTE 2.—In this instance we visited the employing company and were advised that less than 5 percent of its business was related to Federal contracts and then only in an indirect way; their products were rock, sand, ready-mixed concrete, etc., for construction and road purposes.

Mr. MORSE. Let us consider the alleged Federal connection in this school district which, in the opinion of the school district, justified Federal aid, because the district was allegedly impacted.

With this material in the RECORD available and with Senators who want to vote on the facts rising above pressure, I believe I have said all I want to say at this point in my speech about the problem of many school districts getting Federal money under Public Law 815 and Public Law 875 which a thorough investigation would show cannot be justified.

I do not want to extend beyond a year such a program, because I think the Federal Government ought to investigate these facts. The Department of Health, Education, and Welfare should have such a study underway. The Comptroller General is continuing his watchdog activity in regard to this matter. We ought to extend the program for a year, come back next year, when we pick up the whole program of Federal aid to education, and go into this matter again. Then we will be in a much better position to make a decision on it.

Let me make it perfectly clear that by these remarks I intend no criticism of the Office of Education or its method of determining funds under the distribution formula. I would point out that if there is a fault, the fault lies with Congress in that we have not written into the law guidelines of sufficient strength to insure that our intent is met. I would simply stress some examples listed in the Comptroller General's appendix to his report.

I ask unanimous consent that the table of excerpts be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Type of material and service and remarks by companies and school district	Number of children claimed to be federally connected, 1958	Amount of grant
Dairy products	7	$4,316
By company: Dairy products, ice cream.		
By school district: Military subsistence.		
Multigraph supplies	2	1,233
By company: Currently have contracts covering goods of our regular manufacturer so we do not come under the heading of defense plant.		
Rock and sand	25	15,412
By company: Production and distribution of rock, sand, gravel, and transit-mixed concrete.[1]		
Cans	6	3,699
By company: Not a subcontract as such but we did manufacture products for firms which had direct contracts with the Federal Government.		
Surgical supplies	2	1,233
By company: We sell surgical supplies to many firms who have contracts with the Federal Government.		
Adhesives	1	616
By company: Although we do not have contracts with the Government, we do sell adhesive coating to the Government on a competitive basis.		
Water and power	41	25,277
By company: Operation of power dam.		
By school district: Advised by company that project is not listed by contract number.[2]		
Advertising	1	616
By company: Work does not qualify firm as a defense plant advertising agency.		
By school district: This company handles the advertising for ——.		

[1] General Accounting Office comment: In this instance we visited the employing company and were advised that less that 5 percent of its business was related to Federal contracts and then only in an indirect way; their products were rock, sand, ready-mixed concrete, etc., for construction and road purposes.

[2] Although sales to a Government agency were made by the company or organization employing parents of schoolchildren claimed to have a Federal connection, the sales of products or services were found to have been made by a division or part of the company located far distant from the applicant school district area where the parents worked. In no cases was it stated that the parents involved had any direct relation with the production or products or the services sold to a Federal agency.

Mr. MORSE. As will be noted, the chart shows the type of material and service and remarks by companies and school district. It also shows the number of children claimed to be Federally connected, and the amount of the grant.

It is a remarkable document. It shows a dairy company, which sells dairy products and ice cream to families that claim military subsistence. They claim seven such children, and received $4,316.

Then we see multigraph supplies, rock and sand, and cans. The comment by the company is:

Not a subcontract as such, but we did manufacture products for firms which had direct contracts with the Federal Government.

Surgical supplies. The company says:

We sell surgical supplies to many firms who have contracts with the Federal Government.

So what? Why in the world, because a company located in a town, at some crossroads, sells surgical supplies to some military reservation in that State, miles and miles away, should it get aid from all the taxpayers of the United States, and pay, in this instance, for two children at the cost of $1,233? When we add all these up, it amounts to quite a bit of money.

Adhesives. Water and power. The company operates a power dam. The power dam has little to do with the Federal Government. On the basis of that operation, the school district received $25,277.

Mr. METCALF. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Montana. I wish to say for the RECORD that in the opinion of the members of the Committee on Labor and Public Welfare, because of his cosponsorship, when he was a Member of the House, of the Murray-Metcalf bill in the field of education, and because of his long experience in the House in the field of education, Senator METCALF is one of our experts. I now introduce him as one of the best informed Senators to discuss this whole education problem in the Senate.

Mr. METCALF. I am very grateful to the Senator from Oregon for applying the designation of expert to me. I feel far from being an expert. I have had some short acquaintance with the educational field, although not as long as the Senator from Oregon or many other Senators. I wish to compliment the Senator for bringing out that these things are not the fault of the Office of Education. They are the fault—and perhaps it is not a too grievous fault—of the Members of Congress. We have said that we do not want any Federal control and we do not want any Federal interference, and in so doing we leaned over backwards so far that we did not add any fiscal or financial control.

I should like to bring out another example which points out what I am trying to say. On an Indian reservation in Montana, where the trust land is tax exempt and therefore under title IV of the act entitles the school district to get aid under Public Law 874 and Public Law 815, there is a power dam. The power dam pays $83,000 in taxes to the district.

When application for aid under Public Law 874 was made, they neglected to deduct the $83,000. For several years they neglected to do it. I believe they acted in good faith. That dam was not in their particular district, although it paid taxes to the counties. However, the Federal Government never found out about it until one day when a member of the Office of Education from Denver was touring through the State of Montana and he read in a newspaper ad by the Montana Power Co. their statement bragging about how much taxes they had paid throughout the State of Montana. Included in the amount was the $83,000 for this dam. So he investigated it. That was the first time he had had an opportunity to investigate it. Of course, now they have to repay this money. The point is that in our anxiety to prevent any Federal control of textbooks and teaching and the curricula of these schools, we failed to add proper fiscal restraint.

Mr. MORSE. I thank the Senator from Montana very much. He is quite right. In fact, I not only think the Department of Education is not entitled to criticism on this matter, but it is entitled to high commendation for the work that it has been doing in this whole matter in administering Public Law 815 and Public Law 874.

I also wish to compliment the Comptroller General and his associates for the "watchdogging" they have been trying to do in this field.

I know it is true that there have been discovered a good number of these horrible examples. I am convinced that the more we investigate them the more constant the ratio of bad cases in comparison with good cases will hold firm.

The administration took note and made the recommendation at the beginning of the year for a general tapering off. However, I believe that was a type of hatchet approach, rather than a pinpointed approach for really cutting out school districts which have abused the system. For this reason, I said I would not go along with the hatchet approach. I will go along with an extension and a study, so that we may get the facts. That is the approach we wrote into S. 1021. That is what the Senate passed.

A multiyear extension of impacted areas legislation is an attempt at an end run around S. 1021. That is what it is. It is an attempt to get around a part of the authorization which the Senate has already approved to get this present situation frozen, and to keep these abuses frozen for 2 or 3 years, or even perhaps 4 years. There is much popularity to be gained back home in these school districts if a Senator may be getting them some money to which they are not entitled. However, in my judgment, these districts are injuring their Senators.

I do not think they are practicing good government if they put that kind of heat on; and let us talk the language we understand, because we know what is going on. If I did not have an asbestos suit, I would have burned up by now with the heat I have been taking because of my refusal to yield on the matter of a 1-year extension. I get a little suspicious when there is so much desire to provide for more than 1 year, when 1 year would give protection. I get suspicious. I wonder whether they have it coming to them.

Mr. METCALF. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. METCALF. In the very instance I cited a moment ago, we urged the

school district that now is going to have to pay back $83,000 which is located in one of the most impoverished areas of Montana, that the way for it to get assistance from the Federal Government is not to practice abuse of Public Law 874, but to obtain, as in S. 1021, for general aid to education, so that funds could be distributed to the school district without abuses or without the false affidavits which it had to sign.

Mr. MORSE. The Senator from Montana could not have made a more pertinent remark. The way to take care of impoverished school districts is not to continue the application of a law which at present is providing them with funds they cannot show they deserve under the provisions of the law, but which they ask their Senators and Representatives to continue because they cannot obtain money from any other place. What those constituents need to be told is that they ought to be using their influence to get a general Federal Aid to Education bill passed by both Houses. They should be helping to pass a bill which will benefit all the children of the country, not merely the one-third of the children who are now being benefited under Public Laws 815 and 874.

The article I placed in the RECORD earlier in my speech refers to the more than $2 billion which has been spent since 1950 through Public Laws 815 and 874 as a form of Federal aid to education. I do not care how much those engaged in semantics try to draw some line of distinction between a general Federal aid bill and Public Law 815 and Public Law 874. We are helping with Federal dollars one-third of the school children of the Nation. I favor helping all of them with complete guarantees of local control, because many school districts which really need the money are definitely child impacted areas, although they do not have any Federal installations anywhere near them. The school district I have been citing by calling attention to these horrible examples is not impacted in fact. It does not deserve the money, even though it may be entitled to it under the law. I think this district is shaking down the taxpayers of the United States. That is wrong. It is that simple. Congress ought to stop it. We ought to get ready to stop it. The way to get ready to stop it is to extend the law for 1 year, to get our facts, to come back next year, and to cover such areas in a general aid to education bill.

The Senator from Montana, by interrupting me, has reminded me of something else which interests me, and this is a good place to pin it down for the RECORD.

It would be interesting—and I have done this in two or three instances—before a Federal installation has been located, to read all the promotional literature. It comes from the local chamber of commerce, the trade unions, the civic bodies, and the mayor. I find it interesting to read the testimony of such persons when they come before the appropriate committees to state why theirs is the only place in the United States—just that one place—to establish a facility. They indicate in fact, that the Government representatives ought to have their heads examined if they locate the installation anywhere else. There is only one place in the United States to locate some Federal project, and that is in Podunk, which is represented by Senators X and Y and their Representatives. The local chamber of commerce is also very much in favor of Podunk as the site. We all know them. We have lived through this situation for years in the Senate. I have seen this pattern repeated for 17 years. We know probably 500 other places where the facility could have been located just as well. But until the facility is finally located there, the townsfolk would almost give you the shirts off their backs to have it located there.

But once they get it located? Oh, boy. Then the local people are in with open palms. They need aid for this; they want aid for that; they want to be given something for nothing.

I now am simply stating a wild hypothetical, but Senators know what a scramble would occur in this country if we were to say to each one of the impacted areas, "All right. Your project is removable. We will remove it. We will get those children away from your area. We will get the workers out of there. We will put the installation somewhere else." Cannot Senators imagine what the local inhabitants would say, what they would do? They would say, "Forget about it." They would do without the impacted areas legislation. They would keep the children. That is the realism of the situation.

But it is not realistic for me to be thinking about such a hypothetical. The Senator from Montana and I know that that kind of situation will not happen.

The fact is that, in many instances, the economic wealth of the impacted area community has been increased as the result of the Federal installation to the degree that the community cannot possibly justify continuing to receive the aid if it was compared with some poor school district. Such an impacted area community does not need aid as much as the one the Senator from Montana spoke about. There you have a really impoverished school district, in which there is not a single Federal impact, not a single Federal installation, but where a large number of little children are attending low-standard schools. These children are being cheated out of the maximum development of their intellectual potential. They attend schools where classes are being held in the school gymnasium, if there is one, or in the corridors, or on the school stage, or in borrowed buildings near the school building. Those are the youngsters for whom the politicians ought to be bleeding in this debate, not the ones they may be trying to protect in many school districts which cannot justify getting the money they are already getting from the Federal Government. Such districts ought to be satisfied with the extension of the program for another year, until we can get the facts, rather than to ask us to come in to freeze these inequities for another 2, 3, or 4 years.

Mr. President, that is the burden of my case. I could stop with it. That is my case, but let me buttress it further.

I turn now to the operation of Public Law 874. I note that as far as the Office of Education is concerned, there are some communities receiving Federal funds for operation and maintenance of the school districts based upon the attendance at those schools of category B children; that is to say, children of parents who either live or work on Federal property, which might be found to be somewhat indefensible from the standpoint of need.

I refer in this context to one such school district and I hasten to say that there may be many factors of which I do not have knowledge which could justify the use of Federal funds to assist the pupils in this school district. This particular school district is located in my own State, at Gearhart, Oreg. I do not know whether I will get any votes out of Gearhart when I get through with this part of the speech, but here are the facts anyhow.

Gearhart is a very pleasant town on the Oregon coast whose permanent population is only 723 individuals according to the 1960 census. Yet, I note that in the 10-year review of the operation of Public Law 874 and 815, on page 69, that Public Law 874 payments in the amount of $1,663 were received by the Gearhart School District. These payments were based upon the attendance of 16 category B children.

Because from my own knowledge I could not recall that Gearhart possessed any Federal installation, I requested that the Office of Education provide me with the information upon which this funds distribution was based. The memorandum I requested has just been received. It states:

> In accordance with your telephone request there is attached a statement regarding the basis for eligibility under Public Law 874 for Gearhart School District No. 15–C, Oregon, for the 1959–60 and 1960–61 school years.
>
> BASIS FOR ELIGIBILITY AND FEDERAL ENTITLEMENT UNDER PUBLIC LAW 874 FOR GEARHART SCHOOL DISTRICT NO. 15–C, OREGON
>
> This district was eligible for $1,663 in fiscal year 1960 based on an average daily attendance of 16 children in the "B" category at a local contribution rate of $207.90 per child. Eleven of the sixteen children claimed for entitlement lived with parents employed on the naval station at Tongue Point. The other children had parents who were employed on Federal properties known as Customs House in Portland, Columbia River at the mouth (formerly Fort Stevens Military Reservation), and Astoria reserve fleet site.

Those properties are miles and miles away. They are not in Gearhart. Gearhart is a nice place in which to live, though. I continue:

> In 1961 this school district claimed 11 federally connected children in the "B" category and the estimated entitlement is $1,317. These 11 children in average daily attendance were living with parents employed on the naval station at Tongue Point, now designated as Pacific reserve fleet, Columbia group. It is located at Astoria, Oreg. The other two properties were the customhouse at Portland and the Astoria reserve fleet site at Astoria.

That involves my own State. I would have a terrifically difficult time to justify it, and I do not intend to try.

Mr. President, I want uniformity. I want the rules applied to the school districts in all the States, and I want the water squeezed out of this program.

I do not think good government or citizen respect for government is helped by maintaining such a loose administration of Public Laws 815 and 874. So I do not want them extended for more than 1 year until we obtain all the facts. I want to see the Department of Health, Education, and Welfare and the Comptroller General present studies which will tell us where the maladministration is or what changes are needed in the laws and where the undeserved payments, if any, are going. If we get this, we can then correct the situation legislatively. But I do not wish the present situation frozen unchanged into the law for another 2 or 3 or 4 years.

Before this debate is over, no doubt we shall be told many times by some Senators—particularly by some of those who are not present now to hear me, and there are many of them—"I want to tell the Senator from Oregon that after the report he is talking about is made, if we then find there are facts which justify a change in the law, we can change it then."

Mr. President, I submit that will not be done. If such a freeze goes into effect, the change will be made, if at all, only after the end of the freeze period. By that time every Senator will have been bombarded with a host of new issues and problems. In fact, we do not now know how to handle all the problems which presently are before us. If the present arrangement is frozen into law for 2 or 3 or 4 years, any Senator who, before the end of the freeze period had occurred, would propose a change in Public Laws 815 and 874, should have his head examined, for lack of senatorial sagacity, for he would not get a corporal's guard vote in the Senate for any such proposal.

Senators may just as well face the fact that whenever the vote on this bill is taken—whether tomorrow or thereafter—the Senate will be deciding whether it will freeze for 2 or 3 or 4 years the existing waste and duplication. We will be deciding—and this is the first time I have stated this, Mr. President—whether we will do what the Kennedy administration would like to have done—namely, to extend the present act for 1 year, so that the facts can be put before the people, for the correction which should then take place.

Mr. President, I hope a majority of the Senate will support the President.

Mr. RANDOLPH. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. RANDOLPH. Mr. President, it is interesting and informative—and to many Members of the Senate it is well known—that President Kennedy is sincerely desirous of moving in the manner advocated this afternoon by the diligent and knowledgeable Senator from Oregon who is in charge of Senate bill 2393 in this forum.

As I understand the situation, the Senator from Oregon continues his advocacy of helping the elementary school and high school students to the number of more than 45 million in the United States as another school year begins, rather than merely continue the program for the group of children of Federal employees and service personnel, numbering approximately 1,600,000. Is that correct?

Mr. MORSE. That is correct.

Mr. RANDOLPH. As a cosponsor of this proposed legislation before the Senate today, it is with considerably mixed feelings and something less than enthusiasm that I continue to support S. 2393, the measure to provide a 1-year extension of Federal assistance to so-called impacted areas.

As has been so well stated by the Senator from Oregon, I know that there are many areas in which there has been a very heavy impact through defense installations and related programs, and in which it is necessary to continue this aid. In many instances the children of Federal employees create a heavy burden upon local school facilities. While I acknowledge the responsibility of the Federal Government to bear its share of the burden in such cases, I believe now, as I did at the beginning of this Congress, that this assistance should be an integral part of a coherent program of Federal aid for school construction and teachers' salaries.

But there is also an accumulation of evidence which indicates that in many, many sections there has been flagrant distortion of the congressional intent and also, to a degree a failure to use the funds on the basis of the actual merit of the particular caseload.

The pending bill, of which I am a cosponsor, would offer assistance to school districts accommodating slightly more than one and a half million children of Federal employees and service personnel. It is most regrettable that the other body has not acted in this session in concert with the Senate by providing for the other 43 million elementary and high school students in the United States.

As noted in a recent United Press International article printed in the excellent newspaper, the Mineral Daily News of Keyser, W. Va., many hundreds of thousands of children in our urban centers are attending double shifts, for lack of adequate classroom space, and many millions of students are being instructed by teachers who fail to meet their State standards for regular certification.

I have frequently addressed this problem before. I shall not now repeat my comments, except to offer again the hope that next year—and I wish it could be this year—we may put aside extraneous and divisive issues, and attend to the principal task of providing the kind of foundation for education that a wealthy and enlightened democracy deserves. I ask unanimous consent, Mr. President, that the previously mentioned article from the Mineral Daily News be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Mineral Daily News of Keyser, W. Va.]

NATION FACES SHORTAGE OF QUALIFIED TEACHERS—RECORD CROP OF STUDENTS

(By David Smothers)

(EDITORS NOTE.—More schoolchildren than ever before are going back to their classes this week. In some areas, there will not be enough teachers or classrooms to accommodate them. United Press International made a spot check of key cities and questioned top education officials in Washington for this report on back-to-school week.)

With a record crop of 49.3 million students going back to school this month, the Nation faces a critical shortage of qualified teachers.

The key word in that statement is qualified and the authority for it is the Secretary of Health, Education, and Welfare, Abraham Ribicoff.

Most school administrators in cities covered by a United Press International survey said they had enough classrooms and enough teachers to take care of the children.

There were some glaring exceptions. New York City public schools had 6,000 teacher vacancies and all the city's schools were on double schedules. There was no teacher shortage reported in Chicago, but 31,000 children were on double shifts. Half-day sessions were scheduled for 10,000 of the 650,000 children in the Los Angeles public school system.

Many other cities reported they were doing fine. Dallas and Fort Worth had more applications for teaching jobs than they could fill. The reason was apparently simple. The two cities pay almost $600 a year more than the State minimum of $4,014 for teachers.

Cities which said they were well equipped to meet the school year also included St. Louis, San Francisco, Kansas City, Des Moines, Pittsburgh, and Columbus, Ohio.

In a statement to UPI, however, Ribicoff said "we as a nation face a critical shortage of qualified teachers this year and in the years immediately ahead.

"The shortage of teachers will become greater as the nation builds more classrooms to reduce overcrowding.

"The estimated school population gain of about a million pupils a year for the next 10 years also will require added thousands of teachers.

"The quality of teachers counts along with the quantity. For a number of years, there have been between 90,000 and 100,000 teachers who do not meet the State requirements for regular certification."

The mounting nationwide school roll, as reported by the U.S. Office of Education, reflects some of the reason for Ribicoff's concern.

In school this year are an estimated 34.2 million elementary school students, 10.8 million high school pupils, and 4.3 million collegians.

In 1951 there were 23.9 students in elementary schools, 6.5 million in high schools, and 2.3 million in colleges and universities.

In 1941, the breakdown was 20.4 million for elementary schools, 6.9 million for secondary schools, and 1.4 million in institutions of higher learning.

The Office of Education also reported that a total of 1,684,000 teachers will be needed in elementary and secondary schools this fall. Yet, the teacher total for such schools last year was 1,636,000.

Last January, the Nation's public schools had 1,338,560 classrooms for its students. That, the education offices figures, is 142,000 less classrooms than are needed.

From his vantage point, Ribicoff said teacher shortages in the 1961–62 school year will be felt most in the elementary schools.

An increasing number of newly trained teachers are going into the high schools, Ribicoff said, even though "the schools require eight elementary teachers to every five high school teachers."

In the high schools, Ribicoff said, "the demand will exceed supply for teachers of mathematics, English, foreign languages, general science, physics, and chemistry."

The Secretary added "if schools and colleges are to compete with other professions for professionally qualified personnel, higher salaries must be paid."

Ribicoff was asked whether well-heeled districts are hiring teachers from districts which can't afford high salaries.

"Yes," he said. "Many teachers go to the communities with the higher salary scales."

The Nation's largest city appeared to have one of the biggest classroom headaches.

Officials said there was no telling when New York schools would be able to stop their practice of overlapping or double schedules. Some classes in New York start before 8:30 a.m. and others don't let out until after 4 p.m. In the lower grades there is "short time"—4 hours of classes instead of the regular 5.

While New York's school troubles mounted, attendance in the classrooms passed the million mark for the first time in the city's history.

Minneapolis-St. Paul also was hard up for teachers. The Minneapolis schools reported they were short 50 to 55 elementary schoolteachers and would have to fill in with substitutes. Substitutes also were called in to take the place of 65 teachers in St. Paul.

Cities elsewhere struggled manfully to assure full-time education for their youngsters. Progress was being made, but it came slowly.

In Chicago, Assistant Schools Superintendent Dave Heffernan said he hoped all double shifts would be eliminated by January. But he couldn't be sure, even though 10 new schools are being opened in crowded Chicago neighborhoods. Heffernan explained population shifts could occur so quickly that new classroom jamups would follow.

Los Angeles opened 13 new schools and planned for 17 more next year. Still, school officials couldn't be sure when half-day schedules would be eliminated.

The Los Angeles school administrators pointed out that an estimated 27,000 more children will be in the city's schools this year than last. They called the increase about normal.

Mr. RANDOLPH. Mr. President, I strongly endorse what has been said by my colleague.

Frankly, I am distressed, I repeat, that the other body has not acted in concert with the Senate in facing, in greater degree, the need for the enactment of general education legislation for school construction and for the salaries of teachers.

I also wish to state for the record that those of us who now stand with the Senator from Oregon are strengthened in the knowledge that he is speaking for the national interest and striving for the welfare of the public, rather than a segment.

It is most important that in this instance we act with a view toward satisfying the overall needs of education and not just the fringe needs of a comparatively few districts. So I trust that the Senate will continue the program for 1 year only, rather than for two or possibly more years, as requested by one or more contemplated amendments for that purpose.

Mr. President, I state very frankly that I think the President of the United States should restate his position in regard to the desirability of having Congress act on the broader and more important phases of an educational program for all the public schoolchildren of the United States.

There is no implied criticism of the Chief Executive, though I say once again, as before, there is a need for him to speak out affirmatively on this subject so that he will be understood by all.

Mr. MORSE. Mr. President, needless to say, I am most pleased with the statement just made by the Senator from West Virginia. As usual, I am very proud of him. I want to say to the people of West Virginia from the floor today, that the senior Senator from West Virginia [Mr. RANDOLPH] serves as a colleague of mine on the Senate Subcommittee on Education, and, of course, on the full committee of the Senate on Labor and Public Welfare. Not a single time in our weeks of hearings and executive sessions and discussions of education matters has the Senator from West Virginia demonstrated any narrow, provincial interest. He has taken the position that as he votes for legislation which helps all the schoolchildren of America, he is voting for legislation that best serves the interests of West Virginia.

He comes from a State in which there are a good many impacted districts, as he knows. We have discussed this question together and we have discussed it in committee meetings. He put the question to me, "If I vote for it for 1 year, I cannot possibly do any damage to the school districts of my State, because they will be protected for 1 year, until we can get the facts. Is that correct?" I assured him it was correct. That is all he needed from me. All he needed was to be assured that no injustice would be done, and that at the same time we would not vote for a program opposed by the administration. I assured him that the administration wants to bring to us evidence which will justify some modification of the program next year.

The Senator from West Virginia has referred to the position of the President and the need to restate or reassure the country as to his stand on aid to education. I can assure the Senator from West Virginia that will happen time and time again in the not too distant future.

I had a long conference with the President last week. I heard him restate his position on education legislation. I heard him state the position that he very much wanted this legislation extended for only 1 year; and that he wants the whole matter reviewed in the next session of Congress.

I certainly hope that when Members of the House get back home during the recess period to talk to their constituents, they will recognize, as I believe the truth to be, that the parents of this country feel Congress ought to pass general education legislation. We should enact it in order to do justice to the schoolchildren who need to have it. We need to stop the injustice being done to every boy and girl in every nonimpacted school district who, because of a lack of money for good schools, will end up being disqualified for admission to college.

What a wrong, what a shameful thing, that we would do that to the most precious wealth we have, which is, after all, the boys and girls of this country. The whole destiny of America depends on the potential intellectual development of the young people of this country. We are not doing a good job of helping them. We have let this matter get bogged down with politics and bogged down with other forces, too. The public is confused. We must have faith. Once the public comes to understand how essential it is, both to the security and to the economic development of this country, that we have the program the Senator from West Virginia, the Senator from Montana, and our other colleagues on the committee are fighting for, I have no doubt as to what the political verdict will be.

Some men will stay home in 1962, and they ought to stay home in 1962 if sending them back here means they are going to participate in a policy which continues a rank injustice to the school children of this country.

We cannot possibly compete with Russia in the next quarter to half century if we continue our present failure to support the schools of this country with a general aid to education bill. Assistance should be given to private schools in a separate bill. If anybody has the slightest idea the senior Senator from Oregon could possibly have changed his mind, I repeat, assistance in a separate bill for public schools, and assistance in a separate bill for private schools, to the extent that the private schools can be helped within the framework of the constitutional restrictions as set forth in the first amendment.

I think there are three or four groups of Senators who are going to oppose the Hill-Morse bill for an extension of 1 year, and who will propose an extension for more than 1 year.

One group of Senators will be those who voted against S. 1021 because they are opposed to Federal aid to education, although they have watertight compartments in their brains with regard to this matter. They do not like to face up to the fact that, when we have spent $2 billion since 1950, under Public Laws 815 and 874, it is still Federal aid to education, no matter how hard they try to define it otherwise.

Then there is a second group of sincere men—I think they are mistaken men, but they are sincere—who just do not want any Federal aid to education at all, but who have many local political interest groups who wish to continue to receive the handout they now are getting under Public Laws 815 and 874. Such districts are on a rampage to get the present arrangement maintained for more than a year. Such Senators feel this will bring home the bacon. It will show what great Senators or Representatives they are. Forget about the national interest. Think about the local interest.

As everybody knows, I completely disagree with that approach. I think we

ought to extend the law for one year, and then get on with the job of passing a general education bill.

I think when the President continues to make clear, as I am satisfied he will, and when the President next year makes perfectly clear that he has not changed his views with reference to the importance of needed aid to education, there will be a change of attitude in the House and we will get a bill passed. Or, if we do not, after 1962 there will be some new faces in the House—and I am not so sure but what that would be a good thing.

There is a third group who really, and honestly do not think it makes much difference whether the law is extended for 1, 2, 3, or 4 years; that we still have the job of passing a Federal aid to education bill, anyhow, and the two measures are separable. I wish I could agree. I think the issues are so intertwined that we could not possibly separate the issues. If there is a 2 or 3 or 4 year extension, in my judgment we shall have killed the chances of passing a general aid to education bill in the House in 1962.

I think that is the political reality of the situation. Therefore, I cannot support the third point of view.

Then there is a fourth class of Senators who I think would not be very happy to see some of the school districts investigated by the Comptroller General or by the Department of Health, Education, and Welfare. I think the section of S. 1021 which calls for that investigation bothers those Senators very much. We may lose some of those votes.

Mr. President, I have observed many times in my 17 years in the Senate when the Senate was of one point of view until the facts were in, and until the record was made. Then a shift occurred. Very frequently the shift has occurred after there had been a public evaluation of the facts.

I am very hopeful that the debate we shall have in the next few days on this matter will build up public support for a 1-year extension and public support for a general aid to education bill in the next session of Congress, next January.

Mr. President, to document my point that there are child impacted areas whose needs are greater than some of the areas receiving Federal aid money under the impacted areas laws, I had a memorandum on this point prepared by the Office of Education, and I ask unanimous consent that the memorandum be printed in the RECORD at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

OFFICE OF EDUCATION MEMORANDUM

As requested by Ralph Flynt, we have compared several districts that have received Public Law 815 funds with several of equal or greater need that have not received such funds.

As you know, Public Law 815 is intended to assist construction in school districts where the need for construction, or part of it, is attributable to Federal activities. The funds serve in lieu of taxes. There are other districts with similar construction needs which are not reached by Public Law 815 because they do not have the growth in federally connected children necessary for participation under Public Law 815. Several examples follow:

In Oregon, the State does not grant funds for school construction. Public Law 815 funds ($93,536) have gone to Tillamook 9 School District (Tillamook), but none have gone to the Hood River County Unit School District. Yet in many ways they are similar. Tillamook had a weighted attendance of 2,119.9 and Hood River one of 2,108.1 in the 1958–59 apportionments. Tillamook had a true cash value of taxable property of $36.8 million in 1958–59 apportionments, and Hood River had $29.4 million. The classroom shortage in the fall of 1960 was 29 rooms in Tillamook and 21 rooms in Hood River. There may be some variation in the distribution of Federal forest reserve fees to the two districts; this we cannot check with the data available.

In Florida there are substantial State contributions to school construction; however, the local districts must provide part of the cost. Dade County, which has received Public Law 815 funds ($1,492,342 reserved for Dade during fiscal years 1951 through 1960) may be compared with Manatee and Osceola Counties, neither of which has received such funds during this same period. All three counties are growth areas. In Florida the taxpaying ability of each county is determined as a percent of the total taxpaying ability in the State. The enrollment and the classroom shortage are much larger in Dade County than in the other two counties; however, when the classroom shortages are set against the taxpaying ability, Manatee and Osceola have much less taxpaying ability per classroom short in fall 1960 than does Dade County. The same holds true for taxpaying ability per pupil in attendance.

In New Hampshire, Portsmouth has had $494,517 reserved under Public Law 815 during fiscal years 1951 through 1960; Laconia has not received any such funds. The equalized valuation (as of 1958) in Portsmouth was $108 million, or $10.8 million for each of the 10 classrooms short in the fall of 1960. The equalized valuation in Laconia was $63 million, or $2.4 million for each of the 26 classrooms short in the fall of 1960. The equalized valuation per pupil in membership is similar in the two school districts—$29,000 in Portsmouth and $32,000 in Laconia.

Mr. MORSE. I wish to read a paragraph or two:

As requested by Ralph Flynt—

That is Dr. Flynt, of the Office of Education—

As requested by Ralph Flynt, we have compared several districts that have received Public Law 815 funds with several of equal or greater need that have not received such funds.

As you know, Public Law 815 is intended to assist construction in school districts where the need for construction, or part of it, is attributable to Federal activities. The funds serve in lieu of taxes. There are other districts with similar construction needs which are not reached by Public Law 815 because they do not have the growth in federally connected children necessary for participation under Public Law 815. Several examples follow.

One is cited in my own State:

In Oregon, the State does not grant funds for school construction. Public Law 815 funds ($93,536) have gone to Tillamook 9 School District (Tillamook), but none have gone to the Hood River County Unit School District. Yet in many ways they are similar. Tillamook had a weighted attendance of 2,119.9 and Hood River one of 2,108.1 in the 1958–59 apportionments. Tillamook had a true cash value of taxable property of $36.8 million in the 1958–59 apportionments, and Hood River had $29.4 million. The classroom shortage in the fall of 1960 was 29 rooms in Tillamook and 21 rooms in Hood River. There may be some variation in the distribution of Federal forest reserve fees to the two districts; this we cannot check with the data available.

Mr. President, those are two school districts of approximately equal status; the one received $93,536 and the other did not receive a cent.

These are the injustices and inequities about which I am talking. Facts such as I have presented give all the proof Senators ought to need for them to want a study of these programs. Then next year, after we get the facts, we can decide what, if any, remedial legislation ought to be passed based upon the facts.

The memorandum goes on to discuss similar situations in Florida, New Hampshire, and elsewhere. I have put the entire memorandum in the RECORD, and it will speak for itself.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point table 125, which can be found on page 1319 of part 2 of the hearings before the Education Subcommittee of the Senate Committee on Labor and Public Welfare entitled "Public School Assistance Act of 1961."

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 125.—*Number and percent of eligible applicants in fiscal year 1959 by proportion of Federal payments (Public Law 874) to total current expenditures of the applicant district*

Percent Federal payments (Public Law 874) of total current expenditures	Number of districts	Percent of districts
Total	3,761	100
Less than 5 percent	2,365	62.9
5 to 9 percent	734	19.5
10 to 14 percent	279	7.4
15 to 19 percent	140	3.7
20 to 24 percent	58	1.5
25 to 29 percent	55	1.5
30 to 39 percent	58	1.5
40 to 49 percent	28	.75
50 to 59 percent	19	.5
60 to 69 percent	13	.4
70 to 79 percent	6	.2
80 to 89 percent	2	.05
90 to 100 percent	4	.1

Mr. MORSE. Mr. President, the table shows that 62.9 percent of all eligible school districts under Public Law 874—that is to say, 2,365 of the 3,761 school districts eligible in 1959—received less than 5 percent of their school budgets from Federal funds.

I wish to repeat that, Mr. President: 2,465 of the 3,761 school districts eligible in 1959 received less than 5 percent of their school budgets from Federal funds.

When I listen to some of my colleagues out in the cloakroom I hear the argument that if we do not extend these laws immediately, and if we do not extend them at least 2 years, we shall do irreparable damage to thousands of school districts in the country.

That is not so. The facts do not bear it out. The facts show that 2,365 out of the 3,761 school districts eligible

under this program received less than 5 percent of their school budgets from the Federal Government. Perhaps some of those districts even get money to which they are not fully entitled.

Only 25 school districts of the 3,761 received 60 percent or more of their budgets from Public Law 874 funds. We do not have to worry about those. I will tell Senators what type of district that is. This is the district in which there is an atomic plant, in which there is a great military installation, in which there is no question about the fact that the area is overwhelmingly federally impacted. It is not a case of some surgical supply company selling some surgical goods to some Federal office. It is not a case of some little company making adhesive tape or stationery to sell to some Federal agency.

We do not have to worry about the areas which are really impacted. We can observe those with our own eyes. Those areas are not guilty of abuses.

Mr. President, the 25 school districts which receive 60 percent or more of their budgets from Public Law 874 funds are only seven-tenths of 1 percent of the school districts eligible. They are only seven-tenths of 1 percent.

I am always interested in observing how some idea catches hold in the Senate. There is a wave of support which goes through this body, with the statement, "Something has to be done right now. If we do not do it, these school districts will be closing down. They will not be able to serve the children."

One can get a lot of votes with that kind of "scare" argument. I think there has been a lot of that kind of talk in connection with this issue.

Then, when one goes after the facts, one finds there simply is no basis for those fears at all. There is no basis for them.

In fact, if Congress adjourned or recessed and we all went home and came back in January, judging from information I have received from the Federal agencies concerned, there is not a school district which would not be able to go right on functioning, based on the expectation, of course, that when Congress returned it would take up the hardship cases.

The idea of trying to make a great emergency out of this question may be a nice vote-getting technique and device in the Senate, but the facts do not support those who are using that scarecrow argument.

All I seek to do is to persuade Senators to take a look at a few of the facts. I should like to hear their answers to them. With only 25 school districts of the 3,761 receiving 60 percent or more of the budgets from Public Law 874 funds, we find that the number is but seven-tenths of 1 percent of the school districts eligible. These are figures, I submit, which should cause us to pause before we extend indiscriminately the continuance of the program without further review. We need to be careful and we need to know the facts so that we can legislate intelligently.

I ask Senators therefore to support the committee by extending the current program for only 1 year in order that we can attempt to get a full and detailed picture of the situation next session. It would be more preferable had the other body agreed with us on the report and study which we wrote into title II of S. 1021. Since, however, it does not appear that this will be done prior to adjournment this fall, I plead with Senators not to extend this legislation for more than June 30 next.

By holding the extension to 1 year, we assure that consideration can be given in the 2d session of the 87th Congress. If a longer extension is voted, all of us know in our hearts that the probabilities are that the matter will be delayed until 1963 at the earliest.

In conclusion, I should like to discuss one other, and to my mind compelling, point. There are many school districts in the Nation which do not receive aid in the form of Public Laws 874 and 815 funds. Yet in case after case these districts are impacted with children, as I have already pointed out. Their schools are overcrowded, or obsolete, and in some instances shockingly so. Hine Junior High School some 10 blocks from this Chamber would repay a visit by Senators who would like to have a firsthand view of shockingly inadequate school facilities.

If only half of the amendments that I have heard about in the cloakrooms are offered, we shall have many amendments. I see the Senator from Pennsylvania [Mr. CLARK] a member of my committee, sitting in the rear of the Chamber. I wish now to announce that if amendments to the bill start pouring in, I have one. I have not had an opportunity yet to talk to my committee members but I shall offer an amendment that really would help to meet the needs of a very deserving federally impacted area in the United States. It is the District of Columbia. The District of Columbia has no Senators or Representatives. Its citizens are second-class citizens. They cannot vote and have no political power. No pressure will do any good, for there is no Senator from the District of Columbia. But the citizens of the District of Columbia have a need.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. CLARK. The Senator will recall that when the public school bill was before the Senate earlier this session, the Senator from Oregon joined with me in sponsoring an amendment, which we were successful in having agreed to by the Senate, which would increase substantially, but only equitably, the appropriation authorized for the District of Columbia.

The money was badly needed then; it is just as badly needed now. I am happy to have heard my friend indicate his intention to offer such an amendment, and I shall be happy to join him.

Mr. MORSE. I believe that the people of the District of Columbia know they have not a better friend in the Senate than the Senator from Pennsylvania [Mr. CLARK]. Time and time again the Senator from Pennsylvania has tried to help the voteless citizens of the District of Columbia by offering amendments to various pieces of proposed legislation. The other day he was of great help to me when the District revenue bill was under consideration. I added my amendment at that time and it went through the Senate. But I understand we are not even to be allowed to go to conference on the measure. It will not even be considered. If I can have the amendment added to the pending bill, I shall do so. I shall offer it as an amendment to every bill to which I can add it. Because if there is any area in the United States that can justify some assistance by reason of being a federally impacted area, it is the District of Columbia.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. CLARK. I wonder if the Senator shares my view—I am quite sure that he does, and since I came recently to the Senate Chamber, it may be that he has already made a statement in this connection in the course of his speech in support of the pending bill that if we are unable to hold the proposed federally impacted area extension and the proposed NDEA extension to 1 year, we really would be better off without any bill?

Mr. MORSE. I think it would be much better to have no bill at all. I said before the Senator came into the Chamber that no school district would be required to close down if it did not receive the aid. It will be difficult for a few, but they will continue to operate. They will know that next January the issue will again be before Congress in a general education bill, and citizens in the intervening months will be able to do the kind of pressure job that needs to be done.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. CLARK. Does not the Senator believe that President Kennedy and his advisers, including Secretary Ribicoff made a pretty good case before us early in the year to the effect that there were substantial abuses in the present administration of impacted areas which deserve very careful study and a continuation of the impacted areas program should be for a relatively brief period so that the whole subject could be considered next year?

Mr. MORSE. Yes. That is the burden of the first speech that I made. The Senator will notice that I stressed the word "first." I have a series of lectures on this subject. The first lecture deals with the question of impacted areas under Public Laws 815 and 874. I have brought forth some of the evidence showing certain abuses which have developed from the present language and the administration of those two laws. I have also brought out that Senate bill 1021, which we passed, provides for a study by the Commissioner of Education and his associates, with a report to Congress at the end of 18 months—and the Comptroller General's Office undoubtedly will continue its investigation—of the type of horrible example, so to speak, of abuse and misuse of the law which I brought out in my speech earlier today.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. CLARK. A few moments ago the Senator made reference to the fact that the other body had refused to go to conference on a measure affecting the District of Columbia. Is it not also true that the other body has refused to go to conference on the public school bill which the Senate passed?

Mr. MORSE. The House of Representatives has not even been willing to allow the Members of that body to come to a vote on S. 1021. Why? Because I fear majority rule does not always prevail in that body. Minority rule may prevail.

The time has come, I believe, to use the education issue to get the American people to understand how their legislative substantive rights can be denied to them by the House of Representatives. The House has not corrected what I feel to be a great parliamentary procedural abuse; namely, that there is left to a small number of men who occupy positions on the Committee on Rules the power to determine what proposed legislation shall be voted on in the House.

The American people are at the sufferance of the Rules Committee. It is about time to put the Rules Committee of the House at the sufferance of the American people.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. CLARK. I am sure that the Senator will agree with me that, on the whole, it is a wise thing that our rules contain provisions which restrict an entirely candid public expression of our secret views with respect to our proceedings and the proceedings of the other body.

I am certainly not one who wishes to violate that rule here. However, I am sure the Senator will agree with me that, regardless of what we may feel about some of the rules and other matters pertaining to the other body, those are rights which are given to them by their parliamentary procedure. In that connection, I wonder whether the Senator would not agree that we too have some rather peculiar institutions here in the Senate.

Mr. MORSE. Oh.

Mr. CLARK. I pause for appropriate reply.

Mr. MORSE. All I can do is exclaim.

Mr. CLARK. The Senator from Oregon is well aware of the fact that we have in the Senate the rule of unlimited debate. In fact, there have been occasions in the past when the Senator from Oregon has taken advantage of it.

Mr. MORSE. I believe in ironic justice.

Mr. CLARK. We are now developing a mutual thought which might end up with the conclusion that if the other body wishes to take advantage of a parliamentary privilege which they have under their own rules, and not go to conference on education bills, it may become necessary for Members of the Senate to take advantage of our own peculiar rules and not let any bill come from conference.

Mr. MORSE. Give me six men true and blue bound to have dinner together in Washington on Christmas Day, and that is exactly what will happen.

Mr. CLARK. I am sure the Senator, like Brutus, is a reasonable man, and does not want to exercise arbitrary powers.

Mr. MORSE. Never.

Mr. CLARK. The Senator might have the view that if the reasonable compromise suggestion, that we extend the impacted area bill for 1 year and the NDEA for 1 year should be rejected, it might just be necessary to take certain measures which we might possibly regret but which would be entirely within the privileges of the Senator.

Mr. MORSE. Yes; we would regret taking them. But, let me say to the Senator from Pennsylvania, in my opinion, the schoolboys and schoolgirls across America are worth whatever sacrifice we might make as participants in such a prolonged debate, or as I always call them, a filibuster. Perhaps through the educational process we may get some of our colleagues in the House fully to understand how they are denying to the boys and girls of this country the protection they ought to have through Federal aid to education. They are denying to the voters of this country a procedure whereby, being elected by the voters of this country, they will have to stand up to be counted in a vote on the issue itself. They should not be able to use the procedural escape exits provided by following a course of action which avoids voting on the substantive issue itself.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. CLARK. I see on the floor the distinguished Senator from Michigan [Mr. MCNAMARA], who has expressed the view privately, and perhaps publicly also, that we are making a very grave mistake in confining the pending measure to a mere extension of impacted area legislation and to an extension of NDEA. As I understand his view, he believes we should pass a comprehensive school bill and send it back to the other body and see whether they will persist in refusing to go to conference.

Mr. MORSE. I think we could do it if 10 men in the Senate would dedicate themselves to this issue for the next 3 months. I should think it would take about 3 weeks for the Senator from Michigan to read the material I see on the top of his desk.

Mr. CLARK. I close this colloquy with my friend from Oregon with the fervent hope that reasonable men will reach a reasonable solution of this matter and that it will not be necessary to stay in indefinite session in order to get the rock-bottom compromise from which those of us who want to do something for the boys and girls of America cannot well retreat. I express the hope that a majority of the Senate will agree with us in that regard. I am sure my friend from Oregon will agree.

Mr. MORSE. I agree completely. Let us consider the kind of compromise we are offering. It is the President's wish that we extend it for 1 year. We are offering a compromise which protects every school district in the country for a year. We are offering a compromise which guarantees the American people that they will get a report on the facts about any abuses and inequities and injustices.

Mr. CLARK. We are also protecting the scholarships.

Mr. MORSE. We are also protecting the scholarships. We are offering a compromise that continues the program of scholarships, as the Senator suggests. If we bring in NDEA as an amendment we do that. It does not happen to be in the Hill-Morse bill now before us, which deals only with Public Law 185 and Public Law 874.

I close by making a fleeting reference to NDEA. That subject will be my next major effort, at a later hour. All jocularity aside—we have been having a little fun, although we have been in earnest too—I am in dead earnest in saying that we are offering a program which gives protection to every legitimate interest concerned. We cannot justify extending this program beyond another year when we do not have the facts we need, and when we know that the administration can get for us the full facts.

I do not want to seem to be partisan, but I say quite frankly that I do not think my party and the Senator's party have been fair and decent to the President of the United States on this educational matter. I think the treatment the President has received in the House of Representatives on the education issue is unfair. It is treatment that cannot be reconciled with the Democratic Party's platform. The Democrats ought to help the President to keep his word.

The President of the United States in the historic campaign of 1960, in speech after speech, and in State after State, North, South, East, and West, stood up to this Federal aid-to-education issue courageously, as he does to all issues, and he made his pledge. He is asking the Senate now to extend this bill for 1 year until he can have this whole matter reviewed next year. There is such a thing as party responsibility.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. CLARK. Is it not as clear as a bell to the Senator that if we extend these two acts for 1 year, and for 1 year only, we will be helping the President of the United States keep his pledge next year; whereas if we extend it for 2 years we will do serious and perhaps irreparable harm to his ability to put his program across next year?

Mr. MORSE. That is my judgment. I do not want to let the Republicans off the hook. I also think that the Republicans have an obligation to the boys and girls that I have been talking about. As the Senator knows, we have received magnificent assistance from some great Republicans in our fight for educational legislation. I express my appreciation to them. However, we happen to be the majority party. As the majority party we have the responsibility to carry out our pledges. Here is a pledge our President has made. We were behind him in the campaign, and we urged his election. I do not know how many votes the

President received for his position on education. However, let me tell Senators—and I did not know we were going to get into this discussion—that the President's opponents took the position that he was in favor only of school construction. The President said, "I am in favor of school construction and teachers' salaries too."

In my judgment, it resulted in thousands of votes for the President in State after State, because I believe it will be found that a majority of the American people, if a national referendum were held on this question, would vote for a bill such as S. 1021, which covers both salaries and construction.

Mr. President, I return to comments on the District of Columbia. The District receives no Public Law 874 funds. I hope that it will, but it does not now, and has not for the past 11 years of the program. Hine School is a firetrap. I have warned about it before. It has already had one fire which, but for the grace of the Almighty, could have resulted in a terrible tragedy for parents in the District.

Many other such schools in the nonfederally impacted school districts need and deserve support. Many of the 63 percent of the schools now getting Public Law 874 aid could have more assistance under a general aid bill than they now receive. We ought not discriminate against two-thirds of our public school children by denying the financial assistance which could be brought to their schools by a general aid law. We ought to treat these children, their teachers and their parents more fairly. But, by evading the issue through passage of an extension of the present laws for 2 years or more, we will not do our duty as it should be done. We will continue to countenance the overcrowded classrooms, the half-day classes and the makeshift quarters characteristic of far too many of our schools.

Mr. President, the Wall Street Journal has published two exceptional articles which bear upon the subject of my speech today. One was published on June 8, 1961; the other, on September 11, 1961. I ask unanimous consent that they be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, June 8, 1961]

TROUBLED CITIES—THEIR DEFICITS GROW AS THEY TRY TO MEET DEMANDS FOR SERVICES—OAK PARK, MICH., POLICEMEN FIGHT FIRES; BOSTON FRETS OVER IT'S DOWNTOWN NEEDS—MORE HELP FROM UNCLE SAM?

(By Mitchell Gordon)

In Milwaukee, home owners with even house numbers caught watering their lawns on odd-numbered days may be fined up to $50 or tossed in jail for 30 days; although the city sits on Lake Michigan, the sprinkling restriction has been law for 7 years because Milwaukee's waterpumping capacity hasn't kept pace with demand.

In Los Angeles, municipal officials talk of compelling residents to sort their refuse—a special depository for cans and other metal waste and another for garbage and combustibles—to make it worth more to scavengers.

And in Oak Park, Mich., and Sunnyvale, Calif., new municipal servants are now on the payroll. They are known as "public safety officers" and they perform the duties ordinarily divided between policemen and firemen.

All these cases illustrate the struggle of U.S. cities to cope with the growing demands made on them for broader and better services. In major metropolises and crossroads hamlets around the country, municipal taxes are going up these days—but not fast enough to keep deficits from rising too.

Municipal finance officers, the men who must find ways to meet the cities' bills, are pessimistic about their chances of solving by themselves such problems as water shortages, stream pollution, overcrowded schools, inadequate roads, deteriorating downtown areas, debt-ridden transit facilities and relentlessly climbing costs. Nearly all city finance men contend that State and Federal Governments are going to have to step in increasingly to help ease the cities' worsening predicament.

PHILADELPHIA'S NEEDS

"We've just taken a look at our basic requirements for the next 20 years," declares Richard J. McConnell, finance director of Philadelphia. "We figure the cost of keeping Philadelphia livable through that period will run close to $3.5 billion. We'll be lucky to raise $1 billion of that from our own resources (including debt) and we have an income tax, which most cities don't have. At our present revenue rate, it would take us 37 years to raise the money we're going to have to spend in a little more than half that time."

Adds towering Wendall R. Bailey, finance director for Miami: "There's not a hope in the world that we can meet our financial needs in the coming decade from our own resources as they stand now."

John F. Clark, executive director of the Municipal Finance Officers Association in Chicago, believes that "considering the urban problems ahead of us, the city budgets of today are going to look absolutely delightful against those of 5 to 10 years hence."

Even today, however, most cities are having a hard time making ends meet. In the fiscal year ended June 30, 1960, expenditures of local governments totaled $33 billion, the U.S. Census Bureau estimates. In the same period, these local governments received, from taxes and special charges revenues of just under $18 billion, leaving a gap of $15 billion. Borrowing, in the form of general obligation municipal bonds, made up part of the deficit but most of it—more than $9 billion—was accounted for by State and Federal handouts. Ten years earlier, in the fiscal year ended in June, 1950, local governments spent $14.8 billion and took in $8 billion from taxes and special charges—a gap of $6.8 billion.

OPPOSITION TO TAX BOOSTS

City officials say they are meeting firmer opposition in their efforts to raise property taxes, which provide about 70 percent of municipal revenues and are by far the single most important source of funds. Some cities are attempting to boost these taxes circuitously, by reassessing properties at higher than their current valuations. For example, Memphis, Tenn., is getting set to spend $750,000 for its first property reassessment in 30 years. Memphis is aiming to raise by at least 25 percent the $17 million it collects from its property tax at present.

Other sources of funds are not being overlooked. Philadelphia, which increased its income tax rate in January by one-eighth of a percentage point to 1.625 percent, reports extensive contact from other cities seeking information on this tax. Philadelphia expects its rate boost to bring in an additional $5.5 million this year, giving the city $78 million in revenues from this source. Philadelphia has had this tax in effect off and on for 23 years. In addition to Pennsylvania, six States permit certain municipalities to levy income taxes; they are Alabama, Kentucky, Minnesota, Missouri, New York and Ohio, although in New York and Ohio the authority is not yet exercised.

However much existing taxes are raised and new sources tapped, municipal finance men believe local debt will continue to rise. According to the U.S. Census Bureau, the Nation's cities expanded their outstanding long-term debt from less than $16 billion on June 30, 1955, to more than $22 billion 4 years later and the total is said to have risen since, though a more recent tally has not been made. In the fiscal year ended June 30, 1959, cities for the first time spent more on interest charges than they did on fire protection; the interest outlay was $963 million.

DEMAND FOR SERVICES

Such statistics and the gloomy fiscal prospects most cities face, municipal officials say, are doing nothing to deter the public from constantly demanding new governmental services and improvement in older ones. New York City, which is more financially hard pressed than many cities, is spending $400,000 in its current fiscal year to provide child care stations where "needy" mothers can deposit their children for the day free of charge so the mothers can work. Complains a New York City official: "They got used to it during World War II, when we started it, and now they won't let us cut it out."

Evanston, Ill., talks of constructing a municipal ice skating rink which could be turned into tennis courts in the summer. Birmingham, Ala., wants botanical gardens and may get them, with the operating cost estimated at more than $50,000 a year. Birmingham recently finished air conditioning its municipal auditorium and the city not long ago began operating an art museum.

The problems bothering most cities are far more basic, however. Downtown rehabilitation, for example, looms as a large undertaking for many cities. John T. Leonard, Boston's budget director, notes that "the average building in downtown Boston is 75 to 100 years old. Our downtown streets are winding cowpaths. Traffic is so chaotic that the expressway we only recently opened is already filled to capacity at the rush hour. It could cost us as much as $2 billion to cope with our downtown problem and then it would take us 10 years to start showing any improvement."

But most authorities on municipal problems agree that downtown rehabilitation is necessary for the survival of big cities. Congestion and decay of cities' cores already have prompted some businesses to move their office staffs to less crowded suburban areas. If this trend should continue unchecked, it could bring about a loss of tax revenues and consequent lessening of the cities' ability to finance improvements.

AID FROM UNCLE SAM

Federal urban redevelopment programs assist cities in acquiring land for redevelopment and in constructing low-cost housing. But it doesn't make much sense, city finance men argue, to breathe new life into downtown districts without improving their accessibility and parking. In many large cities, expressways linking downtown and outlying areas have been built with Federal aid, but often these big roads add to cities' troubles by encouraging use of cars and dumping more traffic into central districts.

Municipal officials believe the parking problem will become much greater in the years just ahead. Chester Kowal, controller for Buffalo, N.Y., says: "We're going to have to require the provision of parking space in every large new building, but cities are going to lose downtown businessmen with that requirement unless they're prepared to help out on the parking problem in some way." Buffalo's answer, as is that of most cities, is

municipally owned facilities, though Buffalo's own three $2-million downtown garages are operated by a businessmen's cooperative whose fees are designed only to cover operating costs and return construction costs to the city.

Even more serious to some officials is the problem of mass transit. Injection of Government funds appears to be the only way of making fares on mass conveyances low enough to attract downtown workers and shoppers from their private cars. For Philadelphia, this means subsidies to a so-called Passenger Service Improvement Corp., whose 1961 budget of $1.5 million—three times the 1960 figure—is being used to help two commuter railroads keep fares down. For New York City, it means buying new cars for the city's subways out of local tax funds because fares on the publicly owned facility aren't adequate to meet expansion or replacement needs.

FEDERAL TRANSIT HELP

As the cities' mass transit troubles grow, the Kennedy administration is moving to set up a $150 million low-interest fund for loans in this field. However, at least 11 cities say they stand in need of the aid. Divided evenly, the administration's sum would come to less than $14 million a city—or only 5 percent of what Los Angeles alone figures it needs just to start an attack on the problem.

Water is an immediate worry for many cities. Amarillo, Tex., for instance, figures it's going to have to float $42 million worth of bonds, twice its total present debt, in the next 15 years to tap water resources 55 miles away. The city now has to reach no more than 14 miles for water, but present sources are considered inadequate for foreseeable demands.

The growing pollution of streams, rivers and other water sources is compounding this problem. Sioux City, Iowa, which has already had one extension from a Federal court on an order to quit dumping its sewage into the Floyd River, is faced with the expenditure of $7.5 million for a sewage treatment plant, though it has yet to sell the first of a series of bonds to get the project under way. Rainey P. Pope, finance director of Burlington, N.C., recalls that the Haw River "used to be a good fishing stream 10 or 15 years ago" but that it became badly polluted from raw sewage dumped into it by cities along its route. In 1955, North Carolina passed a law ordering cities to quit this practice and last fall Burlington put into operation a $2 million treatment plant.

Education's financial demands on the cities also are great. New York City, for example, is spending nearly 20 percent of its current budget on education; this is nearly twice what the city is putting into police and fire protection. In Birmingham, Ala., City Comptroller Sidney Grady Fullerton, Jr., calls schools "the real problem with us." Undoubtedly, many other city officials would share this refrain if their cities, like New York and Birmingham, ran their own schools. In most areas, separate school districts do so.

RESISTANCE TO BOND ISSUES

Municipal officials complain the education burden is getting to be more of a problem for them because taxpayers are growing increasingly antagonistic toward bond issues for new schools. Declares Dr. Thor W. Bruce, chief auditor for the board of education in St. Louis: "We've had a $16 million bond issue for new schools turned down three times by the voters despite the fact we're spending $140,000 a year in needless transportation costs for children who otherwise might be able to walk to school."

St. Louis and some other cities are stepping up experiments with temporary buildings as a way to avoid some construction; St. Louis has four wooden and four metal temporary structures under test at present.

Welfare costs put an additional strain on some municipal pocketbooks. In its current fiscal year, New York City has marked $245,821,345 for welfare services; this is more than 10 percent of the city's total budget of $2.3 billion.

As for police and fire protection, since 1946 outlays by local governments for these services have more than trebled; as of October 1960, policemen constituted 14.4 percent and firemen 9.6 percent of municipal employment.

The "public safety officer" system being tried in Oak Park and Sunnyvale as a means of saving money basically provides for fire trucks to be manned only by a single driver and for police squad cars equipped with axes and other basic firefighting apparatus and manned by policemen trained in firefighting to answer fire alarms. Because they are out on cruise, squad cars often can get to a fire faster than fire trucks anyway, advocates of the system say. Evanston, Ill., which has only partly adopted this system, figures it is saving $100,000 a year from the former practice of maintaining completely separate police and fire departments.

[From the Wall Street Journal, Sept. 11, 1961]

THE SCHOOLS IN 1961—THEY TRY MANY WAYS TO HANDLE ENROLLMENT RISE, CALLS TO IMPROVE—LOS ANGELES BUDGETS $800,000 EXTRA FOR SCIENCE STAFF—CHICAGO TURNS TO TV—DIRTY WINDOWS IN PITTSBURGH

(By Mitchell Gordon)

School enrollments are up again this month, posing new difficulties for systems already strained by rapid growth and under pressure to bolster the quality of their teaching. But educators are chipping away at their problems—and here and there signs of progress are evident.

This, in broad outline, is the picture sketched by local school administrators and other education authorities as pupils around the country troop back to classes after the summer vacation. According to the U.S. Office of Education, 45 million youngsters, from kindergarten through high school, are expected to register this term in public and private schools, an increase of 1.1 million over a year ago. Some local administrators say they continue to be short of qualified teachers; others report they lack adequate classroom facilities. Their efforts to handle additional pupils and remedy what they consider to be school system shortcomings are likely to mean higher school costs and in some instances bigger tax bills.

The tactics tried by school systems in attempts to alleviate their troubles are highly varied. Some systems are finding cheaper ways to build new schools or searching out places where operating costs can be trimmed; in Pittsburgh, for example, Superintendent Calvin E. Gross expects to save $50,000 a year by having school windows washed only 3 times annually instead of the 10 times customary in the past.

TELEVISION TEACHING

A number of cities are seeking to make better use of particularly talented or experienced teachers by permitting them to concentrate on lecturing to large groups of pupils and relieving them of routine clerical or supervisory chores. Television use is also being stepped up to bring top teachers to more students.

There is continuing public concern over the caliber of U.S. education, a concern that became especially acute after the Russians demonstrated their growing scientific capabilities with the orbiting of the first Sputnik in 1957. In response, some schools are laying even more stress on basic subjects such as science and mathematics and less on frills such as dating etiquette and social dancing. Among the students affected by this trend are the freshmen entering Los Angeles high schools today; beginning with their class, the high schools will require 170 class hours of science, a 20-hour increase from the old requirement. The change meant hiring 108 more high school teachers at a total annual expenditure of over $800,000.

Though concerned about strengthening curriculums, many school officials have their hands full simply scaring up desks and teachers for the steadily expanding army of students. The increase in school enrollments is a long-term affair. The 1961–62 school year is the 17th consecutive year in which enrollments have risen, and authorities expect the school population to swell by another 20 to 30 percent in the coming decade. This year's rise is especially sharp at the high school level, where the total enrollment has jumped 700,000 to 10,800,000.

CLASSROOMS NEEDED

Shortages of classrooms and teachers, stemming from increasing enrollments, have been reported by many school districts ever since World War II. According to the Office of Education, the Nation was short 142,000 classrooms at the start of this year, compared with a shortage of 132,400 a year earlier. The failure of Congress to pass a school construction aid bill dashed the hopes of communities relying on Federal assistance to help ease their classroom shortages.

Such major cities as New York, Chicago, and Los Angeles have been able to make little progress in reducing the number of children on split sessions, under which children in areas short of classrooms attend school in shifts. In fast-growing Los Angeles, School Supt. Ellis A. Jarvis figures he needs the equivalent of one new school a week throughout the school year to accommodate the 25,000 to 30,000 yearly enrollment increase; the actual building pace falls short of this rate.

Over 90,000 teachers are teaching on emergency credentials and lack the college training to qualify on a permanent basis, the Office of Education reports. A decade ago there were 75,000 teachers in this category. Some of the teachers who do not meet the letter of State and local requirements, however, may be excellent, well-educated instructors who simply have not taken specified education course.

CLIMBING COSTS

The increase in enrollments, coupled with inflation and a trend toward more elaborately equipped schools, will raise spending on elementary and secondary schools to over $17 billion during the current academic year, up from $16.5 billion a year ago and $6.5 billion in the 1950–51 school year. These figures include operating and construction costs. The average outlay per pupil was $390 in the school year that ended in June, compared with $259 in 1950–51.

In Pittsburgh, despite the window-washing cutback and other maintenance savings expected to total $200,000 a year, a lack of funds is likely to lead the school board to put into effect a new one-half of 1 percent tax on residents' earnings; this city already has a 1 percent tax on the earnings of both residents and nonresidents working in the city. Over the past 2 years St. Louis taxpayers have seen their school levy rise from $1.61 per $100 of assessed property value to $1.74. Denver's school enrollment has grown so rapidly—from 58,000 students in 1950–51 to 98,000 in 1960–61—that the system has had to seek special permission from the State Tax Commission almost every year since the end of World War II to boost its tax levies by more than the legal limit of 5 percent over the previous year's rate. "Fortunately, they've appreciated our need and haven't turned us down yet," says Supt. Kenneth E. Oberholtzer.

Rising school expenses and taxes are spurring the efforts to economize in school construction. Many school systems are specifying bare concrete block walls for interiors rather than plaster. Some are trimming building outlays by calling for 8-foot-high ceilings instead of 12-foot ceilings. The Los Angeles school system is using small, transportable buildings that can be moved from one area of the city to another as school populations change.

A COAL STOVE AND A WATER BUCKET

More than canceling out savings from tactics such as these, however, is the trend toward adding costly new instructional aids. "A classroom used to be nothing but a blackboard, a few benches, a coal stove, and a water bucket for the kids to take a drink," observes Dr. Shirley Cooper, associate executive secretary of the American Society of School Administrators. "Now we have a vast array of laboratory equipment, projectors, and recording devices, automobile and other mechanics workshops and even air conditioning in a few instances."

A standout example of an expensive new facility that more and more high schools are installing is the language laboratory. "Before the 1950's," says Virgil Volla, associate superintendent of Los Angeles city schools, "we didn't have language laboratories in the public schools. Today, in the electronic age, they come equipped with tape recorders, earphones, playback equipment, individual sound booths for each student and control equipment for the teacher. It's an enormous help for turning out linguists, but it's costly, too." Mr. Volla estimates the average language lab contains about $14,000 worth of equipment. Among the large cities whose school systems have added new language laboratories in recent months are Cleveland, Chicago, and Philadelphia.

To be sure, not all innovations please educators or taxpayers. Student parking spaces, for instance, irk Mr. Volla, of Los Angeles. "In 1950, we weren't providing parking space at our high schools even for teachers," he recalls. "Today we're having to provide 300 to 400 spaces at one of our new high schools for students alone, and, of course, we have to make provision for teachers as well. It not only adds to school site costs, but to upkeep as well."

TEAM TEACHING

Outlays for teacher salaries are rising along with building expenditures, but many school authorities say new instructional procedures are enabling communities to get more value for their educational salary dollar. The practice of using superior teachers to lecture to large groups and providing them with assistants for other chores, an arrangement known as team teaching, is one of the new methods which is spreading rapidly, especially at the high school level. Among the cities making use of the technique are Palo Alto, Calif., Golden, Colo., and Greenwich, Conn.

According to J. Lloyd Trump, associate secretary of the National Association of Secondary School Principals and an advocate of team teaching, a careful evaluation of the new teaching method at Ridgewood High School in Norridge, Ill., indicates "superior academic results at no increase in educational costs." Comments Dr. Ovid Parody, chief of secondary school instruction of the Office of Education: "The principle is the same as not using an engineer to change a radio tube."

In the traditional high school, one teacher—an English teacher, for example—would be assigned several classes of 30 or so pupils. The teacher would meet with each class every day and carry out all phases of teaching, from discussing the evolution of the English novel to taking attendance and correcting spelling errors in themes. The teacher would, in addition, handle extra chores, such as helping to supervise a cafeteria or study hall.

MASTER TEACHERS

Under the team concept, several staff members cooperate to teach a subject. A typical team is headed by a "master teacher," an outstanding teacher, often with a master's or doctor's degree, who is unusually adept at presenting a subject vividly and clearly and who receives higher pay than other team members. The master teacher's primary job is to lecture to groups of 100 or so students and perhaps to lead an occasional discussion group.

Most of the discussion groups and classroom drills, however, are guided by two to four assistant teachers who are part of the team. These lower ranking teachers also shoulder the bulk of the administrative chores. Rounding out a team is a clerk, who performs routine clerical tasks.

The use of television to utilize teaching talent more fully is taking an unusually big step forward this fall in the Chicago area. Starting today, schools there will receive a wide variety of educational programs broadcast as part of the Ford Foundation-backed Midwest program on airborne television instruction. The taped telecasts are beamed from a circling converted cargo plane whose signals can reach over 1 million elementary and high school students in 6 Midwest States. Among the courses offered are biology for high school students, music instruction for the first and second graders, sixth grade arithmetic and Spanish for grades three through six.

Mr. MORSE. Mr. President, the editorial page summary of the St. Louis Post-Dispatch for the week of August 28–September 3 included an editorial entitled "The President and the Schools," which has my hearty endorsement, except for its opposition to any kind of assistance for private schools. I ask unanimous consent to have it printed in the CONGRESSIONAL RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE PRESIDENT AND THE SCHOOLS

The administration went about as far as it could go to appease Congress on behalf of school legislation—and it lost. President Kennedy's prime objective was a $2,484 million program for teachers' pay and public school construction. This finally was reduced to a $324-million, 1-year emergency building program which Representative ADAM CLAYTON POWELL, JR., chairman of the Education Committee, called up under the Calendar Wednesday procedure. The bipartisan coalition killed it, 162 Republicans and 82 Democrats combining to cast 242 votes against it. There were only 169 in favor.

It is appalling that 242 Representatives should be so blind to the necessities of the schools, and to the future of the Nation which depends on its schools.

The President says, "We will be back next year." He should indeed renew the fight, and we hope his administration has learned a lesson from this one. Mr. Kennedy never really took the issue to the country. He relied on "inside work" with Members of Congress. The tactics did not succeed because many Members felt more pressure from the opponents of Federal aid to schools—including the pressure from Catholics who insisted on aid to parochial schools or aid to none—more than they felt pressure from the White House.

We hope the President next year will devote at least one major television address to the issue, explaining in clear detail why Federal aid is needed, why the Constitution and sound social policy forbids its extension to religious schools, why the bipartisan coalition which beat him this time must be beaten next time. Unless Mr. Kennedy engages himself personally and deeply in the contest he cannot expect to win.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter, a copy of which I have received, from Secretary of Health, Education, and Welfare Ribicoff to the Honorable WILLIAM F. DAWSON, chairman of the House Committee on Government Operations, dated July 21, 1961, commenting on the Comptroller General's report of June 12, 1961.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., July 21, 1961.

Hon. WILLIAM L. DAWSON,
Chairman, Committee on Government Operations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request of June 13, 1961, for our views and comments on the Comptroller General's report of June 12, 1961, entitled "Review of Regulations, Policies, and Practices Relating to Federal Grants for School Construction Under Section 305(a)(3), Public Law 815, 81st Congress, as amended, Office of Education, Department of Health, Education, and Welfare."

The principal findings of the report concern the policies, procedures, and practices of a division of the Office of Education during the years 1956 to 1958. They refer to the operations of the division of school assistance in federally affected areas, which permitted the approval of grants on evidence which, in the opinion of the Comptroller General, was not adequate to demonstrate that the school districts were in fact eligible to receive Federal grants for school construction under the provisions of subsection 305 (a) (3) of Public Law 815, as amended. This subsection of the law provides that school districts may be entitled to Federal financial assistance when "the estimated increase, since the base year in the number of children whose membership results directly from activities of the United States (carried on either directly or through a contractor)" equals or exceeds 10 percent of the average daily membership in the base year, i.e., the year preceding a 2-year increase period covered by an application. In addition, school districts applying for Federal assistance for school construction under this subsection are required to show that the financing of the construction of minimum school facilities for the increased number of such children, estimated to be in membership at the end of the 2-year increase period in question who would otherwise be without available school facilities, would place an undue financial burden on the taxing and borrowing authority of the applicant school district.

The principal recommendations made by Comptroller General are as follows: "If section 305(a)(3) of Public Law 815, as amended, is extended beyond June 30, 1961, we are recommending to the Commissioner of Education that, to provide adequate documentary evidence to support payments for school construction, the approval of applications from school districts for assistance be made only after there is submitted by the claimant adequate documentary proof of eligibility for a grant. We are recommending further (1) that there be established suitable criteria and procedure to be observed by the claimants in order to dem-

onstrate clearly that the estimated increase in school membership, that serves as a basis for the grant, is in fact the result of Federal activities and (2) that there be issued, and enforced, improved internal instructions for the guidance of SAFA in its operation of the grant program and in its review of each construction grant application. The criteria and instructions should include recognition of such factors as ratio of Federal business to non-Federal business, the substantial trend to suburbanization regardless of Federal activity, and the recency of employees inmigration to the school district.

"We are recommending also that, if suitable criteria for determining eligibility under the present law cannot be developed and if a grant program of this general type is to be continued beyond June 30, 1961, by the Congress, the Secretary of Health, Education, and Welfare consider giving assistance to the Congress by framing proposed legislation designed to facilitate development of an adequate showing by applicants that they are in fact eligible to receive Federal funds for school construction."

A preliminary draft of the subject report was submitted by the GAO to the Office of Education and this Department for comment on April 29, 1960. That draft contained substantially the same findings as does this subject report and contained similar recommendations. The then Commissioner of Education, Dr. L. C. Derthick, commented on the draft report under date of June 29, 1960. A copy of Dr. Derthick's comments is enclosed. In substance, his comments explained the difficulties experienced in the administration of this section of Public Law 815. He stated that in the light of experience and changes since the program was instituted, it would be desirable to require more adequate documentary evidence from applicant school districts that the estimated increase in school membership clearly results from Federal activities. To put this into effect Dr. Derthick indicated that the Office would thereafter require from applicants under this section more direct evidence of inmigration of parents as a condition for counting children in the increased membership claimed. This proposed change has been adopted and while experience with it is limited, it has had the general effect of reducing payments to eligible applicants under this section.

As to the other recommendations in the subject report, the administration recommended to the current session of Congress that this section of the law be permitted to expire June 30, 1961 (see sec. 302 of H.R. 4970). In justification of this recommendation we stated that grants for assistance for school construction for increased numbers of children whose parents move into a school district to work for Federal contractors in taxable enterprises cannot be justified on the basis of any direct or indirect loss of revenue resulting from the tax immunity of Federal property—the underlying rationale of other sections of the law.

However, the bill reported by the House Committee on Education and Labor (H.R. 7300) would extend this section of Public Law 815 for 3 additional years beyond June 20, 1961, without amendment. If this section of the law is thus extended, we will give careful consideration to the development of additional criteria for determining eligibility of applicant school districts along the lines recommended in the Comptroller General's report.

In concluding my comment, let me say that I recognize the need to reexamine the policies, procedures, and criteria for determining eligibility of applicant school districts if section 305(a)(3) of the law is extended. In my opinion, however, it is not fair to imply that the grants approved in the amount of $142.6 million to some 549 school districts in 34 States during the 10 years of this program are subject to serious question principally on the basis of the detailed examination of the documentation supporting the claim of one California school district for 1956 to 1958. The fact is that the requirements set by Congress for eligibility under this section of the statute are so broadly stated as to leave a wide area for discretion or judgment by the Commissioner in his determination of eligibility. While the report makes a strong case in support of the judgment of the GAO—that the policies, procedures, criteria, and documentation required in support of school district claims might well have been more precise, complete, and stringent—there is no ground for any implication that the determinations made by the Commissioner were not well within the intent of the Congress and the language of the statute itself.

Sincerely yours,

ABRAHAM RIBICOFF,
Secretary.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of a letter dated June 20, 1960, together with a report, from U.S. Commissioner of Education L. G. Derthick to Mr. R. S. Lindgren, of the General Accounting Office.

There being no objection, the letter and report were ordered to be printed in the RECORD, as follows:

JUNE 29, 1960.

Mr. R. S. LINDGREN,
Assistant Director, Civil Accounting and Auditing Division, U.S. General Accounting Office, Washington, D.C.

DEAR MR. LINDGREN: This will reply to your letter of April 29, 1960, enclosing copies of a draft report to the Congress on your "Review of Entitlements of School Districts for School Construction Assistance Because of Federal Activity, Office of Education, Department of Health, Education, and Welfare, February 1960." We appreciate your courtesy in affording us the opportunity to comment on the draft report, and our detailed comments are contained in the attachment hereto.

In summary, we feel that the procedures used by us in determining eligibility under subsection 305(a)(3) of Public Law 815 afforded proper protection of the Federal interest and were consonant with the intent of Congress. The report is based on a limited review of one school district and does not in our opinion establish a basis for the general finding that improper payments have been made under this subsection.

As requested in your letter, the draft report is also attached. Please let us know if we can be of further assistance.

Sincerely yours,

L. G. DERTHICK,
U.S. Commissioner of Education.

COMMENTS ON A DRAFT REPORT TO THE CONGRESS BY THE COMPTROLLER GENERAL ON A "REVIEW OF ENTITLEMENTS OF SCHOOL DISTRICTS FOR SCHOOL CONSTRUCTION ASSISTANCE BECAUSE OF FEDERAL ACTIVITY"

(Prepared by the Civil Accounting and Auditing Division of the General Accounting Office, February 1960)

PART I—SUGGESTED EDITORIAL CHANGES

We suggest the following changes in the wording of the draft:

1. Cover page and pages 1, 3, 10, and 11 delete "entitlements of" and substitute "grants to"; delete "entitlement(s)" and substitute "grant(s)."

2. Pages 1 and 4: Delete "had been or would be" and substitute "had been and/or would be."

3. Page 2: Delete "515 school districts" and substitute either "515 applications" or "405 school districts."

4. Page 5: In the first sentence add "and" after "or."

5. Page 5: Delete "for the fiscal year preceding the fiscal year in which its application is approved" and add "for the base year designated in the application."

(a) Delete "$970,087.50" and substitute "$970,987.50"

(b) Delete "1383" and substitute "1575."

(c) Delete "in average daily membership as of June 1956" and substitute "in average daily membership for the base year 1955–56."

(d) Delete "in average daily membership as of April 1958" and substitute "in actual membership as of April 1958."

PART II—GENERAL COMMENTS

Although the title of the draft report seems to imply a broad review of the determinations made as respects the maximum grants for financial assistance for school construction approved by the Office of Education for applicant school districts under the several provisions of Public Law 815, the report itself deals solely with a review of such determinations as respects one subsection of the law, namely subsection 305(a)(3), as amended, by Public Law 949 (84th Cong.), which authorizes such assistance on account of increases in school membership resulting from Federal activity carried on directly or through a contractor. We would suggest therefore that the title might properly be modified to read: "Review of the administration of subsection 305(a)(3) of Public Law 815 authorizing assistance for school construction because of increased enrollments resulting from Federal activity carried on directly or through a contractor."

Even this more restrictive title may be too broad. The draft report actually deals with a single aspect of the administration of only one subsection of a complicated statute. The aspect of subsection 305(a)(3) covered is that having to do with the determination of the estimated increase in the number of children in membership in schools of a local educational agency resulting from Federal activities carried on directly or through a contractor.

The report focuses "as an active example" on one school district in California which received assistance under subsection 305(a)(3) for the application period July 1, 1956 through June 30, 1958. The finding of the report respecting the determination made by this Office as to the increased number of children estimated to be in membership in this school district as a result of Federal contract activities for the increase period ending June 30, 1958, as compared with the number of such children in average daily membership in the school year 1955–56, is the central issue of the report. The report charges that there was inadequate proof required by this Office of a causal connection between the increase in the number of children claimed by the applicant school district and the Federal contract activities to which the increase was attributed.

From this finding of what is claimed to be inadequate proof of causal connection in the case of the California school district cited as an example, the generalization is made that adequate proof of causal connection was not required by the Office in the determination made for some 405 school districts involving some $136 million in Federal grants since the beginning of the program in 1950, and that in consequence question arises as to the propriety of some $136 million paid to these school districts. According to the report "officials of the Office" admitted that a

single method had been used to establish the Federal contract connection of the increase claimed by school districts applying for this category of assistance under the act since the beginning of the program. Accordingly, since this method was found to be inadequate in the case of the one school district presented "as an active example," the report concludes that it was inadequate in some 405 school districts involving some 515 applications over a period of 10 years.

Surely this is spreading a modicum of evidence over a very broad expanse of generalization.

The report states that the auditors examined 139 of some 458 reports from employers of the parents of children claimed by the school district as resulting from Federal contract activity. Some 26 of the 139 reports were singled out for attention in the report as to the adequacy of the evidence of Federal contract activity therein contained. Associated with these 26 reports in question were some 205 children claimed by the school district as an increase resulting from Federal contract activity. From the data presented in the report only one question can properly be raised—was the Office justified in accepting this increase of 205 children in membership as resulting from activities of the United States carried on directly or through a contractor?

These 205 children represented $126,382 of the $970,987 in total Federal grant approved by the Office for this school district, or some 13 percent of the total amount. Even assuming the validity of the auditor's finding as to the inadequacy of proof of causal connection in the case of these 205 children in this 1 applicant school district, representing 13 percent of the grant approved for that district, the inadequacy of the sample and the fact that during the 10 years of the program, which covered several other application periods during which a number of different provisions of the law affecting the administration of this category of Federal connection were in effect, make it difficult to understand why the full amount of $136 million in grants to 405 school districts made under this subsection for the 10 years of the program should be questioned when there is serious doubt of the propriety of any projection.

Thus, we do not feel that the limited evidence cited in the report is sufficient to warrant a generalization which questions the propriety of 13 percent of the $14.1 million in grants made during the 1956–58 application period. The evidence cited by the report as to inadequacy of proof of causal connection between the 205 children in this school district and Federal contract activity is predicated mainly on the auditor's interpretation of the meaning of the terms "resulting from" and "activities of the United States (carried on directly or through a contractor)." Although nowhere in the report is there a precise statement as to the type of proof which the auditors believe necessary to support a determination that an increase in school membership resulted from Federal contract activity, on page 7 of the report appears this general statement:

"In order to establish that 'school membership resulted' from activities of the United States carried on through a contractor, we believe there would need to be a showing of relationship between 'Federal activities' and the cause of the parents residing within the school district. This was not done, but would have been a logical procedure because an immediate cause of school membership is the pupil living within the geographical boundaries of the school district."

Again, on page 3 of the summary appears this paragraph:

"Section 305(a)(3) of the law authorizes assistance when school construction is needed because certain school membership has resulted from activities of the United States but the Office of Education granted assistance under this section of the law when the only proof of the effect of activities of the United States on school membership was statements from employers in communities that the employers sold something directly or indirectly to a Federal agency. No consideration was given to such factors as the nature of the products the employers sold to the Government, what proportion of total sales was to the Government, or whether the employers' sales or manufacturing were local to the school district or were carried on far away from the school district applying for assistance."

If we interpret the first quoted statement correctly it means that the auditors think that the Office should have required evidence to be presented by the applicant to show (1) that the parent of every child which entered school in the applicant's school district subsequent to the school year which constitutes the base year for determining estimated increases in school membership had moved into the school district after the base year, and (2) that the selection of this school district for residence purposes by the parent was in consequence of (or the result of) "activities of the United States carried on directly or through a contractor." Although item (1) above might seem logically to have been a necessary requirement it was not required by the Office for reasons to be indicated later in these comments. Item (2) above also seems at first glance to be logical. But upon further consideration it would appear to be administratively impracticable, in that it would have required the applicant to secure a statement over the parent's signature as to the parent's primary motivation in selecting the applicant school district for residence purposes. Even assuming that parents would have been willing to provide such statements and that they could have been accepted as reliable evidence of the parent's primary reason for inmigration the Office would then have logically been required to count for purposes of eligibility the child of every parent so certifying that his primary motive or reason for moving to the applicant school district was the desire, hope, or expectation of employment in activities of the United States carried on directly or through a contractor," and this would have been true whether or not such employment was in fact secured. We seriously doubt that this procedure would have elicited acceptable information from parents or have resulted in more adequate proof of causal connection between enrollment increases and Federal contract activity than the method actually used. We have little doubt that it would have been regarded by most parents as an unwarranted inquiry and intrusion by school officials into the parent's personal affairs.

Reverting to the question of why evidence was not required from applicant school districts that children counted as a Federal-contract-connected increase had moved into the school district subsequent to the base-year, it is freely admitted that this was administratively feasible and might well have been required, except during the first 2 years of the program when the act provided for a different concept for counting increases in school attendance for determining eligibility and payment. It was seriously considered when the law was first amended and extended by Public Law 246 in 1953. In retrospect and in the light of the criticism made in the draft report the requirement of such evidence of inmigration might have been a desirable additional element of proof of increase resulting from Federal contract activities.

However, the amendments made by Public Law 246 in 1953 provided as a new limitation for the subsection 305(a)(3) category, a Presidential finding that an applicant school district is located in a critical defense area and that a substantial inmigration of defense workers or military personnel into such an area was required to man the new or expanded defense plants or military installations.

Under the Presidential finding clause of subsection 305(a)(3), the President issued an Executive order dated March 31, 1954, directing the Office of Defense Mobilization to make recommendation to the Secretary of the Department of Health, Education, and Welfare, on the question of whether a new defense plant "has been or is to be established or an existing defense plant or installation is to be reactivated or its operations substantially expanded." The Secretary of the Department of Labor was also directed to make the finding as to whether substantial inmigration of defense workers or military personnel was required to carry out activities at such defense plant or installation. The findings of these two agencies were binding on the Secretary of Health, Education, and Welfare, who also was required to determine whether additional school facilities were required for the children of the inmigrant defense workers and military personnel and whether a particular applicant school district was in an area meeting these conditions.

After this order was issued there followed a series of intensive discussions with the Federal agencies setting up the procedures that would be followed by each in making and certifying these findings. This office developed, with assistance of the Office of General Counsel, the procedure by which a determination was made as to whether an applicant school district was in an area affected by a given plant it had listed.

It was felt that the findings required to be made by the ODM and the Department of Labor under Presidential delegation relating to plants having Federal defense contracts and requiring substantial inmigration of labor necessary to man expanded activities in such plants established the facts of inmigration because of Federal contract activities in the area.[1]

The procedure or method which continued to be used consisted essentially of requiring the applicant school district to conduct: (1) a pupil-parent survey or surveys for the purpose of identifying the place of employment of the parents of pupils enrolled in the schools of the district, (2) a survey or surveys of the places of employment indicated on the pupil-parent survey cards to identify those employers engaged in activities in fulfillment of a Federal contract or subcontract, (3) the number of children in membership in the applicant school district in the school year of application whose parents are employed by such employers, (4) the number of children in average daily membership in the base year whose parents had been employed by such employers in that year, and (5) attributing any increase in the number of children in item (3) over the number in item (4) to have resulted from Federal contract activities.

With the elimination from the law of the requirement under subsection 305(a)(3)

[1] It may be noted also that the same amending legislation introduced another limitation to the effect that the total increase in membership approved for a school district for all categories of federally connected children must be reduced to the extent that the estimated increase in nonfederally connected children in the same 2-year increase period fell short of 10 percent over the base year.

of a Presidential finding as respects the location of an applicant school district in a critical defense area made by Public Law 85–620 amendments (see new sec. 5(a)(3) of Public Law 85–620), it appears in retrospect that it might have been preferable to require that the applicant school district count under item (c) of the procedures outlined above only the number of children of parents entering the school district of residence subsequent to the base year. While this method of counting eligible children would in some respects provide more specificity and would tend to be more conservative than the method actually employed, we would not agree that the method adopted resulted in "improper payments."

Consequently, we plan hereafter in the processing of applications under this subsection of the law, to require from applicants additional and more direct evidence of inmigration of parents subsequent to the base year as a condition for counting children in the increase claimed for purposes of eligibility and/or payment.

Before concluding our comments, attention is directed briefly to the paragraph of the draft report quoted from page 3 of the summary of finding and recommendation. This paragraph summary, taken together with the discussion in the body of the report and notes 1 and 2 on the last page of the appendix, indicates that the GAO auditors are inclined to interpret "activities of the United States (carried on directly or through a contractor)" in such a way as to eliminate certain types of Federal contract activities whose effects on increased school enrollment they feel is rather tenuous and remote. It appears they would rule out procurement contracts (involving the sale of products or services to the Government) particularly if such contracts were entered into by a home office of the company and the items supplied were from a branch located in or near the applicant school district. They seem to feel that parents and children counted should only be in proportion to the number of a contractor's employees engaged in fulfilling a Federal contract, or alternatively in the proportion of the company's sales to the Government. They seem to feel that these and other limitations should have been spelled out in the instructions and requirements issued by the Office.

We have not had an opportunity as yet to reexamine with our field representative the data on file in the school district as respects the 26 examples listed in the appendix of companies claimed by the school district as having contracts or subcontracts for Federal activities. The audit report does not establish the grounds for a specific finding of ineligibility of the cited cases and in the absence of such we cannot conclude that we erred in judgment finding these cases eligible. We believe the statute intended the Commissioner to exercise his judgment broadly in the absence of precise criteria in the law, and we do not accept the conclusion of the report that a few borderline cases establish a basis for the generalization that "improper payments" have been made. Admittedly, judgments on individual cases would be expected to differ in view of the fact that the spectrum of eligibility is not sharply defined.

Instructions issued to our field representative[2] for this increase period included the following as respects section 305(a)(3): "You should examine the plants or installations which the applicant claims have contracts with the United States. You will be expected to satisfy yourself that the plants or installations involved actually have such contracts. You should then determine the estimated ADM for 1955–56 and the estimated membership for June 1958 of the children whose parents work in such plants or installations. Any increase other than the normal (3.5 percent annually) should be justified before being recommended."

We agree in the light of the criticisms made in the draft report that these instructions would have been improved had they been more specific as respects the procedure and evidence involved on the basis of which the field representative would be expected to satisfy himself that the plants or installations involved actually had Federal contracts.

Our experience in attempting to determine increases resulting from this category of Federal-contract-connection, both in Public Law 815 and in Public Law 874, has shown however that many plant officials are reluctant to reveal the existence of Federal contracts, or the nature of the contract, or the proportionate volume of business or employment generated by the contract. As a result of this reluctance (and frequent refusal) by employers to provide school officials or our field representatives with more detailed information concerning their Federal contract activities, we adopted the procedure previously indicated as being the most practical under all the circumstances considered.

In summary and conclusion then, the Office of Education and its Division of School Assistance in Federally Affected Areas were faced with a complicated and difficult administrative problem in the category of Federal connection with which the draft report deals. Administratively the problem was further complicated by four distinct and different legislative authorizations over the period of ten years. For 6 of those 10 years two other Federal agencies were given responsibility under Executive order for making the Presidential findings which affected eligibility and the amount of entitlement of applicants under this subsection of the act. These findings could not be questioned by this office.

Careful consideration was given by the office to various methods of carrying out its responsibilities under this subsection of the act with one aspect of which the report deals. We believe that the method employed provided reasonably adequate evidence for a determination that the estimated increase in the number of children approved as the basis for grants to school districts was in consequence of or resulted from Federal contract activities. However, in the light of the GAO criticism, we plan hereafter in the processing of applications under this subsection of the law, to require from applicants additional and more direct evidence of inmigration of parents subsequent to the base year as a condition for counting children in the increase claimed for purposes of eligibility and/or payment.

We do not believe that the broad generalization made on the basis of the findings reported for the one school district selected "as an active example" is justified. Even as applied to the 59 school districts and the $14.1 million approved for the 1956–58 increase period under the terms of the statute in effect at that time we believe the generalization would not be justified were all the applications for that period examined with respect to all of the factors involved in a determination of eligibility and amount of grant under this subsection of the law.

An indication of the care with which the Office of Education reviewed the applications submitted under this subsection of the law, and of the effectiveness of the procedures used is to be seen in the attached table summarizing the results of the processing of all such applications for the 1956–58 increase period. During that period 129 applications claiming eligibility under subsection 305(a)(3) were received from school districts. These 129 applications claimed an estimated 74,283 Federal-contract-connected children representing estimated total Federal grants of $43,368,700. After review by the Office of Education only 59 of these 129 applications were found to be eligible. These 59 eligible applicants had originally claimed 44,748 Federal-contract-connected children for a total of $25,798,819 in Federal funds. The processing procedures of the Office of Education reduced the number of children from the 44,748 claimed to 24,191 approved and thus reduced the Federal funds granted from $25,798,819 to $14,140,399. In other words in these 59 applications found eligible the Office of Education disapproved the claim of Federal-contract connection of 20,557 children which would otherwise have resulted in additional grants of $11.6 million in Federal funds.

It should be noted also that 70 of the 129 applications were determined to be ineligible and these ineligible applications had claimed 29,535 children to have Federal-contract connection representing Federal grants of $17.5 million.

It would appear from the facts cited above that the procedures employed by the Office of Education in determining the estimated increase in the number of Federal-contract-connected children resulted in a substantial reduction in the number of children and in the amount of grants under this subsection 305(a)(3) category. The major reason for determining school districts ineligible, as well as for reducing the number of children in those applications found eligible, was the elimination by the field representatives and the central office in the processing procedure of plants and children claimed for which evidence of Federal-contract activity and connection was not satisfactorily established.

Consequently we believe that substantial revision of the report and amendment of its finding and recommendation are in order.

Summary of information regarding all applications claiming payment for children under subsec. 305(a)(3) of Public Law 815, submitted by school districts for the 1956–58 increase period, number determined to be eligible and number determined to be ineligible

	Number	Amount of Federal funds [1]
A. Applications filed	129	
1. Children claimed for payment	74,283	$43,368,700
B. Applications found eligible	59	
1. Children claimed for payment	44,748	25,798,819
2. Children approved for payment	24,191	14,140,399
3. Children not approved for payment	20,557	11,658,420
C. Applications found ineligible (A—B)	70	
1. Children claimed but not approved for payment (A1—B1)	29,535	17,569,881
D. Total children claimed but not approved for payment (B3+C1)	50,092	29,228,301

[1] The figures in this column were obtained by multiplying the number of children shown by 45 percent of the approved average construction cost per pupil in the respective States which is the rate of payment authorized by Public Law 815 for children in subsec. 305(a)(3). It is also to be noted that only the Federal funds shown on line B2 were approved for payment. The remaining figures in this column represent claims made by applicants which were not approved.

[2] Field operations memo. No. 39, dated Aug. 31, 1956 (p. 10).

JULY 1, 1960.

Mr. R. S. LINDGREN,
Assistant Director, Civil Accounting and Auditing Division, U.S. General Accounting Office, Washington, D.C.

DEAR MR. LINDGREN: The General Accounting Office report titled "Review of Entitlements of School Districts for School Construction Assistance Because of Federal Activity, Office of Education, February 1960," has been referred to me for comment.

The report deals with the administartion by Office of Education of subsection 305 (a)(3) of Public Law 815. The Office of Education has prepared detailed comments in response to the findings and recommendations of the report which should prove helpful to the GAO.

The principal findings of the report refer to (1) the failure of the Office of Education to require the school districts applying for school construction assistance under subsection 305(a)(3) to adequately support their application for entitlements and (2) the policies and procedures of Office of Education that may have permitted some improper payments to be made. A recommendation is made, based on a judgment of insufficiency of proof of Federal connection in the system approved by the Office of Education, requiring the Commissioner to discontinue approving applications submitted under subsection 305(a)(3) of the law until the Commissioner establishes a "more realistic" basis for the school districts to use in determining the required Federal connection.

The Office of Education has indicated on page 9 in its comments that while the findings do not appear to warrant discontinuing the approval of applications, steps are being taken to require additional and more direct evidence of inmigration of parents as a condition in establishing eligibility.

In connection with the above, it should be noted that the category covered by subsection 305(a)(3) will be automatically eliminated under the terms of the present law, as of June 1961, unless Congress acts to extend it, and there are very few applications under this subsection anticipated in fiscal 1961.

Sincerely yours,

RUFUS E. MILES, Jr.,
Director of Administration.

Mr. MORSE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of S. 2393; and for the assistance of interested persons throughout the country, I ask unanimous consent that excerpts from the report on S. 2393 also be printed at this point in the RECORD.

There being no objection, the bill and excerpts from the report (Rept. No. 743) were ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first sentence of section 3 of the Act of September 23, 1950, as amended (20 U.S.C. 633), is amended by striking out "1961" and inserting in lieu thereof "1962".

(b) Subsection (b) of section 14 of such Act is amended (1) by striking out "1961" each time it appears therein and inserting in lieu thereof "1962", and (2) by striking out "$40,000,000" and inserting in lieu thereof "$60,000,000".

(c) Paragraph (15) of section 15 of such Act is amended by striking out "1958–1959" and inserting in lieu there "1959–1960".

SEC. 2. The Act of September 30, 1950, as amended (20 U.S.C. 236–244), is amended by striking out "1961" each time it appears in sections 2(a), 3(b), and 4(a) and inserting "1962" in lieu thereof.

SEC. 3. (a) The Act of September 30, 1950, as amended (20 U.S.C. 236–244), is amended by inserting "American Samoa," after "Guam," each time it appears in sections 3(d), 6(c), and 9(8).

(b) The Act of September 23, 1950, as amended (20 U.S.C. 631–645), is amended by inserting "American Samoa," after "Guam," in section 15(13).

GENERAL STATEMENT

Public Laws 815 and 874, 81st Congress, provide for assistance to school districts in federally impacted areas. Under Public Law 815, payments are made to help build schools in districts burdened with substantial increases in their school memberships due to Federal activities. Under Public Law 874, payments are made to school districts to help meet their operating and maintenance expenses where such districts are providing education for federally connected children.

Both laws provide Federal payments for three categories of federally connected children to whom the recipient school districts provide free public education. The so-called A children are those whose parents both reside and work on Federal property; B children are those whose parents either reside on Federal property or work on Federal property, but not both; and C children are those whose parents are employed in activities of the Federal Government carried on directly or through a contractor, and whose enrollment in the public schools of the applicant local education agencies has resulted in a substantial increase in the aggregate enrollment of such schools. In addition, section 2 of Public Law 874 authorizes payments to certain school districts which have lost substantial school revenue resources by reason of Federal acquisition of property in the districts, while section 14 of Public Law 815 authorizes special school construction assistance to school districts with large enrollments of children living on Indian reservations.

Both laws also provide for direct provision of free public education by the Federal Government to children who live on Federal military bases or other Federal reservations in situations where the local educational agencies are not able to provide free public education to the children.

The statutory provisions for Federal payments on account of A children are now permanent law, as are the provisions for the Federal operation of public schools in those few cases where local public school agencies are unable to provide this service. However, the provisions authorizing payments to school districts on account of B children and C children (under which the bulk of Public Laws 815 and 874 payments are made), as well as the provisions authorizing payments under section 2 of Public Law 874 and section 14 of Public Law 815, have never been made permanent and all these provisions expired on June 30, 1961.

The principal purpose of the bill is to extend for 1 year those provisions of both laws described above which expired on June 30, 1961. In addition, the bill would increase from $40 million to $60 million the appropriation authorization for special payments to school districts with large enrollments of Indian children (sec. 14 of Public Law 815) since appropriations under this section have already reached the $40 million ceiling. Finally, the bill would extend both laws (which now apply to the 50 States, Puerto Rico, the Virgin Islands, Guam, and Wake Island) to American Samoa.

PREVIOUS SENATE ACTION, 87TH CONGRESS

On May 25, 1961, the Senate by a vote of 49 to 34 passed S. 1021. Title II of this measure was concerned with an extension of, and amendments to, Public Laws 815 and 874. That title differs from the provision of S. 2393 in the following respects:

	Title II of S. 1021	Expiration date	S. 2393	Expiration date
Period of extension	3 years	1964	1 year	1962
Sec. 204	Included	------	Excluded	------

Section 204 of S. 1021 reads as follows:

"The Commissioner shall submit to the Secretary of Health, Education, and Welfare for transmission to the Congress on or before January 1, 1963, a full report of the operation of Public Laws 815 and 874, as extended by this Act, including an analysis of the relation between Federal payments under these laws and Federal payments under title I of this Act, and his recommendations as to what the future relation between these laws and that title should be if they are further extended."

It is the view of the majority of the committee that a 1-year extension of the impacted areas legislation is warranted upon the basis of the justification presented in the following sections of the report. It is further the considered judgment of the majority of the committee that only a 1-year extension of the programs, at this time, is advisable. This position is based upon the belief that the special needs of the impacted areas should be related to the provisions of a general Federal aid to education measure, designed as was title I of S. 1021 to provide broad-purpose financial assistance to school districts through the education agencies of the 50 States. It was for this purpose that section 204 of S. 1021 was drafted. Since it is the belief of a majority of the committee that, within the life span of the 87th Congress, S. 1021, or a similar measure, will be enacted into law, an extension of the impacted areas legislation for longer than a 1-year period is not warranted.

NUMBER OF FEDERALLY CONNECTED CHILDREN AND REQUIREMENTS FOR FEDERAL FUNDS BY CATEGORY OF FEDERAL IMPACT DURING SPECIFIED YEARS UNDER PUBLIC LAW 874

Table I, which was taken from the 10th Annual Report of the Commissioner of Education on the administration of Public Laws 815 and 874, shows for each State and for the United States, the number of school districts eligible for Federal payments under Public Law 874, the number of children counted for payment in the A category of Federal impact, the amount of the Federal payments made for children in this category and similar information for the B category of Federal impact. This information is based on processing actions as of July 31, 1960.

A category children are those who live on Federal property with a parent employed on Federal property. Public Law 85–620, approved August 12, 1958, authorized payments for this category of Federal impact on a permanent basis.

B category children are those children who live on private property with a parent employed on Federal property, or who live on Federal property with a parent employed on private property. Authorization for payments for children in this category of Federal impact, as well as for payments under section 2 and section 4(a) of Public Law 874, ended June 30, 1961.

The 1960 fiscal year is the latest year for which information is available by States showing the number of children and the amount of the Federal payments by category of impact. Estimated data are available,

however, for the Nation as a whole for the 1961 and 1962 fiscal years. That information is presented in tables II and III. The information for the 1961 fiscal year is based on the initial processing of applications. Final data will not be available until final reports for the year are submitted by all applicant districts, analyzed and processed for payment. Data for the 1962 fiscal year are estimates based on the trends shown in the administration of this program over the past several years.

TABLE I.—*State summary of eligible applicants and entitlements, secs. 2, 3, and 4, respectively, Public Law 874, as amended, and eligible average daily attendance, secs. 3 and 4 (entitlements to financial assistance, as of Oct. 31, 1960, for current expenditure purposes for fiscal year 1960)*

State	Number of eligible applicants	Sec. 2, net entitlement	Sec. 3										Sec. 4		Total net entitlement [1]
			Number of pupils in ADA			Entitlement						Average local contribution rate for 3(c)(1) (3(a)+½ 3(b))	Number of pupils in ADA 4(a) 1st-year assistance	Net entitlement	
			3(a)	3(b)	3(c)(4)	3(a)	3(b)	3(c)(4)	Total	Deductible funds	Net entitlement				
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)
Alabama	53		3,076	44,586		$502,095	$3,638,887		$4,140,982	$41,888	$4,099,094	$163.23			$4,099,094

[1] Net entitlement figures from table 1; may be changed on basis of additional information.

[2] Includes $433,775 for subsec. 3(f) applicants.

[3] Includes $25,134 for subsec. 4(a) 2d-year assistance, New Mexico, and $15,327 for subsec. 4(d), Missouri; other entitlements shown are for subsec. 4(a) 1st-year assistance.

TABLE II.—*Estimated average daily attendance of eligible federally connected children under sec. 3 of Public Law 874, fiscal years 1960, 1961, and 1962*

Category of Federal impact	Fiscal year 1960 (actual as of July 31, 1961)	Fiscal year 1961 (estimate)	Fiscal year 1962 (estimate)
(1)	(2)	(3)	(4)
Sec. 3(a) A category	$200,357	$230,423	$264,985
Estimated percentage increase over 1960		15	32
Sec. 3(b) B category	$1,285,194	$1,347,768	$1,401,678
Estimated percentage increase over 1960		4.9	9

TABLE III.—*Estimated gross entitlements under sec. 3 of Public Law 874, fiscal years 1960, 1961, and 1962*

Category of Federal impact	Fiscal year 1960 (actual as of July 31, 1961)	Fiscal year 1961 (estimate)	Fiscal year 1962 (estimate)
(1)	(2)	(3)	(4)
Subsec. 3(a) A category	$44,108,956	$55,967,400	$69,187,500
Estimated percentage increase over 1960		27	57
Subsec. 3(b) B category	$131,752,925	$146,475,400	$163,758,000
Estimated percentage increase over 1960		11	24
Total	$175,861,881	$202,442,800	$232,945,500
Percentage increase over 1960		15	32

It will be noted from the above tables that there were over 200,000 A category children for whom payments were made in 1960 and that the amount of the Federal payment exceeded over $44 million. It is estimated that there will be 264,900 A category children eligible for payment in fiscal year 1962, which is a 32-percent increase over the 1960 fiscal year. The payments under this category were expected to increase from $44 million in 1960 to $69 million in 1962, an increase of 57 percent. When the requirements for Federal operations under section 6 of Public Law 874 for Federal operation of schools for children living on certain Federal properties authorized under section 6 of Public Law 874 are considered the requirements under this section in 1962 are slightly over $85 million. This is the category of Federal impact for which payments are authorized on a continuing basis.

The number of children counted for payment in the B category in fiscal year 1960 was 1,285,194 and their Federal entitlement amounted to $131.7 million. It is estimated there will be over 1.4 million B category children in fiscal year 1962 and that the Federal payment on account of these children would total $163.7 million. This is an increase over 1960 of 9 percent in the number of children and 24 percent in the amount of Federal entitlement. This is the category of Federal impact for which payment expired June 30, 1961.

As stated above, estimates are not available for the number of B category children and the amount of B category payments by State for 1962. It is believed that generally the percent increase from 1960 to 1962 in number of children and Federal payments in each of the categories shown for the Nation as a whole can be applied to obtain a rough estimate for each State.

In summary, it is estimated that 4,100 school districts will apply for Federal assistance under all sections of Public Law 874 of which 3,950 will be eligible for payment if the provisions of the law were extended at their present levels of payment. The estimated total requirements would be $250,046,000.

It is also estimated that approximately 1,000 school districts will be eligible for Federal payments for A category children only in fiscal year 1962 and that the requirements under this category, including Federal operations under section 6, will be $85,700,000.

FISCAL YEAR 1962 BUDGET AND OPERATING PROBLEMS FACED BY SCHOOL DISTRICTS THAT HAVE RECEIVED FEDERAL ASSISTANCE UNDER PUBLIC LAW 874

State laws generally specify final dates by which school budgets must be approved for a forthcoming school year. State laws also generally set forth specific requirements regarding revenue receipts that may be anticipated for budget purposes. The majority of the school districts in the Nation are required to have tax rates set and budgets approved for the following school year by June or July. In a few States final actions may be taken as late as August, and, in still other States, budgets for the following year are set as early as May or June.

Under the State requirements most school districts can anticipate in their budgets only those funds which they have a reasonable assurance of receiving. It is not known precisely what action individual school districts which are recipients of Public Law 874 assistance have taken in their budgets regarding the anticipated receipt of Federal payments under those provisions of the act which expired June 30, 1961. It is quite probable that some school districts relying on the administration's recommendation for continuing the temporary provisions of the law, but at a reduced rate of payment, have anticipated in their budgets receipt of Federal payments in terms of this recommendation. Some school districts may have anticipated, for budget purposes, full payments under the expiring provisions of the law based on the fact that the Senate-passed bill S. 1021 made provision to extend these two laws at their present rate of payment for 3 more years. In still other school districts it is probable that no funds under the expiring provisions of the law were anticipated for budget purposes.

Under most State laws it is extremely difficult to increase tax rates or to secure funds from other sources after a budget has once been approved. Thus, those districts that anticipated Federal payments under the expiring provisions of Public Law 874 will be in an extremely difficult position in fiscal year 1962 if the expiring provisions of Public Law 874 are not extended. Those districts in which Federal payments under the B category constitute a substantial portion of their year's operating budget may find it necessary to curtail the school year by a month or two in the spring. Other districts will be under the necessity of restricting expenditures throughout the entire school year in order to continue school for the full term but on a greatly restricted basis. This would mean eliminating some teachers, increasing size of classes, restricting transportation, reducing necessary maintenance of buildings, and in other ways curtailing their school programs. These reductions would come in numerous communities at a critical time when the pressure of increasing enrollments resulting from expanding employment on Federal projects is becoming more and more acute. In short, those communities whose school enrollments are greatly increased by the presence nearby of major Federal projects vital to the national defense and welfare would find it impossible to maintain an acceptable level of educational services for the children of those military personnel and workers who have been assigned to these Federal projects.

There is listed in table IV some examples of school districts showing the proportion of the year's operating budget that comes from Public Law 874 funds.

TABLE IV.—*Selected school districts receiving Federal assistance under Public Law 874 showing number of A and B category children, Federal entitlement, total operating budget, for fiscal year 1961*

State	Applicant district	Number of children claimed,[1] category—		Total average daily attendance [1]	Percent Federal ADA is of total	Total operating expenses [1]		Percent Federal entitlement is of total budget	Chief Federal properties claimed

[3] Includes $11,100 under sec. 2.

INFORMATION REGARDING NUMBER OF FEDERALLY CONNECTED CHILDREN AND REQUIREMENTS FOR FEDERAL FUNDS UNDER PUBLIC LAW 815, BY CATEGORY OF FEDERAL IMPACT

Under Public Law 815 as currently in effect school districts are authorized to apply for Federal assistance for construction of school facilities for increases in school membership of category A children only that are expected to occur by June 30, 1963. Category A children are those who live on Federal property with a parent employed on Federal property. Authorization for payments for children in this category was made permanent by the passage of Public Law 85-620 in 1958. It is estimated that $24 million will be required under this category for fiscal year 1962 for 17,200 children.

If Public Law 815 is extended to authorize payment for B category children for fiscal year 1962, which provisions expired June 30, 1961, a local educational agency will be authorized to apply for school construction assistance for estimated increases in the number of pupils residing on Federal property or residing with a parent employed on Federal property, that are expected to occur by June 30, 1962. Most of the districts qualifying for assistance under this category (subsec. 5(a)(2)) do so on account of increased numbers of children who reside with a parent employed on Federal property. Based on past experience, it is estimated that in fiscal year 1962, school districts will have an increase of some 42,000 B category children and the estimated payments to the school districts on account of these children will be approximately $32,400,000.

Listed below in table V are examples of school districts which are heavily impacted because of B category children in school membership which have received assistance under Public Law 815 in the past and are expected to have further increases in the number of such children in their schools.

Section 14 of Public Law 815 provides for financial aid to school districts which urgently need additional school facilities primarily for Indian children living on tax-exempt Indian lands and attending or who would attend the public schools if school facilities were available in the district for them.

TABLE V

School district	A category children	B category children	Non-Federal membership	Total
Midwest City Independent School District No. 52, Midwest City, Okla	350	6,909	6,039	13,298
Lompoc Unified School District, Lompoc, Calif	2,513	2,528	1,990	7,031
Monterey City School District, Monterey, Calif	2,809	3,561	4,336	10,706
Ysleta Independent School District, Ysleta, Tex	0	5,093	12,262	17,355
Brevard County Board of Public Instruction, Titusville, Fla	795	10,667	12,990	24,452

These school districts are seldom eligible for assistance under section 5 of the act because they cannot show the required increase in membership for a specific 2-year increase period as required by that section, even though they have large numbers of Indian children living on tax-exempt Indian lands in their school district. Some of these children do not attend any school while others attend boarding schools located outside of the district. If school facilities were available in the district, many of these children not now in any school as well as those attending out-of-district boarding schools, would enroll in the public school. Since most of these school districts have little or no bonding capacity or other financial resources available for construction of school facilities, Federal assistance under section 14 is essential if the school facilities are to be constructed.

The law as now enacted authorizes the appropriation of not to exceed $40 million to carry out the provisions of this section. This amount has now been allocated to eligible school districts. There are several school districts now eligible for a grant under section 14 but no funds can be reserved for them. It is estimated that $2 million will be required for fiscal year 1962 under this section if the act is extended and the authorization for appropriation is increased.

Examples of this type of school district follow:

TABLE VI

School district	Sec. 14 membership	Other membership	Total membership
(1)	(2)	(3)	(4)
Chinle School District No. 24, Chinle, Ariz	828	0	828
Tuba City elementary School District No. 15, Tuba City, Ariz	700	19	719

Mr. MORSE. Mr. President, I am about to suggest the absence of a quorum. Before doing so, it should be noted that I have said little about the National Defense Education Act. All of us know that an amendment may be offered seeking to extend the National Defense Education Act for 2 or more years. When that amendment has been offered and the speech in support of it has been made, I shall have something to say about that subject.

I know other members of the committee wish to speak today or tomorrow or the next day. I sought this afternoon only to lay before the Senate the general framework and the major premises of those of us who support the Hill-Morse bill to extend the impacted areas legislation for another year.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

[No. 197]

Bartlett	Hill	Mundt
Byrd, Va.	Mansfield	Pastore
Clark	McClellan	Randolph
Cooper	McNamara	Saltonstall
Dirksen	Metcalf	Smith, Maine
Ellender	Monroney	Sparkman
Hart	Morse	

The PRESIDING OFFICER. A quorum is not present.

Mr. MORSE. Mr. President, I move that the Sergeant at Arms be notified that a quorum is not present, and directed to request the attendance of absent Senators.

The PRESIDING OFFICER (Mr. METCALF in the chair). The question is on agreeing to the motion of the Senator from Oregon.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will execute the order of the Senate.

After a little delay, Mr. AIKEN, Mr. ALLOTT, Mr. BENNETT, Mr. BIBLE, Mr. BOGGS, Mr. BURDICK, Mr. BUSH, Mr. BYRD of West Virginia, Mr. CANNON, Mr. CAPEHART, Mr. CARLSON, Mr. CARROLL, Mr. CASE of New Jersey, Mr. CASE of South Dakota, Mr. CHURCH, Mr. COTTON, Mr. DODD, Mr. DOUGLAS, Mr. DWORSHAK, Mr. EASTLAND, Mr. ENGLE, Mr. ERVIN, Mr. FONG, Mr. FULBRIGHT, Mr. GOLDWATER, Mr. GORE, Mr. GRUENING, Mr. HARTKE, Mr. HICKEY, Mr. HOLLAND, Mr. HUMPHREY, Mr. JACKSON, Mr. JOHNSTON, Mr. JORDAN, Mr. KEATING, Mr. KEFAUVER, Mr. KUCHEL, Mr. LAUSCHE, Mr. LONG of Hawaii, Mr. LONG of Louisiana, Mr. MAGNUSON, Mr. MCCARTHY, Mr. MCGEE, Mr. MORTON, Mr. MOSS, Mr. MUSKIE, Mr. PELL, Mr. PROXMIRE, Mr. ROBERTSON, Mr. RUSSELL, Mr. SCHOEPPEL, Mr. SCOTT, Mr. SMATHERS, Mr. SMITH of Massachusetts, Mr. STENNIS, Mr. SYMINGTON, Mr. TALMADGE, Mr. THURMOND, Mr. TOWER, Mr. WILEY, Mr. WILLIAMS of New Jersey, Mr. WILLIAMS of Delaware, Mr. YARBOROUGH, Mr. YOUNG of North Dakota, and Mr. YOUNG of Ohio entered the Chamber and answered to their names.

Mr. HUMPHREY. I announce that the Senator from Arizona [Mr. HAYDEN], the Senator from Oklahoma [Mr. KERR], the Senator from Missouri [Mr. LONG], and the Senator from Oregon [Mrs. NEUBERGER] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] and the Senator from New Mexico [Mr. ANDERSON] are absent because of illness.

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], the Senator from Nebraska [Mr. HRUSKA], the Senator from New York [Mr. JAVITS], and the Senator from Vermont [Mr. PROUTY] are necessarily absent.

The Senator from Maryland [Mr. BUTLER] is detained on official business.

The PRESIDING OFFICER. A quorum is present.

Mr. MORSE. Mr. President, I am sending to the desk an amendment which will extend the National Defense Education Act for 1 year, exactly as we propose to extend the impacted areas law under Public Laws 815 and 874 for 1 year.

The same arguments that I used this afternoon in my speech for extension of Public Laws 815 and 874 for 1 year apply equally in support of my amendment for the extension of NDEA for 1 year.

Mr. President, I send an amendment to the desk, for printing under the rule, and ask unanimous consent that the amendment may lie on the table and may be printed in the RECORD.

The PRESIDING OFFICER. The amendment will be received, printed, and lie on the table; and, without objection, the amendment will be printed in the RECORD.

On page 1, after line 2, insert the following:

"TITLE I—PUBLIC LAWS 815 AND 874"

On page 1, line 3, strike out "That (a) the" and insert in lieu thereof the following: "SECTION 1. (a) The".

On page 2, after line 16, insert the following:

"TITLE II—ONE-YEAR EXTENSION OF THE NATIONAL DEFENSE EDUCATION ACT OF 1958

"Amendments to title II (loans to students in institutions of higher education)

"SEC. 201. (a) Section 201 of the National Defense Education Act of 1958 is amended by striking out 'for the fiscal year ending June 30, 1962, and such sums for the fiscal year ending June 30, 1963, and each of the three succeeding fiscal years as may be necessary to enable students who have received a loan for any school year ending prior to July 1, 1962' and inserting in lieu thereof the following: 'each for the fiscal year ending June 30, 1962, and for the succeeding fiscal year, and such sums for the fiscal year ending June 30, 1964, and each of the three succeeding fiscal years as may be necessary to enable students who have received a loan for any school year ending prior to July 1, 1963'.

"(b) Section 202 of such Act is amended by striking out '1962' each place where it appears therein and inserting in lieu thereof '1963'.

"(c) Section 206 of such Act is amended by striking out '1966' each place where it appears therein and inserting in lieu thereof '1967'.

"Amendments to title III (financial assistance for strengthening science, mathematics, and modern foreign language instruction)

"SEC. 202. (a) Section 301 of the National Defense Education Act of 1958 is amended by striking out 'three succeeding fiscal years' both places where it appears therein and inserting in lieu thereof 'four succeeding fiscal years'.

"(b) The last sentence of section 302(a)(2) of such Act is amended by striking out 'two fiscal years in the period beginning July 1, 1960, and ending June 30, 1962' and inserting in lieu thereof the following: 'three fiscal years in the period beginning July 1, 1960, and ending June 30, 1963'.

"(c) The second sentence of section 304(b) of such Act is amended by striking out 'two succeeding fiscal years' and inserting in lieu thereof 'three succeeding fiscal years'.

"Amendment to title IV (national defense fellowships)

"SEC. 203. Section 402 of the National Defense Education Act of 1958 is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"Amendments to title V (guidance, counseling, and testing; identification and encouragement of able students)

"SEC. 204. (a) Section 501 of the National Defense Education Act of 1958 is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"(b) The second sentence of section 504(a) of such Act is amended by striking out 'two succeeding fiscal years' and inserting in lieu thereof 'three succeeding fiscal years'.

"(c) the first sentence of section 504(b) of such Act is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"(d) The first sentence of section 511 of such Act is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"Amendments to title VI (language development)

"SEC. 205. (a) Section 601 of the National Defense Education Act of 1958 is amended by striking out '1962' both places where it appears therein and inserting in lieu thereof '1963'.

"(b) Section 611 of such Act is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"Amendment to title VII (research and experimentation in more effective utilization of educational media)

"SEC. 206. Section 763 of the National Defense Education Act of 1958 is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"Amendment to title VIII (area vocational education programs)

"SEC. 207. Section 301 of the Vocational Education Act of 1946 is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

"Amendment to section 1009 (improvement of statistical services)

"SEC. 208. Section 1009(a) of the National Defense Education Act of 1958 is amended by striking out 'three succeeding fiscal years' and inserting in lieu thereof 'four succeeding fiscal years'.

Amend the title so as to read: "A bill to extend for one year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas, to provide for the application of such laws to American Samoa, and to extend the provisions of the National Defense Education Act of 1958 for one year."

Mr. MCNAMARA. Mr. President, at the outset I wish to say I heartily subscribe to the presentation so ably made by the chairman of the Subcommittee on Education. I think the Senator from Oregon probably has worked harder and more diligently at this session of Congress on the problem of aid to education than has any other Senator up to this time. I subscribe thoroughly to what he has said.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. MCNAMARA. I yield.

Mr. MORSE. I thank the Senator from Michigan for the wonderful help he has been to me and to the chairman of the committee [Mr. HILL] all this year in connection not only with education problems but also in his capacity as chairman of the Subcommittee on Labor. We could not have made the progress we have made thus far if it had not been for the dedicated service to the educational needs of this country rendered by the Senator from Michigan [Mr. MCNAMARA].

Mr. MCNAMARA. I thank the Senator from Oregon. I was about to say that none of this could have been accomplished without the cooperation of the distinguished Senator from Alabama [Mr. HILL], who has been cooperative not only in regard to education but also in regard to proposed health legislation, proposed labor legislation, and other problems which come before the committee.

Mr. President, I wish to start my remarks by calling up the amendment which has been at the desk a week or so, and to make certain modifications to correct typographical errors.

Mr. President, the typographical errors in the amendment 8–16–61—B, offered for myself and the Senator from Maine [Mr. MUSKIE] are as follows: On page 2, line 6, the words "three-year" should be "two-year."

On page 11, lines 11 and 16, the figures "108" should be deleted where they appear and the figures "208" should be inserted in lieu thereof.

The PRESIDING OFFICER. The Senator has a right to modify his amendment. Without objection, the amendment, as modified, will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 1, after line 2, insert the following:

"TITLE I—PUBLIC LAWS 815 AND 874"

On page 1, line 3, strike out "That (a) the" and insert in lieu thereof the following: "SECTION 1. (a) The".

On page 2, after line 16, insert the following:

"TITLE II—SCHOOL ASSISTANCE ACT OF 1961

"SEC. 201. This title may be cited as the 'School Assistance Act of 1961'.

"Declaration of purpose

"SEC. 202. It is the purpose of this title to authorize a two-year program of Federal grants to States to assist their local education agencies to construct urgently needed public elementary and secondary school facilities. It is the intent of Congress that with this assistance the quality of public elementary and secondary education will be substantially improved in all States and that inequalities of educational opportunities within and between States will be substantially reduced.

"Assurance against Federal interference in schools

"SEC. 203. In the administration of this title, no department, agency, officer, or employee of the United States shall exercise any direction, supervision, or control over the policy determination, personnel, curriculum, program of instruction, or the administration or operation of any school or school system.

"Authorization of appropriations

"SEC. 204. There is hereby authorized to be appropriated, without any limitation of such appropriation or condition inconsistent with or contrary to the terms or purposes of this title, for the fiscal year beginning July 1, 1961, and for the succeeding fiscal year, $325,000,000, for the purpose of making payments to State education agencies as provided in this title.

"Allotment to States

"SEC. 205. (a) The sums appropriated pursuant to section 204 shall be allotted among the States on the basis of the income per child of school age, the number of children of school age, and the effort for public school purposes of the respective States. A State allotment under this section for any fiscal year shall be available for obligation by the State, in accordance with the provisions of this title, during such year and the next fiscal year (and for those two years only). Except as provided by section 206, such allotments shall be made as follows: The Commissioner shall allot to each State for each fiscal year an amount which bears the same ratio to the sums appropriated pursuant to section 204 for such year as the product of—

"(1) the number of children of school age in the State in the preceding fiscal year, and

"(2) the State's allotment ratio (as determined under subsection (b)),

bears to the sum of corresponding products for all the States.

"(b) For purposes of this title—

"(1) The 'allotment ratio' for any State shall be 1.00 less the product of (A) .50 and (B) the quotient obtained by dividing the income per child of school age for the State by the income per child of school age for all the States (exclusive of Puerto Rico, Guam, American Samoa, the District of Columbia, and the Virgin Islands), except that (i) the allotment ratio shall in no case be less than .25 or more than .75 and (ii) the allotment ratio for Puerto Rico, Guam, American Samoa, and the Virgin Islands shall be .75, (iii) the allotment ratio for the District of Columbia shall be .50, and (iv) the allotment ratio of any State shall be .50 for any fiscal year if the Commissioner finds that the cost of education in such State exceeds the median of such costs in all the States by a factor of 2 or more as determined by him on the basis of an index of the average per pupil cost of constructing minimum school facilities in the States as determined for such fiscal year under section 15(6) of the Act of September 23, 1950, as amended (20 U.S.C. 645), or, in the Commissioner's discretion, on the basis of such index and such other statistics and data as the Commissioner shall deem adequate and appropriate.

"(2) The allotment ratios shall be promulgated by the Commissioner for each fiscal year, between July 1 and August 31 of such fiscal year, except that for the fiscal year beginning July 1, 1961, such allotment ratios shall be promulgated as soon as possible after the enactment of this title. Allotment ratios for each fiscal year shall be computed on the basis of the average of the incomes per child of school age for the States and for all the States (exclusive of Puerto Rico, Guam, American Samoa, the District of Columbia, and the Virgin Islands) for the three most recent consecutive fiscal years for which satisfactory data are available from the Department of Commerce. Such promulgation shall be conclusive for the purposes of this title, except that the Commissioner may estimate and subsequently revise such allotment ratios, and, as so revised and promulgated, such promulgation shall be equally conclusive.

"(3) The term 'income per child of school age' for any fiscal year for a State or for all the States means the total personal income for the State or for all the States in the calendar year ending in such fiscal year (exclusive of Puerto Rico, Guam, American Samoa, the District of Columbia, and the Virgin Islands), respectively, divided by the number of children of school age in the State or in all such States, respectively, in such fiscal year.

"(4) The term 'child of school age' means a member of the population between the ages of five and seventeen, both inclusive.

"Maintenance and improvement of State and local support for public school financing

"SEC. 206. (a) The sum otherwise allocable to any State under section 205 for any fiscal year after the fiscal year beginning July 1, 1961, shall be reduced if such State's effort for such fiscal year is not at least equal to such State's base effort for such year. The amount of such reduction shall be the difference between the State's public school expenditures in such year and the public school expenditures it would have made in such year had it exerted the State's base effort for such year.

"(b) The sum otherwise allocable to any State under section 205 for any fiscal year after the fiscal year beginning July 1, 1961, shall also be reduced if such State's effort for such year is not at least equal to the State's base effort for such year plus the average annual rate of increase in the national effort over the five fiscal year period beginning July 1, 1956, and ending June 30, 1961. The amount of the reduction under this subsection (which shall be in addition to the reduction, if any, under subsection (a)) shall bear the same relation to the sum otherwise allocable to the State under section 205, (1) as the difference between the State's effort and the national effort for such year bears to the national effort for such year, or (2) if it would result in a smaller reduction, as the difference between the State's expenditure per public school pupil and 110 per centum of the national expenditure per public school pupil for such year, bears to 110 per centum of the national expenditure per public school pupil for such year. This subsection shall not apply to any State for any year for which the State's effort equaled or exceeded the national effort for such year or the State's expenditure per public school pupil equaled or exceeded 110 per centum of the national expenditure per public school pupil for such year.

"(c) The total reductions which may be made under subsections (a) and (b) from the sum otherwise allocable to a State for any fiscal year shall not exceed one-third of such sum.

"(d) The sum of the reductions under this section for each fiscal year shall be reallotted by proportionately increasing the allotments under section 205 for such year of those remaining States (other than the District of Columbia, Puerto Rico, Guam, American Samoa, and the Virgin Islands) whose allotments for such year have not been reduced under this section.

"(e) For purposes of this section—

"(1)(A) A 'State's effort' for any State for a fiscal year is the quotient obtained by dividing (i) the State's expenditure per public school pupil by (ii) the income per such pupil for the State; except that the State's effort shall be deemed to be equal to the State's base effort and to the national effort in the case of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the District of Columbia.

"(B) A State's 'base effort' for a fiscal year means the average State effort over the three immediately preceding fiscal years.

"(C) The 'income per public school pupil' for a State or for all the States for any fiscal year means the total personal income for the State or for all the States in the calendar year ending in such fiscal year (exclusive of Puerto Rico, Guam, American Samoa,

and the Virgin Islands), respectively, divided by the number of public school pupils in the State or in all such States, respectively, in such fiscal year.

"(2)(A) The 'national effort' for any fiscal year is the quotient obtained by dividing (i) the expenditure per public school pupil for all the States (exclusive of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the District of Columbia) by (ii) the income per such pupil for all such States.

"(B) The average annual rate of increase in the national effort over the five fiscal year period beginning July 1, 1956, and ending June 30, 1961, shall be determined by dividing the difference between the national effort for the fiscal year beginning July 1, 1956, and for the fiscal year beginning July 1, 1960, by four.

"(3)(A) The 'public school expenditures' of any State in any fiscal year means the total expenditures by the State and subdivisions thereof in such year for public elementary and secondary education made from funds derived from State and local sources in the State (including payments in the nature of payments in lieu of taxes from any sources).

"(B) The 'expenditure per public school pupil' for any State for any fiscal year means the quotient obtained by dividing the State's public school expenditures in such year by the number of its public school pupils for such year.

"(C) The 'national expenditure per public school pupil' for any fiscal year means the quotient obtained by dividing (i) the public school expenditures of all the States in such year (exclusive of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the District of Columbia) by (ii) the number of public school pupils in all such States for such year.

"(4) The Commissioner's determinations of the State effort, base effort, income, public school expenditures, and expenditure per public school pupil, for any State, and his determinations of the national effort, average rate of increase, and expenditure per public school pupil, shall be conclusive for purposes of this title, except that the Commissioner may estimate and subsequently revise any such determination, and as so revised, such determination shall be equally conclusive.

"Payment of allotments to States

"SEC. 207. Payments to States which have submitted and had approved their applications under this title of Federal funds allotted to them pursuant to section 205 (as adjusted by the application of the provisions of section 206 and as adjusted on account of overpayments or underpayments previously made) shall be made by the Commissioner on the basis of such estimates, in such installments, and at such times, as may be reasonably required for expenditure by the States of the funds so allotted.

"State agency administrative costs

"SEC. 208. From the sums allotted to it under section 205, as adjusted by section 206, for each fiscal year, a State education agency may use such amount as it deems necessary for any supervision, services, and other costs of administering its activities under this title in that year, except that such amount shall not be more than whichever is the lesser of (1) ten cents multiplied by the number of public school pupils in the State during the prior fiscal year, and (2) $150,000, except that if, for any State, such lesser amount is less than $25,000, such amount shall be increased to $25,000.

"State applications

"SEC. 209. (a) A State which desires to receive its allotments under this title shall submit through its State education agency an application to the Commissioner which—

"(1) provides assurance that the State education agency shall be the sole agency for administering the funds received under this title;

"(2) provides that such allotment, except for sums used in accordance with section 208, shall be used exclusively for the construction of public elementary and secondary school facilities;

"(3) sets forth criteria and procedures to insure that in allocating funds received under this title (exclusive of amounts to be used under section 208) to local education agencies priority will be given to local education agencies which, in the judgment of the State education agency, have the greatest need for additional school facilities and which are least able to finance the cost of needed school facilities;

"(4) provides assurance that every local education agency whose application for funds under this title is denied will be given an opportunity for a hearing before the State education agency;

"(5) sets forth procedures for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, funds paid to the State and by the State to the local education agencies under this title, which procedures shall include provision for repayment to the United States of any sums received by the State from its allotment for any fiscal year under this title which are not obligated by it in accordance with the provisions of this title by the end of the fiscal year following that for which such allotment was made, or which are not expended in accordance therewith by the end of the second fiscal year following that in which they were obligated (unless such sums have been deducted from subsequent payments pursuant to section 207);

"(6) provides assurance that the requirements of section 211 will be complied with on all construction projects in the State assisted under this title; and

"(7) provides for making such reports in such form and containing such information as the Commissioner may from time to time reasonably require and for access by the Commissioner, upon request, to the records upon which such information is based.

"(b) With respect to any public school operated by a public agency or institution other than a State or local education agency, and in the case of any State in which a State education agency has exclusive responsibility for financing the construction of school facilities within the entire State, within a given geographical area within the State, or with respect to particular categories of public schools, the Commissioner may modify or make inapplicable any of the provisions of subsection (a), to the extent he deems such action appropriate in the light of the special governmental or school organization of such State.

"Review of State applications

"SEC. 210. (a)(1) The Commissioner shall approve an application of a State which fulfills the conditions specified in section 209(a), and shall not finally disapprove a State application except after reasonable notice and opportunity for hearing to the State education agency.

"(2) Whenever the Commissioner, after reasonable notice and opportunity for hearing to the State education agency, finds that such agency is not complying substantially with the provisions required to be included in its application under section 209(a), or that any funds have been diverted from the purposes for which they have been paid, the Commissioner shall forthwith notify the State education agency, and he shall thereafter withhold further payments to the State under this title until there is no longer any such failure to comply, or, if compliance is impossible, there is a repayment, or an arrangement for repayment, of Federal moneys which have been diverted or improperly expended.

"(b)(1) A State education agency dissatisfied with a final action of the Commissioner under subsection (a) of this section may appeal to the United States court of appeals for the circuit in which such State or agency is located by filing a petition with such court within sixty days after such final action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner, or any officer designated by him for that purpose. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

"(2) Upon the filing of the petition referred to in paragraph (1) of this subsection, the court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part, temporarily or permanently. The findings of the Commissioner as to the facts, if supported by substantial evidence, shall be conclusive, but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

"(3) The judgment of the court affirming or setting aside, in whole or in part, any action of the Commissioner shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

"Labor standards

"SEC. 211. All laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed in whole or in part under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality to be determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276c–5), for construction projects under this title, and every such employee shall receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in excess of eight hours in any workday or forty hours in the workweek, as the case may be. The State education agency of each State shall take such steps as shall be necessary to assure that the wage standards required above shall be set out in each project advertisement for bids and in each bid proposal form and shall be made a part of the contract covering the project. The Secretary of Labor shall have with respect to the labor standards specified in this provision the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z–15) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

"SEC. 212. The State education agency may waive the application of section 211 in cases or classes of cases where laborers or mechanics, not otherwise employed at any time in the construction of the project, voluntarily donate their services for the purpose of lowering the costs of construction and the State education agency determines that any amounts saved thereby are fully credited to the education agency undertaking the construction.

"Definitions

"SEC. 213. For the purposes of this title—

"(1) The term 'Commissioner' means the United States Commissioner of Education.

"(2) The term 'local education agency' means a board of education or other legally constituted local school authority having

administrative control and direction of public schools in a city, county, township, school district, or political subdivision.

"(3) The term 'State' includes the District of Columbia, Puerto Rico, Guam, American Samoa, and the Virgin Islands.

"(4) The term 'State education agency' means the State board of education or other agency or officer primarily responsible for the State supervision of public schools.

"(5) The term 'public school pupils' means pupils in average daily attendance at public schools within a State, or within all of the States, as determined by the Commissioner in accordance with criteria developed by him to assure uniform determinations for all the States.

"(6) The term 'public schools' means schools providing free education at public expense, under public supervision and direction and without tuition charge to resident pupils, and which is provided as elementary or secondary school education—

"(a) by a State or local education agency, or

"(b) if the State application approved under this title so provides, by another State or local public agency or institution.

"(7) The term 'elementary and secondary education' shall not include any education provided below the kindergarten level or beyond grade 12.

"(8) The terms 'school facilities' and 'public school facilities' means classrooms and related facilities (including furniture, instructional materials other than textbooks, equipment, machinery, and utilities necessary or appropriate for school purposes) for public schools, and interests in land (including site, grading, and improvement) on which such facilities are constructed. Such terms shall include gymnasiums and similar facilities, except those intended primarily for exhibitions for which admission is to be charged to the general public.

"(9) The terms 'construct', 'constructing', and 'construction' include the preparation of drawings and specifications for school facilities; erecting, building, acquiring, altering, remodeling, improving, or extending school facilities; and the inspection and supervision of the construction of school facilities."

Amend the title so as to read: "A bill to extend for one year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas, to provide for the application of such laws to American Samoa, and to provide a two-year program of financial assistance to the States for public elementary and secondary school construction."

Mr. McNAMARA. Mr. President, the Senate today once again takes up the school bill.

The reason we are involved again in such a debate is, we are told, because of the refusal of the House of Representatives to accept our previous action on schools.

In short, we are being told to walk into this Chamber with the House, in effect, handing each of us, as we enter, our new senatorial symbol, the rubber stamp.

I would find it difficult to accept such an argument were there a semblance of proof to accompany it, but it is impossible to accept the argument when the evidence is so skimpy.

The simple fact is that the House of Representatives has never voted on a school bill during this session of Congress.

The closest that body came to a vote was on a procedural matter, an issue in which the exact wishes of the House on education were so obscured as to be unrecognizable.

I would remind the Senate that there have been many occasions in the past year when the House gave all of us some pleasant surprises.

I happened to be deeply involved in regard to a bill early in the session, the minimum wage bill, which was once pronounced even more lifeless than is the school bill.

The foreign aid appropriation bill now on our calendar, while still not the optimum bill, was made a far stronger measure by the full House than that which came from House committee.

I cannot believe that we cannot enact a minimum education program in this Congress if the House is given an opportunity to vote on it.

President Kennedy is not a man given to overstatement, and his characterization of the educational problem as this Nation's single most important domestic issue is accurate.

The Senate for 2 years running has given convincing proof of its concern for education.

We should make the effort to present our colleagues in the House with what every rational person would recognize as a reasonable compromise.

That would be simply the addition of a 2-year construction program to H.R. 9000.

It is on that amendment and the necessity for it that I propose to speak at length.

There are obviously, as this Senate has demonstrated, two major educational efforts the Nation must undertake.

First, we must take that action necessary to insure a sizable increase in both the quantity and quality of our teaching personnel.

And second, we must do everything within our power to build the classrooms necessary, to give every American child the educational facilities which our experience and desires demand.

We have tried to accomplish that in our action which sent S. 1021 to the House of Representatives.

That bill has been resting on the table of the House since our action and I am, at this stage of the session, prepared to admit that its chances for House action are slight.

However, I do believe that we can, by the enactment of the construction amendment to the bill before us now, do much to alleviate our classroom problems and indirectly provide more funds for the recruitment of teachers and the upgrading of teaching skills.

My only purpose today is to refresh the memory of this Congress on the reasons why educational legislation has been before us for so long.

To that end I shall read from documents that treat, at length, the subject under discussion.

For those who still express concern about the future role of the Federal Government if it does provide financial aid for schools, I wish to cite some past instances of Federal support of education.

The National Education Association has compiled a list of such Federal activities, and I wish to quote from that list. The title is "Some Landmarks in Federal Legislation for Education."

The list of Federal statutes making grants for education is long. Some of the most important are these:

EARLY PUBLIC LAND GRANTS

1785, Land Ordinance: Specified the manner in which the western lands should be surveyed and stipulated that "there shall be reserved the lot No. 16 of every township for the maintenance of public schools within said township."

Later I shall quote from a statement by President George Washington, who advocated Federal aid to education back in those early days.

I continue to read from the presentation before me:

1787, Northwest Ordinance: Stated that "religion, morality and knowledge, being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged."

1802, Ohio Enabling Act: Granted section 16 of each township in the States carved from the public domain to the township inhabitants for the support of schools. With the exception of Texas, Maine, and West Virginia, the same policy applied to all States admitted to the Union until 1848.

1803, Further land grants to new States: Granted a township to Ohio for a seminary of learning and stipulated that all educational land grants were to be "for schools and for no other use, intent or purposes whatever." Similar grants extended to other States carved from the public domain.

LAND-GRANT COLLEGE STATUTES

1862, Morrill Land-Grant Act: Granted to each State an amount of 30,000 acres of public land (or its equivalent in scrip) per Congressman for the support of a college which would have as its primary purpose the teaching of "such branches of learning as are related to agriculture and the mechanic arts * * *." Provision was also made for military training.

1890, Second Morrill Act: Increased the support of the land-grant colleges and universities.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. McNAMARA. I am happy to yield to the chairman of our Subcommittee on Education.

Mr. MORSE. I think the 1862 Morrill Act is a very interesting one. It was signed by Lincoln after a similar bill in Buchanan's administration had been vetoed. Buchanan made the argument against it. One of the arguments in his veto message against the bill was the old argument that we are still dealing with today. It was feared that the bill might lead to too much Federal control of education. It did not worry Lincoln and, of course, it has not worried the President of any land-grant college since, although over the years we have poured millions of dollars into our land-grant colleges. In the hearings which I have conducted or in which I have participated since I have been in the Senate, we have kept asking for evidence that would show there would be any Federal interference in

the land-grant colleges. Of course, no such evidence has been produced, because it does not exist.

The speech of the Senator from Michigan is very interesting, and I commend him for it. It is well to put down in chronological order, as the Senator has done, the great historic landmarks as to what has happened in the field of education. We ought to show every citizen that we are not dealing with something new today. This problem has confronted the Republic for years, but we think the time has come when we ought to make much more rapid progress than we have been making.

Mr. McNAMARA. I thank the Senator.

All the arguments used against Federal aid to education since I have been in the Senate, for the past 7 years, have gone into the business of Federal intervention following Federal aid.

Those using such arguments have opposed Federal funds for such purposes as building classrooms, helping to pay teachers' salaries, and assisting the States to pay such costs as those. But now we find in both Houses of Congress a great sentiment for the extension of impacted-area legislation. The proposed impacted-area legislation has in it all the elements that the opponents to Federal aid to education have been talking against for years. All those elements are implicit in the proposed legislation which it is now sought to extend for longer than the Subcommittee on Education wants to extend it.

The Senator made a good case on that point. I do not propose to go into it in any degree, except to say for the record that if those elements were bad in the general aid to education bill, they are certainly bad in the proposed extension of the Federal aid to impacted areas legislation. I do not think they are bad in either instance. I do not think there is a danger of Federal intervention.

As I have studied the record, it certainly appears that there has been no Federal intervention down through the history of the country.

I continue to read from my presentation:

1908, Nelson amendment to Morrill Act: Increased the support of the land-grant colleges and universities. The permanent annual appropriation under this act is now $2,550,000.

1935, Bankhead-Jones Act: Increased annual appropriations for support of land-grant colleges and universities. Congress now appropriates $2,501,000 annually.

VOCATIONAL EDUCATION ACTS

1917, Smith-Hughes Act: Provided grants for promoting vocational training in the public schools and for encouraging special education for teachers of vocational subjects. Contained exacting requirements and stipulations as to the use of the funds. Permanent annual appropriation amounts to $7,138,000.

1929, George-Reed Act: Increased annual appropriations for vocational training in the public schools under the Smith-Hughes Act.

1936, George-Deen Act: Continued policy of Federal aid for vocational training in the public schools and extended Smith-Hughes Act to include education in distributive occupations.

1946, George-Barden Act (Public Law 586, 79th Cong.): Supplementary legislation to the Smith-Hughes and George-Deen vocational education acts. Authorizes up to $29 million in Federal grants. With additional funds for practical nursing and fishery education appropriations for fiscal 1958 are at an alltime high of $33.8 million.

1956, Public Laws 911 and 1027, 84th Congress: Amend the George-Barden Act to include Federal aid for practical nurse training of less than college level (up to $5 million a year for 5 years) and training in the fishery trades ($375,000 a year).

1958, National Defense Education Act: Title X of Public Law 85-864 adds area vocational programs and emphasizes new technical skills. (For other details, see also "Defense Education.")

SCHOOL LUNCHES

1946, National School Lunch Act (Public Law 396, 79th Cong.): Distributes funds and federally purchased foods to schools, public and nonpublic, to be used for school lunches.

1954, school milk program (Public Law 690, 83d Cong.): An important adjunct to the school lunch program. In 1958, Public Law 85-478 extended this program until 1961 and authorized $75 million per year to make surplus milk available to nonprofit elementary and secondary schools, as well as child care centers, settlement houses, and summer camps.

VETERANS EDUCATION

1944, Servicemen's Readjustment Act (Public Law 346, 78th Cong.): Provided for educational and training benefits for veterans on the basis of 1 year plus 1 day for each day spent in the service. The GI bill of rights.

1952, Veterans Readjustment Assistance Act (Public Law 550, 82d Cong.): The Korean GI bill provides educational and training benefits for persons who served between June 27, 1950, and January 31, 1955.

1956, War Orphans Educational Assistance Act (Public Law 634, 84th Cong.): Extends benefits of Korean GI bill to orphans of servicemen killed in World War II or Korean conflict.

FEDERALLY AFFECTED AREAS

1941, Lanham Act: Provided Federal assistance including school building aid, for communities adversely affected by Federal activities.

1950, Public Laws 815 and 874, 81st Congress: Provided assistance for school construction (Public Law 81-815), and maintenance and operation (Public Law 81-874) in federally affected areas. Authorized national school facilities survey.

1958, Public Law 85-620 continues Federal assistance for construction and operation of schools in federally affected areas.

RURAL LIBRARIES

1956, Public Law 597, 84th Congress: Established a 5-year program of Federal grants to the States for extension of library services in rural areas. Federal appropriations up to $7.5 million a year are authorized.

1960, Public Law 86-679: Extends the act for 5 years.

EXCEPTIONAL CHILDREN

1958, Public Law 85-926: The Fogarty-McGovern Act, authorizes Federal grants to help train teachers for the mentally retarded.

1958, Public Law 85-905: Authorizes Federal funds to acquire and distribute films with printed captions for use with deaf persons.

DEFENSE EDUCATION

1958, Public Law 85-864: The National Defense Education Act, authorizes $887 million in Federal funds over a period of 4 years to strengthen critical areas in education.

Includes science, mathematics, foreign languages; counseling, testing, guidance; graduate fellowships; research and experimentation in modern teaching tools (TV, films, etc.); and improvement in statistical and information services.

Mr. President, in the specific area of school construction—I should like to read from a report of the Legislative Reference Service dated February 1955.

This analysis treats of the historical role of Federal school construction activity.

CHAPTER II. HISTORICAL BACKGROUND OF THE QUESTION

(Contents: (A) Origin of Federal aid for school construction; (B) programs during the depression of the 1930's; (C) the World War II program; (D) postwar aid to December 31, 1954; and (E) legislative proposals and action, 1948-54.)

A. ORIGIN OF FEDERAL AID TO SCHOOL CONSTRUCTION

It might be said that Federal aid to school construction began with early land and monetary grants for the support of education in States formed from the public domain. Antedating the Constitution, the origin of these grants lies in an ordinance adopted by the Congress of the Confederation in 1785 for the disposal of public lands in the western territory.

As a result of this ordinance and subsequent action by the Congress of the Confederation and later by the Congress of the United States, education in each new State admitted to the Union received an endowment of public lands and in some cases monetary grants derived from the sales of public lands. However, these grants were for the establishment and support of schools in general. Some of the income from the early grants probably was expended by local communities for the construction of school buildings, but the Congress did not specify what portion of the lands or funds derived from the sale of them, if any, should be used for this purpose.

By furnishing sites for school buildings in some instances, and in other ways the early Federal land grants for the support of education undoubtedly gave an impetus to school construction.

In relatively recent years the Federal Government has extensively participated directly in financing the construction of public schools in times of (a) economic depression and (b) war or intensive activity for the national defense.

B. PROGRAMS DURING THE DEPRESSION OF THE 1930'S

During the economic depression of the 1930's the Federal Government provided large-scale financial assistance to communities throughout the Nation for the construction of public schools. The principal Federal agencies which disbursed Federal aid for school construction were the Public Works Administration (earlier called the Federal Emergency Administration of Public Works) and the Work Projects Administration (earlier called the Works Progress Administration). The methods of operation and policies of the PWA and of the WPA differed substantially.

In addition to making allotments for Federal public works the PWA advanced about $2.5 billion in loans and grants to local governments for public works. Besides thus aiding the localities in constructing schools, hospitals, et cetera, vital to community life, the PWA program provided much-needed employment.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. McNAMARA. I yield.

Mr. MORSE. I am very glad the Senator from Michigan has spoken of the

PWA Federal aid to education program. When I go about the country, to talk about Federal aid to education, I find that many persons labor under misapprehension in regard to the amount of money—the millions and millions of dollars—which the Federal Government has for many years contributed to education in the States. In some of my speeches I have stated that one of the most substantial programs by way of Federal aid to education was the PWA program itself. Many a school building in the United States was really built by the Federal Government, in large measure through PWA funds. Many taxpayers do not realize that.

Does the Senator from Michigan happen to have the total amount of PWA funds which were expended for education? He has given us the total of expenditures; but is that amount broken down so as to show the amount of money which was expended for education?

Mr. McNAMARA. Yes; I shall present those figures later.

Mr. MORSE. I have interrupted now simply to emphasize this point, because the Senator from Michigan is rendering a great service by placing this body of information in the RECORD for future reference.

The American people simply are not aware of the fact that they have been spending millions of dollars for many years for aid to education; but they seem to get some kind of blockage when such a program is proposed in a bill for general aid to elementary and secondary schools. However, the Federal Government has built many elementary and secondary schools.

Also, I think it will be found that the WPA program benefited education, too.

Mr. McNAMARA. There is no question about it. In addition to what the Senator from Oregon has stated, the amount of money involved has been spent without Federal intervention. School boards still control their operations. Down through a long series of generations there has been Federal aid, but there has not been Federal intervention. That is an old bugaboo. It is an old saw which is dragged out every time Congress considers such a bill.

I think this statement will help to underscore that point as well as the point which the Senator from Oregon has raised.

Since the chief aim of the PWA was employment rather than relief, jobs on PWA projects were generally not restricted to the needy unemployed; nor were the locations of the projects confined to those areas especially hard hit.

PWA made allotments from July 1933 through June 30, 1942, for 6,687 elementary and secondary school-building projects costing over $979 million. In the territories and possessions of the United States as well as in every State of the Union, communities participated in this program of school-building construction. The importance communities attached to this type of construction was shown by the fact that construction of school buildings comprised about 40 percent of all non-Federal projects for which PWA made allotments.

Besides assisting communities in school construction, the PWA, over a period of 6 years, at a cost of $6,141,000, built 90 educational buildings on Federal lands reserved for Indians.

Unlike the PWA program, the program of the Work Projects Administration, initiated in the summer of 1935, concentrated on providing work for needy unemployed persons rather than for construction workers in general. The WPA program utilized nonrelief workers only for special jobs for which qualified relief workers were not available.

The WPA did not make lump-sum grants to State and local governments as did the PWA. The WPA bore the primary responsibility for the operation of a program of useful public works, of which school construction accounted for about one-third of the total cost. Although States and localities played important roles in the program, the Federal Government directly paid project workers and purchased materials supplied by WPA.

Under the WPA program, over 5,900 new school buildings were constructed and more than 33,000 other school buildings were enlarged, improved, or modernized over a period of 8 years. The estimated total cost—

And this is the figure about which the Senator from Oregon asked—

was $466,700,000, of which the Federal Government provided about 71 percent. New schools built with WPA assistance in practically all the States ranged from small buildings in rural areas to large city institutions. The types and materials of construction and the percentage of sponsor contribution varied widely according to the needs and means of the localities.

During the depression period the Federal Government also provided aid to school construction through other agencies besides the PWA and the WPA. In the 1933–34 school year alone, the Federal Civil Works Administration furnished about $19,500,000 and the Federal Emergency Relief Administration about $44 million for the construction and improvement of educational facilities throughout the country. Under the out-of-school work program of the National Youth Administration, over a period of several years, about 3,700 small educational buildings were erected and about 18,000 were improved or remodeled.

Owing to the impossibility of accurately segregating some of the Federal expenditures by purpose, an estimate of the total expenditure by the Federal Government in aid to school construction during the depression of the 1930's might be misleading. However, it is certain that the Federal expenditure which might be charged to this specific purpose during the depression period amounted to hundreds of millions of dollars.

C. THE WORLD WAR II PROGRAM

Federal aid to school construction during the depression of the 1930's was distributed fairly generally throughout the United States and its territories and possessions. On the other hand, such assistance during World War II was limited to localities having swollen school populations due to the influx of military personnel and warworkers. Under the Lanham Act (55 Stat. 351) these communities received assistance in the construction and maintenance of community facilities, including schools.

The Federal Works Agency initially administered the Lanham Act program, which, along with other functions of the FWA, was transferred to the General Services Administration in 1949.

Under the Lanham Act, municipalities applying for Federal aid in the construction of community facilities were expected to contribute toward the financing of construction. However, the act authorized construction of facilities wholly at Federal cost in case the community was unable to contribute and the facilities were adjudged essential to the successful prosecution of the war. Facilities thus constructed were generally rented to the communities during the war and afterward sold to them.

School construction accounted for about 27 percent of all construction costs under the Lanham Act program. As of June 30, 1946, Federal allotments had amounted to $80,700,000 on 1,151 school projects constructed at a total cost of $98,400,000.

D. POSTWAR AID TO DECEMBER 31, 1954

From July 1946 until after the enactment of Public Law 815, 81st Congress, approved September 23, 1950, no Federal aid was provided for the construction of local public schools.

However, title V of the War Mobilization and Reconversion Act of 1944 had authorized loans to States and localities for the advance planning of public works, including schools. Under this program new planning advances were approved until June 30, 1947, when such advances ceased temporarily. In October 1949 Congress reactivated the program with an authorization of $100 million in Federal aid for advance planning of various community facilities, including schools.

With the enactment of Public Law 815, in September 1950, the Congress established a new program of Federal aid to school construction in federally affected localities.

Public Law 815 recognized a responsibility on the part of the Federal Government for the impact of Federal activities on school-construction needs in certain types of localities. The act provided for Federal payment of the cost of constructing school facilities in federally affected areas in the manner and to the extent prescribed in the law.

Title I of Public Law 815 relates to surveys and State plans for school construction. A brief statement of the provisions of this title appears in a subsequent section of this report.

Mr. SPARKMAN. Mr. President, will the Senator from Michigan yield for a question?

The PRESIDING OFFICER (Mr. BURDICK in the chair). Does the Senator from Michigan yield to the Senator from Alabama?

Mr. McNAMARA. I am happy to yield to the distinguished Senator from Alabama.

Mr. SPARKMAN. I wish to say that I, for one, am very much pleased to have the Senator from Michigan detail this program, which has meant so much to various parts of the country.

I happen to live in a city which is an impacted area—Huntsville, Ala.—near the Redstone Arsenal, which probably is responsibile for more than doubling the population of that area during the last 10 years. In fact, if I correctly recall the census figures, in the last 10 years the population there has increased more than 300 percent, and I would say the major cause of that is the activities of the Federal Government.

We have a fine school system there; but it would have been absolutely impossible for the city—and also the county, I may add, although the county as a whole has not been affected as much as the city has—to have taken care of the schoolchildren there, if it had not been for this program, which the Senator from Michigan is outlining at the present time.

I think it is excellent that he is reminding us of what the program has done in the past; and of course I am happy

that this measure has been brought to the floor at this time. Certainly the program should continue.

I have favored an overall program; but certainly the Congress should not adjourn without extending this program, which has meant so much to the federally impacted areas. So I commend the Senator from Michigan and his subcommittee, or is it the subcommittee of the Senator from Oregon?

Mr. McNAMARA. The chairman of the subcommittee is the Senator from Oregon [Mr. MORSE].

Mr. SPARKMAN. I commend them for reporting this measure to the floor, and I am indebted to the Senator from Michigan [Mr. McNAMARA] for his presentation.

Mr. McNAMARA. Mr. President, I wish to thank the Senator from Alabama for his remarks on the pending aid-to-education bill. I assure him that I know of his activities in this field, and also those of his colleague, the chairman of the Committee on Education and Labor, which handles these measures—the distinguished senior Senator from Alabama [Mr. HILL]. They have long been in favor of a program of this type, and I appreciate their continued help.

Mr. SPARKMAN. Let me say that in 1936, when I first ran for election to Congress, one of the few planks I had in my platform, and had printed on the back of a small campaign card which I used, was "Federal aid for education, without Federal control."

I remember that quite well. I advocated it then. I have advocated it ever since.

Mr. McNAMARA. I am certainly glad to have the Senator's help in the passage of this legislation.

Title II of Public Law 815 provided for Federal aid to school construction in federally affected areas. Following is a condensed statement of the principal provisions of this title.[1]

The title authorized, during the fiscal years 1951 to 1953 inclusive, the appropriation of necessary sums for grants to local school districts for emergency school construction. The need for such construction must have arisen from certain Federal activities.

The title provided for such Federal contributions in the amount of 95, 70, and 45 percent of the average per pupil cost of school construction in the State concerned, multiplied by the number of schoolchildren in three respective categories: (1) Children residing on Federal property with a parent employed on Federal property, if, during the current fiscal year they were 15 or more in number and constituted at least 5 percent of the estimated average daily attendance of the local educational agency; (2) children residing on Federal property partly or wholly situated in the same State as the local educational agency if they were 15 or more in number and constituted at least 5 percent of the attendance; and (3) children whose attendance resulted from activities of the United States if they were 20 or more in number and constituted at least 10 percent of the attendance, and if the construction of additional facilities would impose an undue burden on the taxing and borrowing ability of the local agency.

In the case of agencies having an average daily attendance of over 35,000 during the fiscal year 1950, the percentage-of-attendance requirement was doubled in each category, and provision was made for payment only on the basis of the number of such children in the three respective categories in excess of 5, 5, and 10 percent of average daily attendance during the current fiscal year.

The act provided for the deduction from grants of the amount of Federal assistance to local school construction since 1939, and authorized the reimbursement of local agencies which had already provided facilities for children in the categories named. It made special arrangements for cases in which the effect of Federal activities was determined to be temporary, and in which local agencies were unable to provide education to children residing on Federal property. It authorized the Commissioner of Education to reserve 10 percent of appropriations for special additional grants, in the most urgent cases, to local agencies unable to finance the non-Federal share.

The act prohibited all Federal direction, supervision, or control of the personnel, curriculum, or program of instruction of any school or school system of any local or State educational agency.

Total appropriations, to remain until expended, for school construction in federally affected areas under title II of Public Law 815 had amounted to $341,500,000 as of June 30, 1953.

As of that date the U.S. Commissioner of Education had reserved funds in the amount of $338,195,500 for the construction of 1,336 schoolbuilding projects to house approximately 350,000 pupils. These were located in the federally impacted areas in 44 States, Alaska, Hawaii, and Puerto Rico.

As of June 30, 1953, 191 projects had been completed and 972 were in varying stages of completion. On these 1,220 projects $169,190,368.16 had been paid to date of which $37,608,037.51 was for final payments on completed projects and $131,582,330.57 was for partial payments on the remaining 972 still under construction. In addition to the Federal funds expended and obligated, the applicants had furnished an additional $80 million, or approximately 25 percent, from State and local funds to supplement the Federal grants on the projects.

The administration of the law had accomplished in large measure its major purpose for the period of its effectiveness. Federal funds had not been made available, however, for (1) reimbursement of school districts for expenditures already made on account of increased enrollments due to Federal activities, and (2) aid to districts still experiencing rapid growth because of Federal activities. A new authorization of appropriations for these purposes, and other amendments to Public Law 815 were made effective by Public Laws 246 and 731, 83d Congress. Chapter III of this report contains a digest of these laws.

As of December 31, 1954, the Commissioner of Education had reserved funds on a total of 2,438 school-construction projects under all sections of Public Law 815 as amended by Public Law 246 and as provided under Public Law 357, the Third Supplemental Appropriation Act of 1954. (No funds had been reserved on projects under Public Law 731 as of that date.) Federal funds committed on these projects amounted to $501,280,000.

Of these projects, 1,242 were completed and 498 were under construction on December 31, 1954. Of the 698 approved projects not yet under construction, 266 were pending final revision under Public Law 357, which gave school districts an election as to whether to request reimbursement on previously constructed projects or to initiate new construction.

Total Federal payments under the program as of December 31, 1954, amounted to $370,085,000. Local funds added to approved projects partly financed with Federal funds amounted to over $170 million. All projects authorized to December 31, 1954, are estimated to house in excess of 600,000 pupils.

Mr. President, I turn now to our present needs in school construction.

The U.S. Office of Education, Department of Health, Education, and Welfare, has furnished us a chart, detailing our needs on a State-by-State basis.

I ask unanimous consent that it be printed in the RECORD at the conclusion of this portion of my statement.

The PRESIDING OFFICER (Mr. SMITH of Massachusetts in the chair). Is there objection to the request of the Senator from Michigan? The Chair hears none, and it is so ordered.

(See exhibit 1.)

Needs in housing and full-time public elementary and secondary day schools, by State—Additional instruction rooms needed (as of fall 1960)

Virgin Islands	97

Mr. McNAMARA. I refer to the table I had already obtained unanimous consent to have inserted in the RECORD. I should like, for the purpose of identification, to say that this is a table prepared by the Department of Health, Education, and Welfare and is headed "Housing in Full-Time Public Elementary and Secondary Day Schools by States."

I mention only a few of the States and the additional instruction rooms needed as of the fall of 1960. Connecticut, which according to this compilation prepared by the Department of Health, Education, and Welfare, stands third, 1,060 classrooms; Delaware, 155; Maine, 893; Maryland, 2,912; Massachusetts, 2,342; New Hampshire, 294; New Jersey, 3,839; New York, 16,000; and Pennsylvania, 6,548.

Dropping down the schedule, Michigan is short 10,762 classrooms, according to this compilation. I shall not take the time to read all these figures. Unanimous consent has been granted to have the table printed.

Mr. President, earlier this evening the distinguished majority leader expressed the desire that the Senate adjourn this evening between 8 and 8:30. The material I have prepared for this discussion of my school construction amendment is by no means exhausted. I expect to bring more of it to the attention of the Senate. However, in compliance with the desire of the majority leader, I am prepared to halt my presentation at this time until tomorrow.

Mr. CASE of South Dakota. Mr. President, I ask unanimous consent that there be printed at the conclusion of the remarks by the distinguished senior Senator from Michigan a statement by the distinguished junior Senator from Maryland [Mr. BEALL] with respect to S. 2393, indicating his support therefor.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BEALL

I support S. 2393, which would extend for 1 year aid to impacted areas under Public Laws 815 and 874. At the same time, I hope the Senate will adopt an amendment to extend the program for 2 or 3 years.

It is not necessary to justify the extension of these laws at this time. School districts throughout the country have already committed themselves to faculty assignments and curriculums for the 1961–62 school year. To allow these programs to terminate now, would be an unconscionable breach of responsibility on the part of the Federal Government. Even the strongest opponents of this program agree that any termination must be gradual, thus allowing a transition period during which the local school districts could make necessary adjustments in their budgets.

I favor a 2- or 3-year extension because I feel that this program should be considered separate and apart from any general education bill. Earlier this year efforts were made to solicit votes for a general aid bill by including an extension of the impacted areas program. If a 1-year extension is approved, I have no doubt that the proponents of a general aid to education bill will repeat their efforts next year.

The impacted areas legislation was not enacted to improve the educational standards of this Nation. Rather, the purpose of these laws is to compensate the States for lands taken off the tax rolls by the Federal Government. I submit that the provisions of these laws have no place in a general aid to education bill. For this reason, I support an extension of 3 years or, at the very least, the 2-year extension provided by the House bill.

Mr. McNAMARA. Mr. President, I ask unanimous consent that I may yield to my colleague from Michigan [Mr. HART], with the understanding that I shall not lose the floor, and that his remarks will follow the conclusion of my own speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, as a cosponsor with the distinguished senior Senator from Michigan [Mr. McNAMARA], of the bill S. 8, in both the 86th and 87th Congresses, it is obvious that I would be and am wholeheartedly in favor of his amendment.

However, all of us are aware of the inequities which might result from legislation which allows Federal funds to be spent solely for new construction.

Every Senator can cite districts in his own State which have exerted a monumental effort to build the schools necessary to house their children.

These districts have, at enormous sacrifice, passed bond issue after bond issue so that their children would not be on double shifts or receive their instruction in dangerous, overcrowded, ill-lighted classrooms.

These very same districts, because of this construction effort, are hard put to find the funds necessary to attract and keep a qualified teaching staff.

Whatever legislation Congress passes in the nature of a broadly based Federal assistance program should take into account the plight of such courageous and responsible school districts.

For that reason I have offered an amendment to the McNamara amendment which would permit States to allocate not more than 20 percent of their Federal grants for debt service.

Thus a district which had already taken care of its school construction needs, and is unable to raise the funds necessary to hire fully qualified teachers, would be able to use its Federal grant to retire existing construction obligations.

As a consequence, the funds which it is now spending from its own resources for construction obligations would be released for operational purposes.

The amendment I offer would, I believe, provide the kind of flexibility in a school assistance program which would enable the States to put the Federal money where they consider the need to be most justified. As other Senators have indicated, I regret that the broad comprehensive Federal aid to education bill (S. 1021), which the Senate passed earlier this year, has not become law. As in so many areas, here is one where we are running out of time. As we approach the end of this session I hope we can at least add funds for school construction, with the amendment which I propose permitting some flexibility and regard for the school districts which have done a real job.

Senator McNAMARA has told me that he will accept my amendment to his proposal, and I hope that the Senate shares his views.

Surely I hope that the Senate will limit to 1 year only the extension of the 2 impacted areas laws.

Mr. MORSE. Mr. President, will the senior Senator from Michigan yield, to allow me to ask the junior Senator from Michigan a question or two, with the understanding that my interruption will not cause him to lose the floor?

Mr. McNAMARA. I am happy to yield to the senior Senator from Oregon with that understanding.

Mr. MORSE. If I correctly understand the amendment of the junior Senator from Michigan [Mr. HART], I believe it is a very sound one. I should like to ask him the following questions:

Is the amendment offered because he recognizes that in a number of places in the Nation, including, apparently, a number in his own State, a considerable number of bond issues have been voted by the taxpayers, thereby increasing their taxes on their real property, although they felt they could ill afford those bond issues and the increased taxes; but when they had to make a choice between unreasonable taxes on their real property and denying their children the adequate educational opportunities which they believe they should have, of course they have been voting for the bond issues. Nevertheless, that has worked an injustice on those districts; and I understand that, therefore, the Senator from Michigan believes it is only fair that if Congress passes a school construction amendment or, next year, a bill, school districts which already have passed such bond issues and have raised their taxes accordingly should be able to receive some Federal aid to help them retire those bond issues. Is that the way the Senator from Michigan feels about this matter?

Mr. HART. It is, and for the reasons the Senator from Oregon has so excellently stated. That is exactly the way I feel about this matter.

Mr. MORSE. At the hearings this year some of the witnesses who stated that there is no need for Federal aid to education cited the instances in which bond issues had been voted by the people of various districts, and the conclusion those witnesses reached was that that fact shows that no Federal aid is needed. But I replied that it does not show that at all, and that all one need to do is

look at the districts in which the bond issues have been voted and determine whether the districts can afford the bond issues or whether the situations were such that the people were willing to make the further sacrifice—but an unreasonable one to expect of them—of floating the bond issues in order to provide their children with the education which the parents felt they needed.

And, of course, that means more than regressive taxation on the real property, and is very unfair to the real property owners; and, as we said at the time of the issuance of the bond issues, we did not feel that that was a proper way to treat the taxpayers.

So I enthusiastically support the position of the Senator from Michigan, and I believe there should be Federal aid to school construction; and then we should determine how many districts have imposed such bond issue burdens upon themselves. Certainly they should be in line to receive assistance to the extent of the whole or a certain percentage of the money for school construction made available by them, through the issuance of the bonds. I think the Senator has proposed 20 percent. That would be only pure equity.

Mr. HART. I was sure that would be the position of the Senator from Oregon, even though I did not inquire in advance as to his attitude.

Let me say that in dealing with an area such as this one, which involves education, I would always discuss with my distinguished senior colleague [Mr. McNAMARA] any amendment which I proposed to offer. I would do so for the reason that Senator McNAMARA long has been a leader in the effort to raise educational levels and his leadership predates the presence of either of us in this body. If I correctly understood his remarks—and he does not speak obscurely—he will accept this amendment.

Mr. MUSKIE. Mr. President, will the Senator from Michigan yield?

Mr. McNAMARA. I yield.

Mr. MUSKIE. In addition to the statement the Senators have made, I believe it should be stated that there are districts which have so committed their revenues to the servicing of such bond issues that for some years in the future they cannot be expected to do an adequate job in the fields of school construction and the payment of teachers' salaries. For that reason, as well as the other reasons stated, I hope the senior Senator from Michigan will accept the amendment offered by his junior colleague [Mr. HART].

Mr. McNAMARA. Mr. President, if I have the right—and I believe I do—to accept this amendment as a perfecting amendment to my pending amendment, I shall be happy to accept it, and also to thank the Senators who have spoken in favor of it.

The PRESIDING OFFICER (Mr. HICKEY in the chair). The Senator has a right to modify his amendment.

Mr. McNAMARA. Then I am happy to modify my amendment accordingly, at the request of my junior colleague [Mr. HART] and other Senators.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills of the Senate:

S. 1528. An act to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and of widows and children of certain deceased former officers and members of such forces, department, or service;

S. 1529. An act to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended; and

S. 1762. An act to regulate the practice of physical therapy in the District of Columbia.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H.R. 4669) to amend the law relating to gambling in the District of Columbia.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 4670) to amend the law relating to indecent publications in the District of Columbia; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. DOWDY, Mr. ST. GERMAIN, and Mr. HARSHA were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7035) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 15, 24, 36, 41, 45, 46, and 48 to the bill and concurred therein, and that the House receded from its disagreement to the amendments of the Senate numbered 7, 29, and 50 to the bill, and concurred therein severally with an amendment, in which it requested the concurrence of the Senate.

PROHIBITION OF TRAVEL OR TRANSPORTATION IN COMMERCE IN AID OF RACKETEERING ENTERPRISES—CONFERENCE REPORT

Mr. EASTLAND. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill—S. 1653—to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

ORDER FOR ADJOURNMENT TO 9 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate adjourns tonight, it adjourn until 9 a.m., tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FEDERAL MUTUAL SAVINGS BANK BILL

Mr. SPARKMAN. Mr. President, on July 1, 1960, for the senior Senator from Connecticut [Mr. BUSH] and myself, I introduced a bill to authorize Federal mutual savings banks—S. 3796. At the time I noted that leaders in the mutual savings banking industry requested us to introduce such a measure for study and discussion of its merits by interested groups and the public. On that day I also inserted in the RECORD an article by Mr. Arthur Upgren, an outstanding economist, who noted that the Commission on Money and Credit, originally set up by the Committee for Economic Development, would be studying the adequacy of the Nation's monetary supply. Mr. Upgren stated that no more important report for our welfare would be written in this decade. A copy of S. 3796 was invited to the attention of the Chairman of the Commission, Mr. Frazar B. Wilde, chairman of the Connecticut General Life Insurance Co.

I am pleased to report that the bill has received helpful consideration both from private and Government organizations.

In his preface to the June 1961 report of the Commission on Money and Credit, Chairman Wilde stated that Commission members were deliberately selected with the advice of a distinguished selection committee to provide a group with different backgrounds, including banking, business, Government, labor, and the professions. Noting that all members had broad, practical economic experience, he commented:

It could fairly be said that their conclusions represent a consensus of American philosophy and economic judgment today.

Among the recommendations made by this noteworthy Commission of private citizens in its report was the following:

The Commission recommends that Federal charters be made available for mutual savings banks.

In support of this recommendation, the Commission stated:

At present commercial banks and savings and loan associations may obtain Federal charters. Since only 17 States now provide for the establishment of savings banks, it is not possible to establish savings banks in two-thirds of our States. Federal charters

for savings banks would permit operation in any State, and this would stimulate competition and enterprise among financial institutions, improve the banking facilities in some communities, and perhaps encourage greater conventional mortgage lending activity in all areas.

Federal agencies expressed the opinion that establishment of Federal mutual savings banks should also be helpful in expanding the flow of funds into the Federal Housing Administration and Veterans' Administration sectors of the home mortgage market. Both FHA and VA responded to an invitation from the Senate Committee on Banking and Currency to comment upon S. 3796.

The Housing and Home Finance Agency stated:

This Agency believes that legislation providing for the Federal chartering of mutual savings banks would be desirable because it would encourage an increased flow of funds into the mortgage market.

It is probable that the encouragement which Federal chartering would give to the organization of additional mutual savings banks, now operating under State charters in only 17 States, would attract a portion of savings now being placed in commercial bank time deposits. This would tend to enlarge the supply of mortgage funds since mutual savings banks traditionally have invested more of their funds in mortgages than have commercial banks. Also, the anticipated geographically expanded operation should tend to improve the interregional flow of FHA insured and VA guaranteed mortgages. Finally, by increasing competition among different types of lending institutions, the net result would most likely be an increase in total savings placed with financial establishments, including those which customarily provide major sources of mortgage credit.

The Veterans' Administration had the following comment to make on that bill:

Mutual savings banks have actively participated in the GI loan program. As of December 31, 1959, nearly 30 percent of the outstanding VA guaranteed loans were held in their portfolios. To the extent that the proposed legislation would encourage new mutual savings banks in areas where the system would attract new savings for mortgage loan investment, it would doubtless aid veterans in their search for home loan financing.

In reply to a similar invitation from the Senate Committee on Banking and Currency, the Board of Governors of the Federal Reserve System stated that the bill merits careful consideration in determining whether it can make an important contribution to the economy.

Of all the Federal agencies that commented on that bill to the committee, only the Federal Home Loan Bank Board expressed fear that the conversion of savings and loan associations to Federal mutual savings banks would be accompanied by a decrease of funds flowing into the home mortgage market. However, certain evidence has since been developed to allay that fear. I am pleased to note that, in response to my June 22, 1961, letter to the new Chairman of the Federal Home Loan Bank Board, the matter of Federal charters for mutual savings banks is being discussed by a task force established by that Chairman. In anticipation of a favorable outcome of that study, the senior Senator from Connecticut and I have decided to introduce for study a revised version of S. 3796. The bill being introduced by us today will name the Federal Home Loan Bank Board as the chartering and supervisory agency for Federal mutual savings banks, instead of entrusting these functions to the newly created independent agency proposed in S. 3796. The revised bill will continue the S. 3796 requirement that each Federal mutual savings bank qualify for deposit insurance by the Federal Deposit Insurance Corporation.

Other changes from S. 3796 include the following:

The new bill deletes the authority of Federal mutual savings banks to exercise all powers now or hereafter generally possessed by State-chartered mutual savings banks. Thus, these Federal institutions will look to the provisions of this bill for their powers.

Expenses of examining Federal mutual savings banks may be charged to the institutions examined.

Some specific investment powers of Federal mutual savings banks have been expanded, but there has been deleted all power of the supervisory agency to expand investment powers beyond those expressly designated in the new bill.

Express authority has been granted to Federal mutual savings banks to issue certificates of deposit in $100 multiples for maturity of 2 years or more at an interest rate, terms, and conditions prescribed in the certificate.

Commercial banks accepting savings are expressly added to the list of thrift institutions to be protected against undue injury through the chartering of a Federal mutual savings bank.

Branching powers of Federal mutual savings banks have been enlarged to include States that permit chain or group banking even though they do not permit branches as such for financial institutions.

This new bill clarifies actions that an out-of-State Federal mutual savings bank may take within a State without being deemed to do business in that State.

All these changes are designed to improve the operation of Federal mutual savings banks and the public benefits to be derived from such institutions. Together with basic provisions retained from S. 3796, they combine the best features of State laws affecting mutual savings banks.

The senior Senator from Connecticut and I wish to afford an opportunity for further study of this improved version of a Federal mutual savings bank bill. Therefore, we join in introducing this bill near the end of the current session of the present Congress in the hope that further valuable comments on the bill will be ready for consideration by the Congress when it reconvenes early in 1962.

Mr. President, I ask unanimous consent to introduce, out of order, the bill to which I have referred, that it be printed at this point in the RECORD, and that there also be printed in the RECORD a section-by-section analysis of the bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and the analysis will be printed in the RECORD.

The bill (S. 2528) to authorize the establishment of Federal mutual savings banks, introduced by Mr. SPARKMAN (for himself and Mr. BUSH), was received, read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Mutual Savings Bank Act."

DECLARATION OF POLICY

SEC. 2. The Congress declares that, to carry out more effectively its responsibility for promoting maximum employment, production, and purchasing power in the national economy, it must facilitate and encourage an increased flow of real savings to finance new housing and other capital formation on a sustainable noninflationary basis. The Congress further declares that the increased savings necessary to the security and welfare of the individual as well as to the Nation should be provided within the private institutional framework of our competitive economy and within the dual banking system. These objectives will be advanced by authorizing the establishment of privately managed federally supervised mutual savings banks. Consistent with these objectives, the Congress recognizes the continuing need for maintaining and strengthening the vitality of our State-chartered banking system under the supervision of the various State banking departments. Federal mutual savings banks, together with State-chartered mutual savings banks, will bring to individuals in all States the opportunity of having mutual banks of deposit available to them which are dedicated to encouraging the practice of thrift, thereby increasing the total flow of voluntary savings in the economy. The record of mutual savings banks over nearly a century and a half of providing safety, ready availability of deposits and reasonable returns on these deposits, indicates that new Federal mutual savings banks will stimulate additional savings in the areas in which they are located. The record further indicates that these institutions will devote the bulk of their accumulated savings to the sound, economical financing of housing and home ownership. Moreover, additional funds will become available to support local business enterprise, urban redevelopment, and governmental capital outlays. The welfare of the public will be enhanced not only because economic growth will be fostered by capital formation but also because the earnings of Federal mutual savings banks, after expenses and provision for necessary reserves for safety of deposits, will be distributed entirely to depositors.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Board" means the Federal Home Loan Bank Board;

(2) The term "conventional loan" means a loan secured by a first mortgage or deed of trust on real property or a leasehold estate other than a loan guaranteed or insured by a Federal or State agency;

(3) The term "doing business" shall not be considered to include any one or more of the following activities:

(a) The acquisition of loans (including the negotiation thereof) secured by mortgages or deeds of trust on real property situated in a nondomiciliary State pursuant to

commitment agreements or arrangements made prior to or following the origination or creation of such loans;

(b) The physical inspection and appraisal of property in a nondomiciliary State as security for mortgages or deeds of trust;

(c) The ownership, modification, renewal, extension, transfer, or foreclosure of such loans, or the acceptance of substitute or additional obligors thereon;

(d) The making, collecting, and servicing of such loans through a concern engaged in a nondomiciliary State in the business of servicing real estate loans for investors;

(e) Maintaining or defending any action or suit or any administrative or arbitration proceeding arising as a result of such loans;

(f) The acquisition of title to property which is the security for such a loan in the event of default on such loan;

(g) Pending liquidation of its investment therein within a reasonable time, operating, maintaining, renting, or otherwise dealing with, selling, or disposing of, real property acquired under foreclosure sale, or by agreement in lieu thereof;

(4) The term "financial institution" means a thrift institution, a commercial bank, a trust company, or an insurance company;

(5) The term "mutual bank" means a Federal Mutual Savings Bank chartered under this Act;

(6) The term "State" includes the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Samoa and the District of Columbia;

(7) The terms "State of domicile" and "domiciliary State" mean the State in which a mutual bank's principal office is located; and

(8) The term "thrift institution" means a State-chartered mutual savings bank, a cooperative bank, a homestead association, a mutual savings and loan association, a mutual building and loan association, or a mutual bank.

CHARTERING OF MUTUAL BANKS

SEC. 4. (a) Upon written application by five signatories from among not less than twenty-one individuals acting in the capacity of qualified corporators named in the application, the Board may issue a charter for a mutual bank.

(b) Such a charter shall be issued whenever the Board finds that a mutual bank will serve a useful purpose in the community in which it is proposed to be established, that there is reasonable expectation of its financial success and that its operation will not unduly injure existing thrift institutions or commercial banks accepting funds from savers on deposit.

(c) Any mutual bank shall include the words "Federal", "Mutual", and "Savings" in its title.

(d) Any mutual bank, upon being chartered, shall become a member of the Federal Home Loan Bank of the district in which it is located or, if convenience shall require and the Board approves, shall become a member of the Federal Home Loan Bank of an adjoining district. Mutual banks shall qualify for such membership in the manner provided in the Federal Home Loan Bank Act with respect to other members.

CORPORATORS

SEC. 5. (a) Each corporator of a mutual bank shall be an individual of financial responsibility and good character and shall never have been adjudged a bankrupt, and shall, within such time after his election, and in such form as the Board may prescribe, file proof of his compliance with these requirements with the Board. Without in any way limiting, by the enactment of this subsection, the general regulatory power granted the Board by this or any other Act, the Board is hereby expressly authorized to prescribe standards of conduct for corporators, except that any such standards shall be no more (and may be less) restrictive than those set forth for trustees in section 6(e)(1).

(b) No person shall be a corporator of a mutual bank who is not a resident of the State in which the principal office of the mutual bank is located, except that one less than one-half of the whole board of corporators may be residents of other States.

(c) At their organizational meeting, the corporators shall adopt rules governing the conduct of their business and may amend them from time to time. Such rules shall set forth the number of corporators and shall prescribe that any number not less than one-quarter of those at the time in office shall constitute a quorum for the purpose of doing business. At such organization meeting, or any adjournment thereof, the corporators shall divide the total number of corporators into three classes of equal size, one class to serve for a term of four years, one class to serve for a term of seven years, and one class to serve for a term of ten years, so that at each election of corporators following the first meeting an equal number of corporators shall be elected. The requirements of this section shall be satisfied if the number of corporators in any class does not exceed by more than one the number of corporators in any other class. Thereafter, each corporator shall be elected for a term of ten years, and until his successor is elected and shall have qualified. Successor and additional corporators shall be elected, subject to the requirements of this section, by a majority vote of the corporators, including those whose terms are expiring, present at a duly constituted meeting. Any corporator may be removed from office for cause upon the affirmative vote of two-thirds of the whole number of corporators.

TRUSTEES

SEC. 6. The board of trustees of a mutual bank shall be elected by and from the corporators and shall consist of not less than seven nor more than twenty-five. No person shall be a trustee of a mutual bank who is not a resident of the State in which the principal office of the mutual bank is located, except that one less than one-half of the whole board of trustees may be residents of other States. The corporators shall, by majority vote of those present at their organization meeting, elect a board of trustees, in three classes in the following manner: One-third for a term of one year; one-third for a term of two years; and one-third for a term of three years. Thereafter trustees shall be elected to serve for a term of three years. The requirements of this section shall be satisfied if the number of trustees in any one class does not exceed by more than one the number of trustees in any other class. The office of any trustee shall become vacant if he shall cease for any reason to hold office as a corporator.

(b) The management and control of the affairs of a mutual bank shall be vested in the trustees. The trustees may adopt, amend and repeal bylaws governing the affairs of the mutual bank.

(c) No person acting as trustee of a mutual bank shall hold office as trustee, director, or officer of another thrift institution.

(d) The office of a trustee shall become vacant whenever he shall have failed to attend regular meetings of the trustees for a period of six months, unless excused during such period by a resolution duly adopted by the trustees.

(e)(1) It shall be unlawful for any trustee—

(A) to receive remuneration as trustee except reasonable fees for attendance at meetings of trustees or for service as a member of a committee of trustees;

(B) to borrow funds other than pursuant to section 11(10)(B) or in any manner become an obligor for funds borrowed from the mutual bank for which he is trustee; and

(C) to make a profit, directly or indirectly, from any property sold to or services performed for the mutual bank or in connection with any loan made by the mutual bank for which he is a trustee.

Nothing contained in this subsection shall be deemed to prohibit or in any way limit any right of a trustee who is also an officer of or attorney for the mutual bank from receiving compensation for service as an officer or attorney.

(2) Upon application by a mutual bank, exceptions may be granted to any prohibition contained in this subsection following a determination by the Board that the exception sought is equitable and in the best interests of the depositors of the mutual bank.

(3) The Board may from time to time grant, by regulation, exceptions of general application to the prohibitions contained in this subsection.

(f) No mutual bank shall deposit any of its funds except with a depositary approved by vote of a majority of all trustees of the mutual bank, exclusive of any trustee who is an officer, partner, director, or trustee of the depositary so designated.

COMMENCEMENT OF OPERATION

SEC. 7. (a) No mutual bank may commence operations except upon approval by the Board, which shall not be granted prior to qualification by such mutual bank as an insured bank under the Federal Deposit Insurance Act. Any mutual bank may so qualify in the same general manner as is provided for a State nonmember bank under that Act. No mutual bank shall continue operations if it shall at any time cease to be so qualified.

(b) No mutual bank may commence operations until there shall have been advanced in cash to the credit of such mutual bank, as an expense fund, such sums as the Board may require. Any such sums so advanced shall be evidenced by transferable deferred payment certificates. Outstanding certificates may have such terms and be repaid pro rata in such installments, and shall be entitled to receive interest at such rate, as may be approved by the Board.

RESERVE FUND

SEC. 8. (a) Prior to authorizing the issuance of a charter for a mutual bank, the Board shall require that there be advanced in cash to the credit of such mutual bank not less than $50,000, which shall constitute the initial reserve fund. All sums so advanced as the initial reserve fund shall be evidenced by transferable deferred payment certificates. Outstanding certificates may have such terms and may be repaid pro rata in such installments, and shall be entitled to receive interest at such rate, as may be approved by the Board.

(b) As soon as practicable following the close of each of its first ten fiscal years, each mutual bank shall credit to the reserve fund an amount not less than 10 per centum of its net earnings before interest for such preceding fiscal year and at the close of each fiscal year following the first ten fiscal years shall credit to the reserve fund such proportion of its net earnings for such preceding fiscal year, not exceeding 10 per centum, as the Board may by regulation prescribe; except that credits to the reserve fund shall be required only when the reserve fund shall not equal 12 per centum of deposit liabilities. A mutual bank may credit such further amounts to the reserve fund as it may determine.

(c) The reserve fund of an operating mutual bank shall be available only for the purpose of meeting losses.

BORROWING

SEC. 9. A mutual bank may borrow funds subject to such regulations as the Board may prescribe.

DEPOSITS

SEC. 10. (a) A mutual bank may accept any savings deposit and may issue a passbook or other evidence of its obligation to repay any such savings deposit.

(b) A mutual bank, subject to such regulations and restrictions as the Board finds to be necessary and proper, may accept deposits and issue its certificate of deposit therefor in units or denominations of one hundred dollars or multiples thereof for periods of not less than two years and agree to pay interest thereon at the rate, for the term and subject to the conditions specified on the face of such certificate.

(c) Each mutual bank may:

(1) reject any sums offered for deposit; and

(2) repay any deposit at any time.

(d) Except as otherwise provided in this Act, a mutual bank may pay interest on deposits from net earnings and undivided profits at such rates and at such intervals as shall be approved by its trustees.

(e) A mutual bank may at any time by resolution of its board of trustees require that up to ninety days' advance notice be given to it by each depositor before the withdrawal of any deposit or portion thereof; and whenever the board of trustees shall adopt such resolution, no deposit need be paid until the expiration of the notice period applicable thereto in accordance with such resolution. A mutual bank shall notify the Board in writing on the day of adoption of such resolution. Notwithstanding adoption of such resolution, a mutual bank may, in its discretion, permit withdrawal of all or any part of all deposits prior to the expiration of the notice period prescribed by such resolution. Any such resolution may be rescinded at any time.

(f) Whenever any mutual bank shall have been closed by action of its board of trustees or by the authority having supervision of such bank, as the case may be, on account of inability to meet the demands of its depositors, the Board shall appoint the Federal Deposit Insurance Corporation receiver for such closed mutual bank and the Federal Deposit Insurance Corporation shall accept appointment as receiver thereof. The Board and the Federal Deposit Insurance Corporation shall thereupon proceed to handle the affairs of the mutual bank in accordance with the provisions of the Federal Deposit Insurance Act applicable to a closed national bank.

(g) In order to prevent the closing of a mutual bank determined by the Federal Deposit Insurance Corporation to be in danger of closing, or in order to reopen a closed mutual bank, the Federal Deposit Insurance Corporation may exercise any or all of the authority conferred upon it by the provisions of section 13(c) of the Federal Deposit Insurance Act.

(h) The Federal Deposit Insurance Corporation, in its own right as receiver of a closed mutual bank, may exercise any or all authority conferred upon it in either capacity by the provisions of section 13(d) of the Federal Deposit Insurance Act.

(i) In order to facilitate the sale of the assets of an open or closed mutual bank to and assumption of its liabilities by another insured bank, as defined in the Federal Deposit Insurance Act, or to facilitate a merger or consolidation of a mutual bank with another insured bank, as so defined, the Federal Deposit Insurance Corporation may exercise any or all of the authority conferred upon it by the provisions of section 13(e) of the Federal Deposit Insurance Act, subject to the conditions therein expressed. Any mutual bank is authorized to contract for sales or loans and pledge any of its assets to secure loans effected pursuant to the provisions of such section.

INVESTMENTS

SEC. 11. A mutual bank may invest in the following: (1) Obligations of the United States and those for which the faith of the United States is pledged to provide for the payment of the interest and principal and obligations of any agency of the United States;

(2) Obligations of any State and those for which the faith of any State is pledged to provide for the payment of the interest and principal;

(3) Obligations issued by a city, village, town, or county in the United States or by a department, agency, district, authority, commission or other public body of the United States, or of any one or more States, but in so doing the mutual bank shall exercise the same degree of care and prudence that persons prompted by self-interest generally exercise in their own affairs;

(4) Any property improvement note issued pursuant to the provisions of title I of the National Housing Act; and other property improvement loans subject to such regulation as the Board may prescribe;

(5) Obligations of the Dominion of Canada or Provinces of the Dominion of Canada payable in United States funds;

(6) Bonds, notes, or other evidences of indebtedness which are secured by property registered and recorded first mortgages or deeds of trust upon legal property, including leasehold estates, if the security for the loan is a first lien upon the real property or leasehold estate, and subject to the following conditions:

(A) No investment in mortgages executed by any one mortgagor shall in the aggregate exceed 2 per centum of the assets of the mutual bank at the time the investment is made or $25,000, whichever is greater;

(B) No investment in any one mortgage shall exceed 2 per centum of the assets of the mutual bank at the time the investment is made, or $25,000, whichever is greater, or more than 80 per centum of the appraised value of a one- to four-family residence securing a conventional loan or more than 90 per centum of the appraised value of such a residence constructed within not more than ten years before the making of the loan, or more than 75 per centum of the appraised value of any other real property securing a conventional loan;

(C) No investment shall be made in a conventional loan secured by a mortgage on a one- to four-family residence unless the mortgaged property is located either within the State in which the mutual bank has its principal office or within a radius of one hundred miles of its principal office and unless the mortgage has a maturity of not longer than thirty years from the date the loan is made;

(D) No investment shall be made in a conventional loan if the aggregate unpaid principal of all conventional loans in which the mutual bank has invested exceeds 80 per centum of its assets at the time;

(E) A mutual bank may (i) participate with one or more financial institutions, trusts, or pension funds in any bond or note or other evidence of indebtedness secured by a mortgage or deed of trust which such mutual bank is authorized to invest in its own account: Provided, That the participating interest of such mutual bank is not subordinated or inferior to any other participating interest; and (ii) participate in the same securities with other than financial institutions, trusts, or pension funds: Provided, That the participating interest of such mutual bank is superior to the participating interests of such other participants;

(F) No investment shall be made in a mortgage upon a leasehold unless (i) the principal amount of the mortgage loan is not in excess of 70 per centum of the appraised value of the leasehold, and (ii) provision is made for complete amortization of the loan prior to the expiration of 80 per centum of the remainder of the term by periodic payments as the Board may prescribe; and

(G) Nothing contained in this paragraph (6) shall be deemed to prevent investment by a mutual bank in any bond, note, or other evidence of indebtedness which is guaranteed or insured by a Federal or State agency, or for which a commitment to guarantee or insure has been issued by a Federal or State agency;

(7) Bankers' acceptances eligible for purchase by Federal Reserve banks;

(8) Corporate securities, but in so doing the mutual bank shall exercise the same degree of care and prudence that persons prompted by self-interest generally exercise in their own affairs, and subject to the following further conditions:

(A) No mutual bank shall invest in any corporate obligation, other than pursuant to paragraph (10), that (i) will mature by its terms within one year from the date of issuance, or (ii) if issued or made in series, or repayable in installments, will have an average maturity as of the date of issuance of less than one year; and

(B) No mutual bank shall invest in stocks an amount greater than 5 per centum of its assets or 100 per centum of its reserve fund and undivided profits, whichever is the greater; and

(9) Obligations of a mutual bank or of a State-chartered mutual savings bank;

(10) Promissory notes of the following types:

(A) Any promissory note payable to the order of the mutual bank which is (i) secured by one or more mortgages in which a mutual bank may invest, if the amount so invested in any such note shall not exceed 90 per centum of the principal sum secured by such mortgage or mortgages. The assignment of every mortgage taken as security for any such note shall be recorded or registered in the office of the proper recording officer of the county in which the real property described in such mortgage is located, unless such mortgage or mortgages have been so assigned by a mutual bank; (ii) secured by any of the stocks and bonds in which a mutual bank may invest; or (iii) secured by a life insurance policy, to the extent of such policy's cash surrender value; and

(B) Any promissory note payable to the order of the mutual bank which is secured by the assignment of a deposit or share account in any thrift institution, if the amount of the investment in any such note is not in excess of the amount of such deposit or share account.

BRANCHES

SEC. 12. (a) A mutual bank may, with the approval of the Board, establish and operate one or more branches in the State in which its principal office is located, but only if and to the extent that any financial institution accepting funds from savers on deposit or share accounts and chartered by such State is authorized to establish and operate branches: *Provided*, That in any State where the law expressly prohibits branches or, in the absence of any such law, the establishment and operation of branches are not in conformity with the practice within the State, if the Board determines that chain, group or affiliated financial institutions operate within the State, a mutual bank may with the approval of the Board establish and operate one or more branches in the State.

(b) Before approving the establishment and operation of a branch office by a mutual bank, the Board shall make with respect thereto to the findings required prior to the granting of a charter to a mutual bank.

(c) Notwithstanding any provision of this Act, a mutual bank resulting from conversion, consolidation, or merger may retain and operate any one or more offices in operation on the date of such conversion, consolidation, or merger, and, in addition, may retain any and all unexercised branch rights or privileges enjoyed prior to such date, but only if such office is situated, or such branch right or privilege was exercisable, within the State in which the principal office is located.

CONVERSION

SEC. 13. (a) With the approval of the Board, and subject to all other provisions of this Act applicable to the chartering of a newly organized mutual bank, unless specifically excepted herein, any thrift institution other than a mutual bank may convert itself into a mutual bank upon the affirmative vote of not less than a majority of the votes cast by those entitled to vote upon the affairs of such thrift institution at a meeting duly called and held for that purpose, and shall thereupon possess the powers of and be subject to the duties imposed upon mutual banks under the provisions of this Act: *Provided*, That any such conversion shall not be in contravention of the laws under which the converting thrift institution is organized.

(b) The minimum requirements of twenty-one corporators and seven trustees prescribed by sections 4(a) and 6(a) shall not apply in the case of a thrift institution making application to convert to a mutual bank.

(c) Before approving any such conversion, the Board shall find that the thrift institution seeking conversion has the ability to discharge the duties and conform to the restrictions upon mutual banks and has previously so conformed to the extent required by the Board. However, such institution may retain and service all accounts lawfully held by it on the date of its conversion.

(d) Any mutual bank upon affirmative vote of a majority of its corporators may convert itself into any type of thrift institution organized pursuant to Federal law or the laws of the State in which its principal office is located, but any such conversion of a mutual bank shall be subject to requisite approval of any regulatory authority having jurisdiction over the creation of the thrift institution into which the mutual bank seeks to convert and no such conversion of a mutual bank shall take place unless under the law of the State in which such mutual bank is located the type of thrift institution into which the mutual bank is seeking to convert may, without approval by any State authority, convert into a mutual bank under limitations or conditions no more restrictive than those contained in this section with respect to the conversion of a mutual bank into such a thrift institution.

(e) Any conversion pursuant to this Act shall be subject to section 18(c) of the Federal Deposit Insurance Act.

MERGER AND CONSOLIDATION

SEC. 14. (a) (1) Subject to the provisions of section 18(c) of the Federal Deposit Insurance Act, any two or more mutual banks having their principal offices in the same State, or any one or more mutual banks and one or more State-chartered mutual savings banks having their principal offices in the same State, may (A) with the approval of the Board where the surviving or consolidated institution is a mutual bank or with the approval of the appropriate State authority where the surviving or consolidated institution is a State-chartered mutual savings bank, (B) upon the affirmative vote of not less than two-thirds of the corporators of each such mutual bank, and (C), where applicable, upon compliance with the procedure prescribed by the State, enter into an agreement of merger or consolidation. Thereafter the merger or consolidation shall be effective in accordance with the terms of such agreement.

(2) No mutual bank may participate in a merger or consolidation, when the surviving or consolidated institution is to be a State-chartered mutual savings bank, unless under the law of the State in which the mutual bank is located State-chartered mutual savings banks may participate without approval by any State authority, under limitations or conditions no more restrictive than those contained in this section, in a merger or consolidation in which the surviving or consolidated institution is to be a mutual bank.

(b) Before approving a merger or consolidation the Board shall give consideration to the purposes of this Act and the prospects of the surviving or consolidated mutual bank for financial success and its ability to discharge the duties and conform to the restrictions imposed upon a mutual bank.

(c) Upon such a consolidation or merger, the corporate existence of each of the constituent institutions shall be merged into and continued in the surviving or consolidated institution, which shall be deemed to be the same corporation as each of the constituent institutions.

(d) All rights, franchises, and property interests of the merged or consolidating mutual bank or banks or State-chartered mutual savings bank or banks shall be transferred to and vested in the surviving or consolidated institution by virtue of the merger or consolidation without the requirement under this Act of any deed or other instrument of transfer; and the surviving or consolidated institution shall be entitled to exercise all rights and privileges of the merged or consolidating mutual bank or banks, or the State-chartered mutual savings bank or banks, in accordance with the terms of the merger or consolidation agreement.

(e) The surviving or consolidated institution shall be responsible for all debts and obligations of the merged or consolidating mutual bank or banks or the State-chartered mutual savings bank or banks, in accordance with the terms of the merger or consolidation agreement.

GENERAL POWERS

SEC. 15. (a) For the purpose of carrying out its functions under this Act, a mutual bank—

(1) shall have indefinite succession;

(2) may adopt and use a seal;

(3) may sue and be sued;

(4) may adopt, amend, and repeal rules and regulations governing the manner in which its business may be conducted and the powers vested in it may be exercised;

(5) may make and carry out such contracts and agreements, provide such benefits to its personnel, and take such other action as it may deem necessary or desirable in the conduct of its business;

(6) may service mortgages for others;

(7) may appoint and fix the compensation of such officers, attorneys, and employees as may be desirable for the conduct of its business, define their authority and duties, require bonds of such of them as the trustees may designate and fix the penalties and pay the premiums on such bonds;

(8) may acquire by purchase or lease such real property or interest therein as the trustees may deem necessary or desirable for the conduct of its business, and sell, lease, or otherwise dispose of such real property or interest therein;

(9) shall have authority, notwithstanding any provision of this or any other Act or regulation, to exercise all the powers possessed now or hereafter by any mutual savings bank chartered by the State in which the mutual bank is located.

(b) In addition to powers expressly enumerated or defined herein, a mutual bank shall have power to do all things reasonably incident to the exercise of such powers.

ANNUAL REPORT

SEC. 16. The Board shall submit to the President for transmission to the Congress an annual report of its operation under this Act.

EXAMINATION

SEC. 17. The Board shall conduct an examination twice in each calendar year into the affairs and management of each mutual bank for the purpose of determining whether such bank is being operated in conformity with the provisions of this Act, any rules and regulations promulgated hereunder, and sound banking practice, but the Board, in the exercise of its discretion, may waive one such examination or cause such examinations to be made more frequently if considered necessary. The waiver of one such examination as above provided shall not be exercised more frequently than once during any two-year period. The Board may accept, for any year, in lieu of such examination of any mutual bank, an examination of the mutual bank in such year by the Federal Deposit Insurance Corporation. The expenses of the Board examination herein provided for shall be assessed by the Board upon mutual banks in proportion to their assets. The assessments may be made more frequently than annually at the discretion of the Board. The annual rate of assessment shall be the same for all mutual banks, except that mutual banks examined more frequently than twice in one calendar year shall in addition be assessed the expenses of the additional examinations.

TAXATION

SEC. 18. (a) No State shall impose or permit to be imposed any tax on such mutual banks or their franchise, deposits, assets, reserve funds, loans, or income greater than that imposed or permitted by such State on other similar local mutual or cooperative thrift or home financing institutions.

(b) No State other than the State of domicile shall impose or permit to be imposed any tax on franchises, deposits, assets, reserve funds, loans, or income of institutions chartered hereunder whose transactions within such State do not constitute doing business.

AUTHORITY TO APPOINT CONSERVATORS AND RECEIVERS

SEC. 19. (a) The Board may, in its discretion, take possession forthwith of the business and property of any mutual bank and appoint a conservator or receiver for such bank, whenever it shall appear that such bank—

(1) has violated any provision of this Act;

(2) is conducting its business in an unauthorized, unsound, or unsafe manner;

(3) is in an unsound or unsafe condition to transact its business;

(4) has neglected or refused upon proper demand to comply with the terms of any order, rule, or regulation of the Board; or

(5) has refused to submit its records and affairs for inspection by the Board or the Federal Deposit Insurance Corporation.

(b) The Board shall appoint only the Federal Deposit Insurance Corporation as receiver for any mutual bank.

(c) At any time within ten days after the Board has taken possession of the property and business of any mutual bank, any officer of such mutual bank may apply to the United States district court for the district in which the mutual bank has its principal office for an order requiring the Board to show cause why it should not be enjoined from continuing such possession and, if a conservator or receiver has been appointed, why such appointment should not be vacated; and the district court is hereby granted jurisdiction to hear such cause, to grant such injunction, to direct the Board to surrender such possession, to vacate such appointment, and to take such other action as is necessary or appropriate to carry out the purposes of this

section. Any such proceeding in the district court shall be given precedence over other cases pending therein, and shall be in every way expedited.

SEPARABILITY

SEC. 20. If any provision of this Act or the application of such provision to any person or circumstance shall be held invalid, the remainder of this Act and the application of such provision to any other person or circumstance shall not be affected thereby.

RIGHT TO AMEND

SEC. 21. The right to alter, amend, or repeal this Act is hereby expressly reserved.

The section-by-section analysis presented by Mr. SPARKMAN is as follows:

SECTION-BY-SECTION ANALYSIS OF THE FEDERAL MUTUAL SAVINGS BANK ACT

Section 1. Title: Federal Mutual Savings Bank Act.

Section 2. Declaration of policy: The purpose of establishing a system of Federal mutual savings banks is to promote thrift and use the accumulated savings for home financing and other investments.

Section 3. Definitions: The following terms are defined: "Board," "conventional loan," "doing business," "financial institutions," "mutual bank," "State," "State of domicile," and "thrift institution." "Thrift institution" includes mutual savings banks and mutual savings and loan associations. "Financial institution" includes thrift institutions as so defined, commercial banks, trust companies, and insurance companies.

Section 4. Chartering of mutual banks: Five signatories from 21 or more individual corporators may apply for a charter from the Federal Home Loan Bank Board. To issue a charter, the board must find the mutual bank will serve a useful purpose in the community, have reasonable expectation of financial success, and not unduly injure thrift institutions or commercial banks accepting savings deposits. Mutual banks must have the words Federal, mutual, and savings in their titles. Each must join the Federal home loan bank system.

Section 5. Corporators: Qualifications for corporators, who select trustees for their mutual bank, and their method of procedure, are prescribed. They are chosen for staggered terms of 10 years.

Section 6. Trustees: Qualifications for trustees of a mutual bank, who manage and control affairs of the mutual bank, are prescribed. The board numbers from 7 to 25. Restrictions against self-dealing are imposed. Trustees are elected by corporators for staggered terms of 3 years.

Section 7. Commencement of operation: Mutual banks must qualify for and maintain Federal Deposit Insurance Corporation insurance of deposits to commence or continue operations. Before opening, a mutual bank must have a cash expense fund in the amount required by the Board. Contributions to the fund will be evidenced by transferable deferred payment certificates.

Section 8. Reserve fund: Before obtaining a charter, a mutual bank must also have a cash initial reserve fund of $50,000 or more as fixed by the Board. Contributions to this fund will also be evidenced by transferable deferred payment certificates. For the first 10 years each mutual bank must place in its reserve fund at least 10 percent of net earnings before interest. Thereafter the percentage shall be fixed by the Board, not over 10 percent. The reserve fund need not be built higher than 12 percent of deposits. The reserve fund is usable only to meet losses.

Section 9. Borrowing: A mutual bank may borrow subject to Board regulations.

Section 10. Deposits: A mutual bank may accept or reject deposits and repay them any time. It may use a passbook or other evidence of its obligation to the depositor. It may issue certificates of deposit for 2 or more years in hundred dollar multiples and agree to pay interest at the rate specified in the certificate. It may pay interest on deposits from net earnings and undivided profits as approved by the trustees. It may invoke a 90-day advance notice of withdrawal. Any closed or weak mutual bank may be treated as specified in the Federal Deposit Insurance Act.

Section 11. Investments: A mutual bank may invest in Federal obligations, municipal securities, property improvement loans insured by FHA under its Title I or subject to Board regulation, Canadian Dominion or Provincial obligations payable in U.S. dollars, bankers' acceptances, corporate securities under the prudent man rule plus stated restrictions, mutual savings bank obligations, certain promissory notes, and first mortgage loans on real property under specified restrictions on class of loan, maturity, geographical limits and loan-to-value ratio. A mutual bank may participate in mortgage loans subject to requirements as to equality or priority of lien.

Section 12. Branches: With Board approval, a mutual bank may establish branches in the State of its principal office only to the extent any State-chartered financial institution can, or in chain or group banking States that otherwise permit no branch banking. The Board must first make the findings required for issuing a mutual bank charter. A mutual bank resulting from conversion or consolidation may retain all existing offices and unexercised branch rights within the State of its principal office.

Section 13. Conversion: With Board approval and subject to new charter provisions, any thrift institution may convert into a mutual bank, under the specified procedure. Such conversion cannot contravene laws of the State under which the converting institution is organized. Minimum requirements for corporators and trustees need not apply to converted institutions. To approve conversion the Board must find the converting institution can perform the duties of and meet the restrictions on, mutual banks. A converted mutual bank may retain all accounts lawful on the date of conversion.

A mutual bank may convert into any thrift institution, with approval of the authority regulating the resulting institution. Before a mutual bank can convert to a State-chartered thrift institution, the State must allow conversion in the opposite direction on no more restrictive terms. Conversion is subject to FDIC controls under section 18(c) of the Federal Deposit Insurance Act.

Section 14. Merger and consolidation: Mutual banks may merge or consolidate with each other or with State-chartered mutual savings banks in the same State (with State approval if the resulting mutual savings bank is State-chartered). The law of the State must allow State-chartered mutual savings banks to merge or consolidate with a mutual bank without State approval, before a mutual bank can merge or consolidate with a resulting State-chartered mutual savings bank. Before approving, the Board must consider the purposes of this act, the prospects of financial success and ability to perform duties and meet restrictions of a mutual bank. The corporate existence of all institutions taking part in a consolidation or merger is continued in the survivor, and all rights and obligations are automatically transferred.

Section 15. General powers: A mutual bank is expressly given general operational powers by this section. It also may exercise all powers possessed now or hereafter by mutual savings banks chartered by the State in which the mutual bank is located. A mutual bank is also given powers reasonably incident to the exercise of express powers.

Section 16. Annual report: The Board must submit an annual report to the President for transmission to the Congress.

Section 17. Examination: The Board must examine each mutual bank at least three times every 2 years, but may accept FDIC examinations instead. Expenses of examinations are to be assessed upon mutual banks in proportion to assets under a uniform annual rate, but additional examinations over two a year may be assessed against the mutual bank so examined.

Section 18. Taxation: No State shall tax mutual banks higher than they do similar local mutual or cooperative thrift or home financing institutions. No State other than the State of domicile shall tax mutual banks for transactions within the State that do not constitute doing business.

Section 19. Authority to appoint conservators and receivers: The Board may take over a mutual bank and name a conservator or receiver for any of the reasons listed in this section. It shall name only the FDIC as receiver. Within 10 days after takeover, any mutual bank officer may apply to the proper U.S. district court for an order to the Board to show cause why it should not be enjoined from continuing in possession. The court is empowered to vacate the appointment of a conservator or receiver if warranted. The court proceedings are entitled to precedence over other pending cases.

Section 20. Separability: If any provision of the act or its application to any person or circumstance is held invalid, the rest of the act and its application to other persons or circumstances is not affected by that fact.

Section 21. Right to Amend: The right to alter, amend, or repeal the act is expressly reserved.

Mr. BUSH. Mr. President, I am pleased to join my friend, the distinguished Senator from Alabama [Mr. SPARKMAN], in introducing a bill to authorize Federal mutual savings banks. For well over a century mutual savings banks have enjoyed an enviable and well-deserved reputation for public service and safety in my State of Connecticut and in other States where they provide service. Mutual savings banks were first established in the United States in 1816. The first mutual savings bank in Connecticut was organized in 1819 and is still operating successfully. Mutual savings banks now total 515 in number, of which 71 are located in my State of Connecticut. On the boards of trustees that guide the operations of mutual savings banks are found outstanding citizens of their communities. Mutual savings banks are located in 17 States in this Nation. All presently operate under charters issued by the respective States in which they operate.

Enactment of the bill we are introducing today will make it possible for mutual savings banks to operate in any State in this Nation, provided the qualifications for organization and operation are met.

Commercial banking operates under a dual system of Federal charters for National banks and State charters for State banks. Credit unions have the opportunity to organize under either Federal or State charters. Savings and loan associations enjoy the privilege of organizing under State charter or seeking a Federal charter from the Federal Home Loan Bank Board.

Our bill would remove the discrimination in this respect that now exists against the $42 billion mutual savings

banking industry by authorizing mutual savings banks also to seek Federal charters from the Federal Home Loan Bank Board. By this process, mutual savings banks could extend their location to States in which they presently cannot organize. The residents of these States would then have an opportunity to enjoy the benefits of local mutual savings banking.

On July 1, 1960, I introduced an earlier version of a bill—S. 3796, 86th Congress—to authorize Federal charters for mutual savings banks.

Meanwhile many private and governmental groups have studied its provisions. I note with satisfaction that the idea of Federal charters for mutual savings banks has had the benefit of considered study by the Commission on Money and Credit, a carefully selected group of members having broad, practical economic experience. This Commission operated under the chairmanship of a very capable gentleman from Connecticut, Mr. Frazar B. Wilde, who is chairman of the Connecticut General Life Insurance Co. The Commission in its June 1961 report recommended that Federal charters be made available for mutual savings banks. I believe that the Congress should give great weight to that objective recommendation of such a committee of private citizens that includes many who are expert in the field of banking and finance.

Under the presidency of my friend, Samuel W. Hawley, of Bridgeport, Conn., the National Association of Mutual Savings Banks has performed a most helpful service in collecting and evaluating the results of studies of S. 3796. The revision of the bill we are introducing today reflects many worthwhile suggestions made as a result of these studies. I think it most appropriate that the bill as so revised be introduced before the present session of the Congress ends, so that further careful study can be given to those provisions that presently seem to represent the best thought of the mutual savings banking industry and other knowledgeable groups that have taken the time to consider this idea. At an appropriate time during the next session of the 87th Congress, our bill will be ready for further congressional action. Enactment of a bill along these lines would bring to a logical state of development the dual banking system in the United States.

I commend this bill to the attention of my colleagues and others who may be interested in extending the field of public service rendered by the financial institutions of this country.

EXTENSION OF SALINE WATER CONVERSION PROGRAM—CONFERENCE REPORT

Mr. BIBLE. Mr. President, will the Senator yield so that I may call up a conference report?

Mr. McNAMARA. I will yield to the Senator with the understanding that I shall not lose my right to the floor.

The PRESIDING OFFICER (Mr. Boggs in the chair). Is there objection to the request of the Senator from Michigan? The Chair hears none and it is so ordered.

Mr. BIBLE. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7916) to expand and extend the saline water conversion program being conducted by the Secretary of the Interior. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER (Mr. Boggs in the chair). The report will be read for the information of the Senate.

The report was read, as follows:

CONFERENCE REPORT (H. REPT. No. 1158)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7916) to expand and extend the saline water conversion program being conducted by the Secretary of the Interior, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate, and agree to the same with an amendment as follows:

"In lieu of the language inserted by the Senate amendment insert the following:

"That the Act of July 3, 1952 (66 Stat. 328), as amended (42 U.S.C. 1951–1958), is further amended to read as follows:

"'SECTION 1. In view of the increasing shortage of usable surface and ground water in many parts of the Nation and the importance of finding new sources of supply to meet its present and future water needs, it is the policy of the Congress to provide for the development of practicable low-cost means for the large-scale production of water of a quality suitable for municipal, industrial, agricultural, and other beneficial consumptive uses from saline water, and for studies and research related thereto. As used in this Act, the term "saline water" includes sea water, brackish water, and other mineralized or chemically charged water, and the term "United States" extends to and includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

"'SEC. 2. In order to accomplish the purposes of this Act, the Secretary of the Interior shall—

"'(a) conduct, encourage, and promote fundamental scientific research and basic studies to develop the best and most economical processes and methods for converting saline water into water suitable for beneficial consumptive purposes;

"'(b) conduct engineering research and technical development work to determine, by laboratory and pilot plant testing, the results of the research and studies aforesaid in order to develop processes and plant designs to the point where they can be demonstrated on a large and practical scale;

"'(c) recommend to the Congress from time to time authorization for construction and operation, or for participation in the construction and operation, of a demonstration plant for any process which he determines, on the basis of subsections (a) and (b) above, has great promise of accomplishing the purposes of this Act, such recommendation to be accompanied by a report on the size, location, and cost of the proposed plant and the engineering and economic details with respect thereto;

"'(d) study methods for the recovery and marketing of commercially valuable byproducts resulting from the conversion of saline water; and

"'(e) undertake economic studies and surveys to determine present and prospective costs of producing water for beneficial consumptive purposes in various parts of the United States by the leading saline water processes as compared with other standard methods.

"'SEC. 3. In carrying out his functions under section 2 of this Act, the Secretary may—

"'(a) acquire the services of chemists, physicists, engineers, and other personnel by contract or otherwise;

"'(b) enter into contracts with educational institutions, scientific organizations, and industrial and engineering firms;

"'(c) make research and training grants;

"'(d) utilize the facilities of Federal scientific laboratories;

"'(e) establish and operate necessary facilities and test sites at which to carry on the continuous research, testing, development, and programing necessary to effectuate the purposes of this Act;

"'(f) acquire secret processes, technical data, inventions, patent applications, patents, licenses, land and interests in land (including water rights), plants and facilities, and other property or rights by purchase, license, lease, or donation;

"'(g) assemble and maintain pertinent and current scientific literature, both domestic and foreign, and issue bibliographical data with respect thereto;

"'(h) cause on-site inspections to be made of promising projects, domestic and foreign, and, in the case of projects located in the United States, cooperate and participate in their development in instances in which the purposes of this Act shall be served thereby;

"'(i) foster and participate in regional, national, and international conferences relating to saline water conversion:

"'(j) coordinate, correlate, and publish information with a view to advancing the development of low-cost saline water conversion projects; and

"'(k) cooperate with other Federal departments and agencies, with State and local departments, agencies, and instrumentalities, and with interested persons, firms, institutions, and organizations.

"'SEC. 4. (a) Research and development activities undertaken by the Secretary shall be coordinated or conducted jointly with the Department of Defense to the end that developments under this Act which are primarily of a civil nature will contribute to the defense of the Nation and that developments which are primarily of a military nature will, to the greatest practicable extent compatible with military and security requirements, be available to advance the purposes of this Act and to strengthen the civil economy of the Nation. The fullest cooperation by and with Atomic Energy Commission, the Department of Health, Education, and Welfare, the Department of State, and other concerned agencies shall also be carried out in the interest of achieving the objectives of this Act.

"'(b) All research within the United States contracted for, sponsored, cosponsored, or authorized under authority of this Act, shall be provided for in such manner that all information, uses, products, processes, patents, and other developments resulting from such research developed by Government expenditure will (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense) be available to the general public. This subsection shall not be construed as to deprive the owner of any background patent relating thereto of such rights as he may have thereunder.

"'SEC. 5. (a) The Secretary may dispose of water and byproducts resulting from his operations under this Act. All moneys received from dispositions under this section shall be paid into the Treasury as miscellaneous receipts.

"'(b) Nothing in this Act shall be construed to alter existing law with respect to the ownership and control of water.

"'SEC. 6. The Secretary shall make reports to the President and the Congress at the beginning of each regular session of the action taken or instituted by him under the provisions of this Act and of prospective action during the ensuing year.

"'SEC. 7. The Secretary of the Interior may issue rules and regulations to effectuate the purposes of this Act.

"'SEC. 8. There are authorized to be appropriated such sums, to remain available until expended, as may be necessary, but not more than $75,000,000 in all, (a) to carry out the provisions of this Act during the fiscal years 1962 to 1967, inclusive; (b) to finance, for not more than two years beyond the end of said period, such grants, contracts, cooperative agreements, and studies as may theretofore have been undertaken pursuant to this Act; and (c) to finance, for not more than three years beyond the end of said period, such activities as are required to correlate, coordinate, and round out the results of studies and research undertaken pursuant to this Act: *Provided*, That funds available in any one year for research and development may, subject to the approval of the Secretary of State to assure that such activities are consistent with the foreign policy objectives of the United States, be expended in cooperation with public or private agencies in foreign countries in the development of processes useful to the program in the United States: *And provided further*, That every such contract or agreement made with any public or private agency in a foreign country shall contain provisions effective to insure that the results or information developed in connection therewith shall be available without cost to the United States for the use of the United States throughout the world and for the use of the general public within the United States.'

"SEC. 2. Section 4 of the joint resolution of September 2, 1958 (72 Stat. 1707; 42 U.S.C. 1958 (d)), is hereby amended to read:

"'The authority of the Secretary of the Interior under this joint resolution to construct, operate, and maintain demonstration plants shall terminate upon the expiration of twelve years after the date on which this joint resolution is approved. Upon the expiration of a period deemed adequate for demonstration purposes for each plant, but not to exceed such twelve-year period, the Secretary shall proceed as promptly as practicable to dispose of any plants so constructed by sale to the highest bidder, or as may otherwise be directed by Act of Congress. Upon such sale, there shall be returned to any State or public agency which has contributed financial assistance under section 3 of this joint resolution a proper share of the net proceeds of the sale.'"

HENRY M. JACKSON,
ALAN BIBLE,

LEO W. O'BRIEN,
WALTER ROGERS,
JOHN P. SAYLOR,
CRAIG HOSMER,
Managers on the Part of the House.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. BIBLE. Mr. President, on August 31, the Senate debated and amended S. 2156, the saline water bill, sponsored by the distinguished chairman of the Senate Interior and Insular Affairs Committee [Mr. ANDERSON] and 17 other Senators from both sides of the aisle. After the third reading of S. 2156, the Senate took up the House measure, H.R. 7916, which had passed the House subsequent to the reporting by the Interior and Insular Affairs Committee of the Senate bill. The Senate struck out all after the enacting clause in H.R. 7916 and in lieu thereof inserted the text of the Senate bill as amended.

The House and Senate conferees on H.R. 7916, as amended by the Senate, met and after a full discussion reached an agreement.

The conference report was signed by all members of the conference. The principal provisions upon which the two Houses had differed and upon which agreement was reached by the conferees are as follows:

One. Appropriations of $75 million over a 6-year period are authorized for the research and development program. The House originally had authorized $50 million for a 5-year period, while the Senate had followed the recommendation of the Secretary of the Interior and had authorized $100 million over a 10-year period.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. BIBLE. I am happy to yield to the distinguished Senator from South Dakota, one of the outstanding leaders in the field of salt water conversion.

Mr. CASE of South Dakota. I am glad to note the report is a unanimous report on the part of the conferees. I have a couple of questions to ask the senior member of the conferees with respect to the provisions he has mentioned.

With respect to the change in the amount of authorization, as I understand, the research program is to be put upon a 6-year basis, and the amount to be available or authorized for appropriation is to be $75 million, which is half way between the $50 million originally proposed by the House and the $100 million proposed by the Senate.

Mr. BIBLE. That is true so far as the amount is concerned. Actually, the time was shortened. The Senate version, as the Senator will recall, authorized $100 million over a period of 10 years. The House version was $50 million over a period of 5 years. In the conference, we compromised between the $100 million and the $50 million, by providing $75 million, but we shortened the period of time for carrying out the program. I think we were in agreement completely on the point that the saline water conversion program should be accelerated, particularly on research in basic and applied sciences.

Mr. CASE of South Dakota. The language agreed to by the conferees would permit that. Does the language also provide that the research program may be continued 2 years, or that the appropriation will be available for an additional 2-year period of time?

Mr. BIBLE. The program could continue for an additional 2 years to permit fulfillment of contracts entered into during the 6-year period.

Mr. CASE of South Dakota. If a project is getting underway, or is midway, there will be 2 additional years in which to complete it?

Mr. BIBLE. The Senator is correct. That is for the purpose of completing contracts. I wish to make the RECORD clear.

Mr. CASE of South Dakota. That refers to contracts made within the period of 6 years.

Mr. BIBLE. There would be an additional 2-year period permitted for the purpose of completing such contracts.

Mr. CASE of South Dakota. Under that program will it be possible for the Department of the Interior, Office of Saline Water, to contract with municipalities for a part of that research program?

Mr. BIBLE. I should think that is abundantly clear. I invite the attention of the Senate to section 3 of the bill, which was unchanged in the conference. Section 3 of the bill provides that the Secretary of the Interior may cooperate "with other Federal departments and agencies, with State and local departments, agencies and instrumentalities." I think that language makes it abundantly clear that cooperation with the agencies mentioned, including municipalities, would come under the specific authorization.

Mr. CASE of South Dakota. Mr. President, I think the language is broad enough to cover that. I have asked these questions for the purpose of establishing the understanding of the senior Senator from Nevada as chairman of the conferees in this regard. I think it is a part of the legislative history, and it will make the record abundantly clear.

Mr. BIBLE. I may say that the House managers concur in this understanding of the provision. There was no difference between the Senate and the House versions as to the language I have read.

Mr. CASE of South Dakota. The Senator has referred to the deletion of the section in the Senate bill which would have authorized a special demonstration plant construction program.

Mr. BIBLE. Yes.

Mr. CASE of South Dakota. The Senator from Nevada has called attention to the extension of time in the basic Demonstration Plant Act, which is the act of September 2, 1958. I have a copy of that act before me. It provides authority for the construction, operation, and maintenance of not less than five demonstration plants.

The act went on to specify that not less than three should be designed for the conversion of sea waters and not less than two plants should be designed for the treatment of brackish waters.

Can the Senator state for the RECORD what balance there may be in the authorization of appropriations under the 1958 act which would be available during the period of the operation of the act, which was extended by the conference, as I understand, from the original 7 to 12 years?

Mr. BIBLE. Yes, we amended the 1958 act by extending it, as the Senator has pointed out, from 7 years to 12 years. The last section of the 1958 act provided for an authorization of $10 million. During the hearings on the Senate bill, the committee was advised that today approximately $7 million of this authorization has been appropriated, so there still is a remaining authorization of $3 million under the 1958 act.

Mr. CASE of South Dakota. The Senator has referred to $7 million as having been appropriated. I assume that amount is essentially obligated?

Mr. BIBLE. I think it is by straight appropriation. I understand most of it has been obligated.

Mr. CASE of South Dakota. So there remains approximately a $3 million authorization for appropriations which could be obligated subsequently during the extended period?

Mr. BIBLE. The Senator has stated my own understanding of the situation. There is substantially $3 million remaining of the original authorization of $10 million for construction of demonstration plants. This $3 million has not yet been appropriated; we extended the authorization.

Mr. CASE of South Dakota. Did the conferees make any recommendation or give any indication of their intent with respect to whether or not the amount available for appropriation should be devoted to the conversion of sea water or the treatment of brackish water, or were they silent in that respect?

Mr. BIBLE. We did not specifically deal with that point, because, as the Senator from South Dakota knows, during debate in the Senate on the measure we incorporated an amendment which he offered on the floor of the Senate to define saline water in rather broad language to include salt water, brackish water, and other mineralized or chemically charged water. The term "saline water" is carried throughout the act and reads back to the definition, which is a rather all-embracing definition.

Mr. CASE of South Dakota. The Senator from South Dakota is satisfied with the explanation. In view of the fact that the basic 1958 act authorizing the demonstration plants specified that not less than three plants should be devoted to the conversion of sea water and not less than two plants for the treatment of brackish water, and both those requirements have been met in the plants already designated, it is satisfactory to the Senator from South Dakota that, with the definition which embraces brackish water as well as ocean water, the determination of the greatest need for additional demonstration plants be left to the administrators of the act, and I have no objection on that point.

I merely want to bring out that the possibility exists, and I assume that the Senator will agree with me that the responsibility would rest with the Secretary of the Interior to determine where the greatest benefit could be achieved in placing additional demonstration plants.

Mr. BIBLE. The Senator is correct. The Administrator is charged with that responsibility. Of course, the Secretary of the Interior has established an Office of Saline Water in the Department of the Interior, with which the Senator from South Dakota is very familiar.

Mr. CASE of South Dakota. Mr. President, in conclusion, I wish to say to the distinguished Senator from Nevada that I think that we, as Members of Congress, and the people of the country as a whole are indebted to him and his coworkers on the committee and in the conference for presenting a good, workable bill in the conference report. I hope progress in the years ahead can be as significant to the country as the progress that has already been made.

Mr. BIBLE. I thank the Senator. I share his hope that we may have even greater acceleration of the program in the future.

Mr. MONRONEY. I join the Senator from South Dakota in complimenting the acting committee chairman who was charged with the handling of the bill, the senior Senator from Nevada, for achieving a very excellent result in the conference with the House. The bill was funded with only about $50 million when it came from the House and was limited to a 5-year period, and the Senate agreed to an amendment, of which I was the sponsor, increasing the program to $100 million for a period of 10 years.

I believe that with all the problems in arriving at an adequate compromise, the members of the committee have protected as well as possible the principal purpose of the Monroney amendment. The main purpose of the amendment was to accelerate the program as rapidly as humanly possible because of the great impact which we could achieve if we were able to unlock the secret of turning sea water into fresh water for human use and for the production of an adequate supply of food for hundreds of millions of people who live near the sea.

I should again like to ask the distinguished Senator whether the Appropriations Committees would be free to provide any portion of the $75 million which is authorized for research at any stage, rather than providing an equal amount for each year of the 6-year period. I would not like to see the program dragged out on a basis of equal annual appropriations in each of the 6 years.

It seems to me that the faster we can get the great scientific minds of America working to improve our already developing systems, the sooner we shall be able to say to the world that the genius of America has made this great contribution to science for life instead of science for death.

The program will have far greater impact on the minds of the people of the developing nations of the world than anything that we could do in outer space or in development of missiles.

If the conference report provides for acceleration beyond the 6-year average, which I understand it does, I think the conference committee has created a very satisfactory arrangement to move the program forward at an accelerated rate.

Mr. BIBLE. Mr. President, I respond to my distinguished friend from Oklahoma in much the same manner as I did when we discussed the same question at the time the bill was under debate in the Senate.

The Senate committee report makes abundantly clear that there is no intention to limit funds for the program on an annual basis by dividing the amount which was at that time in the bill, $100 million, by 10, or $75 million by 10, so that an equal amount would be spent each year. I think we made abundantly clear in the Senate report and I am of the impression—I have asked the staff to check it out—that there was a similar provision in the House report on the question of the flexibility and size of the program. We specifically so stated in our report. That is also my analysis of the bill as it comes to us from the conference. There is no intention of limiting any annual appropriation to a pro rata share of the total.

In a program involving a fast-moving science and technology, funds should be available to take advantage of the promising opportunities offered. That provision was written into the Senate report on the problem of the size of the program and the need for its acceleration.

I share the hope of the Senator from Oklahoma. That was one of the reasons why we shortened the program from a 10-year program to a 6-year program. We wished to score some breakthroughs, if possible, in the field of basic research and applied research, because it is in those fields that the real impetus must be given.

I think that the Senator from Oklahoma, as a member of the Committee on Appropriations, will realize that justification may be made for, say, a $20-million program in the first year of operation. The provision is not written into the bill. I do not want to mislead the Senator from Oklahoma. But I think the legislative history is very clear that the expenditures could be $20 million the first year, $20 million the second year, possibly $10 million the third year, and possibly $10 million the fourth year, or any other combination that developments might merit. There is no intention to limit the expenditures to equal annual amounts.

Mr. MONRONEY. I am very glad to have this bit of legislative history in the RECORD. What has been said, and what is contained in the original report, shows the great advantage of acceleration.

I would like to again raise another matter which perhaps is a little beyond the jurisdiction of the committee. As we develop these pilot plants, which are already beginning to prove an economical source of municipal water supply for human consumption, there is no limitation in the bill which would prevent the foreign aid agency from using its own funds to establish demonstration plants in extremely arid parts of the world, where water for human consumption is so desperately needed. In countries where starvation is a daily experience, because of the lack of food or lack of water, we could build pilot plants in order to demonstrate the progress that I feel will be made by our technicians.

Mr. BIBLE. In responding to the Senator from Oklahoma—again I do not want to mislead him in the slightest—title III of the bill as it came from the Senate, which was the title to which the Senator from Oklahoma has alluded, was deleted in conference.

This was a provision which was drafted by the administration and submitted to the committee. It was retained in the Senate version. There was considerable discussion on it during debate in the Senate. The bill as it comes from the conference does not contain that title.

That is, the open-end appropriation authorization for large-scale demonstration plants was deleted, and is therefore no longer in the bill. The thinking was that the great need today is in the field of basic and applied research, not in the need for more demonstration plants. There was a conviction on the part of many of the conferees that private industry was ready, willing, and able to construct operating plants.

I say to the Senator from Oklahoma that I feel section 8 of both the House and Senate versions of the bill, which was retained in the conference measure, states that there is hereby authorized appropriation of certain sums of money—$75 million for a period of 6 years, "*Provided*, That the funds available in any one year for research and development may, subject to the approval of the Secretary of State to assure that such activities are consistent with the foreign policy objectives of the United States, be expended in cooperation with public or private agencies in foreign countries in the development of processes useful to the program in the United States."

I take this to mean, in view of the fact that it is retained in the context of the research and development program, that expenditure of funds authorized by the bill is limited to developing processes in basic and applied research. I do not want to indicate that the bill now before the Senate provides authorization for construction of demonstration plants overseas with Federal funds made available by this program.

Mr. MONRONEY. The Senator and I are in agreement on this point. I did not mean to indicate that there are any funds authorized in this bill that would be available for such an operation. What I am saying is that as the virtues of this operation become apparent in this country, there is no limitation in the bill which would prohibit the use of foreign aid funds for certain demonstration projects, provided they were funded and authorized by the foreign aid bill.

Mr. BIBLE. The Senator's statement is correct. The point is that funds authorized by this particular measure for this particular program could not be used for construction of demonstration plants in foreign countries.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. BIBLE. I yield.

Mr. CASE of South Dakota. I should like to see this statement clarified a little. I have every desire that the foreign aid funds shall be used for the best benefits that can be derived from whatever expenditure we are making under the authority of the Foreign Aid Act; and, in my judgment, no better use could be made of those funds in many places in the world than by assisting in the development of a good water supply. A water supply is basic in any foreign aid development of improvement. I believe that foreign aid funds can be logically used for that purpose.

Also, I hope that the processes that we might develop here might give some guidance to those who expend the foreign aid funds. However, it is my understanding—and I should like to have a positive statement on it by the distinguished chairman of the conference committee—that, having deleted the section in the bill which authorized a new program of demonstration plants in the United States that funds in the bill and the $3 million balance out of the 1958 act would not be used to establish demonstration plants in other countries.

Mr. BIBLE. I think that is a correct statement. I do not believe we can use these funds for the development of demonstration plants in foreign countries.

Mr. MONRONEY. I agree with both of my colleagues. What I am trying to say is that the limitation on demonstration plants in the United States does not exclude the construction of plants which are otherwise eligible under the Foreign Aid Act, if they are funded under the Foreign Aid Act. Whatever technology develops from this program would be useful if interchanged; provided that no funds would be allowed to be transferred from this program to the foreign aid program, but plants would have to be funded by the foreign aid program. If it were eligible under that program, it would seem to me that we would be wise in trying two or three of these plants at strategic points of the world where it would do the most good in America's search for these secrets.

Let us take, for example, the area of the Sahara Desert where the problem of Algeria threatens the stability of the Republic of France. In that area has been discovered one of the world's largest fields of methane gas. There is no use for this gas. It cannot be bottled. It cannot be piped under the Mediterranean. Yet it might serve as the fuel which would make this process practical and produce fresh water comparable to surface water. It could accomplish a great deal in our effort to demonstrate America's scientific competence. Even though in the United States the high fuel cost of such a project would not make it possible to consider it an economical project, over there, with water so scarce, we might find it possible to use this gas for this purpose.

Mr. BIBLE. I thank the Senator.

Mr. President, I believe I can finish my presentation of the conference report in 2 or 3 minutes. First, I wish to read an additional statement from the report of the managers on the part of the House of Representatives:

The Department would have flexibility in the use of these funds in that no year-by-year limitation is intended. So both the Senate and the House have nailed that point down.

Now, as to the second major point of difference between the House and Senate bills. As has been made clear, the open-end appropriation authorization for large-scale demonstration plants, which the Senate had approved upon the recommendation of the Department of Interior, was deleted. Instead, the current authorization for construction and operation of such plants provided for in the joint resolution of 1958 was extended from the 7 years provided in the 1958 resolution to 12 years. No increase in appropriation authorization for construction and operation of demonstration plants was provided. The majority of the conferees were of the opinion that private industry is willing and able to construct and operate such plants.

The third point also has been discussed. Title III of the Senate bill as amended, which authorized technical and financial assistance to foreign nations for establishing saline water conversion plants in their countries, was deleted by the conferees. This provision had been in the draft of legislation submitted by the administration, and was adopted by the Senate. Since provision for construction and operation of demonstration plants in the United States was dropped from the legislation, the conferees did not believe that public funds should be used to assist foreign nations to construct and operate such plants in their countries.

The fourth point is the acceptance in its entirety of the Senate's patent provision. This provision insures that the results of research and developmental activity into saline water conversion undertaken by use of Federal funds, whether in the United States or a foreign country, shall be available to the general public. Included in the patent provision is protection for the owner of any background patent and the Secretary is authorized to make exceptions to the general rule in the interest of national defense.

Mr. President, the Senate conferees are convinced that the agreement reached between the managers on the part of the House and those of the Senate is a fair and reasonable compromise of the differences between the two Houses. The resulting measure is, in our opinion, a strong bill, and one that will accomplish the purposes of the legislation. Again I point out that the report was signed by each of the House and Senate conferees.

I move acceptance of the conference report on the part of the Senate.

The PRESIDING OFFICER (Mr. BOGGS in the chair). The question is on agreeing to the conference report.

The report was agreed to.

ORDER OF BUSINESS

Mr. METCALF. Mr. President, will the Senator yield to me so that I may make a statement, with the understanding that the Senator will not lose his right to the floor?

Mr. CASE of New Jersey. Mr. President, reserving the right to object——

Mr. McNAMARA. Mr. President, I shall be glad to yield if there is no objection.

Mr. CASE of New Jersey. Mr. President, reserving the right to object, I wonder if I may inquire as to the intention of my distinguished and beloved colleagues, as to how long they intend to occupy the floor tonight.

Mr. McNAMARA. I shall refer that question to the majority leader. I have no way of knowing. I am sure the majority leader has something in mind.

Mr. President, I ask unanimous consent that I may do so without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Michigan? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. All I can say is that I hope it will be possible for the Senate to adjourn some time between 8 and 8:30 p.m. I think that is a reasonable time.

Mr. CASE of New Jersey. It is not too early.

Mr. MANSFIELD. No.

Mr. McNAMARA. The Senator from Michigan is very happy to go along with the suggestion of the Senator from Montana, the majority leader.

Mr. CASE of New Jersey. I had no intention of interfering with the Senator's remarks.

Mr. McNAMARA. I assume I shall be permitted to yield to the junior Senator from Montana without losing my right to the floor.

Mr. CASE of New Jersey. I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Michigan? The Chair hears none, and it is so ordered.

Mr. METCALF. Mr. President, the yielding is with the further understanding that the remarks may be printed at another point in the RECORD, so that the remarks of the Senator from Michigan may continue uninterrupted.

The PRESIDING OFFICER. Without objection, it is so ordered.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provision of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. METCALF. Mr. President, I have some misgivings and trepidation about getting into the debate following the Senator from Oregon and the Senator from Michigan, who have made fine statements, who have fine records of knowledge of the educational problems, and who have demonstrated friendship for the boys and girls of America.

However, I feel that at this time we should reappraise some of the educational programs we have adopted in recent years and adopt some basic principles as to a measure of the program we shall enact for the future.

In my research on Federal aid to education in all its various components—and I have been associated with the program ever since I first came to Congress, 8 years in the House, and a year as a Member of this body—one of the best reports and one of the best analyses of the problem I have come across is a report of the National Advisory Committee on Education appointed by President Hoover in 1930. The report was issued in 1931.

The members of the Commission were all outstanding educators of that period. I was attending Stanford University at the time. Our great and distinguished dean of education on that campus was a member of the Commission. That was Mr. E. P. Cubberley. Other members of the Commission included the former famous and longtime Commissioner of Education, Mr. George F. Zook, former president of the University of Akron at Akron, Ohio; the man who later became secretary of the National Education Association, J. W. Crabtree, and others. Outstanding educators of that period participated in the survey and made a report of the National Advisory Committee on Education to President Hoover.

The commission said that the controlling principles and policies, in laying down the responsibility of the Federal Government with respect to education in the States, were as follows:

1. Responsibility: There are national responsibilities for education which only the Federal Government can adequately meet.

(a) From an early period of our national life, the leaders of the American people have recognized their obligation to cooperate in fostering the education of all the people, without regard to State jurisdiction.

(b) The children of the people in all the States are neither more nor less the potential units of popular sovereignty when regarded as potential citizens of the United States than when regarded as potential citizens of the various States.

(c) The collective citizenship of the United States is not different from the aggregate citizenship of all the States.

(d) The preservation of the spirit and the method of the American democratic civilization, which underlies all our governments, is an obligation of all the people, as expressing their will both through the Federal Government and the State governments.

2. Management: Although the educational obligations of each of the three levels of American government—Federal, State, and local—are equally full and binding, these obligations may and ought, in fact, to be discharged by each of these governments in a somewhat different manner.

(a) Our long political experience reveals that each type of governmental operation can best contribute to the provision and management of public education, if the different strengths and weaknesses manifestly inherent in Federal Government, State government, and local government are recognized in each case. Assignment of governmental responsibilities and function with regard to education should follow the inclusions and omissions of responsibilities and functions suggested thereby.

Obviously no one type of government should attempt to parallel all the responsibilities and all the functions of the others. Nor should we foster the disposition to locate all responsibility and commensurate authority in education upon any single governmental level. Together they should supplement, complement, and reinforce each other in the achievement of the common national purpose.

Our civilization seems to call for neither complete local decentralization, where we began, nor for the exercise of complete State power, which is the existing legal theory, nor for an increasing Federal management and control, toward which policy we have been recently tending.

(b) Experience seems to indicate that we require a balanced distribution of educational obligations and functions on all governmental levels. In some cases these functions will be exercised in different degree on more than one level; in other cases they will be specialized and exercised on a single level. Always the total governmental situation must be viewed as a whole since American popular sovereignty is a unit, though several governments with different geographical scope may be utilized in the full and final expression of the popular will.

There is the problem with which we are today confronted. At the Federal, State, and local levels we have responsibilities for education. But in order to carry out the responsibilities, we have a different manner and a different approach. At the Federal level we make a contribution. At the State level we may have equalization, establish standards for teachers, and establish courses of study. At the local level we have direct control by boards, commissioners, or whatever they are called, in the various local districts.

The Commission then continued:

3. Decentralization: It is particularly unwise to centralize in the Federal Government the power of determining the social purposes to be served by educational institutions or of establishing the techniques of educational procedure.

(a) Centralization is a radical departure from the longstanding American tradition of school management, which has given the American people a system of schools that is so responsive to the democratic popular will, need, and aspiration. It is most nearly free from social caste or class bias. In all its present trends it aims to discover and to cultivate in each member of the whole population the personal talents most useful to society and to the individual.

(b) A system of decentralized school management is best adapted to a democratic nation of wide geographical expanse and varied economic, social, and other human conditions. The political domination of education by a remote central government, managed by administrative officers far removed from local conditions and sympathies, has always led to the evils of bureaucratic unresponsiveness to local and to changing needs, to bureaucratic standardization, redtape, and delay, and to official insensitiveness to the criticism of far-distant parents and citizens. Education is of too intimate concern to the American parents to be brought under a far-removed civil administration which tends toward relative inflexibility.

(c) Partisan or class propaganda bringing itself to bear upon mature citizens in legislation is a serious enough difficulty for a democracy. Once it is allowed to operate on the plastic and uncritical minds of youth at school, democracy faces a catastrophe. A decentralized system of management and control of schools is the one absolutely reliable antidote to the easy capture of schools by the propagandists of an economic, social, or political cult.

A class or party may capture a central government by revolution or by some exigency of politics; it cannot as readily capture 48 States and more than 145,000 local school communities which really determine by their agreements what the national educational policy and procedure shall be. Two national school systems of Europe have been captured under centralized, national control of education. In the United States one or two States may for a time be the victims of propaganda on a single subject of instruction, but not all States on all subjects. A few misguided local communities may distort their schools with propaganda on a number of subjects. But the State law often, and the examples of other communities and States always check this tendency. A decentralized national system of schools, uniform in all essential respects because of the common response of all its units to the common soul of America, can never be completely captured.

Our highly decentralized school system is a peculiar and effective American characteristic. We alone among the democracies possess this final safeguard against a class or individual dictatorship which might usurp a central government, and by decrees indoctrinate the young with partial and prejudiced teachings designed to sustain and perpetuate class government, favorable to only some of the people, as opposed to a democratic government considerate of the interests of all the people.

That section again points out the same problem we have had, which is finding where the social issues will be determined, the problem of finding out who will decide what the textbooks will be, who the teachers will be, who will make the contracts with the teachers, hire and fire them. Who will make the decisions that will shake the minds of the boys and girls in the local schools with everyone working toward the end that control will be at the local level?

Awhile ago the Senator from Alabama [Mr. SPARKMAN] told us that when he first ran for Congress many years ago he had on his campaign card, "Federal aid to education without Federal control." They were thinking about the same things in those days.

When Mr. Hoover's Commission was studying the problem of decentralization of our school districts—about 150,000 in those days and about 40,000 in these days—there were considered ways to keep Federal control out of the courses of study, the curriculums, and the books that the boys and girls would work on in the local districts.

The report of the National Advisory Commission in paragraph 4 continued as follows:

4. Tax systems: The American people are justified in using their Federal tax system to give financial aid to education in the States, provided they do this in a manner that does not delegate to the Federal Government any control of the social purposes and specific processes of education.

(a) Such a policy is old, not new. It has been the accepted practice of the American people since the preconstitutional period. The simple policy of making land and money grants to the States for education in general was followed up to the Civil War.

(b) Such financial grants covering a considerable period in our history did not foster control of education in the States by the Federal Government. The grants were made in a manner to foster local initiative and self-government.

(c) Federal money grants given since the Civil War were made to foster specific types of education believed to be necessary for special groups of people. Many of the acts granting these subsidies define limited specific purposes for which the moneys granted may be used; they establish limiting conditions as to so specific a matter as length of class exercises; and they often provide that many details of the work are subject to the approval of Federal officials with authority to reject plans and withhold funds. True, these acts are not effective unless the conditions of the act are accepted by State legislatures. But when a State legislature, in order to secure the money grant, accepts those conditions, it thereby delegates to the Federal Government some of its own responsibility for control of the social purposes and specific processes of education.

(d) Changing economic conditions in the United States have increased the income disparities of States without relieving them of a common national obligation to educate each citizen resident within their boundaries. The drift toward greater fiscal disparities is indicated by such evidence as we have. If this should prove to be the case, Federal aid to education in general may prove to be a necessary fiscal policy.

(e) Adequate data are not now available to prove on economic grounds whether Federal grants to the States in aid of education are or are not justified. With the wide variations in the methods of taxation used in the various States and with the rapidly changing economic conditions, it is not at present possible to determine unequivocally whether Federal aid to education or to other public services will tend to retard or to promote reforms in local systems of taxation. Adequate studies on these points are needed, if the American people are to settle this vital question wisely in their own ultimate interest and not as a mere matter of guesswork, sentiment, and passing philanthropic impulse.

The Senator from Michigan [Mr. MCNAMARA] in his historical development of the way in which Federal aid to education has grown, has borne out and developed, since 1930, the same principle that this Commission brought out in the report.

The report of the National Advisory Commission continued:

5. Grants: If federally collected tax money is used to give financial aid to the States, it should be given to aid education as a whole and not as special grants for the stimulation of particular types of training.

(a) Our long experience shows that general Federal grants do not tend to interfere with our essentially American method of keeping educational management as close to the people as is consistent with effective service.

(b) The widely current notion that control of education always follows any and all types of financial grants is not verified by experience; this false generalization arises from our comparatively recent Federal attempts to stimulate and standardize special types of education in the States through money rewards and deprivals. Federal control followed, not from financial aid as a major purpose but from its use as an instrument for enforcing certain specific educational policies and methods in the States.

(c) Complete financial audit gives the publicity that protects the Federal Government and is an adequate safeguard against State expenditure of Federal funds for anything outside the broad educational purposes contemplated.

(d) Wisdom in State allocation and expenditure of funds given by the Federal Government is best guaranteed by full and detailed reports to the Federal Government. The printing and wide distribution of the same by the Federal Government will inform public opinion, the only competent check upon which popular government may rely in the long run.

(e) State governments are closer to the needs and aspirations of their communities than is the Federal Government. They can check results better than a more remote and centralized political authority. The smaller the area of governments, the more intimate, accurate, direct, and insistent is the criticism of administrative officers by citizens.

When a central government has jurisdiction over a country as geographically large, as industrially varied, as socially differentiated, as historically accustomed to local self-government, and as democratically constituted as is the United States, the inflexible rules inevitably associated with highly centralized administration seriously interfere with effective local action. Smaller governmental units have less difficulty in adapting their own procedures to their own conditions and needs.

(f) Increased Federal control and weakened local initiative have been distinct products of attempts to use the Federal Government to spread desirable, special types of education by money controls used to achieve quick, wide and uniform conduct of the special education stimulated.

Such use of special grants has steadily increased the tendency of the Federal Government to impose its educational policy on the State governments through the psychological influence of Federal participation, through bureau or board administration, and finally through specific legal enactments. Each succeeding special grant has tended to widen, intensify, and fix final control by a Federal agency.

Federal standards of procedure when first inaugurated generally represent the best selections from the then existent widely divergent, and spontaneous experiments of many local communities. Such experimentation tends to be discouraged and restricted after a decade or more of standardization under central governmental influences, and progress halts with the retardation of free inquiry and experiment.

(g) When special grants by the Federal Government are inaugurated as temporary and transitional policies, in order to meet some apparent emergency of national importance, they tend to become permanent to a far greater degree than when made by State and local governments. The administrative officers interested in the financing of such projects are more remote from the scene of local action. While theoretically the servants of the people, they operate closer to the seat of Federal Government and often have a greater argumentative influence in Congress than do the unorganized millions of people supposed to be served by the special grants. This is not true in anything like the same degree where a State government sets up a special, transient policy, and administration. A policy which has served its purpose is more readily revised or revoked in the States.

(h) Such Federal favoring of special types of education obstructs the growing American tendency and aspiration to see and deal with the child's life and with society's needs as a balanced whole.

A tendency to set up more than one system of educational management within the States seems to have inhered in the system of special grants and special managements set up by Federal grants, in spite of the natural resistance of the States.

Mr. HART. Mr. President, will the Senator yield?

Mr. METCALF. I gladly yield.

Mr. HART. I wonder if the Senator would not agree, in light of the section of the report he has read, that Members of Congress who voted for the NDEA program in fact must conclude that they are not greatly concerned about controls, because is it not true that the Federal Government under the NDEA program exerts a greater force and direction to education than would be true in the omnibus Federal-aid proposal? Specifically, did not Congress in the NDEA program, when it adopted it into law, say to the States, "You shall have the money provided you use it to teach A, B, C, D, and E"? A majority of Senators saw no danger in such a provision. Where is the majority now when we talk about an omnibus bill?

Mr. METCALF. The Senator has stated a point that would be very well to discuss now. I was building up to that very point. I am glad that the Senator from Michigan has injected it at this time. It is ironic that the very people who are talking to us about Federal control of education are the ones who are saying that we should extend the National Defense Education Act for 2, 3, or 4 years. The very ones who come in this Chamber to deplore the fact that a general aid to education bill would mean Federal control are the ones who write this indirect Federal control into the proposed legislation.

Mr. HART. Mr. President, will the Senator yield further?

Mr. METCALF. I yield.

Mr. HART. Is not the same irony involved when one of those who are half way along the road with us says: "I am for construction but not for teachers salaries"? Is he not in effect saying that the Federal Government will tell the State what to do with the money rather than letting the State use its own judgment?

Mr. METCALF. In their foresight and wisdom those people say, "We are going to use this as money reward or a deprival for the States."

Let me give the Senator from Michigan a specific example of the kind of Federal control that is built into the National Defense Education Act.

As the Senator knows, we have in one of the titles a provision that, in order to stimulate science and scientific education, we will match dollar for dollar on scientific equipment. In a little while I shall discuss the subject of matching.

However, in my State, a rather wealthy district built a new school. It is a very attractive school. They had a separate room set aside for a school library. When it came time to purchase the books for the school library, the commissioners of the district and the school trustees sat down and they said, "Wait a minute. We do not know how long the National Defense Education Act will be in effect. It is in effect now. For every dollar we spend for scientific equipment, we can get a matching dollar. So let us not buy any books for the school library this year. Let us buy some extra scientific equipment." So there is that beautiful library, empty, without a reference book in it. Yet they have established for themselves a backlog of scientific equipment, because they had the opportunity to get some matching funds under the National Defense Education Act.

I have cited a specific example. It means that the course of study is going to be distorted. It means that the trustees in the districts are always going to say, "We actually need an English teacher. We need to strengthen our history department. However, we can get a little National Defense Education Act money. So let us spend our money for a mathematics teacher, or someone in the foreign language department."

That is the very point that I wish to make. It is that we must be cautious about extending these emergency programs. Let us not make the National Defense Education Act a permanent program or semipermanent program until we have had an opportunity to do as was suggested in 1930 and has been suggested every since, to pass a general education law that will be fair and will relieve us of these inequities and will not bring about Federal control that we inherently find in these specialized programs.

The senior Senator from Michigan has pointed out how these programs have grown—the Smith-Hughes Act, the Vocational Act, the Distributive Education Act, the National Education Act, and so on. These are the specialized programs that he talked about. Time after time they have distorted courses of study in the curricular and have indirectly inspired Federal control and Federal supervision over these school districts.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. METCALF. I am glad to yield.

Mr. MUSKIE. I know that the junior Senator from Montana is a longtime friend of education and has become an expert in the field of this kind of control. I would like to ask what his impression is of the control exerted by the Federal Government in the matter of the impacted area program.

Mr. METCALF. I am glad the Senator from Maine has brought up the special problem connected with this subject, because as a Member of the House of Representatives I served on the special subcommittee of the Committee on Education and Labor that handled two of the extensions of this bill. I was chairman of that subcommittee the last time Public Law 815 and Public Law 874 were extended.

Mr. MUSKIE. It is my impression, from my experience with the school districts in my State, which have benefited from these programs—and we have had many of them—that there has been no Federal control, or at least there has been none which has been considered undesirable.

Mr. METCALF. The Senator's impression is correct. Time after time, from witness after witness, the challenge has been thrown during the hearings in the House—and I know the same thing has happened in the Senate committee—"Show me one example of Federal control over the textbooks or over the choice of teachers or over the curriculums in these impacted areas."

Of course there is some Federal control. Federal control must be had, for example, in connection with compliance with the Davis-Bacon provisions in connection with labor standards, and there must be some control in connection with the Walsh-Healey Act. However, there is no Federal control over education. That is what we are driving at.

Mr. MUSKIE. And no dictation as to the curricula or the educational policy that must be followed by the local districts.

Mr. METCALF. In the 11 years of this act the opponents of the act and the enemies of Federal aid to education have been unable to come forth with one example of dictation so far as curricula is concerned or dictation with respect to textbooks or courses of study.

Mr. MUSKIE. Would the Senator say that within the districts which qualify as impacted areas the Federal program is a general school aid bill?

Mr. METCALF. Of course it is a general school aid bill. As the Senator from Oregon has repeatedly said, this money even goes to pay the janitor and to buy the chalk. It is for operation and maintenance.

Let me point out another difference. Under Public Law 814, which is for the operation and maintenance of schools in impacted areas, the school district goes directly to the Office of Education. It makes its application directly to that office. There is no intervening State agency, such as we have put into S. 1021, in the Morse bill that passed the Senate. In connection with this general aid to education bill we have said that the money will go to the States, to be distributed as the State school officer or the person in charge of education in the State shall determine. However, under Public Law 874, the local district comes directly to the Office of Education and makes application direct to that office for money that is to be used for textbooks and teachers' salaries and for the operation and maintenance of the schools. In some districts, such as those across the river, more than 50 percent of the cost that goes for operating and maintaining the schools comes from the Federal Government.

If there had been any inherent danger, in the last 11 years it would have come out.

Mr. MUSKIE. The lesson to be learned from our experience and from the colloquy here today is that there is greater danger of Federal control under these specialized programs, such as NDEA, than there is from a general school aid bill. Is that not correct?

Mr. METCALF. Yes; because regardless of the good will we have, this indirect sort of Federal control creeps into a specialized program.

Mr. MUSKIE. I thank the Senator.

Mr. METCALF. I thank the Senator from Michigan and the Senator from Maine for their contributions.

Mr. HART. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. HART. I wonder, as a conclusion, whether we could not agree that we do not have overall support for Federal education?

Mr. METCALF. That is, general support for an education act that would provide that the State and local districts would determine where the Federal money would go would take care of most of the problems that we have involved in these specialized programs. If we stimulate some sort of specialized program it should be added onto a general Federal aid to education act instead of the other way around, whereby we pass a national defense education act, and a vocational education act, separately, and then we try to fill in the cracks with a very modest general aid to education bill.

Mr. MUSKIE. Mr. President, will the Senator yield once more?

Mr. METCALF. Gladly.

Mr. MUSKIE. I am tempted to ask the Senator this question. As I observe the almost overwhelming support which the impact area program has in both Houses of Congress, I am tempted to believe that whether or not the program for education gets support depends on whether or not it has been in effect. For example, if a general school-aid bill should ever pass and should be signed by the President, I suspect that it would have thereafter, whenever it came before Congress for renewal, the same kind of overwhelming support that the impact area legislation has.

Mr. METCALF. The Senator has made an argument, perhaps, against a general aid bill, because we have seen today the Senator from Oregon reciting some of the abuses that have crept into Public Law 874. Our friends who are in favor of a 2- or 3- or 4-year extension would continue the abuses. Before I am through I hope to be able to point out some of the inequities and injustices inherent in the basic law. It would be desired to continue those, too.

Mr. MUSKIE. I would suggest to the distinguished Senator from Montana that perhaps we ought to enact the amendment proposed by the senior Senator from Michigan and myself. That would be a step toward progress.

Mr. METCALF. I do not think it is quite long enough a step. I would prefer to take the long step that the Senate took earlier this year.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. METCALF. I gladly yield.

Mr. MORSE. I am very glad that the Senator from Maine has made the comment that he has made just now. I believe that we ought to pass in this Congress a general Federal aid to education bill such as S. 1021, which permits aid for teachers' salaries and school construction and school maintenance. Referring to what the Senator from Montana said a few moments ago, the responsibility is up to the local authorities to decide where they can best spend each Federal dollar for the benefit of the boys and girls going to school in their districts. That is the ideal. That is what I had hoped could be done this year. The Senate did it. I think it is most regrettable that the House did not do it. It is the program which the President stood for in the election of 1960; it is the program he has recommended this year.

The Senator from Maine is unanswerably correct when he says that if we cannot get that program, we ought to get at least the principle of a general Federal aid to education bill on the books. I do not quote anyone in the administration, but I say I am satisfied that the administration is dedicated to the goal of seeking to have the principle of Federal aid to education established. The amendment of the Senator from Michigan would do that.

We recall the controversy not so many weeks ago over the compromise package proposal which the Secretary of Health, Education, and Welfare, Mr. Ribicoff, representing the administration, tried to reach with our associates on the House side. For a time it appeared as though that package proposal might succeed. Had it succeeded, the principle of Federal aid to education would have been adopted. I did not like the package proposal for a good many reasons; but I had to admit that there was one feature of it which I thought outweighed its disadvantages: it would, at least, have written onto the statute books general, not special legislation, such as Public Law 815 and Public Law 874, or the National Defense Education Act. It would have retained the general principle of Federal aid to education. I am satisfied that if we could pass such a bill, as the Senator from Maine has stated, and have a little experience with it, the people would demand not only its continuance but its enlargement.

I think once we get across the bridge, on the other side of the stream, the main part of the legislative journey will have been completed. The people will then receive such legislation with open arms, because I think they will then come to realize how sound we are in seeking to get an assurance of funds which will be available to help the schoolchildren of the country for years to come.

We all know there is another very tough factor connected with this problem. It is one of the reasons why a barricade has been thrown up at the entrance to the bridge. That is, what are we to do about private schools? In my judgment, we cannot justify ignoring that problem in any of these discussions. I repeat my plea: Let us get the principle of Federal aid to public school education enacted. Then let us go ahead to place on the books another general law to provide Federal aid to private schools within the limitations which the Constitution imposes upon us, whatever those limitations are, whether it is the type of limitation contained in the Clark-Morse bill or some other limitation in another bill.

In the Clark-Morse bill, we have said that we will provide for loans subject to judicial review.

I am at a loss to understand why some of the advocates of private school assistance are putting those of us who are advocating this kind of legislation at the whipping post these days. They seek to give the impression that we are performing some disservice to private school education. We know also, that there are other groups which are doing the same thing to us, but for opposite reasons.

It does not make any difference to me where the boy or girl goes to school, so long as the aid goes to the boy or girl. We must keep our eyes on the educational needs of the boys and girls of America. We live under a constitutional system of Government which puts some limits on us. I favor staying within that constitutional framework, but I am glad the Senator from Montana [Mr. METCALF] is saying what he is saying tonight, and that the Senator from Maine is asking him these penetrating questions.

I have one further comment, if the Senate from Montana will bear with me. The fallacious argument which is being used by the private school advocates, that unless private schools are incorporated in the same bill, we are somehow discriminating against the taxpayers representing the private school groups, whether they are Catholic taxpayers, Baptist taxpayers, Presbyterian taxpayers, Quaker taxpayers, or whatnot. The argument is a complete fallacy. I say to my Catholic friends: Remember 50 percent of the Catholic boys and girls are attending public schools, not Catholic schools. When a bill for general Federal aid to public schools is passed, those boys and girls will be benefited, as will every Catholic taxpayer be benefited—not only the Catholic taxpayers who send their boys and girls to public schools, but also the Catholic taxpayers who send their boys and girls to Catholic schools, because as we come to the aid of the public school with Federal funds, we pave the way for a reduction in real property taxes for all taxpayers in the school district, including the Catholic taxpayers. It is the height of fallacy to argue that when the Senator from Montana and the Senator from Oregon fight for a general school bill for public schools, we are somehow, in some way, discriminating against Catholics. It is a completely fallacious argument.

When a public school bill is on the books, I have made it clear—and I certainly have demonstrated by my record that I deliver on a program—that I will press for an independent bill for loans to private schools. Let the extent to which we can go be legally determined. That is the way I think the problem ought to be handled.

I know, as well as does any other Member of the Senate, that a part of the reason why a school bill did not pass the House is the religious reason. We do not have time, from the standpoint of the security of the country, to let an issue such as the religious issue rise to becloud the problem which confronts us. I shall continue to fight for a public school bill and for a private school bill, because I know when I do that I am fighting for the benefit of the boys and girls who need the educational

development that Federal aid to education will give them. Without a Federal aid to education bill, we will sacrifice the full development of millions of minds of boys and girls throughout the country.

I thank the Senator from Montana and the Senator from Maine for making a distinct contribution to the RECORD of the debate by the colloquy which has just occurred between them.

Mr. METCALF. I thank the Senator from Oregon.

Mr. MUSKIE. I thank the Senator from Oregon. I should like to make a comment and then ask one or two more questions.

First, in my judgment, a national program of general aid to education is coming. It is coming because the country needs it. I think the people see it. They see it perhaps even better than do Members of Congress.

As an illustration of that point, the lower house of the Maine Legislature—and it is an overwhelmingly rural, Republican house, conservative by all its inclinations—last winter voted overwhelmingly in support of the principle of Federal aid to education. So the people see its necessity. It seems to me it is a national objective, imposed upon those of us who see it as a national objective, with a responsibility to move toward it as quickly, as best, and as far as we can. This is why I support the amendment of the senior Senator from Michigan.

I understand that among Senators who agree upon this national objective there is a difference of opinion as to the sound tactics—namely, as to what gains we should be prepared to sacrifice today, in order to make some progress. This is a matter of tactical judgment. I must say that those who, like the junior Senator from Montana [Mr. METCALF], have been in the Congress longer than I have, probably are in a better position to make that tactical judgment.

But I should like to ask a few questions. I understand that, aside from the impacted areas bill and the National Defense Education Act, only one school bill has been passed, and that is the school construction bill of last year. Is that correct?

Mr. METCALF. That is correct.

Let me emphasize a statement made in the opening remarks today of the Senator from Oregon [Mr. MORSE], namely, that in the previous Congress the House of Representatives passed a general Federal aid to school construction bill; and the Senate passed a very similar bill, and the senior Senator from Michigan [Mr. MCNAMARA] succeeded in having added to that bill an amendment which called for aid for the construction of schools. So, under our constitutional system, both Houses passed a general aid to education bill. But thereafter the House Rules Committee, by a vote of 7 to 5, prevented the bill from going to conference.

If we believe in the bicameral legislative system, which we have under the Constitution, we must believe there is a way to iron out the differences between the two Houses.

This afternoon we were talking about the lack of majority rule in the House of Representatives. But consider the lack of majority rule in the Congress when the Senate is not allowed to carry out its constitutional function because of a vote of 7 to 5 in a committee of the other body.

Mr. MUSKIE. It is too bad that we cannot have all the victories at one time. This year the House won a victory in connection with the Rules Committee.

Mr. METCALF. But that was the first general Federal aid to education bill that had ever passed the House of Representatives.

Mr. MUSKIE. Prior to that the House came close to passing a bill for aid to school construction, did it not?

Mr. METCALF. Yes, within 5 votes.

Mr. MUSKIE. So it seems to me, as it does to the senior Senator from Michigan, that an aid-to-school-construction bill holds the best promise of enactment during this Congress. The bill which lost by 5 votes in the House of Representatives came up during the Eisenhower administration, I believe, and it did not generate all the controversy that this year's bill has generated.

So it seems to me that the combination of experience, both in terms of the private school controversy and acceptance by the House, holds high promise for the success of a bill for school construction, if passed and approved by the Senate. This is my reason for supporting the McNamara amendment.

Mr. MORSE. Mr. President, will the Senator from Montana yield?

Mr. METCALF. I am glad to yield.

Mr. MORSE. Again I think the Senator from Maine has made a very signal contribution to the debate, and I am glad he has referred to the record under the Eisenhower administration. But there is one fact that cannot be forgotten, and it is that during the Eisenhower administration high spokesmen for the private school groups did not take the position that there had to be a combined bill which covered both the public schools and the private schools.

But the sad fact is that this year, under a Democratic administration, after the President campaigned on a promise of providing Federal aid to education, spokesmen for the private school groups take the position—for the first time—of "all or nothing." Therefore, not only the House, but they, too, are going to have to assume their share of the responsibility for the fact that we cannot get all our victories at one time, as the Senator from Maine has pointed out.

So we might as well face the fact that all the groups involved—the public school groups, the private school groups, and the Congress itself—should be willing to take this a step at a time—namely, to pass a public school bill, and then to do as much as possible for the private school group. The groups should stop shooting at each other, because, after all, when they get into power plays between the legislative forces, the only group that really suffers is the group composed of the boys and girls of America.

Mr. METCALF. I suggest to the Senator from Oregon that that is another one of the irons in connection with the consideration of this proposed legislation. When we have a general Federal aid to education bill before the Senate, the private school groups want to participate. But when we have a simple extension of Public Law 874 before the Senate—a bill which, as the Senator from Maine [Mr. MUSKIE] has pointed out, is a general Federal aid to education bill for districts which are unable to enjoy these benefits—we do not hear a word from our friends who called for aid to the private schools; we do not hear from them a word about the areas that are paying increased taxes, but are not getting the benefits of this general type of Federal aid to education legislation.

Mr. MUSKIE. Before I conclude this colloquy with the junior Senator from Montana and the senior Senator from Oregon—a colloquy which has been stimulating and educational for me—I should like to state that it seems to me that what is needed at this point in the session, in connection with this issue, is practical wisdom. I can understand—although I do not agree with it—the position of those who ideologically oppose the idea of Federal aid to education. That is their prerogative, and is a matter of their conscience; and I do not quarrel with their right to entertain those views. But to those who believe this is a national objective toward which the country must move in the national interest, I say we must apply to our ideal the kind of practical wisdom that has been enunciated by the Senator from Oregon [Mr. MORSE] and the Senator from Michigan [Mr. MCNAMARA] as they have addressed the Senate; and I hope we can get in support of the McNamara amendment the combined support of all those who believe in Federal aid in the national field of education.

Mr. GRUENING. Mr. President, will the Senator from Montana yield to me?

Mr. METCALF. I yield.

Mr. GRUENING. I should like to ask whether the Senator doubts—in view of the fact that earlier in the session the Senate passed an excellent aid-to-education bill—that the amendment of the Senator from Michigan will receive the support of this body. It is an excellent amendment, and it should be supported by the same vote by which the Senate earlier in the session passed the aid-to-education bill.

Mr. MUSKIE. I hope that will happen. But there seems to have developed a general psychology to the effect that "We cannot get an aid-to-education bill enacted at this time. So let us retire from the field, and prepare as best we can for the battle at the next session."

Personally, I do not believe the prospects then will be any better than they are now. I am willing to carry on the fight then if we cannot succeed now; but I believe that some of those who favor Federal aid to education have already thrown in the towel—believing that we cannot get such a bill through the House, and that therefore it is best to give up the fight at this time, and continue the fight next year.

My children have just returned to school, so I am willing to fight for the bill either now or next year. But I think it better to continue the fight now.

The Senator from Alaska may be correct in believing that the McNamara amendment will be adopted; but I am afraid he may not be correct in assuming that all supporters of Federal aid to education will support the McNamara amendment.

Mr. GRUENING. Mr. President, will the Senator yield for a further comment?

Mr. METCALF. I yield.

Mr. GRUENING. Believing, as I strongly do, in Federal aid to education, I think it is our duty to stand firm for a better bill and see this through. If those who are so concerned for Federal aid for impacted areas, and only for impacted areas, were as much concerned as they appear to be, perhaps they would be willing to accept something additional, like the McNamara amendment. They seem to be anxious for impacted areas and nothing else. It seems to me those of us who are concerned for all the schoolchildren should stand together and do something for all the schoolchildren, and not merely for those whose schools happen to be in impacted areas.

Mr. MUSKIE. The definition of an "impacted area" is an area whose ability to support a school system is affected by Federal activities. I suggest that the entire country is an impacted area by that definition. We are engaged in a total war, and that phrase has been used over and over again—a total war which we cannot hope to win unless we commit all our resources; and we cannot commit all our manpower resources to this war if we leave their development to the varying resources of 50 jurisdictions. Every school district of this country, by any realistic definition, is an impacted area and deserves the aid of the Federal Government.

Mr. METCALF. And there is a responsibility for the boys and girls in those districts.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. MORSE. I thank the Senator from Montana for his generosity and tolerance in yielding, but the Senator from Maine has stimulated me by his penetrating question and the comment made by the Senator from Alaska [Mr. GRUENING] causes me to make this comment. The Senator from Maine has said we need practical wisdom. We surely do. He has put his finger on a problem that concerns me. I always put my cards on the top of the table. I have the responsibility of being the floor leader on this bill. It is perfectly obvious that all afternoon I have not been champing at the bit to get to a vote; and the reason why I have not been champing at the bit is I do not think we have the votes yet. I think we need some passage of time in the Senate to reflect on the problem.

The Senator from Maine has talked about the need for practical wisdom and for unifying the leadership in regard to this matter. I wish to say something about that question for a moment or two. We have the leadership. We have it in the President of the United States. The President of the United States has made very clear his program. The President has suffered some setbacks in the House this year on education legislation. Up until now, the President of the United States has been able to get his program through the Senate. So we have this conflict between the two bodies.

We have now a proposal for extension of the Federal impacted areas law and the NDEA. The House has passed a bill which is not in line with the President's program at all—an extension that goes beyond 1 year; an extension which, in my judgment, pulls the rug out from under the President's program; an extension for a period of time which, in my judgment, will almost make certain, as I said earlier this afternoon, no general education bill next year if we pass the NDEA and impacted areas bill for the time as passed by the House.

Toward the end of the session our colleagues want to get home, or to Europe, or Africa, or Asia, or Latin America, or Outer Mongolia—anywhere but here. So I ask respectfully of our colleagues in the Senate, Are you prepared to accept temporarily a unicameral parliament for the United States of America—not a bicameral, but a unicameral parliament whereby you let the House of Representatives call the shots? I do not think either the House or the Senate should do that. I think differences ought to be adjusted in accordance with our constitutional processes. When the House is in disagreement with the Senate, or vice versa, we should get together to adjust the differences in a conference.

Now we have a mandate or a threat from the House that the Senate will either take its education bill on the extension or there will be no conference. My answer is, "Get on your way to Outer Mongolia, Europe, Tibet, or wherever else you want to go, if you do not want to stay here and transact the business that the people elected you to transact." The people did not elect a single Member of Congress to carry out that kind of legislative program, in my judgment.

So the Senator from Oregon is not in a great hurry to get to a vote on this question. I think we ought to have a few days of reflection here in the Senate, on the part of Republicans and Democrats alike, but particularly Democrats.

We all know that, as of the moment I speak, there are some Democrats who want to get this matter behind them. They are anxious to get to a vote, agree with the House, and go home, which means an extension as in the House program, and a further weakening of the President's position.

I am in a position where on this matter I can speak for the President, because I am his leader on the bill. I tell Senators again tonight, as I told them this afternoon, that the President does not want a 2-year extension. He wants a 1-year extension, because he believes that a 1-year extension is essential to his education program for next year. The President intends to keep his pledge on the matter of Federal aid to education. The President intends to do everything he can next year to get a general aid to education bill through Congress.

The Senator from Maine has said he is afraid chances will be no better next year than they are now. Our only hope is to take the question to the people between now and the time Congress convenes again. But if we pass a 2-year-plus extension on NDEA and impacted areas, we shall have given politician after politician the escape exit they are looking for. They will have satisfied the local interests, and that action is going to take the demand off them in enough jurisdictions in this country to the point where we will not have the votes next year to pass the bill which needs to be passed. Extend the law for only one year, and every local school district that comes under NDEA and federally impacted areas legislation is going to say, "Mr. Senator, Mr. Representative, what are you going to do about it this year?" Members of Congress will have to face up to the question again.

The President has told us he wants the program reviewed. He wants the time to present to the Congress the facts on the operation of the existing Federal aid to education program, the special programs the Senator from Montana is speaking about so eloquently here tonight.

I ask my Democratic colleagues, Does the President have the right to ask you to give him that support? Is not the support he is asking for really to carry out the Democratic platform? Are you going to deny the President this request, knowing that if you deny it to him you are going to weaken to a great degree the Democratic Party's promises to the American people on education? Is the President asking for anything unreasonable when he asks for a year's extension, which will take care of every school district in this country?

Not a single school district will suffer by a granting of the President's request. Every school district now receiving NDEA help in impacted areas help will be assured of it for another year.

We ask for leadership. We ask for practical wisdom. This is the President's wisdom.

Senators may say, "I am not bound to do what the President wishes me to do." Of course not. I do not know of any Senator who has demonstrated by his record more eloquently his honest, independent judgment, when he thinks the President is wrong, than has the senior Senator from Oregon.

I point out that what the President is asking cannot possibly damage a single school district in this country for the next year.

I make these remarks to my Democratic colleagues. I shall have some comments to make about the Republicans in a moment, but I am talking to Democrats now. I say to my Democratic colleagues in the Senate, "You ought to resolve this question in favor of the President." He is our leader for this

legislative program. He is the man, in behalf of all of us, who made the promises in the 1960 campaign. He is the man who took our party to victory in November 1960. He is the man who earned tens of thousands of votes upon the basis of the educational issue. He is the man who, in my judgment, on this issue ought to be supported by the Democrats in the Senate of the United States. He is the man to whom Senate Democrats should rally in view of the treatment he has received on the House side of the Capitol.

I do not think the Democrats in the Senate can countenance the course of action some Democrats took in the House against the leader of our party now in the White House. I think the time has come when, as Democrats, we must make perfectly clear that as a majority party we do not propose to let the Rules Committee of the House determine what legislation can be passed in the Senate and in what form it must be passed in the Senate. We must make clear that we shall not stand still for the position that if legislation is not passed in such a form as the House desires it will not even sit down in conference with us.

I say to my Democratic colleagues that whether we like it or not, this has now become—and it will be so interpreted across America in the months ahead—a clear party issue. The man on trial in connection with that issue is the President of the United States, John F. Kennedy. This bill happens to be the vehicle. This is the legislative issue which raises the question as to whether the Democrats in the Senate of the United States will rally behind their leader to support a 1-year extension of this program, thereby guaranteeing to every school district in this country a continuation of every dollar of aid it now gets under both the NDEA and impacted areas legislation.

One might say, "Senator, will that not drive Republicans away from us?" Not at all. Not at all, in my judgment, because I think many Republicans will recognize the soundness and merit of the points I am making. They will recognize that if we are to maintain the constitutional form of government set up as between the House and the Senate, with the separation of powers which exists between the two Houses—after all, Members of the Senate, even though they be Republicans, should support the proposal that we shall not let the House determine the form of legislation and the procedure to be followed by the Senate in considering legislation passed by the House, when it is legislation which ought to be passed by the Senate in accordance with its own policies.

I serve on a committee, which has had jurisdiction over this subject matter, with Republicans. I said earlier this afternoon, and I repeat tonight, we would not have had this proposed legislation before us all year long if we had not had Republicans on our committee who were educational statesmen, too. They recognize the importance of Federal aid to education.

I hope the Senate will reflect on the parliamentary situation confronting us. I am in no hurry to get to a vote. I agree with the Senator from Alaska [Mr. GRUENING]. We had better take a little time on this. I am perfectly willing to have it laid aside for a few days after we have made our case in chief, for people to reflect on it and for the country to be heard, because I will tell the Senators that once the American people take the time to know what this fight is all about I shall not worry as to whether the Senate will be sustained in the judgment of public opinion. Public opinion will be with us. We can take it before any jury. Any impartial jury will give us a unanimous verdict.

I am sorry I have taken so much time, but I thank the Senator from Maine [Mr. MUSKIE], because he made a call for practical wisdom. He was correct. I gave him the source of practical wisdom I think we ought to follow. That source is the President of the United States on this question. When the President asked for a 1-year extension and not a 2-year extension, I do not think local pressure from back home, any political consideration, any desire to get away quickly by capitulating to the House, can possibly be justified as a substitute for meeting the request of the President of the United States.

I say to fellow Democrats, "Relax. Study. Check back home. Look into the facts, such as the Senator from Michigan [Mr. MCNAMARA] and the Senator from Montana [Mr. METCALF] are putting into the RECORD."

After Senators have given this problem study, I have a feeling the vote may change. We may find we can get the program extended. We may adopt such amendments as the amendment of the Senator from Michigan. We may get a conference with the House.

I close on this note: What do Senators think would happen in a good many districts in this country if the Representative had to go back to face the fact that the reason the country did not get a bill passed was that the House would not go to conference with the Senate? We do not have to worry about the Senate's position in that kind of controversy. The responsibility will be clearly the responsibility of Members of the House of Representatives. They have asked for it. That is where I intend to put the responsibility.

I sincerely hope that when we finish with this debate a majority of our colleagues in the Senate will agree with us and that we shall get a 1-year extension, resulting in a conference with the House.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. GRUENING. I congratulate my good friend the senior Senator from Oregon for his great eloquence, and for his magnificent support of what to me is the most important legislation which could possibly be passed by the Congress.

We in this session have passed a great deal of excellent and important legislation. We passed a depressed areas bill. We passed an airport bill. We passed a farm bill. We have passed a number of excellent bills to carry out the President's enlightened domestic program, but I think no proposed legislation is comparable in importance to the aid to education bill, something which goes to the heart of democracy, which affects not only this generation but also generations to come.

I hope the Senator will stick to the fight, and I hope all of us who believe as he does will do our utmost to see the fight through.

Mr. MORSE. I thank the Senator from Alaska.

Mr. METCALF. Mr. President, I thank the Senator from Oregon for a splendid contribution to the debate and for a keen analysis of the questions which are before us at this time.

The specific question before us is how long to extend Public Laws 815 and 874. Around that specific question are all the other questions the senior Senator from Oregon has outlined so eloquently and so well. I hope Senators who are not present, who are not able to hear the remarks of the Senator from Oregon, will read the RECORD, and I hope it will change many votes.

I wish to go forward with the recommendation from the National Advisory Commission.

I ask unanimous consent that all the recommendations be printed at this point in the RECORD.

There being no objection, the recommendations were ordered to be printed in the RECORD, as follows:

RECOMMENDATIONS

The committee regards the foregoing principles and policies of dominant importance. Believing that they are the necessary guides in the evolution of Federal relations to American education and that it is essential to follow them if we would make the United States meet its responsibility for national aspects of education in ways that are consistent with our kind of democratic civilization, the committee submits the nine following specific proposals for action:

1. Continue special aid now in force: For at least 5 years and until the results of the finance surveys recommended in No. 4 below are adequate to provide a sound plan for an equitable and economical method of Federal financial assistance to the States, continue the special appropriations now in force for the purpose of aiding agricultural education and research, rural extension for adults, vocational education, and similar educational enterprises, but leave the States free to expend such moneys for the specific purpose designated without the requirement for matching of moneys and without Federal authority to approve or reject State plans.

2. Amend laws: Amend those existing laws which give or tend to give the Federal Government and its agencies power to interfere with the autonomy of the States in matters of education. These amendments should repeal all provisions that require the States and their local communities to match Federal funds or that grant power to the Federal agencies to approve or reject State educational plans, to prescribe the standards controlling instruction, or otherwise to supervise and direct educational or research activities within the States.

The foregoing discussion does not relate to Federal research activities in fields other than education save as these affect the autonomy of the States in the conduct of their educational affairs.

3. Restrict legislation: Enact no additional laws that grant Federal financial aid to the States in support of special types of education or that increase existing Federal grants for such special purposes as are already aided.

4. Study finances: In line with the study of school finance recently begun by the Office of Education, make further and continuing studies of tax systems, distribution of national income, living costs, public expenditures for eleemosynary institutions, bonded indebtedness, Federal aid to States for purposes other than education, and of such other features of the situation as may be necessary to understand the total economic, political, and fiscal organization of which the school system is a part. Such facts in particular should be sought as will reveal how far and by what methods the people are justified in using the Federal tax system to supplement State and local taxes in support of public education in the States in order to insure meeting fully the national responsibility for education.

Similar studies should also be made at once to answer two questions:

First: How far shall the Federal Government properly grant funds either to the States in support of specially designated institutions or directly to particular institutions?

Second: What are the right uses of the remainder of the public domain in the States for the uses of education?

5. Aid education generally: Make all future grants to States as grants-in-aid of education in general, expendable by each State for any or all educational purposes as the State itself may direct. Such grants should be made only after thorough educational and financial studies have shown to the satisfaction of the appropriating power that such Federal aid is justified. Such grants should in no case be flat grants of an equal amount for each State, but should be apportioned to the States on the basis of adequate educational and financial studies. Such grants should be made for a definite and not an inconclusive period, and be subject to review at the close of every 10-year census period, when needed readjustments may be made to meet changed conditions. The only restriction placed by Federal legislation on such educational grants should be the provision that every State, when it accepts the grant, agrees to make each year to the Federal headquarters for education a full report on all questions on which the Federal headquarters for education may require information concerning the manner in which the State has used the grant.

6. Restrict audits: Restrict the audits of the Federal Government to those made by the Treasury Department merely to determine whether or not monies granted have been spent for the general or special educational purposes as defined in the several Federal acts of appropriation, without making audit an indirect method of controlling or determining educational standards and processes.

7. Limit emergency aid: Emergency grants made by the Federal Government to meet some special and transient crisis involving the use of education should be restricted to financial aid to investigate the problem, to disseminate the needed information, and to promote cooperation among all the States and local communities. A new Federal agency may be created for this temporary purpose if the needs are such as to necessitate this, but financial grants to such a new agency should be made for a strictly limited period, and not renewed.

8. Create adequate Federal headquarters: Create an adequate Federal headquarters for educational research and information, so organized as to serve both as a reliable source of comprehensive, correlated, and accurate information regarding national aspects of education for all concerned in the States, Territories, and outlying possessions, and as a cooperating center for all Federal agencies with respect to the educational aspects of their work.

9. Increase appropriations: Increase the Federal appropriations for educational research and information service by the Office of Education, by the Federal Board of Vocational Education, by the Extension Service and the Office of Experiment Stations in the Department of Agriculture, and by other offices or bureaus of the Federal Government primarily concerned with the stimulation and improvement of various types of education in the States; and provide ample facilities to these offices for supplying to all concerned the results of research and statistical studies through publications and conferences.

Mr. METCALF. I wish to emphasize that the National Advisory Commission made recommendations that are particularly pertinent to the debate today. They said that we must continue the special aid now in force, and recommended that it be phased out.

No. 3. But we enact no additional laws that grant Federal financial aid to the States in support of special types of education or that increase existing Federal grants for special purposes as are already aided.

The Senator from Oregon said that President Kennedy had asked that the program be reviewed, but periodically the administration has asked that it be reviewed before.

In 1956, in his educational message, President Eisenhower said:

In continued recognition of the special school enrollment problems created in many communities by military and civilian activities of the Federal Government, I am recommending the extension for 2 years of the authority for providing assistance in paying for new school buildings in federaly affected areas.

Listen to this statement:

With the enactment of legislation to authorize general Federal assistance for school construction, the necessity for the further extension of special Federal aids for construction, and for maintenance and operation in these school districts will require reconsideration.

That was President Eisenhower's statement in 1956.

In 1958 he said:

Schools in federally affected areas: The Federal Government has a responsibility for aiding school districts when it creates serious financial problems for them. It has recognized this responsibility in the past by providing grants to help build and operate schools in districts where enrollment is swelled by Federal activities. Experience with these programs, however, suggests that they should be modified; many of the communities for which grants have been made no longer have problems as acute as those suddenly generated by the migration of workers and families to them during the Korean crisis.

In view of the continued maintenance of a substantial Defense Establishment with shifting locations, authority for grants for construction and operation of schools should be extended, but the assistance should be restricted to instances where the Federal personnel both live and work on Federal property. However, grants for operation of schools on behalf of people living on taxable property should be gradually reduced during an adjustment period, and then terminated.

The special increase in Federal employment during World War II, which led to the enactment of this legislation in 1950—

That is the impacted area legislation—

has been superseded by a relatively stable Federal Establishment. In many cases the presence of Federal installations in the community adds to rather than detracts from the revenue base for the support of schools.

President Eisenhower then came out in support of the proposal of the senior Senator from Michigan:

The pressing need now is not for aid to federally affected districts on the basis initiated in 1950, but for general aid to help localities with limited resources to build public schools.

So we have before the Senate S. 2393 to extend the impacted program for 1 year. The President this year asked for a review. President Eisenhower asked for a review and reappraisal several times during his administration. We have a program that started as an emergency program and has been extended 1, 2, and at one time 3-year periods. But we have never sat down and considered just what the equities of the program are as compared with the permanent general school program, and it is time for us to do so. One of the best features of S. 1021 when it passed the Senate was that it provided for just such a review and just such an appraisal.

This afternoon in his opening address the senior Senator from Oregon pointed out some of the abuses and some of the misuses of Public Laws 815 and 874. He pointed out specifically examples in school districts that had been uncovered by the Comptroller General and investigators from the Office of Health, Education, and Welfare. In the few minutes that I have remaining I should like to point out some of the inequities and injustices that are inherent in the basic law that need to be reanalyzed and reappraised.

The basic principle then under which we have adopted Public Law 874 is that the Federal Government should provide assistance in the operation of the schools in those local school districts whose school revenues are impaired as a result of Federal activity on tax-exempt Federal property.

The same is true of Public Law 815. It is founded on the concept that where we have a Federal activity on tax exempt Federal property, and the local school facilities are overcrowded, then the Federal Government has a responsibility for providing for adequate facilities.

The reason for this Federal responsibility is that the children of parents who live and work on tax exempt Federal property are a burden on the district whose chief source of revenue is the property tax, and therefore the district cannot achieve a property tax on tax exempt Federal property. The ordinary tax resources available to finance school programs, either construction or operation and maintenance, are not available to the districts. Once such an entitlement is established, however, the Federal Government does not carry out its

responsibility on a basis of in lieu of taxpayments.

It carries them out rather on a measure of how much it would cost to educate that individual child.

During the hearings there was quite a discussion as to whether or not Public Laws 815 and 874 were in lieu of a tax program. Of course, they are not. In many areas the amount of money the Federal Government pays for the education of boys and girls who are federally affected would be 10 or 20 times as much as the tax revenues lost as a result of tax-exempt properties.

In other areas where we have highly complex and complicated Federal installations, perhaps the taxes lost would be many times the value of the local contributions. But we are looking at the cost to the school district for educating the federally affected boy and girl.

The Commissioner of Education ascertains the local contribution rate per child, which would be equal to the current expenditures per child in generally comparable districts.

That is subject to a proviso that the rate is not less than one-half the State average per pupil cost or one-half the national average per pupil cost in the second preceding year.

For example, in fiscal 1960 the average local contribution rate varied from $158.62 to $411.60. The average nationally was $208.82. But here is another one of those inequities in the legislation.

We talk about the local contribution rate. However, the State government also contributes. I am calling attention to table 26 on page 244 of volume 1 of the hearings. I ask unanimous consent that the table may be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 26.—*Estimated percent of revenue for public elementary and secondary schools received from the State, 1960–61*

	Percent
50 States	40.1
1. Delaware	79.6
2. South Carolina	71.8
3. North Carolina	71.1
4. Hawaii	70.8
5. New Mexico	70.6
6. Alabama	69.1
7. Louisiana	68.2
8. Georgia	64.1
9. Washington	61.6
10. West Virginia	57.0
11. Kentucky	55.3
12. Tennessee	55.2
13. Nevada	55.1
14. Florida	55.0
15. Mississippi	54.4
16. Pennsylvania	51.1
17. Arkansas	50.8
18. Texas	50.0
19. Alaska	47.5
20. Wyoming	45.2
21. Michigan	43.6
22. Utah	43.4
23. Oklahoma	42.8
24. New York	42.4
25. Arizona	40.9
26. California	40.4
27. Minnesota	37.9
28. Maryland	36.5
29. Virginia	36.1
30. Idaho	32.6
31. Indiana	31.4

TABLE 26.—*Estimated percent of revenue for public elementary and secondary schools received from the State, 1960–61*—Con.

	Percent
32. Maine	29.6
33. Missouri	29.4
34. Oregon	29.4
35. Ohio	29.1
36. North Dakota	28.3
37. Massachusetts	26.9
38. Connecticut	26.6
39. Montana	25.3
40. Rhode Island	24.9
41. New Jersey	23.8
42. Kansas	22.7
43. Colorado	22.1
44. Vermont	22.0
45. Wisconsin	21.3
46. Illinois	20.4
47. Iowa	11.6
48. South Dakota	8.2
49. New Hampshire	5.7
50. Nebraska	4.0

Mr. METCALF. Mr. President, the table demonstrates that Delaware, for example, has 79.6 percent of the cost for public elementary and secondary schools paid by the State government. Nebraska, which is No. 50 on the list, had about 4 percent paid by the State government. So the local contribution rate varies from something around 4 percent, in the case of Nebraska, to 80 percent in the case of Delaware. Here is one inequity that should be taken care of and rectified in subsequent legislation. If we extend the act for 2 or 3 or 4 years, we will not have the opportunity to rectify that inequity which is inherent in the present law.

Several situations occur wherein the Federal responsibility arises and payment is made under existing law.

The first is where the parent both lives and works on tax-exempt Federal property. Under these circumstances there is no question but that the local school district which educates these children should be reimbursed for the cost incurred by the school district. Under Public Law 874 the Federal contribution is an amount equal to the amount of the local contribution in the comparable areas. We have said that there is a permanent and continuing Federal responsibility in such a situation, and have made that permanent legislation. So that most of the situations that have been brought forward in the past few weeks as horrible examples which would work great injustices and hardships on school districts, if we failed to extend the law, just will not come about, because they are the result of children whose parents both live and work on Federal property, and the permament and continuing and general law is not affected by whether or not this law is continued.

The second situation is where parent works on tax-exempt Federal property but lives off the property. In such a case under Public Law 874 the district is entitled to one-half the local contribution rate. Sometimes, as when this law was first enacted, it was 70 percent. It has varied. There is no magic about this ratio. It is an arbitrary figure which is fixed at 50 percent now. That is unfair.

It is clear, under the premise which is the basis for aid, that if the Federal property is in the district in which the school is located, that school is entitled to assistance. However the Bureau of the Census report demonstrates that in the Nation as a whole commercial and industrial property constitutes only 27.7 percent of the locally assessed real estate tax base. In no State does the local assessed valuation of all commercial and industrial property reach 40 percent. The national range is from 37.1 percent to 9.3 percent. Therefore, the arbitrary rate of 50 percent gives a definite tax break to the districts that are the beneficiaries of aid under this category B. Some of them get as much as 40 percent of a tax break, but they all get a tax break under this provision.

On the other hand, where the parent lives in one school district and works on tax-exempt Federal property in another district, there is no point in giving any assistance. There is no need for one school district to tax real property in another, whether it is tax-exempt Federal property or private property. This is an indefensible proposition, whereby we pay category B for children whose federally-affected parent lives in one district and works in another, or, as locally, who lives in one State and comes to work in the District of Columbia. Perhaps that is why the State of Virginia, for example enjoys a 9.3 percent contribution from the Federal Government, when the national average is only 3.6 percent.

The third situation is where parents live on tax-exempt Federal property but work off that property. In such a case the payments are the same as in the other category, or Federal category B pupils. However, as we have seen, the tax impact is entirely different in such a situation because the majority of the local property tax is on residential property, rather than on commercial or industrial property.

These situations create an inequity in the other direction. However, the objections are the same when the district in which the parent lives is not the same district in which the school is located.

Then we have the so-called category C, where we have industrial or manufacturing property. An examination of the last report of the Office of Education on administration of the so-called impacted area demonstrates that while there are inequities it is not substantial reason, and perhaps that should be continued.

When President Kennedy suggested several changes in Public Law 815 and Public Law 874, he was not only thinking about the abuses and the misuses that have grown up as a result of the Comptroller General's letter or the investigation by members of the Office of Education, but he was also thinking of the very injustices that are inherent in the law. In my opinion some of them should be taken care of right away. Some of the suggestions that the President made at the beginning of this year were too far reaching. I think it was proper and right for the committee to say, "Let us extend it for another 2 years and have a study made, and let us have a report made and find out what the facts are."

That is what we are not faced with today. Unless we pass S. 2393 just as it is before us, for a 1-year extension, or if

we adopt some of the amendments for a 2- or 3- or 4-year extension, we will not have the opportunity to do that. We will not have the opportunity to make changes, and we will not have an opportunity to rectify the inequities that are inherent in the law.

I have every praise for the committee for increasing the amount of money that is available for Indian schools. We have exhausted the fund in title IV of the act.

I believe that title IV should be made permanent legislation for that sort of impact, because it is just as much a Federal responsibility as the impact on the boys and girls whose parents both live and work on Federal property.

On the other hand, there are parts of the program for category B children whose parents enjoy benefits to which they are not entitled and who are taking benefits away from districts that have much more need and much more impact.

So I urge the Senate to pass S. 2393, for a simple 1-year extension. If we do otherwise, we will go further and further away from the basic principle that a general school aid bill is the bill that gives the fairest distribution of Federal tax money, gives the least control, and makes it possible to have these specialized programs phased out and tapered out so that we can reappraise them as they go out, and give us an opportunity to pass the kind of bill that will bring justice to the boys and girls of America.

OUR GOOD NEIGHBOR: MEXICO, AND ITS PROGRESS

Mr. GRUENING. Mr. President, last Thursday the Senate, by unanimous vote, passed a bill introduced by my good friend, the senior Senator from California [Mr. KUCHEL] and cosponsored by a number of Senators of whom I was happy to be one, to present a statue to the people of Mexico.

The original draft of the bill, introduced over a year ago, proposed that this gift commemorate the independence of Mexico on the occasion of its 150th anniversity in 1960, and also the triumph, 100 years ago, of Benito Juarez, the great mid-19th century statesman who both promulgated the basic principles of social reform in Mexico and had them incorporated in the constitution of 1857, and drove out the French military invasion which made Maximilian, the Austrian prince, for a few years Emperor of Mexico.

The original intent of the Senators who sponsored this legislation was to give to Mexico a statue of Miguel Hidalgo y Costilla, the parish priest who, in 1810, sounded the call to revolution which severed Mexico from Spain, and is rightly deemed in Mexico to be the father of its independence.

But the Mexican Government made the suggestion that the monument be to one of our great men, and nominated Abraham Lincoln. It seems to me that in proposing a statue of Lincoln, the Government of Mexico effectively reaffirmed its own faith in the equality of men, its adherence to their unceasing quest for freedom, its belief in a government of, by, and for the people, all of which basic human aspirations Abraham Lincoln will eternally symbolize. As my distinguished colleague, the junior Senator from California [Mr. ENGLE] said, in speaking for the bill, this suggestion of the Mexican Government was "one more example to prove that Abraham Lincoln not only belongs to the ages but to all nations."

There is much that is heartening in this troubled and tragic era with its peril of impending cataclysm in the sane attitudes and friendly relations of the three nations that constitute the North American Continent: Canada, the United States, and Mexico.

The long-held, unprecedented relations with our northern neighbor; the uniquely undefended 3,400-mile common boundary, have long been matters of record and of appropriate rejoicing. Heirs to the same traditions of law and freedom, allies in two great wars for their preservation, we know that there are no differences between us that cannot be settled peacefully, at the conference table, in the manner of civilized people.

But it is of Mexico, our other land neighbor, that I would speak. For here, I deeply believe, that our two peoples, with far different heritages and backgrounds, have likewise entered—and I trust and believe, irrevocably—the phase of history when not only are our ideology, our aspirations, and our purposes compatible, but that the prospect for a close and harmonious relationship, of a partnership of purpose, lies invitingly before us. The alliance for progress has already begun here.

It was my privilege, some weeks ago, on the floor of the Senate, to insert in the CONGRESSIONAL RECORD, and to comment upon, the notable address delivered in Mexico City on the occasion of Freedom of the Press Day by Mexico's President, Adolfo Lopez Mateos.

That freedom of the press is not only celebrated in Mexico, but is a living reality—as it is enduringly in very few Ibero-American countries—is itself a fact of enormous significance. On that occasion, Mexico's President made clear that his country rejected the totalitarian philosophy of the right and of the left; that neither fascism nor communism were ideologies which appealed to the Mexican people, and that their Constitution, wrought during the political and social revolution of this century's second decade, was an indigenous and homegrown product derived out of Mexico's experience, designed to correct inherited evils and to respond to the needs of the Mexican people.

My interest in the prospect of an increasingly warm and constructive relation between our country and our only land neighbor to the south, indeed the geographic entry and bridge to all Latin America, led me to read President Adolfo Lopez Mateos' "state of the Union" address delivered to the Mexican Congress on September 1. I found this long, comprehensive report by the nation's chief executive to its legislative branch, a notable document and a heartening one, containing, in addition to a wealth of contemporary information, declarations of policy and purpose of historic import. Running through its recording of impressive progress in every sector of Mexican life—financial, economic, industrial, agricultural, social, hygienic, cultural, artistic, political, and, above all, spiritual—is implicit the long, arduous, and tortuous path over which the Mexican people have climbed.

For Mexico's history is far different from ours. While our early pioneers and their successors, deliberate refugees from Old World limitations, seeking liberty and opportunity, found both in a promised land abounding in natural resources which they could fashion as they would, Mexico appeared on the stage of recorded history as a conquered nation. Its established society, the most advanced self-evolved culture in America, was overthrown by force and subjected to an alien rule whose motivations in the 16th century were the established concept that to the victor belong the spoils.

For three centuries the people of Mexico suffered under an oppressive colonial domination. But unlike our Thirteen Colonies' severance from a far less restrictive oversea colonial rule, independence gave Mexicans little relief from the abuses of colonialism. The people of Mexico had merely changed masters. Political independence was followed by no economic or social liberation. The inherited feudalism, the mold of a caste society, continued. Juarez, in midcentury, fought for its abolition, but his political, economic, and social reforms were, after his death, obliterated by deeply intrenched and inherited habits, and by the long dictatorship of Porfirio Diaz. Under Diaz, Mexico, despite a financial stability, fostered by the entry of foreign capital and a Porfirian peace, which eliminated pretorian uprisings and banditry, was a feudal fief dominated by a small number of great hacendados and the representatives of foreign interests. The great mass of the people lived in abject poverty and squalor, illiterate and diseased. Peonage—virtual slavery—existed.

The revolution begun in 1911, and after Francisco Madero's, its leader's, murder, carried on by other leaders—Carranza, Zapata, Obregon, Calles—wrought, through the constitution of 1917, what were deemed the necessary political and social reforms, updating many which Benito Juarez had for a time established nearly three-quarters of a century earlier. It is under that constitution that Mexico has operated and progressed for something less than half a century.

The striking fact is that the history of the new Mexico, the Mexico of today, the emerging Mexico, the Mexico conscious and proud of its nationalism and of its uniquely characteristic traits, is of relatively recent origin. Although its political, social, and economic aspirations and, increasingly their validation in fact, have their ideological roots in "the reform"—as it is referred to in Mexican historiography—of Benito Juarez of a

century ago, subsequently to be dissipated and in 1917 revitalized and updated, the Mexico of today began with the revolution of the century's second decade, began with what is known universally in Mexico as the revolution.

Much of Mexico's rich cultural legacy, its delightful folkways and notable indigenous craftsmanship, go way back, long before the coming of Cortez, Aztec, Toltec, Maya, Zapotec, and other less famed regional arts and artifacts are all preconquest, and thus, in the Western sense, prehistoric. Spain made enduring contributions in its architecture, painting, literature, language, religion, and customs. But withal, Mexico, until 1911, was a feudal principality, ruthlessly dominated by a few for the few. The rest of the people could be characterized by the title of the work of the great Mexican novelist, Mariano Azuela—"Los de Abajo"—"those who are underneath." It is a novel of the revolution written during the revolution and its three-word title summarizes why the revolution had to be fought and was fought.

The great change that has come derives its ideology from the constitution of 1917. It is for Mexico what our Declaration of Independence and our Constitution are for the United States. But its implementation has been due to a succession of practical, intelligent, and generally public-spirited presidential administrators and their associates from Alvaro Obregon, the military genius of the revolution and the statesman President of the peace that followed, to President Adolfo Lopez Mateos. They have been men imbued with a sense of Mexico's destiny and of its potentials as a great nation. That sense of nationality, of nationhood has grown steadily. Its clarion call was sounded 45 years ago, during the chaos of revolution and before the drafting of the constitution of 1917, by Manuel Gamio, one of Mexico's great and internationally famed archeologists and ethnologists, in a classic volume entitled "Forjando Patria"—"forging the fatherland."

That awareness of nationhood, that new confidence in Mexico's destiny, has shown itself in a fusion of once disparate elements of class and race; in a shrewd domestic program; in a sound fiscal policy for which Antonio Ortiz Mena, the Secretario of Hacienda y Credito Publico—the equivalent of our Secretary of the Treasury—deserves much credit; in an enlightened foreign policy; in a flowering of the arts—music, painting, architecture, archeology, literature—the expressions of a naturally gifted people, and in increasing participation of Mexicans in the sciences and skills of this expanding age of invention.

But what is most striking, considering the long heritage, the wreckage of a decade of violent revolution, the lack of many kinds of essential experience, the brevity of the new purposefulness—less than half a century—is the fresh breath of freedom that has blown away the encrusted privilege, the ancient rigidities, the recurrence of caudillismo—the man on horseback—that have bedeviled and still throttle in varying degree the sister Hispanic nations. Note that dictatorship was never more intrenched than it is today in the mother countries of the Iberian Peninsula. Consider the political history of nearly all the New World offspring of Mother Spain and Mother Portugal: alternations of dictatorship and chaos interspersed with occasional attempts—always short lived—of representative government, and a persistent economic feudalism which stubbornly bars progress. This is one of the great obstacles to the success of President Kennedy's alliance for progress. Would that the other nations of this hemisphere who are scheduled for membership in this "alianza para progreso" had the orientation and purpose of Mexico.

Which brings me to President Lopez Mateos' great state of the union message. It is, I feel, far too long to ask that all of it be printed in the CONGRESSIONAL RECORD; moreover, much of it deals with details of direct concern to Mexicans only. But I should like to quote a few salient passages.

First, as to national purpose:

General development so that without sacrificing liberty social justice may prevail—that is the political, economic, and social objective of the Mexican people. For this reason, our most important tasks are those which accelerate, without warping, the national growth * * * and so that the benefits of such development may be equitably distributed both geographically and socially.

But lest the purposefulness and direction of Mexican programs imply an easy and certain realization of them we should heed the President's warning of the magnitude and duration of the task:

The fundamental tasks of Mexico are clearly within her territory. We have not reached sufficient level of development that permits us to think of the future without deep preoccupation. Mexicans, for several generations to come, will have to dedicate their best efforts to elevate the living standards which still retard the progress of great sectors of our population. Mexico—we must say without mincing words—is not a rich country, and besides we form part of a world which is growing smaller but more complex, where it is not possible to ignore the growing interdependence which day by day draws one state to another, including the more remote.

This statement of social responsibility which, called the Declaration of Mexico, was approved unanimously at the sixth reunion of the Inter-American Conference to which Mexico was host, and is quoted by the President:

We believe that subhuman conditions of existence should be eliminated with the utmost urgency; that prosperity should be shared; that conditions of special privilege should yield to a growing and more widespread enjoyment, and that by a fulfillment of individual and collective obligations may be demonstrated that poverty, wherever it exists, constitutes a peril to the liberty of all men.

On private enterprise and labor:

With the most profound revolutionary and democratic faith, my administration has invariably respected the autonomy of private enterprise. In the case of labor unions it believes in their control of their internal organization. In the case of both, the state will limit itself to the enforcement of existing statutes.

On foreign policy:

In the last year the international climate has been afflicted with exacerbated tensions, and has grown graver. The world appears to have forgotten the experiences of two great wars in this century and circumstances cast dark shadows over the hopes for a better world—a world of peace and justice—for which millions of men gave their blood.

Serene judgment, the exercise of a normal rationality, and mere consideration of the destructive power of nuclear weapons, which should absolutely bar any use of force, are set aside. And states, particularly the small or medium sized, such as Mexico, which need peace to solve their own urgent problems, are subject to pressures and currents which emphasize the need for serenity of mind and strict adherence to the validation of the rights of man.

Notwithstanding these unfavorable conditions, the Government of Mexico has worked intensively in the field of bilateral relations and in the international organizations to which we belong, sustaining our traditional foreign policy and emphasizing respect for the dignity of man under conditions of social justice; striving for the liberty and independence of peoples, and for the complete sovereignty of all states with all the attributes thereof, such as the right to decide freely its external and internal policies. In the midst of skepticism which clouds these concepts, we persist in the quest for a rebirth of confidence, of mutual understanding, of tolerance, and of the elementary impulse of solidarity which unites men so that they may face the unknown future without anxiety. The foreign policy of Mexico, like its domestic policy, is based on the unbreakable faith we have in the moral values of man.

When we advocate absolute respect for the principle of self-determination of peoples whether it be in Europe, Asia, Africa or America, we do not pretend—as has been erroneously or perversely interpreted—that nations should convert themselves into islands, removed from the reality of the world in which we live. On the contrary, we are convinced that this principle does not impede, but helps states to collaborate with each other to facilitate the spiritual and material conquests of humanity.

In this connection, I would like to make clear once more our position on the question of Cuba. Mexico has invariably asked, as in many other cases, that the principle of nonintervention be applied, but has never suggested, nor can suggest, that this principle be observed by only one group of states, since the vigor of the doctrine depends on the universality of its application. On the other hand, I would like to remind you that a year ago, on this same occasion, upon reiterating the sentiments of sympathy for the revolutionary aspiration of the Cuban people, I placed them clearly in the sphere of inter-American solidarity when I said that "our Republics constitute a family of nations formed in history and for history" and that "our mission of each one of these nations, consists in maintaining ourselves united in peace and concord within the great common causes."

On several occasions, particularly during my trip to South America, I expressed the conviction that culture is the best vehicle for communication between peoples. Like no other, it facilitates the comprehension between men who, regardless of nationality, political views or religion, recognize equality in the great enterprise of human thought. Therefore, we have tried within the limits of our resources to accentuate Mexico's cultural participation abroad in expositions, conferences, interchange of people, donations of books, etc., which have had great results.

The activity of Mexico in international organizations has been particularly intense. The increasing of tensions has been felt with intensity in these organizations even in those of technical character, but most especially in the General Assembly of the United Nations. The juridical position of countries like Mexico, who wish to maintain their freedom of criteria has become delicate and sharp, exposed to misunderstanding and misinterpretation.

Mexico attends international meetings in a spirit of sincere cooperation. Her invariable line is to help find conciliatory solutions which can contribute to progress in international relations. Mexico has no possessions beyond her frontiers. Her armaments are limited to those indispensable to guarantee internal security. She does not belong to any organized bloc in the cold war. What can she follow, then, without the conservation of the principles of law, which make international friendship possible, such as the right of self-determination of peoples and of nonintervention consecrated in the Charter of the United Nations? In these circumstances it is necessary to underline the preoccupation with which we view the risk that the international community drift away from the principles and purposes of the charter and fail to comply with its aims. The principle of collective security would be exposed to a second and more serious failure with all the grave consequences which this would carry. Mexico proposes to maintain inalterable her well-known fidelity to this basic principle of the modern international organization—we want to erase the least doubt in this respect—whether it is suggested as a purpose of the United Nations and the Organization of American States or as the result of treaties and agreements, voluntarily accepted by our country in exercise of her sovereignty to guarantee the collective security.

Mexico has attended in the past year no less than 30 international conferences.

In the sphere of the Organization of American States there were two events of exceptional interest. The first, the meeting of the Special Commission To Study the Formulation of New Methods of Economic Cooperation held in Bogotá in September 1960, where the Act of Bogotá recognized that the social and economic progress of the countries of Latin America is of importance for all and that deficiencies in any of them have repercussion in the rest. At the same time it declared that the primordial object of all economic development is the promotion of social justice.

The other event was the recent extraordinary meeting of the Inter-American Economic and Social Council in Punta del Este, Uruguay, in which for the first time the American Republics have considered the possibility of vigorously promoting their development toward necessary goals on a program which assures a substantial flow of economic assistance to Latin America in advantageous conditions with absolute respect for sovereignty.

Like other nations of Latin America, Mexico has high hopes in this development which, if carried forward with decision and wisdom, will permit the multiplication of resources, indispensable base for any economic expansion to provide well-being for our peoples.

I have already spoken of the participation of our country in the Latin American Association for Free Trade which today will begin negotiations on products for which various member states will request exemption or reduction of import taxes.

As I have stated, Mexico was the site of several international conferences. I mention the Mexico-North American Parliamentary Meeting in Guadalajara, although it concerns the field of action of your sovereignty, because I wish to congratulate the Mexican legislators for the atmosphere of sincerity in which they carried out their conversations and for the light they gave toward better understanding of our mutual problems.

We must underline the importance of technical assistance, necessary factor for the acceleration of progress and we propose to participate in it, more and more, within the limits imposed by our resources.

The foreign policy of a nation is the product of a combination of many elements. Among these is the geographic situation, history, relative power, national interests, commitments through treaties and agreements freely arrived at, universal desire to improve, and the noble concept of collaboration among peoples. The play of all these elements is dominated by the order, very weak still, of international law. Force, unfortunately, continues to be preponderant in the march of the world.

Within this situation, the foreign policy of Mexico follows concrete objectives. Historically it is the result of painful experiences which her people—her dignified men and resigned women—remember without bitterness but with the objectivity that a stern lesson engraves in the memory. It is not possible, from the historic viewpoint, to fail to take into account the experience of this people, in a partial estimation of our foreign policy. Mexico never has fought a war of aggression nor has represented a threat to anyone nor has tried to impose her political or social ideas on another country. The Mexican revolution is of Mexico and for Mexico.

Geography has placed us on the same continent together with countries which were born almost with us, at the end of the 18th or beginning of the 19th century, within a mold of revolutions—democratic and republican of the epoch. We have political, economic, and social ties with these nations which contribute to a unity achieved only in this region of the planet. America, as I have said on other occasions, is our natural habitat.

This does not prevent us from having ties with other nations of the world, or of making specific commitments such as bind all in their status as members of the United Nations. Consequently, neither as part of the inter-American system nor as members of the world organization are we neutrals. We have been, we are, and we shall continue to be independent; but we hope that independence which is not neutrality shall be respected, in whatever way it manifests itself, as one of the loftiest expressions of the dignity of a nation. The Government of Mexico cannot associate with international movements which are imperialistic in character, whether of the extreme right or of the extreme left. The will of the Mexican people is to maintain a representative republic, democratic and Federal, and the prime responsibility of its officials is to carry out the mandate of the constitution of the Republic.

The words of Mexico's great President speak for themselves. But although, clearly, Mexico is on the march, I would be remiss if I did not particularly call attention to his warning that his country's inherited problems will not be solved overnight; that the road ahead is still long and arduous; that there is still great economic disparity, great poverty, unemployment, undernourishment, disease, illiteracy, in Mexico, and that generations of dedicated effort will be required to reach the goals of economic and social equality and generally high living standards to which Mexicans rightfully aspire.

What to me is inspiring is that despite the profound differences between the history and the heritage of our two neighbor nations, our thinking, our ideals, and our objectives have today become similar, and indeed in many respects identical. As never before, I believe, our mutual understanding is at its highest level. It is true, as the Senator from Montana [Mr. MANSFIELD], our esteemed majority leader, said in paying tribute to "the great amity, friendship, understanding, and tolerance which exists between the great Republic of Mexico, at the present time under the leadership of one of the great leaders in the hemisphere and of the world, Adolfo Lopez Mateos and our country," that "there are many things in the past we would like to forget or at least not to remember."

True. But, fortunately, times change. We know now that the people of Mexico and the people of the United States have much to give to each other; much to learn from each other; and that we can and shall, now and henceforth, work together in harmony, with mutual respect and affection for common goals, and for the solution of each other's problems. We shall, in short, be good neighbors and carry out, by deeds, the good-neighbor policy that one of our greatest Presidents, Franklin Delano Roosevelt, proclaimed and sought to implement nearly 30 years ago.

Mr. KUCHEL. Mr. President, that was a splendid address by the Senator from Alaska. No one in American Government is better acquainted than the Senator from Alaska with the people of Mexico, their culture, and their history. I have had the honor of reading his book on Mexico and its history, which is acknowledged today to be one of the outstanding works on that subject.

Surely, Mr. President, it is thrilling to realize that we in this country live in peace, with no barbed wires separating us, with our neighbor to the south and our neighbor to the north, and with no military personnel patrolling the borders on either side. I think that is eloquent testimony to the fact that the hopes and aspirations of the people and the Government of Mexico are identical with those of the people and the Government of the United States. We live in freedom. We pray for freedom for all peoples. We seek peace with justice for all.

I wish to congratulate my friend, the Senator from Alaska [Mr. GRUENING], and to pay testimony to the fact that, perhaps unique in the background of those of us who serve the Government of our country, is his long acquaintance, on the basis of having spent some years of his life in that country, with our great sister republic to the south of us.

Mr. GRUENING. I thank the Senator from California, whose State is one of the four States which border on our great neighbor to the south. Many of his constituents are of Mexican birth or origin; and he must know, as I do, what friendly, kindly, and lovable people they are. I know of no particular phase of our foreign policy which is of greater

importance than the demonstration by our deeds of our ability to live in peace and amity with our immediate neighbors.

As I said a few minutes ago, we have taken that for granted for many years in our relations with Canada. We take pride in the 3,000 miles of undefended boundary line—now 4,300 miles, since Alaska has become a State—between our country and Canada; and many years ago it seemed to me most important to establish a similar relationship with our neighbor to the south. We are doing that now, most definitely; and it is a matter of great satisfaction, not only to me, but to all the rest of those who prize peace and good will to men on earth.

I know of no people who are more responsive to good will and kindness than our neighbors to the south. They are pretty generally practitioners of the Golden Rule, and their country is enchanting and lovely. Its arts and crafts, ancient temples, snow-covered peaks, folkways, and beautiful songs emanating from the humblest huts combine to make it a beautiful and charming country. We can contribute much to it, and it can contribute much to us. I believe that a mutual exchange of what each has to give will make for a happy development on both sides of the border; and I believe we are making excellent progress in that direction.

Mr. KUCHEL. I agree with the Senator from Alaska; and I look forward to the further growth of that progress and to the time when the existing amity between the two countries will be even greater.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following additional routine business was transacted:

ADDITIONAL REPORTS OF A COMMITTEE

The following additional reports of a committee were submitted:

By Mr. BIBLE, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 6494. An act to provide for withdrawal and reservation for the use of the Department of the Air Force of certain public lands of the United States at Nellis Air Force Range, Nev., for defense purposes (Rept. No. 972).

By Mr. BIBLE, from the Committee on Interior and Insular Affairs, with amendments:

S. 1063. A bill to amend the act of April 22, 1960, entitled "An act to provide for the establishment of the Wilson's Creek Battlefield National Park, in the State of Missouri" (Rept. No. 970); and

H.R. 2470. An act to provide for the establishment of the Lincoln Boyhood National Memorial in the State of Indiana, and for other purposes (Rept. No. 971).

ADDITIONAL BILL AND JOINT RESOLUTION INTRODUCED

The following additional bill and joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred, as indicated:

By Mr. HOLLAND:

S. 2529. A bill to authorize the appropriation of adequate funds to provide for the completion of the construction of the Inter-American Highway; to the Committee on Public Works.

(See the remarks of Mr. HOLLAND when he introduced the above bill, which appear under a separate heading.)

By Mr. McGEE:

S.J. Res. 136. Joint resolution to determine the susceptibility of minerals to electrometallurgical processes and other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. McGEE when he introduced the above joint resolution, which appear under a separate heading.)

CONCURRENT RESOLUTION—PREVENTION OF ACCIDENTS AND PROMOTION OF SAFETY ACTIVITIES

Mr. CAPEHART submitted the following concurrent resolution (S. Con. Res. 46); which was referred to the Committee on Commerce:

Whereas ninety thousand Americans are killed yearly in accidents; and

Whereas nine hundred thousand Americans are injured every year in accidents; and

Whereas the annual monetary costs of all accidents in the United States have been estimated at $13,000,000,000; and

Whereas the cost in human suffering and heartaches of such accidents is incalculable; and

Whereas it is the duty of all of the citizens of the United States to take the strongest measures possible and exert utmost efforts to help lessen this waste of our Nation's most valuable resource, its people: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that (1) existing safety organizations and all interested citizens in each State should combine their efforts to establish therein, as a division of the National Safety Council, a State safety council whose main function would be to provide leadership and knowledge to intensify safety activities and programs in such State in all safety fields, and (2) each State safety council would reach its greatest effectiveness by the establishment, in each of the counties (or other comparable political subdivisions) of each State, of a local safety council whose main functions would be to develop and promote community support for governmental agencies charged with the promotion of public safety and to make safety a matter of concern in every home.

AUTHORIZATION FOR APPROPRIATION TO COMPLETE CONSTRUCTION OF INTER-AMERICAN HIGHWAY

Mr. HOLLAND. Mr. President, under authority granted me by the distinguished chairman of the Appropriations Committee, the Senator from Arizona [Mr. HAYDEN], I had the privilege between December 10 and 20 of last year of making a field trip over virtually the entire mileage of the Inter-American Highway below the Republic of Mexico.

Our party began our inspection trip in the vicinity of the Mexican-Guatemalan border and completed it at Panama City. I reported this field trip to the Senate in detail on February 9, together with certain comments on the highway and recommendations regarding the importance of completing the highway. At that time, I was advised by the Bureau of Public Roads that in its judgment approximately $28 million was needed to complete our commitments on that part of the highway lying below the Mexican border. I had hoped that a specific administration proposal for the needed authorizations and appropriations would have reached Congress and been enacted into law prior to this time, since I regarded the completion of this highway as the most important commitment we have to our Latin American friends. However, apparently it has not been possible to formulate specific recommendations, particularly in view of the many crucial decisions which have pressed upon the leaders of the executive branch during the earlier portions of this year.

Mr. President, today I am introducing a bill to authorize an additional $28 million as our contribution to complete this highway in the friendly republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama and in belated recognition of the fact that the friendly Republic of Mexico has completed, through her own resources, construction of the entire mileage of the Inter-American Highway lying within her borders. In doing so, it is my hope that my proposal will be a means of bringing forth for the consideration of Congress in January specific recommendations of the Bureau of Public Roads and of the Bureau of the Budget. It is further my hope that by means of this proposal Congress may have the benefit of the planning of the various executive branches and agencies when this matter is considered next year.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2529) to authorize the appropriation of adequate funds to provide for the completion of the construction of the Inter-American Highway, introduced by Mr. HOLLAND, was received, read twice by its title, and referred to the Committee on Foreign Relations.

STUDY OF MINERALS IN ROCKY MOUNTAIN AREA

Mr. McGEE. Mr. President, I introduce, for appropriate reference, a joint resolution which I believe can make a significant contribution to the development of our water and mineral resources which is a prime concern to those of us in the Rocky Mountain area.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 136) to determine the susceptibility of minerals to electrometallurgical processes and other purposes, introduced by Mr. McGEE, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

Mr. McGEE. Mr. President, it is a Senate joint resolution which calls on the Secretary of Interior to undertake,

in cooperation with appropriate departments and agencies in the Federal Government and with the individual States and private industry, a comprehensive study of the minerals in the Rocky Mountain area. The study would determine the susceptibility of those minerals to electrometallurgical processes, the potential economic impact upon the economy of the Rocky Mountain area and the Nation of the development through electrometallurgical processing of these minerals to economic utility and marketability, the relation of such mineral development to the development of potential hydro and thermal power supplies and requirements in the Rocky Mountain area and to the energy requirements of the entire Nation and the relationship of this mineral development to the security needs of the United States. Under the resolution, the Secretary would report the results of this study to the President and the Congress within 12 months after approval of this resolution.

Also, Mr. President, I ask unanimous consent to have printed at this point a letter from the junior Senator from Utah [Mr. Moss], the junior Senator from Montana [Mr. METCALF], the junior Senator from California [Mr. ENGLE], and me to the chairman of the Senate Interior and Insular Affairs Committee [Mr. ANDERSON], written on August 31, urging the committee to give special attention during the approaching recess of Congress to speeding up research work on the reduction of evaporation of water from reservoirs.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON INTERIOR
AND INSULAR AFFAIRS,
August 31, 1961.

HON. CLINTON P. ANDERSON,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: Extensive drought in the Western States this year has underscored the need for acceleration of research in water conservation as recommended by the Select Committee on Water Resources in its January 30, 1961, report.

We are particularly interested in seeing the research work on control of evaporation from reservoirs and other water impoundments speeded up to the fullest extent that can soundly be done. This work gives promise of greatly increasing useful water supplies from existing facilities at comparatively small costs and without requiring large investments or long waits through construction periods.

Inasmuch as agencies in the Department of the Interior are conducting research on evaporation control, directly and through contracts with universities and colleges, this is written to urge that the Committee on Interior and Insular Affairs undertake, during the coming recess of Congress, such studies and hearings as are advisable to determine the current status of these research programs, and to guide us in the 1962 session on a program to assure all-out effort in this field.

If increase in facilities, personnel, or authorities will speed this promising work it should be provided as early as possible.

The initiative you have taken during the past few months to implement the recommendations of the Committee on Water Resources has been a great service to the West and the Nation. We hope it will be as possible to give some special attention to evaporation control and the conservation and more efficient use of available water supplies.

Sincerely yours,

FRANK E. MOSS.
LEE METCALF.
GALE W. MCGEE.
CLAIR ENGLE.

Mr. McGEE. Mr. President, this measure is being introduced because of my growing concern for a greater sense of urgency in the development of our God-given resources. Almost 3 years ago I made my first address to this body, which was my "maiden" speech, as the first speech of freshmen Senators is called. At that time my remarks centered on the relationship between the building of a more productive economy for the United States and our ability to meet the obligations of the cold war by an aggressive development program for our natural resources. It was with a great deal of pleasure that same year that we saw the passage of Senate Resolution 48 creating the Senate Select Committee on National Water Resources, and it was particularly gratifying to me since I firmly believe if any one resource can be described as basic to the development of all others, that resource is water. This fact became even more clear to me as a member of that newly created Water Committee when, for more than 2 years, we held hearings, gathered the results of expert studies by various departments and agencies, and heard hundreds of witnesses all across the country.

The impact of that report, Mr. President, was sobering and challenging. It revealed that in the next 20 years this Nation, on both a public and private basis, is going to have to spend more than $200 billion on the development of water resources alone. This task, Mr. President, is not only one that might be done; it not only could be done; it not only should be done—it is one that must be done. In view of this staggering challenge, those of us who served on the Water Committee were greatly heartened that the theme of natural resource development formed such a significant part of President Kennedy's campaign appeal; and we were also pleased with the President's stirring words to the Congress on the subject of resource development. We had hoped that the completion of our report, when coupled with the administration's viewpoint, would make two significant impacts—first, an absolutely indispensible, popular understanding of the magnitude, the urgency, and the importance of the need to develop our water resources; and second, the catalytic effect which would result in a series of specific legislative recommendations by Members of Congress.

However, since the day of the committee report, our legislative record has not reflected the urgency which I, at least, had hoped. Excluding bills which duplicate each other, as well as bills which are so similar as for all practical purposes to duplicate each other, a total of 102 bills has been introduced in this Congress on the subject of water development. Yet, after 8 months have elapsed, only four of these bills have even been reported from committee. This is not, of course, a reflection on the record of any Senator nor of any committee, but is pointed out only to suggest that this record can hardly be claimed as an adequate response to our Nation's needs.

Another discouraging aspect of our overall attack, or lack of it, in the water resources field is the current program of the Bureau of Reclamation. The Bureau has reported that between now and the end of the century its program, involving the construction of 75 percent of Federal projects and 90 percent of the non-Federal projects included in the list of 1,085 reclamation projects furnished to the committee, could provide food and fiber for 25 million more people; would enable us to build a quarter of a million full-time family size farm units; would add 40,000 new local retail enterprises to our economy; and would add nearly a billion dollars to the Federal Treasury each year. However, when I asked the Bureau what definite plan it had to build its share of the total of the $18 billion worth of the water storage needed by the year 2000, the Bureau's reply was that their rate of progress was "on the minimum side," that their general investigations program would have to be doubled at least, and that it would not be physically possible to complete a list of projects already authorized within the next 6 years.

Equally disheartening was the Bureau's information that the predicted need of 440 million acre-feet of additional water storage by the year 2000 cannot be met at the present rate of development. They now have 26 reservoirs under construction which would increase our storage capacity by 41 million acre-feet, and they say there are 150 additional projects which, if completed within the next 6 years, would add another 22 million acre-feet to our total storage capacity. Between the years 1967 and 2000, however, they could add only an additional 50 million acre-feet even at twice the present rate of Federal reclamation development.

These figures are not cited here today to embarrass the Bureau of Reclamation or the Interior Department. They are given as an example of the type of metamorphosis that can set in if we allow ourselves to become sidetracked or if we do not become sufficiently aroused to tackle the job that must be done. It is abundantly clear to me, Mr. President, that without public disposition to accept or even demand greater activity and increased expenditures in the field of water development there can be but little hope for major strides forward.

Mr. President, we cannot hope to maintain our position of world leadership by overcautious programs and compromise measures which do little to add to the real strength of our Nation's economy. Ours is not a nation of unending resource abundance, whose resources need only minimal development by man to supply his needs. It is true that we have the resources, but they must be developed. The economy of this country does not, without adequate resource development that in turn abets

national economic growth, contain within itself sufficient strength to win the world contest in which we are now engaged.

I believe it is highly significant that Nikita Khrushchev in his latest Communist Manifesto—the draft of the program of the Soviet Communist Party to be presented in October—says that "priority will be given to developing easily exploitable resources that provide the greatest economic effect."

He continued his statement:

> The industry in the areas to the east of the Urals, where there are immense natural riches, raw materials, and power resources, will expand greatly.
>
> The following must be achieved within the next 20 years; in Siberia and Kazakhstan—the creation of new large power bases using deposits of cheap coal or the water power resources of the Angara and Yenisei Rivers, the organization of big centers of power-consuming industries and the completion in Siberia of the country's third metallurgical base, the development of new rich ore and coal deposits, etc.

These words should serve as a sufficiently grim and ominous warning to convince anyone that, whether we develop our own resources or not, the Soviet Union surely intends to develop its resources. What Russia is going to do is what we have been waiting to do. Are we, Mr. President, some day in the future going to look back and say that we can recall the time when, if we had had the vision and the courage to begin aggressive development of our natural resources, we would still be able to maintain our pace with the Soviet Union and we would still enjoy the position of world leadership which we have lost to them? Obviously none of us looks forward to such a bleak prospect. But I submit, Mr. President, that time is running out.

New dams, new industrial plants, new power facilities do not come into being overnight. Indeed, were we to launch a massive resource development program this very instant, it would be many years in the future before it would be brought to fruition. Thanks to such studies as that conducted by the Select Water Committee, as well as hundreds of other studies and reports by various Government and private agencies and industries, the guidelines to achieving the task ahead are well defined and numerous.

We have but to merely follow them—to act decisively—to wake ourselves from the lethargy which has so destructively hindered our national effort.

It is what we do, or fail to do, in the field of resource development that will determine whether we achieve the goals that we, as a Nation, have set for ourselves. Only an economy that has been stimulated to the extent that a rate of economic growth of at least 4½ or 5 percent is achieved and maintained; only an economy that is stimulated to an extent that just, sensible, and nonconfiscatory tax rates will yield drastically increased public revenues; only an economy that has been stimulated by a resource development to the extent that stubborn, chronic, and large-scale unemployment is wiped out—only such an economy can afford to do the things that this Nation must do in the areas of national defense, foreign aid, education, and other domestic programs in the next four decades. The concept that must be thoroughly understood by the American people is that this program must take place and become effective before these other goals can be achieved—not at some time in the future when it becomes fiscally possible by conservative standards to do the job—it must take place now.

AID TO FEDERALLY IMPACTED SCHOOLS—AMENDMENTS

Mr. MONRONEY (for himself, Mr. KERR, Mr. FULBRIGHT, Mr. SMATHERS, Mr. HOLLAND, Mr. CASE of South Dakota, and Mr. COTTON) submitted amendments, intended to be proposed by them, jointly, to the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa, which were ordered to lie on the table and to be printed.

PROPOSED STUDY RELATING TO DEVELOPMENT OF PUMPED STORAGE—ADDITIONAL COSPONSOR OF BILL

Mr. McGEE. Mr. President, a few days ago, the junior Senator from New Mexico [Mr. ANDERSON], and the senior Senator from Oklahoma [Mr. KERR] introduced Senate bill 2460.

S. 2460 calls on the Secretary of the Interior to conduct a study of the need or desirability of developing pumped storage in connection with Federal reservoir projects.

Mr. President, I compliment the Senator from New Mexico and the Senator from Oklahoma for introducing this proposed legislation, for I believe it can have a very beneficial effect in approaching a solution to the staggering resource development challenge we face in the future. I ask unanimous consent, Mr. President, that my name be added as a cosponsor of S. 2460.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, September 11, 1961, he presented to the President of the United States the following enrolled bills and joint resolution:

S. 48. An act to authorize the Secretary of the Army to modify certain leases entered into for the provision of recreation facilities in reservoir areas;

S. 203. An act to declare that the United States holds trust for the pueblo of Santa Ana, Zia, Jemez, San Felipe, Santo Domingo, Cochiti, Isleta, and San Ildefonso certain public lands;

S. 322. An act to make certain funds available to the Nez Perce Tribe of Idaho;

S. 344. An act to amend the Seneca Leasing Act of August 14, 1950 (64 Stat. 442);

S. 541. An act to amend the act of June 1, 1948 (62 Stat. 281), to empower the Administrator of General Services to appoint nonuniformed special policemen;

S. 685. An act to amend the Coast and Geodetic Survey Commissioned Officers Act of 1948, as amended, and for other purposes;

S. 931. An act to repeal that part of the act of March 2, 1889, which requires that grantors furnish, free of all expenses to the Government, all requisite abstracts, official certifications, and evidence of title;

S. 935. An act for the relief of certain members of the Army National Guard of the United States and the Air National Guard of the United States;

S. 1368. An act to amend the Shipping Act of 1916, to provide for licensing independent ocean freight forwarders, and for other purposes;

S. 1501. An act to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs;

S. 1518. An act providing for the disposition of judgment funds of the Omaha Tribe of Indians;

S. 2016. An act to give to the Walker River Paiute Tribe the reserved minerals underlying its reservation;

S. 2216. An act to authorize the transfer of three units of the Fort Belknap Indian irrigation project to the landowners within the project;

S. 2224. An act to grant minerals, including oil, gas, and other natural deposits, on certain lands in the Northern Cheyenne Indian Reservation, Mont., to certain Indians, and for other purposes;

S. 2395. An act to amend the Railroad Retirement Act of 1937 to provide reduced annuities to male employees who have attained the age of 62, and for other purposes;

S. 2422. An act concerning the White House and providing for the care and preservation of its historic and artistic contents; and

S. J. Res. 98. Joint resolution to provide for the observance of the centennial of the enactment of the Homestead Act.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. McNAMARA. Mr. President, in accordance with the order previously entered, I move that the Senate now adjourn until tomorrow, at 9 a.m.

The motion was agreed to; and (at 8 o'clock and 6 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Tuesday, September 12, 1961, at 9 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate September 11, 1961:

INTERNATIONAL ATOMIC ENERGY AGENCY

Glenn T. Seaborg, of California, to be the Representative of the United States of America to the fifth session of the General Conference of the International Atomic Energy Agency.

The following-named persons to be Alternate Representatives of the United States of America to the fifth session of the General Conference of the International Atomic Energy Agency:

Henry DeFolf Smyth, of New Jersey.

William I. Cargo, of Maryland.
John S. Graham, of North Carolina.
Leland J. Haworth, of New York.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 11, 1961:

CALIFORNIA DEBRIS COMMISSION

Col. Arthur H. Frye, Jr., Corps of Engineers, to be president and senior member of the California Debris Commission, under the provisions of section 1 of the act of Congress approved March 1, 1893 (27 Stat. 507; 33 U.S.C. 661).

PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service, subject to qualifications therefor as provided by law and regulations:

Harold C. Woodworth to be senior surgeon.

Winsor V. Morrison to be senior assistant surgeon.

Morris L. Shoss to be senior sanitary engineer.

James H. Eagen to be assistant sanitary engineer.

Gerald R. Stowe to be assistant pharmacist.

Trygve O. Berge to be scientist director.

U.S. Grant III to be senior veterinary officer.

Mildred Kaufman to be dietitian.

Lamont B. Smith to be senior assistant therapist.

EXTENSIONS OF REMARKS

Farm Legislation in the 87th Congress, 1st Session

EXTENSION OF REMARKS
OF
HON. HAROLD D. COOLEY
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Monday, September 11, 1961

Mr. COOLEY. Mr. Speaker, the 1st session of the 87th Congress is drawing to a close, and it is my duty, as chairman of the House Committee on Agriculture, to review for the Members of the House the work of this Congress, thus far, in behalf of agriculture.

This report is a matter of great pride for me, and I am sure the majority of the Members of this body feel the same deep satisfaction in what is accomplished.

This 87th Congress, which convened in January, already has done more to change and improve the fortunes of the farm families of America than perhaps any Congress since the enactment of the basic agricultural laws that were designed to lift agriculture out of the great depression.

We have moved effectively to ease the cost-price squeeze that for almost a decade has strangled the farm economy. We have reversed the long downward trend in farm income. The effects of our work already are evident. During the month ended August 15, the index of prices received by farmers rose nearly 2 percent. The mid-August index was 3 percent above a year earlier.

This is being achieved because we have an administration and the Congress working together, with common objectives.

When this Congress convened in January, the time was nearing when farmers would plant their crops. A new administration was coming into power. Time was of the essence, if we were to come to grips in 1961 with the deepening depression that had settled upon the farmlands of our Nation. The situation demanded courageous and swift action.

The most pressing problem of agriculture confronting us was the great and burdensome surplus of wheat and feed grains, and the prospect that crops to be planted this year would build this surplus to more costly and staggering proportions.

The new administration, after Orville Freeman had been named the Secretary of Agriculture, and after he had consulted with farm legislators in the Congress, came forward with a proposal that offered the one great promise of injecting stability in a large area of agriculture in 1961. This was the feed grains bill.

This bill proposed to establish a one-year emergency program to reduce the production of feed grains in 1961, and thereby to alleviate the conditions of oversupply and low prices then seriously depressing a major segment of the Nation's agriculture and placing on taxpayers the burden of holding nearly $4 billion of these grains.

Our Committee on Agriculture called this legislation up for consideration against a background of almost a decade of national controversy and bickering on farm policy, during which time the farm economy had gradually deteriorated. The basic issue in this background was between those who would remove restraints upon an already exploding production and those who contended that the only way for agriculture to achieve a fair price structure is to adjust production to the needs of the markets. Our Committee on Agriculture, with remarkable speed, resolved the issue in a determination to make the law of supply and demand work for the farmer, and not against him. We reported the legislation to provide incentives for farmers to reduce their production of feed grains. The Congress promptly passed the bill, and it was signed into law by the President.

Farmers responded magnificiently. They cooperated in the new program far beyond expectations. Consequently, feed grains production has been brought into reasonable bounds in 1961, to the great benefit of farmers and taxpayers as well.

Mr. Speaker, the program is expected to add around $750 million, in 1961, as compared with 1960, to the income of corn, grain sorghum, oats, barley and soybean producers.

This 1961 feed grain program has worked, as follows:

First. Payment in cash or in kind for retiring 20 percent of corn and grain sorghum acreage—or up to 20 acres, whichever is greater on individual farms. Eligibility for price support for corn and grain sorghum to be contingent upon participation in this diversion of 20 percent of acreage or 20 acres.

Second. Payment in kind for retiring an additional 20 percent of corn and grain sorghum acreage. However, this additional acreage diversion would not be required as a condition for price support eligibility.

Third. An increase in the price support level for corn from $1.06 to $1.20 a bushel, and increases in the supports for grain sorghums and other feed grains. Also, an increase in the support level of soybeans, intended to divert at least 2 million acres from corn and grain sorghums.

Mr. Speaker, the Committee on Agriculture, with the feed grains program underway early in the spring, turned forthwith to work upon general farm legislation, to be effective with the 1962 crops.

I want to commend the members of our committee and the Members of the House, regardless of political party affiliations, who worked so long, so hard, and with such dedication, to reverse the long, desperate, downward trend in farm prices which had depressed the farm economy and impoverished large areas of agriculture. I am especially encouraged at the substantial support many Members representing city constituencies gave to this effort to stabilize the farm economy.

Agriculture is by far the Nation's largest industry. Farming employs more persons than the steel industry, automobile industry, transportation industry, and public utilities combined. This 87th Congress has demonstrated a sound awareness that what happens in agriculture bears directly not only upon farmers but ultimately upon consumers, taxpayers, and the economy as a whole.

Mr. Speaker, notwithstanding the great range of clashing views abroad in this country on the direction farm policy should take, this Congress proceeded with the job that had to be done. We passed, and the President has signed, the Agricultural Act of 1961. I think it is the most important piece of legislation, in the interest of farmers, to be enacted in a decade.

Following are the major provisions of the Agricultural Act of 1961:

DECLARATION OF POLICY

The act makes a broad declaration in behalf of policies in order more fully and effectively to improve, maintain, and protect the prices and incomes of farmers, to enlarge rural purchasing power, to achieve a better balance between supplies of agricultural commodities and the requirements of consumers therefor, to preserve and strengthen the structure of agriculture, and

to revitalize and stabilize the overall economy at reasonable costs to the Government. It specifically declares it to be the policy of the Congress to "recognize the importance of the family farm as an efficient unit of production and as an economic base for towns and cities in rural areas and encourage, promote, and strengthen this form of farm enterprise."

TITLE I—SUPPLY AND PRICE STABILIZATION

Consultation on agricultural programs

Provides authority for consultation and advising with farmers and farm and commodity organizations in developing agricultural programs.

The 1962 wheat program

1. A mandatory reduction of 10 percent in wheat acreage and incentives for producers to reduce their acreage voluntarily another 30 percent to a maximum 40-percent acreage curtailment on individual farms. A producer could retire up to 40 percent of his allotment or 10 acres, whichever is greater, and receive payment for such diversion.

2. An exemption from marketing quotas limited to 13.5 acres per farm or the highest acreage planted for harvest in 1959, 1960, or 1961. The present exemption is 15 acres.

3. Price support limited to producers who do not exceed their reduced 1962 acreage allotment and who divert an acreage at least equal to 10 percent of their previous acreage allotment to conservation uses, with payments in cash or in kind on up to 45 percent of normal production for such diversion.

Secretary Freeman has set the 1962 wheat support at a national average of $2 a bushel. This is 83½ percent of parity. The support this year is $1.79 or 75 percent of parity.

4. Payments in cash or in kind up to 60 percent on normal production on wheat acres voluntarily removed from production above the mandatory 10-percent diversion.

5. Authority for producers to plant castor beans, guar, sunflower, safflower, or sesame, if designated by the Secretary, subject to the conditions that no payment shall be made with respect to diverted acreage devoted to any such commodity.

6. Increases the marketing penalty from 45 to 65 percent of parity price and establishes stricter computation of amount subject to penalty, in cases of noncompliance with allotments.

7. Provides that where producers can prove their 1959 and 1960 acreages and yields, these figures shall be accepted.

8. Authority for 3 years, beginning with 1962, for the Secretary to increase Durum wheat acreage allotments if the supply warrants. No export subsidies on Durum if acreage is increased.

The 1962 feed grains program

1. A voluntary retirement of acreage previously devoted to corn, grain sorghum, and barley. The 1962 program would add barley to the grain program in operation for corn and grain sorghum in 1961. A special exemption is provided for producers of malting barley.

2. Payments to producers on retired acreage up to 50 percent of the normal value of production on these acres, at the current support rate, for the first 20 percent of the corn, grain sorghum, and barley acres retired to a conservation use, and payment up to 60 percent of the normal value of production on land retired above 20 percent of the previous acreage in these crops. Any producer may place a minimum of 20 acres of cropland in conservation use and receive payments.

3. A price support level determined at the discretion of the Secretary of Agriculture, but not less than 65 percent of parity. Under similar provision in the 1961 program the Secretary set the support of corn at $1.20 a bushel, or 74 percent of parity, and grain sorghum at $1.93 a hundredweight, or 78 percent of parity. The corn support in 1960 was $1.06 and grain sorghum $1.52.

4. As a condition of eligibility for price support a producer of corn, grain sorghum or barley (except as provided for malting barley) must participate in the acreage reduction program for these crops in 1962, to the extent prescribed by the Secretary. To be in compliance with the program, a producer of corn or grain must not increase his acreage of barley and a producer of barley must not increase his acreage of corn or grain sorghum.

Marketing orders

1. Adds to the Agricultural Marketing Agreement Act of 1937, peanuts by areas of production, turkeys and turkey hatching eggs, cherries and cranberries for canning or freezing; and also adds apples, both fresh and for canning and freezing (and products except canned or frozen products are covered) in Michigan, New York, New England, Maryland, New Jersey, Indiana, and California. The provision relating to peanuts requires that if any orders are developed for peanuts, each of such orders shall be limited to peanuts produced in one of the areas named in the bill. Tobacco would remain in the list of commodities where producers, if they wish, could develop marketing orders. Soybeans are deleted from this list.

2. Requires processors representing over 50 percent of the volume of cranberries, cherries, and apples for canning or freezing to approve any marketing order, as well as producers, before it can become effective.

3. Also includes provisions: (a) amending the above-parity provision of the act to prevent termination of orders prior to the end of the marketing season; (b) changing the civil penalty provision to aid enforcement by reducing the penalty and dropping "willful"; (c) permitting orders for groups or portions of commodities; (d) requiring referendums for initial orders and that the ballot describe the order; and (e) providing for processor referendums in cases where processor approval is required.

4. Adds to the commodities subject to import regulation under section 8e, when marketing orders are in effect on the same commodities in the United States, oranges, onions, walnuts, and dates except dates for processing.

Wool

Extends the National Wool Act for 4 years to March 31, 1966.

TITLE II—EXTENSION AND AMENDMENT OF PUBLIC LAW 480—AGRICULTURE TRADE DEVELOPMENT AND ASSISTANCE ACT

1. Amends title I (sales of commodities for foreign currencies) of Public Law 480 to (a) extend title for 3 years; (b) establish a limitation of $4.5 billion on disposal of surpluses under title I agreements for a 3-year period and an annual limit of $2.5 billion; (c) authorize the use of foreign currencies for dollar sales to American tourists; (d) improve the agricultural market development activities in foreign nations by setting aside 5 percent of the foreign currencies acquired each year to this purpose and by requiring that not less than 2 percent of the foreign currency sales proceeds be convertible into the currencies of other foreign nations as the Secretary of Agriculture deems necessary to improve overall U.S. market development activities.

2. Amends title II (food donations to relieve distress among friendly peoples) to (a) extend title II for 3 years through December 31, 1964; (b) extend authority for economic development for 3 years through December 31, 1964; (c) continue present authorization of $300 million per year, plus carryover; (d) make annual limitation applicable to amount programed rather than amount spent.

TITLE III—AGRICULTURAL CREDIT

1. Real estate loans:

(a) To persons who are or will become owner-operators of not larger than family farms.

(b) Available to all farm owners and tenants for soil and water conservation measures.

(c) May be made to certain nonprofit associations for soil and water conservation, drainage, and flood control, with an insured loan limit of $1 million and a direct loan limit of $500,000.

(d) Sets the limit on loans to individuals for land acquisition at $60,000.

(e) Both insured and direct loans may be made up to 100 percent of normal value of the farm.

(f) Provides interest rate of not to exceed 5 percent plus fees. Out of 5 percent paid by insured loan borrowers, one-half of 1 percent to go to insurance fund and one-half of 1 percent now used for administrative expenses could go to the lender as additional interest.

(g) In determining eligibility for real estate loans the Secretary must consider prevailing private and cooperative interest rates in the community and must determine that the applicant is a U.S. citizen, has farm background and either training or experience, and is or will become a family farm owner-operator.

2. Operating loans:

(a) Increases loan limit from $20,000 to $35,000, and limits term of loan to 7 years. Not more than 25 percent of the annual appropriation can be used to create borrower indebtedness in excess of $15,000.

(b) Authorizes participation loans up to 80 percent with private lenders.

(c) Provides interest rate of not to exceed 5 percent.

(d) Authorizes loans to soil conservation districts which are unable to obtain necessary credit elsewhere on reasonable terms and conditions, to purchase farm equipment customarily used for soil conservation purposes. Single loans are limited to $35,000 outstanding indebtedness and total loans cannot exceed $500,000 in any 1 year.

(e) In determining eligibility for operating loans the Secretary must consider prevailing interest rates in the local community and must determine that the applicant is a U.S. citizen, has farm background and either training or experience and is or will become a family farm owner-operator.

3. Emergency loans:

(a) Authorized in areas suffering from natural disaster conditions.

(b) Provides interest rate of not to exceed 3 percent under terms applicable to regular real estate or operating loans.

(c) In determining eligibility for emergency loans the Secretary must consider any established farmer or rancher or citizen of the United States or a private domestic corporation or partnership engaged primarily in farming or ranching in designated areas with experience and resources sufficient for probable successful operation, and persons or corporations outside designated areas who have suffered severe production losses not general to the area.

TITLE IV—GENERAL

1. Extension of Great Plains conservation program to December 31, 1971.

2. Extension of the school milk program for 5 years through June 30, 1967, with the House provision requiring annual appropriations.

3. Extension of the veterans and Armed Forces dairy programs for 3 years through December 31, 1964.

Mr. Speaker, the Agricultural Act of 1961 and the earlier special feed grains bill are the major enactments of the

87th Congress thus far, in behalf of agriculture. But along with this work we have developed and enacted other important legislation relating to the well-being of agriculture, thus contributing to the strength of the general economy.

Of particular importance was the bill to extend and amend the Sugar Act.

In July 1960, Congress enacted Public Law 86–592, which, first, extended the Sugar Act for 3 months—from December 31, 1960, to March 31, 1961—second, authorized the President to set the Cuban sugar quota for the balance of the calendar year 1960 and for the first 3 months of 1961 at any level not in excess of the Cuban quota under the basic quota system of the Sugar Act, and, third, directed the manner in which replacement supplies of sugar were to be obtained upon reduction of the Cuban quota.

Under this authority the Cuban quota has been cut to zero.

The sugar bill we enacted this year extended the Sugar Act from March 31, 1961, to June 30, 1962. It did not change the basic provisions of the act, although the legislation embraced two amendments to the emergency authority: First, to relieve the President of the obligation to purchase any part of the sugar formerly supplied by Cuba from any country with which the United States does not maintain diplomatic relations; and second, to require that in above-quota foreign purchases consideration should be given to countries of the Western Hemisphere and to those countries purchasing U.S. agricultural commodities.

The necessity of passing the bill before the Sugar Act expired on March 31 this year, and the complicated nature of the Sugar Act, which finds all of its provisions interrelated and dependent upon each other, made it impossible for the committee to take action on several propositions which would have made substantial changes in the basic act.

It was the committee's intention, upon completing work on the Agricultural Act of 1961, to return to sugar problems and hold the necessary hearings and conduct the essential studies to enact long-term sugar legislation, dealing with quota adjustments for foreign supplies and with the desire for expansion of domestic sugar production in old and new areas. We were awaiting recommendations from the Department of Agriculture, which administers the sugar program.

On August 3, I received a letter from Secretary Freeman advising that for several reasons it appeared inadvisable for the Department to present recommendations for amending and extending the Sugar Act before the beginning of the next session of Congress. He said "world production and marketing of sugar are undergong realinement and the situation has not yet stabilized," and this fact, coupled with other uncertainties in the international fields "lead us to believe it wise to reserve judgment for the present about some of the major issues respecting sugar import quotas." Moreover, the Secretary said "within the domestic sugar industry there are also important unresolved issues."

I subsequently announced that no further sugar legislation would be considered at this session but that such legislation will be given preferred treatment when the Congress returns in January. But, ever alert to the problems relating to sugar, internationally and among our own producers, our committee on September 7 adopted resolutions:

First. That the President be requested to instruct those in charge of administering the sugar program that it is the clear intent of Congress that in making any foreign purchases of sugar for the calendar year 1962 clear preference is to be given those countries which offer to buy a reasonable quantity of U.S. agricultural commodities in return for our purchase of their sugar.

Second. That it is the sense of the committee that in allocating the sugar tonnage necessary to supply the domestic growth factor, the Secretary of Agriculture should make allocations to new mills so that this new tonnage can support the development of the sugar industry in new areas in anticipation of passage of legislation revising the Sugar Act in 1962.

Third. That the committee would regard with extreme disfavor any action or statement by any representative of the United States at the Conference in Geneva, Switzerland, on the International Sugar Agreement, which would commit the United States or imply, either directly or indirectly, any commitment on the part of the United States to adopt any system of sugar importation other than fixed statutory quotas such as have heretofore operated so effectively under the Sugar Act of 1948 and previous laws.

Mr. Speaker, the three major farm enactments I have discussed are Public Law 87–5—the special feed grains program for 1961; Public Law 87–15—amend and extend the Sugar Act; and Public Law 87–128—the Agricultural Act of 1961.

Our committee has considered and reported to the House many other bills in this session dealing with specific matters relating to agriculture. A number have become public law, including:

Public Law 87–8—Farmers Home Administration loans (ceiling increase).

Public Law 87–10—extend time for application of 1959 amendment to Federal Nematocide, Fungicide and Rodenticide Act.

Public Law 87–28—amend title I of Public Law 480 (provides $2 billion additional authority during 1961).

Public Law 87–33—temporary release and reapportionment of pooled acreage allotments.

Public Law 87–37—cotton acreage allotments transfer from flooded areas.

Public Law 87–62—emergency hay harvesting on conservation reserve acreage in drought areas.

Public Law 87–67—special milk program for children, expanded and extended to June 30, 1962.

Public Law 87–104—wheat referendum time extension to August 26, 1961.

Public Law 87–106—emergency livestock loans extension.

Public Law 87–127—surplus grain sales in disaster areas.

As I make this report, several bills relating to agriculture are awaiting final action before we adjourn. Among these is the Mexican farm labor bill.

Mr. Speaker, in closing this report, let me emphasize again to my colleagues that the work we have done in this first session of the 87th Congress, particularly in the enactment of the Agricultural Act of 1961 and the special feed grains program for 1961, will restore stability to large areas of agriculture. It will reduce burdensome farm surpluses. It will save taxpayers almost $1 billion by diminishing expenditures on farm programs.

However, Mr. Speaker, we by no means have solved all of the problems of agriculture. Some commodities will not be helped by what we have done. They still will be in trouble when this session is adjourned.

In most of these commodities, effective action by the Congress must await the development of unity among producers on what kind of program they want.

The 2d session of the 87th Congress, which convenes next January, will write further general farm legislation. I am hopeful, and I am sure my colleagues here are hopeful, that leadership and unity among farmers themselves will develop in such a way that we may then be able to take another great stride to provide adequate rewards for the people of this country who have made us the best fed nation on the face of the earth.

Status of the Regular Appropriation Bills and Legislative Back-Door Appropriation Provisions, 87th Congress, 1st Session

EXTENSION OF REMARKS

OF

HON. CLARENCE CANNON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. CANNON. Mr. Speaker, for the information of the House and the country, I include up-to-date tabulations on the status of the regular appropriation bills and identified legislative bills carrying back-door provisions of one kind or another.

With presentation of the two conference reports today and the public works bill scheduled in the House tomorrow, we are near the conclusion of the regular appropriations schedule of the session. The usual last supplemental bill of the session will be reported tomorrow and disposed of this week. As disclosed by the tabulation, the District and foreign assistance bills are in the Senate. The State, Justice, judiciary bill is in conference and will be forthcoming.

The appropriations business has been delayed inordinately this session by the unexplained lateness of the growing practice of processing authorization bills annually. The Committee on Appropriations has been marking time for several weeks on certain bills waiting for the authorizations to clear.

The tables follow.

Table of appropriation bills, 87th Cong., 1st sess., as of Sept. 11, 1961

[Does not include any back-door appropriation bills]

Title	Budget estimates to House	Amount as passed House	House action compared with budget estimates	Budget estimates to Senate	Amount as passed Senate	Senate action compared with—		Final conference action	Increase or decrease compared to budget estimates to date
						Budget estimates	House action		
1961 SUPPLEMENTALS									
3d supplemental	$1,235,482,769	$803,506,119	−$431,976,650	$5,275,213,127	$4,637,419,970	−$637,793,157	+$3,833,913,851	$1,694,055,637	[1] −$3,581,157,490

Total, loan authorizations	(636,600,000)	(658,900,000)	(+22,300,000)	(612,000,000)	(725,500,000)	(+113,500,000)	(+95,600,000)	(725,500,000)	(+113,500,000)

[1] Major reductions include 2 items submitted directly to Senate (S. Doc. 19): (1) $2,969,525,000 to restore funds of Commodity Credit Corporation. Entire estimate disallowed in conference; $1,951,915,000 resubmitted for 1962 in budget estimates for Agriculture (H. Doc. 155); (2) $490,000,000 for "Payment to the Federal extended compensation account." Reduction made by Senate. Resubmitted to Senate for 1962 in Labor-HEW bill (S. Doc. 30).

[2] Includes borrowing authority as follows: Budget estimate, $15,000,000; House reported and passed, $10,000,000; Senate reported and passed, $10,000,000.

[3] Pending final disposition in House, with $3,812,000 not settled (and not included in this figure).

NOTE.—Indefinite appropriations are included in this table.

New authority to obligate the Government carried in identified legislative bills—1st sess., 87th Cong. (public debt borrowing, contract authority, use of receipts, and authority to use existing authority)

[Please note that for some bills no amounts are shown; thus the grand totals understate the situation]

10. Highway Act of 1961 (H.R. 6713; Public Law 87-61) (diversion of general fund revenues to "trust" fund; contract authority):							
(a) Diversion of ½ of 10 percent tax on trucks, buses, and trailers [21]			1,660,000,000	1,803,000,000	1,660,000,000	+1,660,000,000	+1,660,000,000
11. Agricultural Act of 1961 (H.R. 6400; H.R. 8230; S. 1983; Public Law 87-128):							
(a) 1962 wheat program (use of CCC funds involving subsequent reimbursement of CCC)			[6]	[6]	[6]		
(b) 1962 feed grain program (contract authority and use of CCC funds involving subsequent reimbursement of CCC)			[6]	[6]	[6]		
(c) Agricultural commodities, sales for foreign currencies (contract authority involving subsequent reimbursement of CCC)	[23] 7,500,000,000	[22] 4,500,000,000	[22] 4,500,000,000	[22] 4,500,000,000	[22] 4,500,000,000	−3,000,000,000	
(d) Famine relief (contract authority involving subsequent reimbursement of CCC)	[23] 1,500,000,000	[23] 900,000,000	[23] 900,000,000	[23] 900,000,000	[23] 900,000,000	−600,000,000	
Total, Agricultural Act	9,000,000,000	5,400,000,000	5,400,000,000	5,400,000,000	5,400,000,000	−3,600,000,000	
Grand total (as to amounts listed)	28,670,000,000	24,720,000,000	27,196,000,000	19,561,000,000			

[1] Department endorsed need for some legislation, but no specific request was submitted by the administration. Bill extends over 6 years.
[2] Recommended usual-type authorization of appropriation to 3 revolving funds plus use of receipts derived from operations. House concurred.
[3] For 3 revolving funds plus use of receipts derived from operations.
[4] For calendar year 1961 only (to a total of $3,500,000,000).
[5] Originally submitted as part of the general farm bill, to be financed in this manner for fiscal 1962 and thereafter through the more usual annual advance appropriation.
[6] Amounts not precisely determinable.
[7] Basis for this figure is set out on pp. 54-55, H. Rept. 447.
[8] For 4-year period; full executive request and Senate bill were for 5-year period.
[9] For 4-year period.
[10] Represents estimated maximum cost of annual contributions for 100,000 units of public housing to be paid out over period 40 to 45 years. See pp. 55-56, H. Rept. 447.
[11] Regular authorization for appropriation in Executive request and Senate bill. House bill made no provision. Bill changed at conference stage to contract authority.
[12] Regular authorization for appropriation. Senate bill made no provision. Bill changed at conference stage to contract authority.
[13] Part of, and included in, item 6(d), urban renewal grant authority.
[14] Executive request and Senate bill proposed a 5-year extension of availability of the uncommitted balance of previous authority otherwise due to expire on June 30, 1961. (Amount variously estimated at $207,000,000 to $235,000,000; actually turned out to be $227,612,000.) House bill and final version extend such balance and add $200,000,000 additional—limited, however, to a 4-year period. See pp. 57-58, H. Rept. 447.
[15] Excludes $1,200,000,000 carried in Senate bill for veterans direct loans inasmuch as the program is also accounted for in the first bill listed in tabulation.
[16] Regular authorization for appropriation.
[17] Usual form of appropriation authorization—$1,200,000,000 for fiscal 1962 only.
[18] Authorizes this amount to be appropriated over 5 years, 1962-66, but confers authority on the President to make agreements "committing" such appropriation authorizations, "subject only to the annual appropriation of such funds."
[19] Officially estimated at $287,000,000 for 1962 and $300,000,000 for each succeeding year.
[20] Precise amounts not identified.
[21] While technically this is not "New authority to obligate the Government," it has the same effect insofar as general budget totals and results are concerned in that it is, in final effect, the same as an expenditure from the general fund. Amounts shown taken from p. 12, S. Rept. 367. "New authority to obligate the Government" carried in the law, and requested, is $11,560,000,000 for the interstate program over the period through 1972; but it is against the highway "trust" fund, not the general fund. Not shown here are the executive proposals (1) to increase new obligating authority for the A-B-C program; (2) to shift financing of forest and public land highways from the general fund to the "trust" fund; and (3) to redivert aviation gas tax revenues from the "trust" fund to the general fund. They are not shown because action was postponed to a later time.
[22] Enacted and Senate bills for 3 calendar years, 1962-64. Full executive request was 5 years, 1962-66. House was for 3 years, 1962-64, with no limit, but in order to avoid gross distortion of totals and comparisons, $4,500,000,000 is arbitrarily inserted.
[23] Full executive request was for 5 calendar years, 1962-66. Senate, House, and enacted are for 3 calendar years, 1962-64.

Nine New Plants Financed by MIBA Will Be Completed and in Operation This Year

EXTENSION OF REMARKS
OF
HON. CLIFFORD G. McINTIRE
OF MAINE
IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. McINTIRE. Mr. Speaker, the State of Maine is populated by an enterprising citizenry that assiduously adheres to a do-it-yourself philosophy.

In consonance with this theme of citizens and State independence, the Maine Industrial Building Authority Act of 1957 established a unique organization designed to promote industrial development in the State of Maine.

Under this act, an industrial authority was set up, such an authority being empowered to guarantee up to $20 million in loans extended by banks and other lending institutions to local nonprofit corporations located throughout the State.

This authority, in order to meet its obligations, was authorized to issue up to $20 million of its own bonds, and these bonds are fully supported by the full credit of the State of Maine.

Only nonprofit development corporations are entitled to borrow under this program, the maximum for any single loan being $1 million. Under the program's operation local development corporations rent building facilities to existing and new industries on a lease or lease-purchase basis. New structures are built only at such times as clients give adequate assurance of active interest.

The act provides that the local agencies must have a minimum of 10-percent equity in any undertaking; hence, participating banks could lend as much as 90 percent of the valuation. Furthermore, the act permits that such loans may be made for periods up to 25 years.

Mr. Chairman, I have a particular interest in the functions of this authority, for prior to 1958 the Federal Reserve Act prohibited national banks from making loans in excess of 66⅔ percent of valuation. This had the effect of preventing national banks in the State of

Maine from participating in full accord with the 90-percent-of-valuation loan provision of the Maine Industrial Building Authority Act.

Through legislation introduced by me and other interested Congressmen, this restriction was lifted through an amendment to the Small Business Act of 1958, which permitted 90-percent-of-valuation loans to be made by national banks in those instances where the bonds of a lending authority were supported by the full credit of a State. Through such an amendment the financial resources of national banks in Maine became sufficiently available to implement the provisions of the Maine Industrial Building Authority Act.

That this State-advanced effort is bearing fruit is borne out by the results, and in this respect I would like to insert into the RECORD an article from the August 31 issue of the Houlton Pioneer Times that gives some insight into the economic dynamics generated by this State-sponsored authority:

[From the Houlton Pioneer Times, Aug. 31, 1961]

NINE NEW PLANTS FINANCED BY MIBA WILL BE COMPLETED AND IN OPERATION THIS YEAR

(By Roderic C. O'Connor, manager, Maine Industrial Building Authority)

Nine new industrial plants, financed with the assistance of the Maine Industrial Building Authority, will be completed and start operations this year.

These plants will provide jobs for 1,300 employees and provide a total payroll of more than $4 million. The plants will have a total floor area of about 500,000 square feet.

Total cost of the nine plants is over $5 million; insured mortgage loans involve $4.25 million, with $3 million of such loans made by private Maine lending institutions.

The nine new plants, their location, cost, footage, and products are:

Tenant firm	Location	Project cost	Square footage	Product
Morningstar-Paisley, Inc.	Houlton	$1,100,000	60,000	Potato starch modifications.
Hamilton & Sons, Inc.	Auburn	33,000	5,000	Metal fabrications.
Northeast Gases, Inc.	Saco	80,000	8,000	Industrial gases.
Potato Service, Inc.	Presque Isle	1,250,000	120,000	Processed potatoes.
Hancock-Ellsworth Tanners, Inc.	Hancock	800,000	70,000	Sheepskin leather.
R. & L. Manufacturing Co., Inc.	Waterboro	160,000	23,000	Trophies.
Vahlsing, Inc., Maine	Easton	1,150,000	95,000	Processed potatoes.
Casco Printing Co.	Portland	130,000	15,000	Job printing.
Lynn Innersole Co., Inc.	Saco	65,000	98,000	Shoe innersoles.

Strengthening the Two-Party System

EXTENSION OF REMARKS
OF
HON. KEN HECHLER
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. HECHLER. Mr. Speaker, a strong two-party system is one of the bulwarks of our democracy. Believing as I do that we must all take advantage of any opportunity afforded to strengthen the two-party system, a few days ago I addressed the following letter to the Honorable Cecil H. Underwood, former Governor of the State of West Virginia:

SEPTEMBER 7, 1961.

Hon. CECIL H. UNDERWOOD,
Huntington, W. Va.

DEAR CECIL: I hope you will run against me for Congress in 1962.

It seems to me that in the interests of the two-party system the Republican Party should run its strongest candidate. As a former Governor of West Virginia and temporary chairman of the Republican National Convention in 1960, you are far and away the strongest possible candidate.

There are three reasons which may have kept you from wanting to run for Congress: (1) the responsibilities of your present position as a coal executive; (2) a dislike for the 2-year term; (3) a feeling that the three new counties added to the Fourth Congressional District make Republican success difficult.

Let me analyze each of these. (1) You have made a great contribution to the development of the coal industry in your present position. But no man should refuse a call to the higher duty of public office, where your talents would be available on a far broader scale in the interests of the State we love.

(2) A campaign every 2 years is admittedly difficult. Yet if you should win in 1962, this would be an excellent stepping stone for another statewide race in 1964 for a longer term as Governor or Senator. Meanwhile, by defeating me in 1962, you would not only win the congressional seat for the Republicans, but also make the task easier for the Republican Party in the 1964 congressional race—even if you decided in 1964 to leave Congress in order to run for the Senate or the governorship.

(3) Despite the new counties added, the Fourth Congressional District is still a swing district where the vote will be very close.

In case you are concerned by the Democratic registration majority, perhaps the following figures on your 1960 Senate race within the counties of the new Fourth Congressional District are very revealing:

1960 U.S. Senate race

County	Underwood majority	Randolph majority
Cabell	3,454	
Jackson	1,362	
Lincoln		825
Logan		7,921
Mason	978	
Pleasants	5	
Putnam		406
Ritchie	2,044	
Roane	889	
Tyler	2,001	
Wayne		2,018
Wirt	16	
Wood	3,327	

As you can see, you carried 9 out of the 13 counties in the new Fourth Congressional District. Your total vote in these 13 counties was 96,372 to 93,466 for Senator JENNINGS RANDOLPH—a majority of 2,906 against a superb campaigner and a peerless orator. If you could get close to a 3,000 majority over a powerful candidate like Senator RANDOLPH, you should not be afraid of me.

I think if you ran against me we would help to bring the issues forcefully to the attention of the voters, and thereby strengthen the forces of democracy. Such a campaign would stimulate greater interest in government by the people. Whatever the result, the people of West Virginia would gain through wider participation as we both worked constructively for the interests of our State.

You owe it to the Republican Party to make this fight. Even more, you owe it to the State of West Virginia. I hope you will decide to make the race.

Sincerely,

KEN HECHLER.

Take the Guesswork Out of Air Crashes

EXTENSION OF REMARKS
OF
HON. ROMAN C. PUCINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. PUCINSKI. Mr. Speaker, last week 78 persons were killed when a commercial airliner crashed just a few minutes after taking off from Chicago's Midway Airport. This was the worst plane crash in Chicago's history.

During this past weekend another airplane crashed shortly after taking off from Shannon, Ireland, killing another 80 people.

Two of Chicago's outstanding newspapers, the Chicago Sun-Times and the Chicago Tribune, have spoken out in support of legislation which I have introduced which would require all commercial airliners to carry a recording device in a shock-proof, heat-proof container installed in the cabin of the aircraft with an open microphone constantly recording all conversations in the cockpit of the aircraft.

I introduced this legislation more than 2 years ago with the sincere hope that we would be able to eliminate a good part of the agonizing speculation which follows every major air disaster by having a record of the pilot's efforts to save his plane during the last tragic moments before a crash. I am convinced this information from the pilot would provide vital information to establish the cause of a disaster.

The Federal Aviation Agency has advised Congress that it already has the authority to order installation of such recording devices.

The Administrator of the Federal Aviation Agency, Najeeb Halaby, told a press conference in Chicago last week there are technical problems involved in the installation of such devices. I have the highest degree of confidence in Mr. Halaby and am sure that if he will order an urgent program for the development of this equipment, such equipment can be perfected very quickly. I hope there will be no further delay in ordering these recorders installed in commercial airliners.

These recorders in themselves could not have avoided the two most recent crashes, but certainly had they been ordered installed at the time I introduced the original legislation, we would be in a much better position today to evaluate the causes of these crashes and take ap-

propriate action to prevent similar tragedies in the future.

It is inconceivable to me that there would be any further delay in the installation of this equipment. The Airline Pilots Association favors such an order; in my discussions with operators of commercial airlines I have found no one who has raised any serious objections; and the Federal Aviation Agency itself has been working on this project for more than 2 years now.

I am confident that with all the technological gains we have made in practically every field of human endeavor, we should have no problem perfecting a device that will do this job effectively and will at least give us a better idea of what is the cause of these crashes.

I hope the FAA Administrator will order the installation of these devices forthwith; and in support of my contention, I include in the RECORD today two excellent editorials. The first appeared in the Chicago Sun-Times on September 2; the second appeared in the Chicago Tribune on September 9.

I hope there will be no further delay in carrying out this project.

The articles follow:

[From the Chicago Tribune, Sept. 9, 1961]

THE MISSING CLUE

Unofficial reports from the men investigating last week's airplane disaster seem to confirm the belief that there was a structural failure and that part of the tail assembly, including a rudder, broke away just before the plane crashed. This would explain why this section was found, relatively undamaged, about a quarter of a mile to the rear of where the rest of the plane first hit the ground.

Weakening of the tail assembly, it is theorized, would have interfered with and perhaps destroyed the pilot's control of the plane. This might explain the sharp right turn which the plane made just before crashing. The captain may have called on the copilot for help, thus explaining why no radio call was made. Then, as part of the tail broke off, the rest of the plane would have been thrown into an uncontrollable dive.

If the investigators could be sure that this was what happened, they could promptly rule out other theories and concentrate on why the metal gave way. They would be done with their job sooner, their conclusions would probably carry more conviction than otherwise, and their recommendations would be that much more likely to prevent a recurrence. It would help them immeasurably to know what was said in the cockpit just before the crash.

The same could be said of previous crashes in which, for one reason or another, no hint of trouble was given by radio.

Nearly 2 years ago, after an earlier and inadequately explained crash, we suggested that a tape recorder might provide much necessary information. Representative ROMAN PUCINSKI, of Chicago, has asked Congress to require airlines to install one in the cockpit, where it would run constantly while the plane is in flight.

The record need only cover a few minutes; older sounds and voices could be automatically erased as later ones are recorded. The tape would have to be in a shockproof and fireproof container, but the evidence it provided would save time and uncertainty during investigations and would very likely save lives. It should be worth the relatively insignificant cost of the equipment.

[From the Chicago Sun-Times, Sept. 2, 1961]

CHICAGO'S WORST AIR DISASTER

The worst plane crash in Chicago's history, and the worst in U.S. commercial aviation involving a single plane, killed 78 persons early yesterday only minutes after takeoff from Midway Airport. Especially poignant, entire families on gay vacations with their children were among the victims.

With the rest of the community, we join in mourning the losses which have been suffered by so many loved ones and friends of those aboard the craft.

At this writing, the cause of the disaster is not known. A passenger on an earlier leg of the cross-country flight, who disembarked at Chicago, has told of hearing a strange noise and feeling unusual vibration during the flight here. The FBI is investigating the possibility that a bomb was responsible. Witnesses said they saw a "blinding flash" as the plane circled before falling.

A regular procedure is to reconstruct the plane from the wreckage in an effort to determine what structural failure or operational difficulty was responsible for the tragedy. This is a long-drawn process and offers no certain prospect that the cause of the crash will ever be found.

U.S. Representative ROMAN PUCINSKI, Democrat, of Illinois, has proposed that all planes be equipped with automatic tape recording devices, in crashproof, sealed containers, that would preserve the last 5 minutes of a pilot's and a copilot's conversation. It would continually erase earlier conversation.

Thus, after a crash, investigators would have the testimony of the nature of the trouble from the best possible source, the men flying the plane. Plane-to-ground radio does not assure any such message. Contact can be lost in a storm, or the radio can be destroyed in a fire.

Such recording devices exist and the Federal Aviation Agency has authority to install them. We understand that an order for them to be put in use was to have been issued earlier this year but got sidetracked. There should be no further delay on this.

With airliners steadily increasing in size and passenger capacity, everything possible should be done to prevent disasters such as yesterday's. Determining the cause of crashes is part of prevention. The tape idea should at least be tried.

A Long History of Service

EXTENSION OF REMARKS

OF

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. CORMAN. Mr. Speaker, the motion picture industry's long history of outstanding service to the Nation in time of need is a familiar story to all of us. But perhaps less known to many is the fact that each year Hollywood contributes over a million dollars to national and local charities through a unique fund-raising organization known as Motion Picture Permanent Charities.

This year, Motion Picture Permanent Charities will conduct its 20th anniversary campaign throughout the film and allied industries with a goal of raising $1,250,000 for the 22 major health and welfare agencies it supports.

Notable in this 20th anniversary year is the fact that some time during the campaign, the Motion Picture Permanent Charities will reach a total of $25 million raised to help worthwhile charitable organizations. This, I think, is a truly remarkable achievement for a single industry to accomplish. But the record for outstanding achievements by Motion Picture Permanent Charities is equally remarkable.

It was formed in 1940 as a clearinghouse to screen and approve agencies appealing to the film industry for funds, but by 1942 it became evident to its leaders that a different kind of fundraising organization was needed by the film industry.

Thus, late in 1942 Motion Picture Permanent Charities, under Samuel Goldwyn's leadership, created its own campaign organization and consolidated all charity appeals within the film industry, the first such comprehensive program undertaken by a single American industry.

Following this pioneering venture, Motion Picture Permanent Charities set another first in the charity field by instituting the fair plan, payroll deduction system by which an employee contributes voluntarily a fixed amount from each paycheck. So successful was this system that other industries and other charity federations have modeled their fund-raising programs after the fair plan.

Undoubtedly Motion Picture Permanent Charities will pioneer other programs in the future, but on this 20th anniversary I think it appropriate to extend to Hollywood and the Motion Picture Permanent Charities the applause and thanks quite properly due them.

Washington Report

EXTENSION OF REMARKS

OF

HON. BRUCE ALGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. ALGER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following newsletter of September 9, 1961.

WASHINGTON REPORT

(By Congressman BRUCE ALGER, Fifth District, Texas)

SEPTEMBER 9, 1961.

As predicted in my newsletter of August 19 a greatly amended foreign aid authorization bill was sent back to the House from conference and was approved on August 31, 260 to 132. The final bill authorized appropriations of $4,253,500,000 for foreign economic and military aid in fiscal 1962 and $1.5 billion in each of the following 4 years for Development Loan Fund long-term, low interest development loans. The bill also authorized the President to establish a new foreign aid agency. The final bill did not include the long-term borrowing authority requested by the President. He had asked for authority to borrow $8.8 billion from the Treasury for the Development Loan Fund over a 5-year period fiscal 1962–66 to finance long-term, low interest development loans. The final bill authorized $1.2 billion for fiscal 1962 and $1.5 billion a year for fiscal

1963–66, making $7.2 billion available for development loans over the 5 years but required annual appropriation of funds (at least a partial victory for those of us in the House who fought the transfer of responsibility for appropriations from Congress to the Executive).

The foreign aid appropriation bill was whipped through the House in 1 day, September 5, by a record vote, 270–123. The bill as approved appropriated $3,357,500,000 for foreign aid, $896 million less than carried in the authorization bill, but $300 million more than recommended by the House Appropriations Committee.

One of my principal objections to foreign aid is the money we give to our enemies and so-called neutral nations. This objection was supported during the debate on the foreign aid bill by Congressman GLENARD P. LIPSCOMB, of California, who pointed out that the dollars of U.S. taxpayers are being sent to Cuba to bolster the Communist regime of Fidel Castro. Congressman LIPSCOMB, a member of the House Appropriations Committee, pointed to the report on the Foreign Aid Appropriations Bill. He said each year the President requests millions of dollars to cover U.S. contributions to international organizations. In just one instance, LIPSCOMB pointed out, the Pan American Health Organization is providing 32 Russian jeeps for a malaria eradication program in Cuba. Although malaria has a low incidence rate there, the eradication allotment in 1961 is $79,766, or 20 times the amount budgeted in 1958—before Fidel Castro came to power. This has been augmented by a $99,000 allotment from the World Health Organization Malaria Eradication Special Account, for the purpose of providing the Soviet jeeps to Cuba. The American taypayer pays 66 percent of the cost of the so-called health plan for Cuba instigated by PAHO.

UNITED NATIONS SPECIAL FUND

LIPSCOMB reminded Congress that this Fund, to which the United States contributes 40 percent, on May 24 granted $1,157,600 to aid agricultural research programs in Cuba. U.S. contributions for the fiscal year 1961, both assessed and voluntary, amounted to $241,799,522 to over 50 international organizations and their related activities. According to Congressman LIPSCOMB, it appears that very few, if anyone, have ever attempted to figure out where this money actually goes, and actually what it is used for.

Add to these startling statements of how the U.S. taxpayer is contributing to countries dedicated to our destruction, the utter contempt for the United States and our ideals expressed by the delegates to the Conference of Uncommitted Nations at Belgrade last week, and the course we are taking to our own national suicide (newsletter of Aug. 26) becomes more apparent. The nations present at the Belgrade Conference have been the recipients of $7.2 billion from the American taxpayers. Yet not one voice was raised in behalf of American policies. Not a single delegate protested a vicious attack on the United States by the Communist delegate from Cuba. On the other hand, no official action was taken by the Conference to condemn the Soviet Union for its wanton disregard of humanity for its devious use of 3 years of useless negotiations on banning nuclear testing to build up its own arsenal and then arrogantly begin testing within hours of an announcement that it would. No protests from the uncommitted nations for the enslavement of 17 million human beings in East Germany. While India's Nehru piously asks the United States to negotiate with the Communists on issues which are not negotiable, he utters not a word of protest at the brutal and barbaric invasion of Tibet and the inhuman atrocities practiced on her people by the Communists.

It's time we faced facts. The uncommitted nations are not uncommitted, nor are they neutral. For whatever reason, fear or self-interest, they are alined with Soviet Russia and when the chips are down, in the final contest between freedom and Communist slavery, they will be against us unless they are convinced that we are stronger and will win the battle. There are no moral grounds for neutralism in a fight to the death. Those countries which give aid and comfort to our enemy also become our enemies. My own position is opposed to foreign aid until it is used in the self-interest of the United States.

Myers Bros.: Diamond Jubilee

EXTENSION OF REMARKS
OF
HON. PETER F. MACK, JR.
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, September 11, 1961

Mr. MACK. Mr. Speaker, this year Myers Bros. Department Store of Springfield, Ill., is celebrating its diamond jubilee. This store is as much a part of that city as the historic Lincoln shrines. In a sense it is a Lincoln shrine, as the present store is located on the site once occupied by a law office of Abraham Lincoln.

This occasion commemorates more than just 75 years in the retail business. It marks the consistent policy of the Myers Bros. to follow fundamental rules of responsibility of business in a country of free enterprise.

The combination of energetic work, business ingenuity, forward thinking, and a tradition of providing top quality merchandise at the lowest possible price are the major ingredients of success in this "store that quality built." Coupled with this strictly business attitude, however, is the family's pride in their hometown. "Civic duty is the rent we pay for the space we occupy in our community" has been the motto of the Myers brothers since the founding of their business in 1886.

There is quite a contrast between the first and present stores. Myers Bros. in the beginning was a two-story building, 22 feet wide, located on the west side of Lincoln Square and the Sangamon County Courthouse. Albert and Louis Myers, later joined by their younger brother Julius, purchased the business in 1886 from Sam Rosenwald, whose faith in these young men was so profound that he personally chose them as the new owners and lent them money for the purchase of the store. Rosenwald was the father of Julius Rosenwald, who later became famous through his association with Sears, Roebuck & Co., and as a great philanthropist.

Albert and Louis started out with one clerk and credit to buy merchandise. But through economical management, they had cleared their indebtedness and were making a profit from their venture before the first year was out.

By 1900 the store had expanded from the potbellied stove and kerosene lamp atmosphere, and the business was moved into a brandnew five-storied building on the corner of Fifth and Washington Streets.

In 1924, disaster struck, and the store was burned to the ground. Undaunted by this setback, the Myers brothers bought out a store down the street—lock, stock, and barrel—and were back in business the next day, making plans for their present 10-story home. Without a halt in operation or inconvenience to their customers, Myers Bros. were back with an expanded business in only 1 year.

This example is typical of how the Myers brothers weathered other rough times—wars, depressions, boomlets and booms. But as times and methods change, the Myers brothers family proved not only adaptable to such change, but succeeded in accumulating a record of leadership in both local and national business affairs.

Locally, Myers Bros. collected a string of "firsts." Their store was the first Springfield business ever honored with front-page recognition in the Wall Street Journal; the first to use color advertising, first to hold a live flower show in connection with spring openings, first to publish an extensive Sunday rotogravure section, first to carry a noncontributory pension plan for their employees, and first with store-home deliveries for their customers.

Countrywide recognition came when Julius Myers, now deceased, became the first president of the National Retail Merchants Association. Myers Bros. are also recipients of the sixth annual retail award plaque, 1954, citing them as brand name retailer of the year.

Thus, what began as a small store in a pioneer town has now blossomed into an established business with six branch stores throughout central Illinois, servicing Jacksonville, Danville, Lincoln, Mattoon, Havana, and Alton.

Myers Bros. have come the long way from a one-clerk operation to a payroll of 250 persons. Their average employee has 6 years' service, and many have 25 years or more. The store now has 67 selling departments, and 14 service departments, all coordinated and timed in buying and selling procedures to keep up with and anticipate current trends in the market.

The brothers themselves have contributed three generations of service to their business and their community. There is virtually no major civic group that has not felt the personal help and leadership of one or more of the Myers brothers. From the founders to the present managers, Stanley C., Albert M., Alan J., James E., Morris, and Louis, the Illinois State capital and subsequently other communities have benefited by their devotion as active citizens.

Whether it is a Boy Scout, junior college, YMCA, hospital or civic club drive, one of the Myers family can always be found in assistance. To these men, such work is merely in keeping with their philosophy that "a growing and progres-

sive community and a growing and progressive business are one and the same."

Thus, credit to Myers Bros. is not just a passing recognition of a successful business, which it is; but also the recognition of a sincere application of principles and integrity, in the quest for a better future. Myers Bros. are evidence of the fact that a strong community is based on the permanence of economic enterprise and faithful citizenship.

In closing I would like to note that the founders of this fine and upstanding business were close friends of my father, Peter F. Mack, Sr., and I am proud to say that the present owners are good friends of mine.

Progress Report on Rural Areas Redevelopment

EXTENSION OF REMARKS
OF

HON. WINFIELD K. DENTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 11, 1961

Mr. DENTON. Mr. Speaker, the progress of the rural counties of the United States is just as vital, if not more vital in many ways, to the continued progress and prosperity of this country as our great cities. The establishment of the Area Redevelopment Agency in the U.S. Department of Commerce has been a good step in the right direction toward the relief of those cities hard hit by the recession which this country experienced the past year. I have long been interested in the plight of some of our more rural communities, and am pleased to be able to insert in the RECORD at this time the following statement provided me by the U.S. Department of Agriculture telling of that Department's activities in the rural areas of the country. This is just another sign of the tremendous interest of the Kennedy administration in all our peoples, be they in cities or the rural areas. Under unanimous consent, I include this information in the RECORD:

PROGRESS REPORT ON RURAL AREAS DEVELOPMENT

The Department of Agriculture has launched a full-scale campaign to end rural poverty by aggressively promoting more jobs and other opportunities in the Nation's rural counties.

Since January 20 the Department has moved rapidly to mobilize its resources and personnel for a total program of rural areas development, which Secretary Freeman terms "more important to the long-range future of our Nation than any other program now being conducted by the Department."

In the short space of 7 months the new RAD program has gone into operation throughout the Nation, reinforced by new and strengthened services of the Department. Some highlights of the remarkable progress that's been made:

Establishment of a top level Department of Agriculture RAD Board and staff to get the program into operation.

Organization of State and local RAD activities, with Farmers Home Administration, Rural Electrification Administration, and Federal Extension Service assigned the full-time job of helping local groups get underway.

Naming of 487 rural counties as eligible for financial aid under the new Area Redevelopment Act, and direct USDA assistance to leaders in making use of ARA to strengthen their economies.

Stepped up rural electrification, farm credit, and small watershed work of the Department to make even greater resources available for rural development. Of particular importance is more imaginative use of REA section 5 loans to finance machinery in rural industries.

The task of rural areas development is national in scope, international in gravity. Today in the United States more than 36 percent of all farm families have incomes of less than $2,000 a year. Last year, if underemployment in the Nation's farm regions were converted into terms of unemployment, there would have been 1.4 million persons in rural America unemployed.

RAD aims at more rapid economic growth in farm communities and small towns where these underemployed families live. This is a key factor in winning the cold war. The United States must prove to noncommitted peoples of the world, most of whom live in rural sections, that rural poverty and suffering can be eliminated at home. Otherwise they will turn to other governmental systems for an answer to their problems.

For both domestic and international reasons, therefore, Secretary Freeman has placed RAD at the top of his priority list of USDA objectives. In March 1961, as a first step, he established the Rural Areas Development Board representing 12 USDA agencies. In June he set up an Office of Rural Areas Development to staff and coordinate the program. At that time, the Secretary also assigned specific jobs to three key USDA agencies, with the aim of getting work started at the grassroots as soon as possible.

Farmers Home Administration is responsible for establishing RAD panels to supply State and local leaders with technical aid in promoting new enterprises.

Federal Extension Service is responsible for providing organizational and educational leadership to State and local RAD committees. These include civic leaders, farm and business representatives, rural electric borrowers, State development agencies, trade union representatives, and all other interested groups.

Rural Electrification Administration has the job of stimulating new business and other enterprises to build employment in rural areas.

Drawing on a broad background of work with farm and other rural people, each of these key USDA agencies has rapidly geared up for its RAD assignments.

Farmers Home Administration set up a special staff to handle RAD work, and is now holding a series of training meetings with key field personnel. REA also has a new staff of some 15 specialists who are helping communities develop new rural enterprises. Rural electric and telephone co-ops are enthusiastically joining in local RAD programs. For many rural electric co-ops, rural development is tied in closely with their future operations. And in July Federal and State extension officials mobilized additional resources at National, State and county levels to support the program and conducted a series of regional meetings to intensify staff contributions for the program.

Other USDA agencies represented on the Department's RAD Board have also acted to strengthen and step up those programs that promote area development.

This rapid action on the part of the Department of Agriculture has resulted in RAD program organizations in 38 States, with local program districts of two or more rural counties already organized in 25 States.

The Department of Agriculture also has the job of helping eligible rural counties obtain benefits under the new Area Redevelopment Act. These benefits include Federal loans and grants for public works and industrial development, technical aid, and retraining of workers, including farmers and farmworkers.

Among the Department's major assignments under the act are selecting rural counties to receive assistance; reviewing area plans for development; and most important, helping local leaders put together plans and projects that will take full advantage of the new ARA program.

Because of the Department's already existing organization for Rural Areas Development, rapid progress has been made in selecting rural counties for the ARA programs, formulating area-wide plans, and setting up local groups capable of running the program in the rural (5b) areas.

Nearly a third of the Nation's counties are covered by areas now eligible to apply for the ARA program, including 487 rural counties in 41 States and Puerto Rico. Long-range economic development plans for revitalizing their economies already have been approved for 180 counties in 22 States. The majority of these are rural redevelopment counties, assisted by the Department of Agriculture, or other similar areas with large numbers of underemployed people living in farm areas.

ARA is another tool the Department of Agriculture is using to promote maximum economic development in farming areas, along with its own extremely important kit of area development services and aids.

Many of these regular programs of the Department which implement and further local area development plans have been stepped up in this revitalized Rural Areas Development campaign against rural poverty.

Since early 1961, REA has approved 144 electrification loans amounting to $166,781,000 and 125 telephone loans totaling $42,594,000. Loans for generating and transmission facilities amounted to 57.6 percent of the electric total, and included a $60 million loan, largest in REA's 26-year history, to Hoosier Cooperative Energy, Inc., of Indiana.

On September 8, REA approved a $25,000 loan to a rural electric cooperative which will enable a small North Dakota firm to add equipment and create new jobs in a farming area. It was made under the consumer financing provision (sec. 5) of the Rural Electrification Act. REA policy on loans to help consumers acquire electrical equipment has been expanded to gear this lending program to the needs of rural areas for increased nonfarm income.

Between January 1 and August 1, 1961, 55 small watershed projects including 4.5 million acres were authorized to receive planning assistance, and 36 projects including 1.6 million acres were authorized for operations. On August 1, 325 projects including 18.6 million acres had been authorized for operations.

Between May 19 and August 14 President Kennedy sent to the Congress for approval work plans for 54 watershed projects including 3.9 million acres, the largest number sent to the Congress in a 90-day period since the program was authorized in 1954.

The Farmers Home Administration had a sharp rise in lending activity during the past 7 months and ended the 1961 fiscal year lending $397 million, an alltime high.

Recent legislation is now being implemented which will make a more adequately financed, broadened, and expanded credit program available to a wider range of farmers, particularly young farmers just

getting started and farm families on the smaller farms.

Under the Housing Act of 1961 rural residents including those living in small communities are now eligible along with farmers for more than $430 million rural housing loan funds available over the next 4 years to construct, improve, or repair homes and related facilities.

Secretary Freeman has called the achievement of full prosperity in America's rural areas a key factor in the world contest with communism.

"I believe that in the rural areas development program we have the weapon to wipe away the chronic depression which now enchains many areas, it can lift the curse of underemployment which saps the strength of our rural economy in every area and it takes the first step toward the permanent prosperity of the rural community.

"This program, combined with the freedom of economic choice which the Kennedy farm legislation will provide the farmer, will help restore full freedom of economic opportunity to those who live in rural America," the Secretary said.

SENATE

TUESDAY, SEPTEMBER 12, 1961

The Senate met at 9 o'clock a.m., and was called to order by Hon. E. L. BARTLETT, a Senator from the State of Alaska.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Thou God of grace and glory, whose clearest and most searching words are heard in the silences of the soul, give, we beseech Thee, to Thy servants who here wrestle with the Nation's problems, quiet hearts and open minds that welcome all truths from whatever direction it may come. May the fret and fever of their spirits not add to the confusion of a bewildered age instead of helping and healing.

Lift our eyes, we pray Thee, above the foggy valley of narrow loyalties and partisan interests to vaster vistas where small things are seen as small, and great things as great. Remove far from us even unrecognized bigotries and prejudices based on a lack of understanding.

In the crises of our time join us with those who across the waste and wilderness of human hate and need, preparing the way of the Lord, throw up a highway for our God. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 12, 1961.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. E. L. BARTLETT, a Senator from the State of Alaska, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. BARTLETT thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. METCALF, and by unanimous consent, the reading of the Journal of the proceedings of Monday, September 11, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 2838. An act to exempt from taxation certain property of the Army Distaff Foundation; and

H.R. 9080. An act to authorize the Philadelphia, Baltimore, & Washington Railroad Co., to construct, maintain, and operate branch sidings over First Street SW., in the District of Columbia.

ENROLLED BILL SIGNED

The message also announced that the Speaker pro tempore had affixed his signature to the enrolled bill (S. 1653) to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises, and it was signed by the President pro tempore.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred to the Committee on the District of Columbia:

H.R. 2838. An act to exempt from taxation certain property of the Army Distaff Foundation; and

H.R. 9080. An act to authorize the Philadelphia, Baltimore & Washington Railroad Co. to construct, maintain, and operate branch sidings over First Street SW., in the District of Columbia.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. METCALF. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. KUCHEL, and by unanimous consent, the Irrigation and Reclamation Subcommittee of the Committee on Interior and Insular Affairs was authorized to meet during the session of the Senate today.

On request of Mr. MCNAMARA, and by unanimous consent, the Irrigation and Reclamation Subcommittee of the Committee on Interior and Insular Affairs was authorized to meet during the session of the Senate today.

COMMITTEE MEETING DURING SENATE SESSION FOR WEDNESDAY AND FRIDAY

Upon request of Mr. HUMPHREY, and by unanimous consent, the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary was authorized to meet during the session of the Senate tomorrow, September 13, 1961, and Friday, September 15, 1961, to take testimony on the bill (S. 1522) from the Honorable Abraham Ribicoff and the Honorable Lee Loevinger.

RESTITUTION FOR SENECAS—RESOLUTION

Mr. KEATING. Mr. President, for some time I have been carrying on a fight to win fair treatment for the Seneca Indians in western New York in connection with the proposed construction of the Kinzua Dam project.

I have said, and I say again, that this country, particularly at this hour in our history when we are prepared to accept the risk of armed conflict rather than yield our treaty rights in Berlin, should not take lightly the obligations of a solemn treaty with the American Indians.

However, I realize that we have reached a late hour in this controversy. Plans for construction of the dam are going ahead.

If the Indian lands are flooded, as is now planned, that does not end the story so far as I am concerned. We still have the duty to make all possible restitution to the Senecas.

Such restitution must be not only economic but also moral. In this connection I call the attention of the Senate to a wise and generous and honorable act of the Board of Supervisors of Cattaraugus County, N.Y. I ask unanimous consent that at this point in the RECORD there be printed a resolution by the Cattaraugus County Board of Supervisors, suggesting that the bridge to be built across the Allegheny River as part of the dam project be designated the Seneca Memorial Bridge.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION 250

Whereas the plans for the construction of the Kinzua Dam project include the erection of a new bridge across the Allegany River in the vicinity of Coldspring; and

Whereas the Kinzua Dam project has worked an extreme hardship upon the Seneca Nation of Indians in depriving them of lands where, for many generations, their

families had resided, and the propriety of the taking of such lands from them raised serious legal and moral questions: Now, therefore, be it

Resolved, That the Cattaraugus County Board of Supervisors does hereby memorialize all legally constituted public officials in charge of the location and erection of the new bridge to name and dedicate the proposed new bridge as a memorial to the Seneca Nation of Indians; and be it further

Resolved, That such bridge, when erected, shall be appropriately designated the "Seneca Memorial Bridge," either by arches or tablets erected at or near both approaches of said bridge; and be it further

Resolved, That certified copies of this resolution, when adopted, be forwarded by the clerk of the board to President Kennedy, Senators Keating and Javits, to Congressman Goodell, to President Basil Williams of the Seneca Nation of Indians, to the Army Corps of Engineers, to Governor Rockefeller, and to the New York State Department of Public Works; and be it further

Resolved, That the Cattaraugus County Board of Supervisors does hereby respectively solicit their aid and support in so naming and dedicating the proposed new bridge.

Adopted September 6, 1961.

THE COMMUNIST MENACE—RESOLUTION

Mr. ERVIN. Mr. President, the North Carolina State Council of the Junior Order of United American Mechanics, which is a constituent element of one of America's greatest patriotic organizations, adopted at its recent State meeting a resolution pointing out the threat which communism poses to America and to the free world. I ask unanimous consent that a copy of this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION 9

COMMUNISTIC MENACE

Whereas the threat of communism lies in its titanic struggle for the physical conquest of nations and the minds and souls of their people; and

Whereas in four decades communism has developed like a huge cancerous growth infecting and threatening the life of Western culture and during this period has taken over the life, death, and thought of more than 800 million people, in more than a dozen nations. To use the words of elder statesman, James A. Farley, "The enslavement has been accomplished through broken promises, broken treaties, skilled deceits, insidious propaganda, blatant lies, strangling economic pressures, and brute force"; and

Whereas the Communist enemy has advanced to its present degree in this country because so many—especially some of our youth—are misinformed, indifferent, complacent, or receptive to Communist ideology: Now, therefore, be it

Resolved by the State Council of North Carolina assembled in Asheville this 11th day of August 1961, That there is an imperative need to create a full awareness in the minds of our citizenry of the Communist real aims and their widespread growth and influence at home and abroad; that informative, relevant governmental releases be made with greater frequency; that the Senate Committee on Internal Security and the House Committee on Un-American Activities have continuing support and be encouraged to further publicize their findings relative to the subject; that we favor the making of Hon. J. Edgar Hoover's book, "Masters of Deceit," required reading in our schools and colleges; and be it further

Resolved, That as a patriotic order and as individuals we will lend our assistance and make every proper effort to accomplish the foregoing, in the belief that it benefits the welfare of the Nation, and will contribute to the preservation of freedom; and be it further

Resolved, That the State secretary be and hereby is directed to send copies of this resolution to the President of the United States and to Members of Congress from this State.

M. J. STOKES.
J. D. BOBBITT.
J. L. WHITE.
JOHNNIE C. CURRIN.
A. C. EDWARDS.

Approved by the good of the order committee:

DEWEY WILLIAMS.
JAMES E. MOSTELLER.
WALTER E. CRISSMAN.

COMMUNISM AND WEST BERLIN—LETTER

Mr. ERVIN. Mr. President, Thomas C. Hoyle III, of Greensboro, N.C., belongs to a family which has made significant contributions to religion, law, politics, and government in North Carolina. During recent months, he has been a student at the University of Vienna, in Vienna, Austria. During his sojourn there, he visited West Berlin and various other sections of that general area of Europe. On July 15, 1961, he wrote to his father, Thomas C. Hoyle, Jr., a distinguished member of the North Carolina bar, a letter in which he set out with remarkable clarity his appraisal of communism, the neo-Nazi movement in Austria, and the attitude of West Berliners to the pending crisis. Representative HORACE R. KORNEGAY, of the Sixth North Carolina Congressional District, and I share the opinion that this letter makes these things readily understandable, and, for this reason, ought to be made available to our colleagues in the Congress and to the public. Having obtained authority to do so from both the author and the recipient of this letter, I ask, in behalf of Representative KORNEGAY and myself, that a copy of the letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JULY 15, 1961.

DEAR DAD: You asked me several months ago to write you a detailed account of what I had learned about the neo-Nazi movement in Austria. I have waited until now in order to study the problem more carefully. If you think this information would be of interest to Representative KORNEGAY, please send a copy to him.

I first learned of the problem of the neo-Nazis through conversations with an American student who was studying with me in Vienna. I also had several conversations with his Austrian roommate. The Austrian seems to have several friends who are members of the movement and may himself have attended several meetings, but is definitely not a member himself. It seems that the center of the movement lies in some of the fencing fraternities in the University of Vienna. These fraternities have been in existence since before 1900; their purpose is to keep active the interest in fencing which is a symbol of masculinity to the Austrians. Not all of the members of these fraternities are neo-Nazis, but some of them are.

It is most probable that those who are members of the movement have been taught some of the principles of national socialism by their fathers who were active Nazis. The main interest seems to be in the reunification with Germany; the reason for this is perhaps the strength of the West German economy today. Also there are strong anti-Semitic feelings within the group, but these have been strong in Austria since before the time of Hitler.

On several occasions I discussed the neo-Nazi with a very intelligent 28-year-old who works as a consultant for a pharmaceutical company. He has no direct connection with the main part of the University of Vienna where the members of the neo-Nazi group study. When I told him what I had heard about this group, he said he did not believe that such a group existed. I talked with a good number of Austrians, 35 years old and older, and they knew nothing of the existence of such a movement. It is my belief that most Austrians know nothing of the neo-Nazi movement, but nevertheless, many neo-Nazi symbols are painted or scratched on the walls of buildings in Vienna. I am certain of the existence of a group with neo-Nazi feelings in Austria today, but as to their organization and strength, I do not know the details. I do know that there is a strong dislike of the Jews and that neo-Nazi signs are rather prevalent in Vienna's old Jewish section.

After learning of this situation, I became more fully aware of a problem which is of much greater danger to America today than neonazism—that is communism. I made a 3-day trip by bus with a tourist bureau to Prague, Czechoslovakia. I have also traveled through Yugoslavia twice, stopping for 12 hours in Belgrade because of a train wreck, and I have just returned from Berlin where I visited the East sector several times.

I was in Prague for the May 1 parade which is one of the great celebrations of the Communist Party. I cannot say I know all about communism or that I understand it completely, but I can say that I carefully observed the people who are living under the Communist regime. Prague is supposed to be the showplace of communism, and I think that the people there are more prosperous than in other parts of Czechoslovakia or in other satellite countries. I saw no beggars on the streets of Prague, but there were also no people who were "well off." I got the impression that all of the people were the same. I saw no one who seemed to be really happy or who seemed to be enjoying life.

I watched the people line up for the May 1 parade; they were carrying pictures of Lenin, Marx, and the other Communist leaders. These people were forced by the government to march in the parade; very few of them, I felt, actually knew why they were marching. Among these marchers were the university students with whom several of my friends had talked; these Czechoslovakian students knew and were opposed to the reasons for marching—they said they were fed up with communism and wanted to escape, but there was no possibility.

When the parade was underway, I observed that only a few of the marchers exhibited any real enthusiasm after they passed the reviewing stand. It is most difficult for me to describe the conditions in Prague; there exists an atmosphere of resignation in the minds of the people. This atmosphere envelops the entire city; it seems as if everything is dead; any interest in an active life is absent.

In Berlin I found a situation which made me most proud to be an American. The West sector was largely rebuilt and modern,

although some of the ruins still remain. The East sector, however, is the direct opposite; Stalin Alley, one of the main streets, is modern, while much more of the sector is still in ruins. In the West sector I was shown by a tour guide the monument to the American, British, and French pilots who lost their lives during the airlift in 1949. The guide made a special point to emphasize how important this time was to the West. As a member of this tour, I could not help but realize how strongly the West Berliners felt about this airlift. I believe, and many Europeans have told me that they have the same opinion, that this was the West's and especially America's finest hour since 1945. America proved to the world that she was willing to stand behind her words and support free peoples.

Of the numerous West Berliners with whom I have spoken, each has stressed the necessity of keeping American troops in Berlin. The West Berliners want the American troops to remain in Berlin for their protection; they believe that if America gives up in Berlin that she will have lost the cold war and thus will be subjecting the entire free world to communism.

In Prague, in Yugoslavia, and in East Berlin, the people seem to exist instead of live. It is quite evident to a Westerner that the people lack a purpose or meaning to live. This may seem to be abstract, but most of my fellow students who have visited these places have the same impression I do. The conditions of these people living under communism can be more easily and more thoroughly understood when one has an opportunity to observe them personally. The reasons I said that communism is such a great danger to America are: first, it is an ideology aimed at destroying man as Westerners understand him; secondly, most Americans say they hate communism, but they don't know what communism is. Communism is a religion whose purpose is to destroy the mind of man and man's power to think and reason. Under communism, man's sole justification is in his service to the state. Freedom, individualism, and God, which are all important to the Western man, have no place in the Communist way of life.

These are some of the things I have learned in the past several months, but where do we go now? I have several suggestions:

1. We should teach in the public school the meaning of democracy as contrasted with communism.

2. The high schools and especially the universities should put a strong emphasis on the history of the world since 1914 and the significance of this period.

3. We should teach in our colleges and universities courses on communism, its ideals and its methods so that we can understand it and more intelligently fight it.

4. We should attempt to help those citizens who have finished their formal education to understand communism. This could be done through civic clubs and similar organizations.

It is my belief after studying in Europe for 6 months and after talking with hundreds of Europeans and Americans that America and the American public must decide today to enlighten themselves. We must diligently study our own way of life and study the ideals and methods of the Communist ideology so we can intelligently understand and defeat it. We must make the decision to protect and preserve the ideals which made America great. We must decide to stand for and to support at any price the rights of freemen in their attempt to maintain their independence. If America fails to make her stand today, she will not have a second opportunity.

Love,

BUCK.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, without amendment:

S. 1581. A bill for the allocation of costs on the Wapato-Satus unit of the Wapato Indian irrigation project (Rept. No. 974).

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, with amendments:

S. 1060. A bill to authorize the Secretary of Interior to construct, operate, and maintain the Oroville-Tonasket unit of the Okanogan-Similkameen division, Chief Joseph Dam project, Washington, and for other purposes (Rept. No. 973).

By Mr. BURDICK, from the Committee on Interior and Insular Affairs, without amendment:

S. 1139. A bill to amend the act granting the consent of Congress to the States of Montana, North Dakota, South Dakota, and Wyoming to negotiate and enter into a compact relating to the waters of the Little Missouri River in order to extend the expiration date of such act (Rept. No. 975).

By Mr. KUCHEL, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 1378. An act to authorize the Secretary of the Interior to enter into an exchange of certain land in Madera County, California, with Mary Saunders Moses (Rept. No. 981).

By Mr. GRUENING, from the Committee on Interior and Insular Affairs, without amendment:

H.R. 2924. An act to repeal an act entitled "An act extending the time in which to file adverse claims and institute adverse suits against mineral entries in the district of Alaska," approved June 7, 1910 (36 Stat. 459) (Rept. No. 982).

By Mr. BIBLE, from the Committee on Interior and Insular Affairs, with amendments:

S. 1760. A bill to establish the Great Basin National Park in Nevada, and for other purposes (Rept. No. 983).

By Mr. GOLDWATER, from the Committee on Interior and Insular Affairs, with amendments:

S. 522. A bill to authorize the establishment of the Hubbell Trading Post National Historic Site, in the State of Arizona, and for other purposes (Rept. No. 986).

By Mr. ENGLE, from the Committee on Commerce, without amendment:

S. 2524. A bill to amend the Shipping Act, 1916 (Rept. No. 980).

By Mr. ENGLE, from the Committee on Commerce, with an amendment:

H.R. 3156. An act to make the Panama Canal Company immune from attachment or garnishment of salaries owed to its employees (Rept. No. 979).

By Mr. KERR, from the Committee on Public Works, without amendment:

H.R. 8678. An act to provide for the conveyance of a portion of the Henry G. Shirley Memorial Highway and other highways on the Pentagon road network to the Commonwealth of Virginia, and for other purposes (Rept. No. 984).

By Mr. KERR, from the Committee on Public Works, with an amendment:

S. 856. A bill to create a regional agency by intergovernmental compact for the planning, conservation, utilization, development, management, and control of the water and related natural resources of the Delaware River Basin, for the improvement of navigation, reduction of flood damage, regulation of water quality, control of pollution, development of water supply, hydroelectric energy, fish and wildlife habitat, and public recreational facilities, and other purposes, and defining the functions, powers, and duties of such agency (Rept. No. 985); and

S. 2394. A bill to authorize the improvement of Portland Harbor, Maine (Rept. No. 978).

By Mr. YARBOROUGH, from the Committee on Labor and Public Welfare, without amendment:

H.R. 3587. An act to amend section 612 of title 38, United States Code, to provide outpatient medical and dental treatment for veterans of the Indian wars on the same basis as such treatment is furnished to veterans of the Spanish-American War (Rept. No. 987).

By Mr. JOHNSTON, from the Committee on Post Office and Civil Service, without amendment:

H.R. 6007. An act to amend section 505(d) of the Classification Act of 1949, as amended, with respect to certain positions in the General Accounting Office (Rept. No. 988).

By Mr. FULBRIGHT, from the Committee on Foreign Relations, with amendments:

H.R. 8291. An act to enable the United States to participate in the assistance rendered to certain migrants and refugees (Rept. No. 989).

YOUTH CONSERVATION CORPS AND YOUTH PUBLIC SERVICE PROGRAM—REPORT OF A COMMITTEE—MINORITY AND INDIVIDUAL VIEWS (S. REPT. NO. 976)

Mr. CLARK. Mr. President, from the Committee on Labor and Public Welfare, I report favorably, with amendments, the bill (S. 404) to authorize the establishment of a Youth Conservation Corps to provide healthful outdoor training and employment for young men and to advance the conservation, development, and management of national resources of timber, soil, and range, and of recreational areas, and I submit a report thereon. I ask that the report be printed, together with the minority views of Senators GOLDWATER, PROUTY, and TOWER, and the individual views of Senators CASE of New Jersey, and JAVITS.

The ACTING PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Pennsylvania.

ESTABLISHMENT OF ADDITIONAL SUPERGRADE AND SCIENTIFIC TYPE POSITIONS—REPORT OF A COMMITTEE: INDIVIDUAL VIEWS: ADDITIONAL AMENDMENTS—(S. REPT. NO. 977)

Mr. JOHNSTON. Mr. President, from the Committee on Post Office and Civil Service, I report favorably, with amendments, the bill (S. 1732) to increase the limitation on the number of positions that may be placed in the top grades of the Classification Act of 1949, as amended, and the limitation on the number of research and development positions of scientists and engineers for which special rates of pay are authorized; to fix the compensation of hearings examiners; and for other purposes, and I submit a report thereon. I ask that the report be printed, together with the individual views of the Senator from Pennsylvania [Mr. CLARK].

The ACTING PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from South Carolina.

Mr. JOHNSTON. Mr. President, subsequent to the approval of the bill, the committee agreed to additional amendments relating to a small group of positions, which, because of a misunderstanding, was not dealt with in the bill as reported. I ask that the additional amendments be printed.

The ACTING PRESIDENT pro tempore. Without objection, the additional amendments will be printed.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Robert F. Corrigan, and sundry other persons, for personnel action in the foreign and diplomatic service; and

Executive J, 86th Congress, 2d session. International Telecommunication Convention, with annexes, and the final protocol to the convention, signed for the United States at Geneva on December 21, 1959 (Ex. Rept. No. 10).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GRUENING:

S. 2530. A bill regarding a homestead entry of Lewis S. Cass; to the Committee on Interior and Insular Affairs.

By Mr. BOGGS (for himself and Mr. WILLIAMS of Delaware):

S. 2531. A bill making Columbus Day a legal holiday; to the Committee on the Judiciary.

By Mr. CARLSON:

S. 2532. A bill to amend subsection (h) of section 124 of the Agricultural Enabling Amendments Act of 1961; and

S. 2533. A bill to amend subsection (d) of section 16 of the Soil Conservation and Domestic Allotment Act, as amended; to the Committee on Agriculture and Forestry.

S. 2534. A bill to amend the Internal Revenue Code of 1954 with respect to the taxation of distributions of stock and dispositions of property made pursuant to orders enforcing the antitrust laws; to the Committee on Finance.

By Mrs. NEUBERGER (for herself, Mr. CARLSON, Mr. MANSFIELD, Mr. METCALF, Mr. CASE of South Dakota, Mr. MAGNUSON, Mr. BURDICK, Mr. CHURCH, Mr. CARROLL, Mr. MOSS, Mr. HUMPHREY, Mr. MORSE, Mr. MCCARTHY, Mr. MCGEE, and Mr. ALLOTT):

S. 2535. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture and Forestry.

(See the remarks of Mrs. NEUBERGER when she introduced the above bill, which appear under a separate heading.)

By Mr. CARLSON:

S. 2536. A bill to provide for the issuance of a special postage stamp in honor of the 50th anniversary of the liquefied petroleum gas industry; to the Committee on Post Office and Civil Service.

By Mr. CHURCH:

S. 2537. A bill to add certain public lands to the Craters of the Moon National Monument, Idaho, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HUMPHREY:

S. 2538. A bill for the relief of Benjamin M. Storey; to the Committee on Finance.

By Mr. GORE:

S. 2539. A bill to amend the Internal Revenue Code of 1954 with respect to income from sources outside the United States, and for other purposes; to the Committee on Finance.

(See the remarks of Mr. GORE when he introduced the above bill, which appear under a separate heading.)

THE WHEAT BUSHEL MANAGEMENT PROGRAM

Mrs. NEUBERGER. Mr. President, today it is my privilege to introduce, on behalf of the Senator from Kansas [Mr. CARLSON] and myself, proposed legislation which makes possible a wheat bushel management program. A number of other Senators have joined us as cosponsors.

Technically, our bill is titled "The Wheat Marketing Act of 1961." It amends the Agricultural Adjustment Act of 1938, as amended.

Realistically, it provides the tools which will enable the Department of Agriculture to—

First. Deal positively in decreasing our burgeoning wheat surpluses;

Second. Improve the income of all wheat farmers; and

Third. Prevent wasteful spending of taxpayer dollars for storage.

These are big problems, perhaps oversimplified, but I believe the wheat bushel management program can solve them. I ask unanimous consent that this legislation lay over until Friday, September 15, for additional sponsors.

Such a bushel quota program would replace our ineffective acreage limitation program. The program is designed to aid both our wheat producers and the general public. It will reduce high storage costs, now approaching $1 million each day. It will encourage higher quality wheat production. It will allow higher per bushel monetary returns and greater total income to the wheat farmer.

There are definite advantages in establishing wheat quotas on a bushel basis:

First. Bushel quotas provide a mechanism for an orderly reduction in Commodity Credit Corporation stocks. They shift storage responsibility to individual growers.

The Secretary of Agriculture, under this proposal, determines U.S. wheat needs for the coming year. He makes that determination by adding the domestic bushel consumption for food to those bushels needed for export.

For example, let us say he finds our wheat needs for the coming year are 1,100 million bushels. This includes 500 million bushels for domestic food use, the average for the past 10 years, and 600 million bushels for exports under programs such as food for peace and for sale under other sections of Public Law 480.

Under the wheat bushel management program, CCC stocks would be reduced by 175 million bushels leaving 925 million bushels to be supplied by the producers.

These bushels are divided among States, the counties, and down to the farm level in a manner similar to that used in the present apportionment of acreage allotments. Each farm quota would be based on the historical wheat acreage of the individual farm and the farm's normal yield, which have been determined previously.

Under the program proposed the CCC storage would be reduced by a minimum of 100 million bushels and possibly by as much as 250 million bushels per year until the surplus has been used.

Second. Bushel quotas encourage the production of higher quality wheat. Each producer has a limited number of bushels certificated by the Department of Agriculture which he may sell into the market for food and export. The natural incentive to the grower is to produce the highest possible quality of wheat to receive the highest possible dollar return for this limited quantity.

Should the producer decide to produce more wheat than he may legally sell for food and export use, he may. But he must store the surplus on his farm or in an elevator at his own expense, or he may use the overproduction of wheat for feed, seed, or industrial purposes.

Third. Bushel quotas, as suggested, allow the price of certificated wheat to be determined on the free market.

The Commodity Credit Corporation would offer a loan at 75 percent of parity only on the producer's quota for primary use. Any wheat sold by CCC for food or export could not be released for less than the full parity price for wheat. Since the quantity eligible to be marketed by producers is less than the market demand, and since the market can obtain the additional quantities needed for food and export only from CCC at full parity, the free market price to producers would approach parity. Thus, producers will receive a fair price for the wheat sold into the primary market with a minimum of cost to the American taxpayer.

Fourth. Bushel quotas allow the price per bushel for feed wheat to be competitive with other feed grains. The market price prevails on feed wheat and on other noncertified wheat.

On August 31, 26 Senators from wheat producing regions signed a joint letter to Secretary of Agriculture Freeman. We pointed to the need for reducing surplus and growing a better quality of wheat to increase demand for U.S. wheat on the world market.

We concluded:

We strongly urge that your Department develop, under the procedures provided by the Agricultural Act of 1961, recommendations for a comprehensive, long-range wheat program, embodying the principles of the bushel program, in sufficient time to submit your recommendations to the Congress by January 1962.

We emphasize the purpose of that letter today. We have introduced this legislation to provide further encouragement to the Secretary of Agriculture and

to insure the Senate's having a work base for the next session. I understand our concern is shared by Members of the other body where identical legislation is to be introduced.

Our proposal is similar to that introduced in the 86th Congress. The wheat bushel management program is endorsed by the National Association of Wheat Growers, the National Farmers Union and the National Grange. It has other friends but I would be remiss if I did not admit it has critics. I am reassured, however, when I consider that the men who know wheat best feel this approach is best.

Some wheat farmers know this proposed legislation more familiarly as the wheat certificate plan. Farmers qualifying as wheat producers would be issued marketing certificates for their share of of the national wheat requirements for primary use. When we speak of "primary use" we refer to the amount of wheat to be used for domestic food consumption and total exports for the next marketing year.

The proposed legislation requires that certificates must be accompanied by wheat. They cannot be transferred. They are valid at the producer level only for the marketing year for which they have been issued.

The wheat bushel management program stipulates that no one can process wheat for food or export which is not covered by marketing certificates. The program specifies that CCC wheat sold for primary use shall not be sold for less than 100 percent of the effective parity price.

The 1-year emergency wheat program passed by Congress this year made mandatory a 10-percent reduction in wheat acreage. Farmers have responded by reducing their acreage even more, as was possible under law. Department of Agriculture experts have estimated that the harvested acreage of the 1962 crop could be 41 to 42 million acres, compared to 51.45 million acres this year. Let me point out that a 20 percent acreage reduction will decrease the number of bushels less substantially. For example, the crop for 1962 is estimated at around 1,100 million bushels compared to 1,200 million bushels for 1961.

I have mentioned the cost of storing our wheat surplus. August 1961 figures from the Department of Agriculture show that the public, the taxpayer, now has about $3 billion invested in wheat. The bushel carryover estimate is 1,400 million. Last crop year, says USDA, the total disappearance of wheat was an estimated 1,271 million bushels—606 million for domestic use and 665 million exported. The export figure is the highest in our history.

Many bushels of wheat have been sent abroad under the Food for Peace program. Deputy Director James W. Symington tells me the figure, beginning January 1 through August 31, is 265 million bushels.

I asked him for a bushel breakdown by countries. That breakdown is:

[In millions of bushels]

India	44
Brazil	39
Egypt	28
Pakistan	23.5
Turkey	18
Yugoslavia	16
Poland	13.7
Tunisia	5
Korea	2.3
Jordan	4.3
Morocco	4.2
Algeria	.225
Libya	.280
Ethiopia	.1

The totals for the sub-Sahara African nations are being prepared. I am advised that each figure will be less than 1 million bushels.

But the increase in wheat exports has not prevented the Department from stating that without the emergency 1-year program the stocks of Government wheat were "likely to keep increasing." The simple "why" is American agricultural ability. It is easy to keep the minimum national wheat acreage allotment stable at 55 million acres. It is impossible to curtail rapidly rising acre yields.

A wheat production cutback of 100 million bushels saves taxpayers about $258 million, according to Department figures. Our wheat carryover of 1,400 million bushels is about 100 million bushels above last year's figure. It is 5½ times larger than the carryover of 255 million bushels 9 years ago.

Do experts believe the wheat bushel management program will be successful?

When the Senate Committee on Agriculture and Forestry asked witnesses to testify on the omnibus farm bill this spring, Mr. Carl Bruns, president of the National Association of Wheat Growers, and Mr. James B. Dyess, executive vice president of the association, responded. The association is composed of 10 independent State wheat grower organizations. It represents an area in the Great Plains and the Pacific Northwest where approximately 60 percent of the wheat in the United States is produced.

I would like to quote briefly from Mr. Bruns' testimony. He said:

> A new approach is needed for wheat. Acreage controls have not been an overwhelming success in keeping wheat production in line with needs.
>
> This bushel-management program would provide the needed increase in wheat producer's income by tailoring marketing of wheat for food and export to market needs.

Mr. Bruns earlier has said the bushel-management plan had widespread understanding and support of wheat producers. This certainly is true of wheat growers in my State of Oregon.

Were we to permit a continued use of the acreage program we would be pyramiding CCC stocks and Government costs. The acreage program has made possible business ventures which ought not ever to have spotted American agriculture.

Many of you have read the 1960 report of the House Committee on Government Operations whose study found that grain storage for the Government had become a $500 million a year industry. The Intergovernment Relations Subcommittee reported, for example, that a Kansas warehouseman received nearly $2 million in storage fees for storing wheat in buildings rented from the Air Force for $29,000 entirely in accordance with CCC policy.

At this moment the Government has in storage nearly 1⅓ billion bushels of wheat. This enormous inventory of 1.242 billion bushels was acquired by CCC at a cost of $2½ billion. It includes wheat grown in the past 5 years, starting in 1956. Since acquisition, the added storage and transportation costs have increased the cost of wheat by more than half a billion dollars. As of June 30, 1961, the financial inventory of CCC wheat was $3,087 million.

The cost of storing one bushel of wheat the first year is approximately 45 cents. Charges include 13.5 cents for storage; 5 cents for handling; 21 cents for transportation to the terminal market; and 6 cents for interest. Thereafter for each year of storage the cost increases 18.5 cents for storage and interest.

The Department of Agriculture tells me that in fiscal year 1960 the storage cost for wheat was $214 million plus $38 million for transportation. This total varies and can be higher than the 1960 figure of $252 million. And it invites critics and friends alike to deplore daily million-dollar storage costs.

Again we see the urgent need for legislation to enable the Department of Agriculture to deal effectively with surpluses.

The Denver Post is a fair and fearless Rocky Mountain newspaper that keeps watch on congressional activities. On September 8, 1961, the Post approved the bushel-quota plan and said the idea was sound.

The Denver Post notes:

> Under the bushel controls, a plan which the National Wheat Growers Association has boosted for several years, the amount of wheat grown would be geared much more closely to actual needs.

And, that is what we hope to do.

Senator CARLSON and I are pleased to be joined in introducing the wheat bushel management program by Senators MANSFIELD, METCALF, CASE of South Dakota, MAGNUSON, BURDICK, CHURCH, CARROLL, MOSS, HUMPHREY, MORSE, MCCARTHY, MCGEE, and ALLOTT.

Mr. President, I ask unanimous consent that the editorial "A Hopeful Trend in Wheat Legislation," which appeared in the Denver Post be inserted in the RECORD.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the editorial will be printed in the RECORD.

The bill (S. 2535) to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat, introduced by Mrs. NEUBERGER (for herself and other Senators), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

The editorial presented by Mrs. NEUBERGER is as follows:

A HOPEFUL TREND IN WHEAT LEGISLATION

Twenty-six Senators, primarily from the western half of the Nation, have taken a significant step forward in the field of wheat legislation.

By signing a letter to Agriculture Secretary Orville Freeman endorsing bushel-quota controls, the Senators last week gave real impetus to the prospect of a major breakthrough in one important aspect of the farm surplus problem.

The letter asks Freeman to prepare for submission to Congress in January proposed legislation on a permanent wheat program. Such legislation, the Senators said, should be based on a bushel-quota plan.

This means that the 26 Senators have apparently decided the time has come to face realities in wheat. For years the USDA has tried to administer jerry-built surplus controls based on the theory of acreage limits.

Such controls haven't worked. Farmers have cut their acreage—as stipulated by the programs—but they've taken, quite naturally, steps to boost the yield from the acres retained in production. The result is that fewer acres still produce a surplus.

Under bushel controls, a plan which the National Wheat Growers Association has boosted for several years, the amount of wheat grown would be geared much more closely to actual needs.

Much of the guesswork will disappear if the new program is enacted. A wheat farmer will be given certificates for so much production—in bushels—based on the Agriculture Secretary's overall determination of how much wheat the Nation will need.

The farmer can market for domestic food use only as much wheat as his certificates permit. He can grow extra wheat but such excess must be held for the next year (when he might need it to fill out that year's quota) or it could be used as livestock feed.

By estimating the Nation's wheat needs the Secretary could, in effect, regulate the price of wheat, much as he does in determining U.S. sugar needs and, consequently, the price paid to growers.

There may be hazards involved in the program. Some will fear tighter controls. But the present surplus pile of 1.3 billion bushels of wheat, maintained at enormous cost, appear to outweigh the disadvantages.

One of the major advantages of this program would be in upgrading wheat quality. In the past, farmers have tended to grow for quantity rather than quality, figuring that the important thing was to get as much wheat as possible for the acreage permitted. This has been true despite limited penalties for poor-quality wheat.

Under the new program, farmers would be encouraged to get the highest price offered by the processors on the number of bushels allotted. They would thus make more money by putting on the market, under certificate, the highest quality grains.

The bushel-quota plan, if passed, is aimed at 1963. If passed early next year it will permit winter-wheat growers to plant for the new program a year from now.

The idea is sound. Colorado's Senators, GORDON ALLOTT and JOHN CARROLL, will get the thanks of the majority of their wheat-growing constituents for signing the letter to Freeman.

Next January they should support it strongly.

Mr. CARLSON. Mr. President, I associate myself with the Senator from Oregon [Mrs. NEUBERGER] and other Senators in sponsoring legislation proposing an amendment to the Agricultural Adjustment Act, involving a marketing program for wheat.

This session of Congress, which is now nearing adjournment, has enacted two bills affecting agriculture; namely, a feed grain program and a wheat program. The effect of these programs on our surpluses of feed grains and wheat cannot be determined until after the feed grain production for 1961 has been determined and for wheat, not until the 1962 harvest has been completed.

These programs have been well received by our farmers, but it is generally agreed that they are temporary programs and we should be working on programs with some permanency for agriculture.

Wheat is one of our problems that should be studied by the Department of Agriculture during the congressional recess, with a view to making recommendations to Congress for a workable permanent program for the wheat producers of the Nation. It was with this thought in mind that the Secretary of Agriculture, Mr. Freeman, appointed a committee of outstanding citizens familiar with and interested in finding a solution to the wheat problem, with a view of making recommendations for a long-range permanent program.

Mr. Anson Horning, of Larned, Kans., president of the Kansas Wheat Growers Association and second vice president of the National Association of Wheat Growers, has been selected by Secretary Freeman to head this study committee. In my opinion, Mr. Horning's background and knowledge of our wheat program qualifies him eminently for this position.

The appointment of this committee and its study of the wheat program makes it important that Congress have before it, for its consideration, a proposal that is designed to stabilize the income of wheatgrowers at a fair level and reduce the stocks of wheat now in the hands of the Government, thereby providing a much-needed saving for the taxpayers.

The bill that is being introduced in the Senate today provides that basis.

The U.S. Department of Agriculture published for the month of August this year the wheat situation and the USDA report reads as follows:

> The total wheat supply for the marketing year beginning July 1, 1961, is now estimated at 2,619 million bushels, 2 percent below the record of 2,672 million bushels a year earlier. A decrease of 146 million bushels in the indicated production more than offsets an increase of 93 million bushels in the carryover on July 1, 1961.
>
> Domestic disappearance for 1961–62 is now estimated at about 594 million bushels, slightly below last year because of reduced use of wheat for seed; exports at 675 million would be slightly above the record 662 million in 1960–61 and continue to reflect a large proportion shipped under Government programs. On the basis of these estimates, about 1,350 million bushels would be carried over on July 1, 1962—about 60 million bushels below the 1961 carryover. This would be the first decline in stocks since 1958, when the carryover was 881 million bushels.

Recent figures from the Department of Agriculture fully indicate the need for further study and improvement in our wheat program. I sincerely hope that the Department will make a thorough study of the legislation we are introducing today and that Congress will have an opportunity to consider it in the next session.

AMENDMENT OF INTERNAL REVENUE CODE OF 1954 WITH RESPECT TO INCOME FROM SOURCES OUTSIDE THE UNITED STATES

Mr. GORE. Mr. President, at the time the corporate and excise tax rate bill was before the Senate, the Senate understood, I am sure in good faith by all concerned, that the Senate would have an opportunity during this session to consider a major taxation bill, and thereby afford the Senate opportunity to seek to work its will with respect to tax legislation.

Such a bill has not been forthcoming from the other body. This is regrettable. The tax reform measures recommended by the President have not been considered by the Senate. The tax writing committee of the other body, however, has now reported to the House, and it is my informal understanding that the House will now consider, a major tax bill generally known as a bill for tax relief for the Du Pont Co. In any event, the Senate Finance Committee begins hearings on that bill tomorrow.

I have no objection to the fact that the Senate Committee on Finance will hold hearings on this bill before the House considers it. That seems to me to be entirely proper. Such procedure facilitates Senate consideration of measures passed by the other body.

Once a major tax bill is presented to the Senate, as the Du Pont tax relief bill would be, then consideration of the field of dividend credit, intercorporate transfers—indeed, the whole field of taxation of corporations, officials, and stockholders of corporations, will then be in order.

So that it will be available for consideration at the time, I introduce for appropriate reference a bill which embodies most of the administration's original recommendations regarding taxation of income earned abroad. I send the bill to the desk and ask that it be appropriately referred.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2539) to amend the Internal Revenue Code of 1954 with respect to income from sources outside the United States, and for other purposes, introduced by Mr. GORE, was received, read twice by its title, and referred to the Committee on Finance.

Mr. GORE. Other bills relating to the administration's recommendations for tax reform, or some of them at least, will be introduced tomorrow.

These bills will be in printed form and available for consideration by the Committee on Finance during its consideration of the Du Pont tax relief bill, and by the Senate if such a bill is reported to the Senate.

AMENDMENT OF SHIPPING ACT OF 1916—AMENDMENT

Mr. KEFAUVER submitted an amendment, intended to be proposed by him, to the bill (S. 2524) to amend the Shipping Act of 1916, which was ordered to lie on the table and to be printed.

ESTABLISHMENT OF LINCOLN BOYHOOD NATIONAL MEMORIAL, IND.—AMENDMENTS

Mr. HARTKE submitted amendments, intended to be proposed by him to the bill (H.R. 2470) to provide for the establishment of the Lincoln Boyhood National Memorial in the State of Indiana, and for other purposes, which were ordered to lie on the table and to be printed.

IMMUNIZATION FROM ATTACHMENT OF SALARIES OWED BY PANAMA CANAL COMPANY—AMENDMENT

Mr. KEFAUVER submitted an amendment, intended to be proposed by him, to the bill (H.R. 3156) to make the Panama Canal Company immune from attachment or garnishment of salaries owed to its employees and to amend the Shipping Act of 1916, which was ordered to lie on the table and to be printed.

PROTOCOL RELATING TO AN AMENDMENT OF CONVENTION ON INTERNATIONAL CIVIL AVIATION—REMOVAL OF INJUNCTION OF SECRECY

Mr. MANSFIELD. Mr. President, there was transmitted to the Senate today Executive N, 87th Congress, 1st session, being a protocol relating to an amendment to the Convention on International Civil Aviation. As in executive session, I ask unanimous consent that the injunction of secrecy be removed from the protocol, and that the protocol, together with the President's message be referred to the Committee on Foreign Relations, and that the message from the President be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The message from the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith a certified copy of a protocol dated at Montreal June 21, 1961, relating to an amendment to the Convention on International Civil Aviation.

The protocol, embodying a proposed amendment to article 50(a) of the convention, enlarges the membership of the Council of the International Civil Aviation Organization from 21 to 27.

I also transmit herewith, for the information of the Senate, the report of the Secretary of State regarding the protocol.

JOHN F. KENNEDY.

Enclosures:

1. Report of the Secretary of State.
2. Certified copy of protocol dated at Montreal June 21, 1961, relating to an amendment to the Convention on International Civil Aviation.

THE WHITE HOUSE, *September 12, 1961.*

NOTICE CONCERNING NOMINATIONS BEFORE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

William H. Murdock, of North Carolina, to be U.S. attorney, middle district of North Carolina, term of 4 years, vice James E. Holshouser, resigned; and

William Medford, of North Carolina, to be U.S. attorney, eastern district of North Carolina, term of 4 years, vice James M. Baley, Jr., resigned.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Tuesday, September 19, 1961, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, September 12, 1961, he presented to the President of the United States the enrolled bill (S. 1653) to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises.

DEATH OF LEO CARRILLO

Mr. KUCHEL. Mr. President, the people in my State and the Nation mourn the passing of a distinguished actor, a native-born Californian, who traced his patrimony back many generations. Leo Carrillo passed away over the weekend. I had the pleasure of knowing him during his life. He was most proud of his forebears. He was proud, too, of his native State.

Quite aside from the eminence which he reached as a great actor, his was the life of an active American citizen, who devoted much of his time to the cause of government. He served on the State parks commission, commencing with the administration of Earl Warren. He continued serving the people of his State subsequent to Governor Warren's tenure as our State's chief executive.

During all his lifetime he brought happiness and smiles to the people of our country, and, I think I may say, the world, in the happy motion pictures in which he played, continuingly, stellar roles.

I ask unanimous consent that an obituary which appeared in the New York Herald Tribune of this morning be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LEO CARRILLO DIES AT 81; SCREEN'S LOVABLE BADMAN

SANTA MONICA, CALIF.—Actor Leo Carrillo, 81, a descendant of the Spanish dons whose great-grandfather was first provisional governor of California, died of cancer at his home here Sunday.

He had been in a coma for several days. His physician, Dr. Adolph Kosky, said Mr. Carrillo had battled the encroaching disease since the actor was first operated on in September 1959.

IN BADMAN ROLES

Leo Antonio Carrillo was one of the first of Hollywood's goodhearted badmen. He portrayed the likable heavy in a succession of melodramas of the thirties such as "Frontier Bad Man," "The Gay Desperado," "Wyoming" and "Twenty Mule Team."

A far cry from the typical villain who gets hissed by the audience and punished by the law, Mr. Carrillo combined malevolence and charm in a mixture that sometimes won the heroine in the final reel.

In 1934 he costarred in the Wallace Beery epic "Viva Villa," and impressed reviewers in the role of Villa's treacherous lieutenant with a "characterization at the same time lighthearted and sinister."

Mr. Carrillo graduated to his roles of badman after a career on the legitimate stage where he became something of a matinee idol. An interviewer in 1928 asked him: "Is it so that you have invariably played the role of a great lover?"

To which he replied: "Yes, I have always derived great joy in playing such parts, for love is the greatest force in the world and these roles satisfy my yearning for expression."

Some of Mr. Carrillo's stage vehicle's were "Gypsy Jim," "Lombardi, Ltd.", "The Brigand," and "Mike Angelo," where he employed a mellifluous talent for Italian dialect.

Mr. Carrillo was a native Californian. His ancestors came to this country with Cortez. His great grandfather became the first provisional governor of California in 1837 and his father was mayor of Santa Monica.

BEGAN AS CARTOONIST

After an early career as cartoonist on the San Francisco Examiner, he turned to the stage and got his first breaks on vaudeville, doing the rounds of orpheums and palaces.

It was on the vaudeville circuit that Mr. Carrillo met Will Rogers, then doing a silent cowboy act with a little riding and a lot of roping. Mr. Carrillo noted the cowboy's easy wit and persuaded him to add dialogue to his act.

In his vaudeville act Mr. Carrillo was billed as "the undisputed champion of broken English," and it was this talent for mimicry that landed him his first parts in dialect plays on the legitimate stage.

After the dialect period came the matinee idol era and, after that, Mr. Carrillo arrived in Hollywood at about the same time as sound pictures. He was always in demand as a character actor and was able to ride the horseback sequences himself in westerns.

Mr. Carrillo had a brief fling in politics. In 1937, he was urged by friends to run for the governorship of California. His campaign never got off the ground, however, and the actor lent his support to Earl Warren.

Mr. Warren was elected by a landslide, and grateful for Mr. Carrillo's help, asked the actor what political plum he wanted. Mr. Carrillo requested an appointment on the State parks commission, explaining that one of his hobbies was restoring old missions. Once appointed, Mr. Carrillo was known as the most active member on the commission.

The ACTING PRESIDENT pro tempore. Is there further morning business?

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that further proceedings under the quorum call be suspended.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SALUTE TO "UNCLE SAM" WILSON, OF TROY, N.Y.

Mr. DIRKSEN. Mr. President, I ask the Chair to lay before the Senate the amendments of the House of Representatives to Senate Concurrent Resolution 14.

The ACTING PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the concurrent resolution (S. Con. Res. 14) saluting "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of America's national symbol of "Uncle Sam," which were, on page 2, strike out all after the resolving clause and insert: "That the Congress salutes "Uncle Sam" Wilson, of Troy, N.Y., as the progenitor of America's national symbol of "Uncle Sam," and on page 1, in the preamble, strike out lines 13 through 16, inclusive, and on page 2 of said preamble strike out lines 1 through 3, inclusive.

Mr. DIRKSEN. Mr. President, I move that the Senate disagree to the House amendments, request a conference thereon with the House of Representatives, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to; and the Acting President pro tempore appointed Mr. McCLELLAN, Mr. KEATING, and Mr. COTTON conferees on the part of the Senate.

The ACTING PRESIDENT pro tempore. Is there further morning business?

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. YOUNG of Ohio. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MEDICAL AND SURGICAL CARE FOR ELDERLY WITHIN SOCIAL SECURITY THE ONLY WAY

Mr. YOUNG of Ohio. Mr. President, the firing squad of the American Medical Association has packed away its propaganda guns. Due, in part, to a heavy AMA barrage of falsehoods, action on medical care for the elderly, which many of us hoped would be taken during this session of the Congress, will be postponed until next year.

If ever a propaganda campaign was based on misrepresentation and a smokescreen of distortions, it has been the AMA campaign against health care for the elderly, under the framework of social security.

Mr. President, if one were to take seriously the propaganda of the American Medical Association, one would weep bitter tears for the downtrodden members of the medical profession. They are faced—or so the AMA story goes—with a regimentation more complete, more ruthless, and more stringent than anything in history.

Indeed, judging from the hysterical propaganda of the high-paid AMA publicity and public relations men, the medical profession, which just happens to be on the average the wealthiest profession in America, will find itself enslaved in chains.

Who is the villain who would perpetrate such cruel injustice? Apparently, it is President Kennedy himself, for it is he who has proposed to bring medical and surgical care for the elderly under the framework of the social security system, a proposal which has caused shockwaves of revulsion in AMA leaders.

In the face of this, the professional medical politicians who dictate policy of the AMA are aghast. Their patriotism obliges them, they say, to protect the American people from the ultimate horror, socialized medicine.

Of course, Mr. President, I do not happen to take AMA propaganda seriously. It obviously stems from a fantasy land of shortsighted self-interest and arrogant indifference to the needs of the American people. It is an indifference which I hasten to say is not shared by most of the 180,000 American physicians and surgeons whom the AMA house of delegates claims to represent.

You and I know, Mr. President, that AMA propaganda is sheer nonsense. President Kennedy's program would not change the traditional doctor-patient relationship. Supporters of the proposal have no wish to alter the general practice of medicine.

We Americans take pride in the high standing, advancements, and great scientific achievements of the specialists engaged in scientific medical research and in the medical profession as a whole.

The plain fact is that the AMA is laying a thick smokescreen to hide from the American people its own narrow self-interest and its immutable habit of standing squarely in the path of progress and shouting "Stop." I refer to the 192-member house of delegates ruling the AMA, less than one-fourth of whom are general practitioners. At least 150 are specialists or political doctors.

In order to appear not entirely negative, chieftains of the AMA have thrown their weight behind the inadequate medical care bill enacted last year. They have tried, and failed, to make a case for this law, which requires enabling action by State legislatures, and which clearly does not meet the urgent medical needs of our elderly people.

I voted against it. Its passage has not aided one person in my State of Ohio who was not already on relief.

Mr. President, the truth is that fraudulent AMA propaganda cannot obscure the fact that only 10,000 elderly Americans throughout our Nation, previously unprotected by any Federal-State program, have benefited from the bill enacted last year during the Eisenhower administration.

This is feeble advertisement for the program, considering that at the present time, more than 16 million Americans are 65 years of age or older.

Mr. President, the leaders of the AMA are long on noise and short on memory, for it is significant to note that in 1950 they were strangely silent when a Federal-State matching program for the elderly indigent was enacted.

Indeed, I suggest that the AMA would oppose the program enacted last year if it were not faced with what its ruling group hysterically considers a greater threat—the proposal to place medical care for the elderly under social security.

The ACTING PRESIDENT pro tempore. The time available to the Senator from Ohio, under the 3-minute limitation, has expired.

Mr. METCALF. Mr. President, I ask unanimous consent that the Senator from Ohio may proceed for 3 additional minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. YOUNG of Ohio. Mr. President, it is a fact that in this case, as in so many others, the AMA once again stands stalwart against the wishes and welfare of the American people. The small band of willful men who control AMA policy assert our people do not support this program. Yet, a recent Gallup poll shows conclusively that the people overwhelmingly endorse President Kennedy's proposal. Two out of three persons interviewed indicated they are in favor of increasing the social security tax, if necessary, to finance medical care for the elderly. Only 26 percent are opposed.

Apparently, Americans refuse to swallow the propaganda pills prescribed by the professional medical politicians who presume to speak for 180,000 American physicians and surgeons.

Mr. President, during this session of the Congress we provided medical care for hogs—to curb hog cholera—but we failed to provide medical care for needy elderly men and women.

It is my hope that we shall enact the administration's medical care program during the next session of the Congress.

This is the fairest, most equitable, and most practical way to meet the urgent health needs of elderly Americans.

The basic problem is that persons 65 years of age or older cannot purchase adequate health insurance from private corporations, except at exorbitant rates. This often results in having medical expenses wipe out lifetime savings or force older men and women to live on the charity of relatives or on public charity.

Adding medical aid to the present social security system would be a simple matter. The employer and employee, by the payment of only one-quarter of 1 percent each during the time when the employee is working, would cause enough additional revenue to flow into the social security fund to keep it actuarially sound to accommodate the new program. Self-employed persons would

pay three-eighths of 1 percent from their earnings. The medical care plan would be self-financing, and would protect men and women at age 65, following their retirement from employment.

Mr. President, we must be realistic and we must legislate in recognition of the fact that medical and surgical expenses for older people are three times the expenses incurred by those in their forties, or even those in their fifties. It is a fact that medical expenses rise sharply with increasing years. At the same time, for most people the ability to meet them declines rapidly, once they are off the payroll.

It is a tragic situation that here in the richest country in the world, millions of our elderly live in constant fear that their savings, if any, set aside for a dignified old age will be washed away by one prolonged illness or a serious accident.

Mr. President, I will never advocate any change in the freedom we Americans enjoy to be attended by doctors of our choice, or in the doctor's freedom to select his patients, and determine for himself all the details of his treatment.

We simply must make it possible for persons during their working years to provide for medical and surgical care in their old age. The most sensible way to do this is within our social security system, which is correctly termed our Nation's old-age, survivors' and disability insurance system. In fact, in my view there is no other adequate way.

The ACTING PRESIDENT pro tempore. Is there further morning business?

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METCALF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). Without objection, it is so ordered.

THE NIBBLE INDEX

Mr. KEATING. Mr. President, on August 11, when the Agriculture Department released last month's grain production figures, I spoke on the floor of the Senate on this subject. I called attention to the fact that the estimate in August of the still unharvested 1961 corn crop was 3,352,037,000 bushels. The August estimate represented an increase of 176 million bushels over July.

Yesterday the Department released the September estimate of the corn crop for 1961, which is 3,519,000,000. This is 167 million bushels over the August estimate.

To put it all together, in July the Department of Agriculture estimated that the feed grain program would result in a 716-million bushel cut in corn production. Right now, the Department estimates that the 1961 crop will be 372 million bushels less than last year. The originally projected decrease in production has been cut in half.

Mr. President, some slippery varmint has been nibbling away at our corn statistics. Perhaps we should call these monthly reports the "nibble index." This is just another indication that the feed grain program is not doing the job. I oppose this program and I think it is worthwhile to continue to place these figures in the RECORD.

What do these figures mean? The emergency feed grain bill program increased price supports as an incentive to cut production. It has failed. Production has not been materially cut. Consumer prices are bound to increase. Feed prices to dairy, poultry, and livestock farmers have gone up.

We are throwing money at the farm problem without even aiming. Our solution is no solution. Almost everyone agrees that new directions are needed to deal with our Nation's farm problem. Why must we continue going in the old direction, which is backward?

HELPING AN ANTI-COMMUNIST FIGHTER

Mr. WILEY. Mr. President, an article which was published recently in the Polish Courier, of Milwaukee, tells an interesting story of how a U.S. Senator was able to help save an anti-Communist fighter from deportation to Poland, where many years of imprisonment were undoubtedly awaiting him. The credit in this case goes to the distinguished Senator from New York [Mr. KEATING], who has again displayed his humanitarian spirit.

The Senator from New York introduced a bill for the relief of Jozef Budny, who had fought against communism for most of his adult life in Poland, and was ordered deported from this country by the Immigration Service. Senator KEATING realized the injustice in this case and intervened in Mr. Budny's behalf, through the introduction of a private bill to grant permanent status in the United States to Mr. Budny.

Knowing that many of my colleagues would be interested in this story, I ask unanimous consent to have printed at this point in the RECORD the English translation of the Budny story as it appears in the Polish Courier, of Milwaukee, July 27, 1961.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENATOR KEATING SAVES A POLE FROM DEPORTATION

WASHINGTON, D.C.—Another Pole has all reason to be forever grateful to the U.S. Senator from New York, KEATING, for saving him from a compulsory deportation to Poland and from delivering him to the Communist catchpoles now ruling Poland.

The man recently saved by Senator KEATING, is Josef Budny, an old anti-Communist fighter. A compulsory return to Poland would mean for him, at best, many years in the security prisons.

The deportation order was already issued. On July 11, Budny was supposed to report to the American immigration authorities with his hand baggage. He had to be transported to Montreal where, on board of the *Batory*, room was reserved for him and paid for by the American authorities.

Before the war Budny used to work in the investigating department of the state police at Poznan with a special assignment to fight Communist diversion. During the war he played a similar role in the Polish underground movement. A special unit for the combat of Communist diversion existed within the AK (Polish revolutionary army) and, because of his valuable experience, Josef Budny was attached to it.

After the war, when the German occupation was replaced by the Communist occupation, the authorities of the new regime were, at first, not able to identify Budny with the member of the anti-Communist unit of AK, whose name was known to them only as a pseudonym. However, he was suspected of anti-Communist sentiments and he was not spared persecution. During all this time the security did not stop in its efforts to find out the true name of the sought-for member of the underground, as, according to its information, he was living and residing within the country. Thus the noose tightened more and more.

In 1960, Budny succeeded, by a trick, to receive a foreign passport and a visa to visit a distant relative in California. As a result, he stopped in New York and immediately went to the Polish Immigration Committee with the request to take care of his asylum.

Budny's deposition concerning his activities in the country, were confirmed both by private persons living in the United States and the AK headquarters in London. In spite of that, the immigration authorities rejected Budny's request. The appeal of the committee to the central immigration authorities in Washington met with the same fate. The answers of the Immigration Office made it clear that it regarded persons who left Poland after the "magic date" of 1956, as safe from persecution in case of deportation to Poland. The Immigration Office did not question the credibility of Budny's statements. Simply, a very dangerous proposition prevailed, that after Gomulka's takeover in Poland, nobody is subject to political persecution.

When all other means of saving Budny failed, Senator KEATING, to whom Polish Immigration Committee presented the case in detail, agreed to introduce a private bill in the Senate. Although the bill has not yet been passed, there is hope for its favorable acceptance. The introduction of the bill alone, caused an automatic suspension of the deportation proceeding.

It deserves to be mentioned that Senator KEATING recently took a firm stand in the Senate against the deportation policy, as now practiced by the Immigration Office in respect to political refugees and escapees.

The PRESIDING OFFICER. Is there further morning business?

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METCALF. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further morning business? If not, morning business is closed.

Mr. METCALF. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METCALF. What is the unfinished business?

The PRESIDING OFFICER. There is no unfinished business at this time before the Senate. It may come up by unanimous consent or motion at this time.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

Mr. METCALF. I ask unanimous consent that S. 2393 be made the unfinished business.

The PRESIDING OFFICER. The clerk will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill.

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UTAH'S UNIQUE ROLE IN NATIONAL DEFENSE

Mr. BENNETT. Mr. President, the recent callup of National Guard and Reserve units draw attention once more to a fact of which all Utahans are proud, namely the exceptionally high percentage of Utah men who have participated in the defense of their country in the past and who are answering the call today.

On a per capita basis, Utah is contributing 2½ times as many men to the armed services in the recent call to active duty as the national average.

There are 1200 Utah National Guardsmen being called to active duty at the end of this month, representing .13 percent of the State's population, which compares with .05 percent of the national population represented by the 76,500 men being called up. Thus, Utah's rate is 2½ times the national average.

In this connection it is interesting to note that Utah has traditionally been the No. 1 State in percentage of draft-eligible men who were found acceptable for military service.

The national rejection rate for selective service during the period 1948 to 1961 was 39.1 percent. The rejection rate for Utah is only 21.3 percent—roughly half as much. Utah leads the 50 States in this respect.

In this hour of national peril, Utahans are particularly proud of the disproportionate role they are playing in the Nation's defense.

I ask unanimous consent to have printed in the RECORD an editorial from the Deseret News in Salt Lake City for September 6, commenting on Utah's unusual role in supplying manpower for the armed services.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TWO AND ONE-HALF TIMES AS MANY UTAHANS

Ever since the call of the Mormon Battalion, the people of this State have been fully represented in every call to national military duty—sometimes, it has seemed in numbers considerably higher than the size of our population would seem to indicate.

Usually, the extra burden assumed by our people has been for one simple reason: They have been available and prepared. That was the case, certainly, with the Mormon Battalion, called to make that historic march to southern California. It has been the case in the past two World Wars, when our boys have suffered fewer rejections for physical, mental, or moral reasons and so have served their country in numbers higher than the national per capita averages.

It seems, also, to be the case with the current callup of National Guard units.

The some 1,200 Utah guardsmen who will be entering active duty at the end of this month represent .13 percent of the State's population. That compares with the .05 percent of the national population represented by the 76,500 men called up nationally. Utah's rate in this initial call is more than 2½ times the national average.

The reason seems to be—and our military officers and men can take pride in the fact—that the Utah units represent a level of training several cuts above the average nationally. They have the needed technical specialties and are at authorized strength—a position most National Guard outfits seldom reach.

So Utah is again in the front of the call to military service, and no Utahan who loves his country will resent the heavier service our men give. But one notes that the 76,500 men Reserve troops called so far are only a small part of the 250,000 the President is authorized to call. Many more may be pressed into service before our international tensions are reduced.

In calling attention to Utah's generous military contribution, we do not do so in the spirit of complaint. Perhaps we are somewhat like the rooster who rolled the ostrich egg out among his chickens and explained that he was not complaining but just wanted them to see what was going on next door.

If and as new Reserves must be called up, we hope our neighbor States and the rest of the Nation can do as well as Utah.

Mr. BENNETT. Mr. President, in the field of education probably the most important Federal program which has been in existence for the past several years has been the program of Federal assistance to areas which have been adversely affected by Government installations or by an influx of schoolchildren because of the location of defense installations.

On April 19 I introduced a bill, S. 1678, proposing to extend Public Laws 815 and 874 for a period of 3 years. I, of course, will support any extension of these laws, but I would urge the Senate to grant us as long an extension as possible so that the school districts can make their plans.

The basic intention of these public laws is to compensate school districts in reasonable amounts for the cost of educating schoolchildren whose parents are employed in Federal activities and where unusual local school problems result. Section 1 of Public Law 874 reads as follows:

In recognition of the responsibility of the United States for the impact which certain Federal activities have on the local educational agencies in the area in which such activities are carried on, the Congress hereby declares it to be the policy of the United States to provide financial assistance for those local educational agencies upon which the United States has placed financial burdens by reason of the fact that—

(1) the revenues available to such agencies from local sources have been reduced as the result of the acquisition of real property by the United States; or

(2) such agencies provide education for children residing on Federal property; or

(3) such agencies provide education for children whose parents are employed on Federal property; or

(4) there has been a sudden and substantial increase in school attendance as the result of Federal activities.

Public Law 874 provides Federal assistance for the operation and maintenance of public schools. Its companion law, Public Law 815, provides assistance for the construction of school facilities, and the general declaration of policy is similar in both laws.

I would like to emphasize that the federally affected areas program is not a handout program. Defense installations are mixed blessings to a community, even in the case of those installations which are privately operated. One example of such a situation is Box Elder County, Utah, where the Thiokol Chemical Co. has established a testing ground for missile solid fuels. This operation has created a tremendous impact on the entire economy of the area. The strain on the local taxpayers has been almost unbearable. For one thing, local property levies cannot keep pace with the rapid and sudden increases in Government service needs. Adustments come slowly and ponderously. Not only have the schools in the area been affected but there are problems connected with sewage, roads, and other public services. If Public Laws 815 and 874 funds cannot be made available to this community and other communities similarly situated, I fear the consequences on the school operations for the children living in those areas.

Whatever one may think of general Federal aid to education, there is no question of the justice of the impacted areas program, whereby the Federal Government, which pays no local taxes, helps to meet the demands thrust on the local districts by the Federal operations. I urge the Senate to extend this vital program. At this point for the information of the Senate I wish to insert in the RECORD a table showing entitlements of Utah school districts under Public Laws 815 and 874 for the fiscal year 1961.

I also ask consent to have printed a table prepared by the U.S. Office of Education showing the estimated entitlements for Utah as a whole if these laws are extended for 1 or 2 years. The communities to which this money goes are performing a vital function in contributing to our defense program.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE I.—*Public Laws 815 and 874—Entitlements and reservations for Utah school districts, fiscal year 1961*

Applicant	Public Law 815 [1]	Public Law 874
Board of Education, Tooele County School District, Tooele		$275,961
Weber County School District, Ogden	$501,670	315,805
Ogden City Board of Education		330,578
Davis County School District, Farmington		641,975
Grand County School District, Moab	110,780	59,659
Board of Education, Daggett School District, Manila		30,479
Kane County School District, Kanab		27,251
Box Elder School District, Brigham City	191,168	138,448
Logan City Board of Education		10,611
Duchesne County School District		23,635
Washington County School District, St. George		12,064
Cache County Board of Education, Logan		41,599
Total	803,618	1,908,065

[1] In addition to these grants to regular school districts, the Dugway Proving Grounds in Tooele County received $133,032 for school construction on this Federal installation.

TABLE II.—*Estimated entitlements and reservations under Public Laws 815 and 874, fiscal years 1962 and 1963*

	Fiscal year	Extension without amendment [1]
Public law 874	1962	$2,150,700
Public Law 815	1962	522,400
Public Law 874	1963	2,466,900
Public Law 815	1963	1,284,400

[1] Considering Public Laws 815 and 874 are extended without amendment for fiscal years 1962 and 1963.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METCALF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. MORSE. Mr. President, some of our colleagues are away this morning on official business. The Democratic leadership is at the White House. The Senator from Michigan [Mr. MCNAMARA] will be here soon, to continue the presentation of his amendment. Later, I shall submit and discuss my amendment to add the District of Columbia to the impacted area proposal. I believe that later this morning we shall have a better understanding of our schedule in connection with the bill.

I wish to announce that I shall call a meeting, in a room near the floor of the Senate, of the Democratic members of the Education Subcommittee, to discuss certain questions of policy which have arisen.

Mr. President, this morning I wish to say that every argument I made yesterday, I now restate by reference. The observations I made yesterday on the importance of sustaining the President's hand in connection with NDEA and impacted area legislation, I consider to be even more important this morning.

As the Senator in charge of the pending bill, I think it much better that we pass no legislation of this type at all, rather than to pass the measure the House has passed concerning NDEA and impacted area legislation. My judgment is based on two reasons: First, I think the substance of that proposed legislation is unsound. I believe it very unsound to pass a measure in the field of impacted areas beyond a 1-year period. All of us know, if we but read, that there already exists a prima facie case which calls for reappraisal and reexamination of the expenditures for impacted areas.

I can state for a certainty that the President strongly supports aid to truly federally impacted area school districts; but the President could not ignore, and does not ignore, the evidence which is accumulating from the Comptroller General, which bears out the argument I made yesterday in the Senate; namely, that there is need for reexamination, reappraisal, and modification of the aid going to some of the school districts. Such abuses must be corrected.

It is not fair to the taxpayer. It is not fair to the school districts which do not claim to be subjected to any Federal impact, but in which the educational situation, from the standpoint of pupil impact on the crowded conditions, a lack of funds, and an inadequate tax base in the community to support the school, results in serious educational crises in such districts. The President is aware of all this, and therefore he has asked the Senate to extend this legislation for only 1 year.

I repeat, this morning, that one of the policy questions the Democratic Members of the Senate must decide is whether they will back up their President or whether they will pull the rug from under him, as the House of Representatives did.

This morning, I repeat that in the 1960 campaign the President made very definite commitments in regard to the issue of Federal aid to education. The President promised aid, not only for school construction, but also for teachers' salaries. He promised a general school bill such as Senate bill 1021. We in the Senate kept faith with the President. I am very proud we did: We passed Senate bill 1021. The House of Representatives did not even let that bill reach a vote. The House permitted its Rules Committee, acting under an archaic procedural system, to deny to the elected Representatives of the various congressional districts of the country an opportunity to vote on the President's program.

I wish to say a goodly number of Democratic Members of the House of Representatives rode into office in 1960 on the President's coattails. In my judgment, many of them never would have been elected in 1960 if it had not been for the forthright and courageous campaign conducted by John F. Kennedy. In the House there are many Democrats who cannot possibly justify the treatment they have given the President in regard to the aid to education bill, and neither can the Democratic leadership in the House. Of course, we did not expect to receive any help from the Republican Members; but we have a right to expect the Democratic Members at least to take their President's program to the House for a vote. They should not hide behind an archaic rules system which gives to the House Rules Committee dictatorial power, and thereby prevents the people of the country, through their representatives, from exercising a voice in connection with aid to education.

As I suggested in my speech last night—and I wish to restate it this morning, for purposes of emphasis—we have a fairly good idea why some Members of the House and some Members of the Senate are so anxious to get NDEA and federally impacted area legislation extended beyond 1962: They think they would have less to answer for in the 1962 campaign. I think they are dead wrong, and I do not believe the American people will forget the way this whole educational matter is being handled in the Senate by some of the Democratic Members.

The people are going to understand that extending impacted area legislation and National Defense Education Act legislation beyond 1962 greatly reduces, if it does not absolutely kill, for all intents and purposes, any chance of getting the President's program adopted in 1962. It is not fair to the President, and it is not fair to the platform of the Democratic Party, because in our 1960 platform we solemnly promised that we were going to pass a Federal aid to education bill. We have a majority in the Congress; and if the bill is not passed, the Democratic Party escapes its responsibility for the failure to pass it. I am not at all interested in the coalition argument, the old argument that the bill would have been passed if it had not been for the fact that certain ultraconservative Democratic Members joined with an overwhelming majority of ultraconservative Republican Members. I never accept that argument; it does not excuse the Democratic Party for not keeping its word.

In view of what I consider to be the very shabby treatment he received at the hands of the House of Representatives, the President is entitled to be supported by the Democrats in the Senate. He is entitled to be supported particu-

larly when he has made it very clear to the leadership of the Senate, and made it very clear to the chairman of the Subcommittee on Education, that he does not want the NDEA and the impacted areas legislation extended beyond a year. He wants the entire question of the educational problems of this country reevaluated next year. He wants a new attempt made to pass a general aid to education bill. He wants a bill which would include an extension of impacted areas and NDEA legislation, modified in whatever respect those laws need to be modified in light of the facts which I believe will be brought out by the Department of Health, Education, and Welfare and the Comptroller General.

It is a pretty clear issue, so far as party politics is concerned. If there are any Democrats who think they can duck the issue by extending NDEA and impacted areas legislation for 2 years, and thus to minimize the chance of having to come to grips with the Federal aid to education problems next year, prior to the 1962 election, I think they have another thought coming. I think they are riding for a terrific fall as far as the voters are concerned. I think the mothers and fathers of schoolchildren are not going to appreciate such parliamentary tactics. I do not think the parents of this country are going to appreciate such party irresponsibility.

If such Democrats want to make this an issue in 1962, I am perfectly willing to make it an issue in each one of their constituencies across the country. I have no more desire to see elected Democrats who walk out on their responsibilities and on their President, on a matter of policy such as this, than I desire to see Republicans elected. This is a political issue, and there is not a Democrat in the Senate who can escape the political consequences of the issue. If there must be a fight within the Democratic Party to support the President of the United States, I am ready to take on any Democrat in the Senate in my defense of the President.

In view of the inexcusably shabby treatment the Democratic Members in the House of Representatives gave the whole education question procedurally, I think the time has come for the Democrats to back up the President in the Senate in connection with his request that the legislation be extended for only 1 year.

Do not misunderstand me. I respect the right of any Democrat or of any Republican to vote against the President on the substance of any issue. I do, myself, time and time again, and always will feel free to, as long as I serve in the Senate.

This issue however, is no longer a substantive one in regard to NDEA and impacted areas. This question becomes an issue as to what the Democrats in the Senate of the United States are going to do procedurally, in connection with passage of legislation in the Senate. The issue is whether or not we are going to surrender to the House attitude of "take it or leave it. Our bill, no conference, or no bill."

My answer is, "A conference on legislation, or no bill." And then let the Members of the House of Representatives go back home to explain their decision to the voters.

I have spoken very frankly, Mr. President. My speech, of course, does not make some people very happy. I am well aware of the fact that I have colleagues on this side of the aisle who are quite unhappy about the position of the Senator from Oregon. The Senator from Oregon, as chairman of the Subcommittee on Education, has a solemn obligation to the President of the United States. I know what the President's wishes are. I have reported the President's wishes to the Senate. I am pleading with the Senate not to present to this country a spectacle in the Senate of a surrender to the House, and thus do in the Senate the same kind of an injustice which was done to the President in the House.

I cannot escape the conclusion that the extension for 1 year, as asked for by the President, protects every school district in the country. It gives us an opportunity to consider the evidence which will be submitted by the General Accounting Office and the Department of Health, Education, and Welfare during the next year; it particularly gives to the President an opportunity to take the Federal aid to education issue to the American people again prior to the 1962 election, and it gives the people next year an opportunity to make clear to the Members of the House of Representatives what their will is. That is what we are asking for.

I was going to discuss my NDEA amendment——

Mr. METCALF. Mr. President, before the Senator gets into the NDEA amendment, will he yield for a question?

Mr. MORSE. I am glad to yield.

Mr. METCALF. I do not think there has been adequately discussed here the effect on the proposed legislation of the Supreme Court decision on segregated and integrated schools. When this was emergency legislation and when it was considered as temporary legislation, many of us salved our consciences by saying, "Well, this is just an emergency, and it will go along for just a year or so." So we did not do anything about the fact that segregated schools were being built all over certain areas of America. If the law is extended for more than 1 year, after 11 years of existence, it will become practically permanent legislation. We should begin to think about the fact that the expenditures for school construction have been a billion dollars or more, and millions of those dollars have been spent to build segregated schools in the last 11 years, in defiance of the Supreme Court decision.

I wonder where are the people who are always asking for segregated school amendments on general education bills? Why are they not present, saying, "If we extend the law for more than 1 year, if we make this more than temporary legislation, we shall have to add an amendment to provide that there shall be no segregated schools constructed with Federal money"?

Mr. MORSE. I think the Senator from Montana is completely correct. This only illustrates what is involved in the question.

I intend, before this day is out, to submit some evidence in regard to what some of the States, whose Senators are "raring to go" for an extension of this legislation for as many years as they can get it extended, receive. The evidence will show that in some of these States there are gross abuses in regard to impacted area aid.

The Comptroller General has reported on one abuse after another, as to one school district which is getting aid from the Federal Government which, in my judgment, is not really entitled to that aid.

This is what concerns the President. Of course, an instance such as this is doing great damage to all the eggs in the nest. The story among farmers is that if there is a rotten egg broken in a nest, it will spoil the fertility of the other eggs, if the nest is not cleaned up very quickly.

I say to the Senator from Montana, all the President is asking for is help in order that there can be good, honest administration of the federally impacted area aid program. He is concerned about the findings of the Comptroller General. He is concerned about the findings of the Department of Health, Education, and Welfare.

I think we ought to work with our President, not against him, so long as what he is asking us to do will protect for 1 year every school district. Not a school district will lose a single dollar. All the districts will get the money. The investigations can be made. We ought to extend the law for only 1 year, and then carry out the provisions of section 204 of S. 1021. I hope that investigation will proceed anyway. We should call upon the Department of Health, Education, and Welfare to conduct an investigation into the question of the difficulties of the administration of federally impacted area legislation.

As I have told the Senate many times this year, at the beginning of the year, I believe this investigation will be conducted in any event because the President is concerned about the proof he has of abuse and waste in the allocation of money which some school districts may not be entitled to receive.

I pointed out yesterday the Federal impact connection in one instance involves only a surgical manufacturing company which sells some surgical supplies to some Government office; or, in one other case, involves a company which manufactures and sells to the Government some adhesive tape; or involves a telephone company in a locality which also supplies telephone service to a military installation in the area. That school district gets federally impacted area funds.

Mr. President, there is no question about the fact that there is an injustice in connection with this program which might take on the characteristics of fraud. That is what bothers the President. That is what concerned him at the beginning of this year, when he asked

for a tapering off of the program. In my judgment, he was mistaken when he asked for a blanket tapering off of the program. As the Senator from Montana knows, I opposed the President at that time in respect to his proposal. I said, "Let us get the rotten apples out of this barrel. Let us not take the position we shall throw away half of the barrel simply because there are a few rotten apples in it."

The President came to recognize the soundness of our position, and adopted our recommendation. Now what is proposed? It is proposed to continue the abuses by freezing them into the program for another 2 or 3 or 4 years.

The President said, "Give me a program for a year, and then next year we can review the entire question of Federal aid to education."

I do not know how anyone can state it more clearly. Though I do not quote the President, I tell the Senate that the President next year will make the education program one of his major efforts so far as domestic policy is concerned. I am perfectly satisfied that when we hear the state of the Union message next year, we shall have no doubt as to where the President stands on this question. The President is concerned about education from the standpoint of the domestic needs of our country, just as he is concerned about it from the standpoint of our foreign needs, because the President knows we cannot continue to miss the mark as widely as we are missing the mark in regard to adequate support of the school system of this country and still keep pace with Russia. This is one of the ugly realities confronting us.

I plead again: Give to the President the support for which he is asking. He proposes no harm to a single school district of a single State. I do not think any Senator has the right to say, "I want to get it behind me. I do not want to have to touch it until after the 1962 elections, and perhaps I will not have to touch it then."

I have had a news ticker release handed to me, from the UPI. I have glanced at it quickly. It certainly sustains the observations I am making. It reads as follows:

President Kennedy made it known today that he wants a 1-year limit on renewal of aid to impacted school districts so a broader program can be considered in 1962.

The President's wishes were made known by congressional leaders after their weekly breakfast with Kennedy.

Senate Democratic leader MIKE MANSFIELD told newsmen about the President's views. This put Kennedy and the congressional leaders behind a fight which Senator WAYNE MORSE, Democrat, of Oregon, and other Senators are waging on the issue.

MORSE planned a friendly little filibuster—

All my filibusters are friendly.

MORSE planned a friendly little filibuster in the Senate to assure action next year on a broad school aid program by slapping a 12-month ceiling on further aid to federally impacted areas and extension of the National Defense Education Act.

I am not planning any filibuster at the moment. I am merely taking the time necessary for the educational process to work. It takes a little time for the country to become aware of what is involved in an issue. Most respectfully I say, sometimes it takes a little time for my colleagues in the Senate to find out what the issues are all about. Too many of us get on the tramway, after there has been a long bell, and what do we do? We say to each other, "What is the vote on?" So we tell each other, coming over on the tramway, or someone tells us what he thinks the issue is. Sometimes when we get to the floor we find the issue is quite different. I know how those things happen. I do not wish to have anybody come to the floor of the Senate without having been fully prepared quite some time in advance as to the importance of this issue. So if taking time to discuss this matter thoroughly causes me to be charged with a filibuster, I plead guilty.

Mr. METCALF. Mr. President, will the Senator yield at this point?

Mr. MORSE. I wish to make it perfectly clear that I shall not prevent a vote from eventually occurring, but I am going to be sure that the Senate is ready for the vote when the vote occurs.

I yield to the Senator from Montana.

Mr. METCALF. I was also informed that this morning that one of the radio commentators suggested that the Senator from Oregon might conduct a mild filibuster. I am encouraged that our friends of the press have learned of the friendliness and mildness of the Senator from Oregon and know that, even with respect to difficult and controversial problems such as we have confronting us today, he addresses the Senate in the same friendly and mild spirit with which he meets us in our general relations off the floor of the Senate.

Mr. MORSE. The Senator is very kind. I assure the Senator that I have very patiently tried to perform my duties in the Senate as the Senator in charge of the bill with the assistance of such wonderful friends as the Senator from Montana [Mr. METCALF] and the Senator from Michigan [Mr. MCNAMARA].

I think that what is needed is that later this morning all of us who have a responsibility as members of the Subcommittee on Education should have a huddle on this question. I should like to be joined by my friend from Montana in that huddle so that we can decide what legislative policy we should follow.

Mr. MCNAMARA. Mr. President, will the Senator yield?

Mr. MORSE. I am delighted to yield.

Mr. MCNAMARA. I think the suggestion is quite essential and timely. The news item read by the Senator from Oregon indicates that the President stands firmly for a 1-year extension of the impacted areas bill. I have material here which includes the minutes of the White House Conference on Education about which the people have completely forgotten.

Mr. MORSE. I do not think it was ever well publicized.

Mr. MCNAMARA. No, it was not well publicized. There was nothing dramatic about it. The records of school boards all over the country are cluttered with testimony indicating the need for aid to education. Even with a White House Conference at which the facts were so well established, it is hard to dramatize the present day needs in education, and how we are falling behind in classroom construction, teachers' salaries and adequately trained teachers.

As the Senator from Michigan has said, the White House Conference was not very well publicized. There was nothing dramatic about it. It was a review of information that had been accumulated by school officials and interested parties from all over the country for many years. What we are attempting to do is not very dramatic. It is "old hat." It is established. But the great need exists. No one denies the need. Perhaps we should take more time. Perhaps we should take several days to review what has happened at the White House.

Mr. MORSE. Does not the Senator from Michigan agree with me that if we are to conduct a course on the educational problems facing America, the volumes published on the White House Conference on Education ought to be required reading for any student in that seminar?

Mr. MCNAMARA. I think so. We should go back through the fine record that the Senator's committee has made on the testimony presented and underscore some of those views. There are many things we could do. What we need to do at this point is to decide, in the light of the position taken by the President, whether we should consider moving expeditiously in the direction suggested.

Mr. MORSE. There are several alternatives. We have the alternative of conducting a seminar for 2, 3, or 4, or 5 weeks.

Mr. MCNAMARA. I believe it would be comfortable in Washington around Thanksgiving time. The weather will cool off. We shall be rid of the humid weather. I think the Senate would be comfortable in Washington around the holidays.

Mr. MORSE. I think it would do more good and it would be better for the country if Members of Congress remained for such a seminar, than if they took junkets to Asia, Europe, Africa, and elsewhere. The country would be better served if they did something to help the children of America in regard to their school problems. It would be cheaper, too.

Mr. MCNAMARA. In many ways I think the proposed seminar would be better, but I presume the things to which the Senator has referred are necessary in the processes that we follow.

Mr. MORSE. If we took enough time to make the country aware of what is really concerning the people of this country with regard to the school crisis, possibly there might be some effect upon their representatives in Congress. We would like to think so.

Mr. MCNAMARA. That is true; but even if it were not, the record should be made.

Mr. MORSE. I think we owe it to the children to make the record.

Another thing we need to keep in mind is that as we make the record and explain to the American people how serious the crisis is, the President himself may wish to take the next step. I do not speak for him on that point. If Congress will not support him in his request for a year's extension, and if Members of the House are so eager to go home, it would be interesting to have them come back and decide what they want to do about a veto. I do not know what the President will do, but I know what I would do if I were President. I would veto the bill. I would carry the fight to my party in both Houses of Congress.

I would find out whether or not the members of my party are ready to have me continue as the leader of my party. I think that question is involved in this education issue. I do not think the President can take lying down what the House has done on the educational issue this year. I do not think the Senate can justify supporting the House, and thereby repudiating the President on this issue. It is about time for Democrats to decide whether or not we are going to fish or cut bait on this issue.

So far as the senior Senator from Oregon is concerned, I am fed up with the attitude that the House has taken on this issue. I am fed up with having the Democratic leadership in the House say to Democrats in the Senate, "Take our bill or no bill at all."

My answer is, "No bill at all."

We did not ask for this fight. This fight was forced upon us. I believe the Senator from Michigan has pending a very sound amendment.

I have received another AP ticker tape message. The message is from Kossuth, Miss.:

KOSSUTH, MISS.—The floor in an old building at Kossuth High School collapsed during a recess today, injuring an estimated 20 persons.

Corinth Community Hospital reported it received 17 victims for treatment, but none was considered serious. Some of the students, the hospital said, would be hospitalized.

The Senator from Michigan knows that there is before the Senate Subcommittee on Education much evidence that shows that many school buildings in which children are going to school ought to be condemned. Children should not enter their portals a single day. Risks are being taken with the lives and physical well-being of the most precious wealth we have—our children. Members of the House of Representatives want to go home without passing the school aid bill.

Mr. McNAMARA. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. McNAMARA. The Senator makes an important point when he cites the condition of the school in Mississippi; but it is unusual for such things to be recognized by the press. The news is not very sensational. Those things happen every day in dilapidated, outmoded classrooms, to say nothing of totally inadequate school buildings which are unsafe, improperly ventilated, without proper sanitary facilities, and containing fire hazards.

As the Senator has pointed out, more children attend classes in buildings that were not designed to be schools, such as basements of churches, and other places, which do not have adequate facilities, and have improper ventilation. It is astonishing that there is not more contagious disease caused by these conditions, because of improper ventilation, for example. There is a great need for construction of classrooms. If the Senator will permit me to do so, I should like to read the words of the Senator from Arkansas [Mr. FULBRIGHT] in his presentation before the Senator's committee. The Senator will remember that that was one of the finest presentations that we heard.

Mr. MORSE. I think it would be helpful to have that statement in the RECORD, and to restate it.

Mr. McNAMARA. I hope every Senator will read it. I wish to read a short section of the statement by the Senator from Arkansas. The Senator from Arkansas said:

CLASSROOM SHORTAGES

The status of education in America today leaves much to be desired. There was a shortage of 142,100 classrooms in the fall of 1960, an increase of 6,900 from the previous year. There are nearly 2 million students in excess of normal classroom capacity, and almost three-fourths million students attending school on curtailed or half-day sessions. In a report released by the Department of Health, Education, and Welfare last January, it was estimated that construction of 607,000 classrooms will be required by 1970. Four hundred sixteen thousand and six hundred should be built by the end of 1964 to take care of the classroom backlog, increased enrollment, and current replacements. This will require a construction rate of over 10,000 classrooms a year above the current construction rate. This construction will require an estimated $26.8 billion in revenue, or an annual revenue requirement of $2.7 billion for the remainder of the decade.

Mr. MORSE. I think that is an excellent statement.

Mr. McNAMARA. Is it logical to assume that the local property owner, whether he owns a home or a business, can assume a burden like that, in addition to what he is already carrying at the local level? Is it not time that someone speak up in behalf of the already overburdened homeowner and property owner in the school districts throughout the country?

Mr. MORSE. I am so glad the Senator from Michigan has spoken up again. He spoke up before in connection with his Federal aid to education presentation. Yesterday the Senator adopted the modifying amendment offered by his junior colleague, to provide that 20 percent of the school construction money which is made available could go to a district which has already built a school by issuing a bond which has placed a heavy tax burden on the real property of that community, and that that 20 percent could be used to help with that bond issue. What we must watch out for in a Federal aid to education bill is that we do not do an injustice to the school districts that have done their jobs.

Mr. McNAMARA. That is right.

Mr. MORSE. My State, for example, spends for its schools, in comparison with its wealth, far in excess of most States in the country. It is in the upper bracket. When we were working on the formula, we pointed out that some of our Midwestern States and Northwestern States had done a remarkably good job in support of their schools. In some other States there has not been a great sacrifice made, in some instances. That is why we asked for that to be considered in connection with the formula, and it was.

Now the Senator from Michigan proposes that it be considered in regard to the money that has to be used for school construction. I completely agree with him. I want the Senate to know that I will support his amendment. I am not at all interested in the argument that we must not do anything to the program, because if we do we will have to go into conference with the House. We ought to insist on a conference with the House. If we do not insist on a conference with the House, we will never escape the charge that we are legislating under a form of legislative blackmail imposed upon us by the House of Representatives. The Senate cannot justify such a surrender of its prerogatives.

This is a serious school situation which is typified by the school that partially collapsed in Mississippi. However, we do not have to go very far from the spot that the Senator from Michigan and I are now occupying, to discover school buildings in the District of Columbia which should be condemned. I remember back in 1957, when my subcommittee of the District of Columbia Committee was ably assisted by the Senator from Pennsylvania [Mr. CLARK] in making an investigation of the school situation in the District of Columbia. We warned then, for example, that the Hine Junior High School was a firetrap. Nothing was done about it. It was not so many months thereafter that a fire broke out, a rather damaging fire, in the Hine School. No children or adults were in the building. Too bad the building did not burn to the ground. The children got out of there in time. It could have been a catastrophe. Courageous action on the part of teachers and older children, through one act of heroism after another, led them to safety. The fire was put out. It is still an unsafe building. It should not be used.

Our school superintendent, Dr. Hansen, has warned us, in the District of Columbia Committee, on several occasions that we have a serious school building problem in the District of Columbia. When are we going to learn? Will we really have to wait until a catastrophe occurs? I shall offer, today or tomorrow, or the next day, depending on what policy we agree upon today in regard to the length of this seminar that we are conducting on educational problems of the country, an amendment which will bring the District of Columbia under

the provisions of federally impacted area legislation. It would be applicable only to Public Law 874, but it would help through release of other funds with what the Senator from Michigan has been so dedicated to, school construction. It will help the District of Columbia to the tune of about $5 million. As the Senator knows, we have a hard time getting Federal help for the people of the District of Columbia because they have no Senators and they have no Congressmen. They are voteless and they have no political pressure that they can bring to bear.

Mr. McNAMARA. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. McNAMARA. Are not the children of the United States in exactly the same position?

Mr. MORSE. That is right.

Mr. McNAMARA. They have no lobbyists.

Mr. MORSE. The schoolchildren have no powerful lobby.

Mr. McNAMARA. They have no vote. They have very weak spokesmen. They depend on people like the Senator and me to get legislation necessary in the field of education.

Mr. MORSE. The Senator is quite right. The District of Columbia labors under a handicap. I use the word handicap in connection only with the passage of legislation. Senator after Senator will probably deny, in righteous indignation, what the Senator from Oregon says, and even resent what he says, but it needs to be said. I have a feeling that we would get school buildings in the District of Columbia more quickly if it were not for the fact that 73 percent of the school population of the District of Columbia is colored.

Mr. President, each of those little colored children also happens to be a child of God; and, in my judgment, it is just as important, it is equally important, that we provide the same education for the colored children of America as for the white children. That is why we cannot justify a racial policy in connection with education. That is why my subcommittee will soon start hearings on the problem of segregation in America's schools. We cannot continue to hold our head high among the free nations of the world and participate in the disgraceful record of segregation in the United States. In my opinion, one of the difficulties in the whole matter of Federal aid to education is the lurking fear that it might hasten the day when America will keep faith with its Constitution and bring to an end the immoral segregation which exists in this country, to the damage of thousands and thousands of little colored children, who grow into citizenship eventually, but are scarred psychologically, injured emotionally, resentful and bitter, because they know that the people of the United States do not put into practice what we claim to be our ideals of first-class citizenship.

That is all bound up in this fight today. Let no one think it is not. It is far in the background, and some do not like to have it brought out for full public disclosure. I will make a fight for my amendment for the District of Columbia because I think those colored children are entitled to safe schools too. It may take us a few more years, but we will win. We are making progress. We will win.

I say to the President of the United States from the floor of the Senate today: "Mr. President, you have a fighting obligation which you owe to the American people on this issue right now. You have an obligation, Mr. President, to make clear that you will not take the treatment which the House of Representatives has given you in regard to education."

The friends of education have a right to expect no less from the President. Let me quickly add: I have no question about his fighting heart. I talked to him at length last week about this problem. I know how the President feels. The President is aware of what has happened in the field of Federal aid to education this year. He knows the forces that went to work to prevent the passage of education legislation in the House.

I am getting some interesting mail because I have spoken out against those forces—all of them. I care not where the opposition comes from. When it has come from the spokesmen of the private schools of America, I have spoken out against them. I have told them that if they want to make it an issue in 1962, I will take them on, because they are wrong, and they know they are wrong. They have no right to take an all-or-nothing position. As I stated on the floor of the Senate yesterday, they owe it to the taxpayers to see to it that we get a sound public school bill passed independently of any private school bill, and that we then get a private school bill passed within the framework of the Constitution as far as we can go within the Constitution. That has always been my position. A harder fighter for the private school interests in this country does not sit in the Senate today. I was the first to favor a loan bill for private schools. I know how costly it would be to me so far as politics is concerned. But if I ever take a position in this body for political reasons, then I have no reason to sit here, I say to the Senator from Michigan. I favor loans for private schools because, in my judgment, it is important, too, that children who go to the private schools have their intellectual potential developed to the maximum extent.

The Senator from Michigan [Mr. McNAMARA] knows we cannot rewrite the Constitution, but I favor going as far as the Supreme Court will go on this issue. That is why the Clark-Morse private school bill contains a section which provides for judicial review. The sooner we get that, the sooner we will put this splitting issue behind us. It is not good for the country to keep this issue alive. The way to get the issue settled is to have a bill passed and get it to the Supreme Court for determination. But I say to the spokesmen for the private schools that we have no right to jeopardize the interests of students who attend the public schools.

Those spokesmen should recognize that 50 percent of the children, for example, from Catholic families go to the public schools, not to the private schools. It is in the interest of the parents of those children that there be good public schools. It is in the interest of the taxpayers representing both public and private school children that we reduce this unconscionable tax upon American real property which is used primarily to support the school system of the country. It is regressive, not progressive, in nature.

These are some of the problems behind the scenes in this power play in the Senate today. Various lobbyist groups are well represented in the gallery these days. It was filled yesterday and it is again today. They do not relish my talk, but they do not have an answer to it.

Mr. President, this issue is pretty clear: We back up our President in his request. We reevaluate the whole educational matter in the next session of Congress. We give to the House of Representatives an opportunity to get home to talk to their constituents. We come back next January. We look at the whole problem as the President wants us to look at it. If we do not do that, we will let our President down. We will do him great damage, unjustifiably so.

If we follow the President's recommendations, we will support every school district in the country without the loss of a single dollar for the next year. We will have another chance to look at this situation next January 10.

But to pass an impacted areas bill and an NDEA bill for 2 or more years, as is proposed by some persons, contrary to the wishes of the President of the United States, will immediately weaken, if not absolutely destroy, any possible chance of the President succeeding next year in a reevaluation and a reconsideration of his educational program.

Mr. President, I send to the desk, and request to have printed, my amendment which would apply Public Law 874 to the District of Columbia; for Public Law 874 is the only one from which the District of Columbia can really benefit. I ask that the amendment be printed, subject to being called up whenever I decide to call it up.

The PRESIDING OFFICER. The amendment will be received and printed.

Mr. MORSE. Mr. President, I am about to suggest the absence of a quorum. I suggest that after that, the Senator from Michigan [Mr. McNAMARA] complete the presentation of his amendment. I want him to know that so far as I am concerned, I shall be happy to accept his amendment; but, as he knows, that will require Senate action.

I think I shall suggest the absence of a quorum, and then we can have a little conference and can decide what to do.

Mr. McNAMARA. Very well.

Mr. MORSE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CASE of South Dakota. Mr. President, before the Senator from Oregon leaves the Chamber, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MORSE. I object. I call for a live quorum.

The PRESIDING OFFICER. Objection is heard; and the call of the roll will continue.

The legislative clerk continued the call of the roll.

Mr. MORSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. CASE of South Dakota. Mr. President, reserving the right to object——

The PRESIDING OFFICER (Mr. SMITH of Massachusetts in the chair). Does the Senator object or not object?,

Mr. CASE of South Dakota. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MANSFIELD. Mr. President, will the Senator withhold that objection——

Mr. McNAMARA. Mr. President, to resolve this matter, I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue the call of the roll.

The legislative clerk resumed the call of the roll, and the following Senators answered to their names:

[No. 198]

Bartlett	Ervin	Muskie
Bennett	Gruening	Pastore
Boggs	Hart	Prouty
Butler	Keating	Saltonstall
Case, S. Dak.	Long, Hawaii	Smith, Mass.
Church	Mansfield	Sparkman
Clark	McNamara	Williams, Del.
Dworshak	Morse	Young, Ohio

Mr. HUMPHREY. I announce that the Senator from Missouri [Mr. LONG], the Senator from Oregon [Mrs. NEUBERGER], and the Senator from New Jersey [Mr. WILLIAMS], are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] and the Senator from New Mexico [Mr. ANDERSON] are absent because of illness.

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] and the Senator from Texas [Mr. TOWER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The PRESIDING OFFICER. A quorum is not present.

Mr. MORSE. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms will execute the order of the Senate.

After a little delay, Mr. AIKEN, Mr. ALLOTT, Mr. BIBLE, Mr. BURDICK, Mr. BUSH, Mr. BYRD of Virginia, Mr. BYRD of West Virginia, Mr. CANNON, Mr. CAPEHART, Mr. CARLSON, Mr. CARROLL, Mr. CASE of New Jersey, Mr. COOPER, Mr. COTTON, Mr. DIRKSEN, Mr. DODD, Mr. DOUGLAS, Mr. EASTLAND, Mr. ELLENDER, Mr. ENGLE, Mr. FONG, Mr. FULBRIGHT, Mr. GOLDWATER, Mr. GORE, Mr. HARTKE, Mr. HAYDEN, Mr. HICKEY, Mr. HILL, Mr. HOLLAND, Mr. HRUSKA, Mr. HUMPHREY, Mr. JACKSON, Mr. JAVITS, Mr. JOHNSTON, Mr. JORDAN, Mr. KEFAUVER, Mr. KERR, Mr. KUCHEL, Mr. LAUSCHE, Mr. LONG of Louisiana, Mr. MAGNUSON, Mr. MANSFIELD, Mr. MCCARTHY, Mr. MCCLELLAN, Mr. MCGEE, Mr. METCALF, Mr. MONRONEY, Mr. MOSS, Mr. MUNDT, Mr. PELL, Mr. PROXMIRE, Mr. RANDOLPH, Mr. ROBERTSON, Mr. RUSSELL, Mr. SCHOEPPEL, Mr. SCOTT, Mr. SMATHERS, Mrs. SMITH of Maine, Mr. STENNIS, Mr. SYMINGTON, Mr. TALMADGE, Mr. THURMOND, Mr. WILEY, Mr. YARBOROUGH, and Mr. YOUNG of North Dakota entered the Chamber and answered to their names.

The PRESIDING OFFICER. A quorum is present.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. McNAMARA. Mr. President, yesterday, in my remarks on the need for a school construction program this year, I placed in the RECORD evidence on the following points:

First. That the Federal Government has been in the field of education since the enactment of our Constitution.

Second. That in the precise field of school construction—there is a long and varied history of Federal participation through such programs as PWA, the impacted areas legislation and similar measures.

Third. That the latest figures available from the Office of Education show that the Nation needed—as of the fall of 1960—a total of more than 142,000 classrooms.

What does this classroom shortage mean?

Former President Eisenhower called for a White House Conference on Education in 1956.

I should like to read what that conference thought about our classroom needs.

Mr. President, at this point I yield the floor because it is necessary for me to attend a meeting off the floor.

BETTER GOVERNMENT

Mr. MOSS. Mr. President, at a hearing of the Subcommittee on Privileges and Elections, of the Committee on Rules and Administration, presided over by the present occupant of the chair, the Senator from Nevada [Mr. CANNON], evidence was heard on the question of contributions to political parties, and on various ways of amending the present law governing those contributions.

Recently the Deseret News, of Salt Lake City, published an article on this subject which accords very much with the position I took before the committee.

I ask unanimous consent that the editorial, entitled "For Better Government," published on September 7, 1961, be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Salt Lake Telegram, Sept. 7, 1961]

FOR BETTER GOVERNMENT

Congress is now considering a bill that could finally help attain that long-sought goal of political reformers—grassroots campaign contributions from the great mass of individual citizens.

The bill would attain this worthwhile goal by providing a tax incentive. Voters who contributed at least $20 to Federal general elections could trim $10 from their Federal income taxes. The tax deduction would not be increased by a larger donation.

This Nation has a long way to go before reaching such a goal. The hard fact is that only 2 percent of American voters now contribute to political campaigns. And of all campaign spending, 90 percent comes from about 1 percent of the population.

This, however, does not mean that citizens generally are unwilling to make small campaign contributions. A public poll has shown that 17 million American families would be willing to contribute $5 each to the parties of their choice. But for some reason most of them never get around to doing it.

If they did, the $85 million that would be raised could revolutionize American politics. It could reduce the disproportionate influence exercised by the "big money boys." Countless small, individual contributions could help remove from politics the temptation of large institutional or personal donors to try to pull strings. In fact, the clean breath of fresh air that such grassroots contributions could bring into politics is indicated by the fact that the $85 million or more that could be raised this way is more than twice the $33 million spent by the Republican and Democratic Parties combined in a presidential election.

In short, better politics and better government could easily result from a well-supported drive to obtain grassroots campaign contributions. It's about time we did something to make it a reality.

DISTRIBUTION OF POWER FROM UNITS OF THE UPPER COLORADO RIVER PROJECT

Mr. MOSS. Mr. President, the question of building the tie lines between the dams of the Colorado River storage project has been discussed extensively in my State and in all of the States of the Upper Colorado Basin.

There is great conflict on whether these lines should be built by the Federal Government, to tie the dams together, or whether private utilities should be given the opportunity to build the lines and charge a wheeling fee for wheeling the power. A great deal has been said on the subject.

Recently the Upper Colorado River Commission held a meeting in Denver at which private utilities offered some sort of an agreement to the Upper Colorado River Commission. I have called the Department of the Interior and the Bureau of Reclamation, and they have advised me that no such proposal has been made to them. Nevertheless the proposal was published in the press. There appeared in the Ogden Standard-Examiner, on September 3, of this year, a newspaper account of what had occurred at the meeting and what action was taken by the Upper Colorado River Commission.

Subsequently there appeared a resolution which was adopted by the Commission. That resolution was placed in the CONGRESSIONAL RECORD by my colleague, the senior Senator from Utah [Mr. BENNETT].

On September 6, I received a letter from Governor McNichols, of Colorado, discussing this same subject, and pointing out that the action of the Upper Colorado River Commission did not represent the official action of the State of Colorado, and was done without his knowledge or consent.

I believe this explains better than I could the controversy that has been revolving around this particular subject, and therefore I ask unanimous consent to place in the RECORD at this point the newspaper account from the Ogden Standard-Examiner, to which I have referred, and the letter from Governor McNichols dated September 5, 1961.

There being no objection, the article and letter were ordered to be printed in the RECORD, as follows:

[From the Ogden Standard-Examiner, Sept. 3, 1961]

PRIVATE FIRMS SCORE BIG POINT IN POWER TRANSMISSION BATTLE

DENVER.—Five private utility firms won a major victory when the Upper Colorado River Commission unanimously threw its support to their compromise plan for distributing power from units of the upper Colorado River project.

Commission members from Colorado, Utah, Wyoming, New Mexico, and one representing the Federal Government approved the plan.

The action allied the powerful policymaking agency with advocates of the private utility system in the private versus public power controversy, and set the stage for debate in Congress on the issue next week.

The Kennedy administration, like that of its Republican predecessor under President Eisenhower, has recommended an all-Federal system of power transmission from participating units of the upper Colorado project.

SAVE MILLIONS

The five private firms contend their own existing lines can be used for transmitting power to the Rocky Mountain region, thus saving millions of dollars for constructing a Federal system they claim would duplicate their own.

Gov. George Clyde, of Utah, a Republican and a Commission member, said the five-member agency met in executive session to discuss the revised plan submitted by the utilities.

In effect, the new proposal would reduce the cost of the private system development by $146 million and would require the Federal Government to pay the private utilities only taxes and normal maintenance after the transmission lines were amortized.

The original offer refused to consider a cost reduction to the Federal Government after the lines are amortized during the first 50 years.

SPECIAL CASE

L. R. Patterson, vice president of the Public Service Co. of Colorado, said in a letter to the Commission that "such procedure is definitely contrary to normal public utilities accounting practices."

But, his letter added, the private utilities "are willing to consider this particular service as a special case * * * in the interest of the earlier development of the participating projects."

Joining Public Service Co. of Colorado in the private groups' campaign are Public Service Co. of New Mexico, Utah Power & Light Co., Arizona Public Service Co., and Pacific Power & Light Co. of Portland, Oreg.

Voting in favor of their plan at the Commission meeting were Utah's Governor Clyde, former Gov. Edwin C. Johnson of Colorado, John Bliss of New Mexico, and Earl Lloyd of Wyoming.

The fifth Commission member is Robert Newell of Boise, Idaho, representing the Federal Government.

Newell's vote in behalf of the private utilities came as somewhat of a surprise, since the Federal Government's position favors the all-Federal transmission plan.

STATE OF COLORADO,
EXECUTIVE CHAMBERS,
Denver, September 5, 1961.

Hon. FRANK EDWARD MOSS,
U.S. Senate, Senate Office Building, Washington, D.C.

DEAR SENATOR MOSS: On September 1, 1961, the Upper Colorado River Commission adopted a resolution endorsing a proposal by various private power companies to permit those companies to construct, own, and operate major segments of the Colorado River storage project transmission system. A meeting of the commission was held in Denver, Colo., for this purpose, during my absence from the State. I am sure that you have already been advised of the commission's action.

The official agency of this State in matters pertaining to reclamation development is the Colorado Water Conservation Board. That board, after intensive staff study, adopted a resolution on August 2, 1961, endorsing the construction of the transmission system which heretofore has been approved by Secretary Seaton and Secretary Udall. I have already expressed my complete and continuing support of our State board's position.

The purpose of this communication is to advise you that the recent action of Colorado's commissioner on the Upper Colorado River Commission, who incidentally is my appointed representative to the commission, was undertaken without my knowledge or consent. The action was likewise taken without the knowledge, consent, or counsel of the Colorado Water Conservation Board, our official State agency.

I am also advised that the technical staff of the Commission was never requested to make and therefore never made a recommendation on the important issues which was the subject of the Commission's resolution.

I am further advised that the so-called new proposals of the private power companies were never made in writing until after the Commission adopted its resolution. I also have information that members of the Upper Colorado River Commission met in secret session with officials of the private power companies in Salt Lake City, Utah, about a week before the official commission meeting of September 1, 1961. The proposals made at the Salt Lake City meeting were never communicated to me, to the commission's own staff, nor to the responsible State agencies.

We would be pleased to receive any new proposals by the interested private power companies and to have such proposals made available for review and recommendation by the appropriate State agencies, by the commission's own staff, and by the Secretary of the Interior. Until such proper reviews and recommendations are made, I shall forthwith ask the Upper Colorado River Commission to withdraw its resolution of September 1, 1961.

Until the foregoing action takes place, I wish to emphasize that the action of the Upper Colorado River Commission and of Colorado's commissioner thereon, as herein described, was and is contrary to my position and to the official position of the State of Colorado.

Sincerely,

STEVE MCNICHOLS.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. MOSS. Mr. President, the question before the Senate now, whether or not Federal aid should be extended to impacted areas, is one which is not controversial in and of itself. The coming of large Federal installations into our various States and the concentration there of families with children of school age made it perfectly apparent that these school districts locally could not support the load that was thrust upon them by the sudden change in population. Therefore, we began with the Federal aid to impacted districts. This has been of great significance in my State of Utah, because we have had large concentrations of population in and around Hill Air Force Base, and there have also been large concentrations in the Box Elder County area because of the erection of the Thiokol Chemical Co. plant, in which the first stage of the Minuteman is to be manufactured and where considerable R. & D. activities are going ahead with solid propellants. There are other areas of the State such as those in Tooele County, where the Tooele Depot has attracted a large number of people. Recently it has been given an increased mission because of the termination of the depots at Ranier and Benicia.

So this problem will continue. It has been urgent and necessary that aid to impacted areas be extended to districts of this sort. So I heartily support the position of the committee in continuing impacted area. This is Federal aid which is readily recognizable for this need. There has been a little controversy about it. The only controversy which seems to exist on this type of Federal aid is the length of time the extension of the program shall run, and the precise formula as to whether a district would or would not qualify.

The general idea of Federal aid to education is perfectly acceptable. Many persons have written and talked to me about Federal aid generally and have been concerned about Federal control resulting from this kind of aid. They seem to overlook the fact that Federal aid has been extended all these years, and there has never been a complaint or an instance, so far as I know, of Federal control of the areas claimed. It seems to me that the idea of Federal control of schools as a result of Federal aid to schools is entirely specious. The Federal contribution, even for the most ambitious of the bills offered, would amount to a mere 5 or 10 percent, or some small fraction of the total cost of supporting the schools. If the aid were extended in the way the formula required—that is, the money being made available according to a particular formula and extended to the State board of education or whatever State control agency is concerned, there being no further Federal supervision of the funds—certainly there could be no Federal control. So the argument of Federal control falls by the board.

It seems to me that the only argument which really has any substance is the one made by those who are simply unwilling that the Federal Government should contribute any of its resources to the States in assisting them to bear this great financial burden. The cost of education is one of the greatest tax burdens which has come to us in this country. In fact, it is one of the great burdens of all the major nations of the world. Whatever we may think of the Soviet Union and its system of government, we must recognize the tremendous financial expenditure that the Soviet Union has made in the field of education.

At the time of the Bolshevik revolution some 40 years ago, the population of the Soviet Union was largely illiterate. Estimates were that as high as 80 or 85 percent of the people of Russia were illiterate at that time.

By a determined and concentrated effort, in the intervening 40 years, the Communist rulers of Soviet Russia have built an educational system which is now universal and is compulsory. Literacy has become the rule in the Soviet Union. The estimates now are that from 95 to 98 percent of the population of the Soviet Union can read and write. In fact, a strong effort is being made in this particular field. One of the notable things to observe in the Soviet Union is the vast effort which is being made to print and publish all sorts of books and pamphlets. Of course, they are propagandistic in nature. It is the purpose of the government to propagandize the people. Nevertheless, they are made available, and everyone reads.

The Soviet system of economics is such that subsidies are readily granted for any purpose which the Government desires to stimulate, so the printing industry is subsidized, and the books are sold at a fraction of the actual cost of producing them.

But I come back to the point that this activity indicates that a complete changeover has been made in the Soviet Union from a population which was illiterate and unschooled to one which is highly literate, and with all children attending school. Great progress also has been made in the Soviet Union in the field of adult education.

It has been estimated that the Soviet Union contributes as much as 25 percent of its governmental budget in support of its schools. If a comparable contribution were made in the United States, our schools would be the best in the world. We could have adequate classrooms. We could provide more teachers who were qualified and trained in particular subjects; we could improve upon the very fine schools which we now have. One of the institutions which has made the United States prominent economically and politically in the world is the excellent public school system which we have developed. We too, have compulsory education in all States. The amount of education which is compulsory varies from State to State, and that is proper, because I believe education should remain in the control of the States.

However, our continuing problem is to improve the excellence of our instruction and to make available to our children the kind of instruction which will enable them to compete in the present-day world. The world has become more complex. Of course, that is a cliche, something we all recognize. But the schoolchildren of today, in the fourth, fifth, and sixth grades, are talking about nuclear fission, travel into space, and chemical equations and formulas which were not even thought of 20 years ago, even at the college level. As we move deeper into this field, we shall require more and more effort in the field of education. But proportionately America is falling behind; we are not keeping up. While we have contributed more in dollars to our schools, percentagewise, compared to our population and our gross national product, we are not keeping up.

Mr. Walter Lippmann wrote a very interesting article about the Federal aid to education bill. It bears repeating. I shall read it.

THE SCHOOL BILL

(By Walter Lippmann)

After foreign aid, the most urgent business before Congress is the bill known as the School Assistance Act of 1961. The Senate passed the administration bill on May 25 by a vote of 49 to 34. This bill authorizes for a period of 3 years the payment of $850 million a year in grants to the States for the construction of public schools, for payment of teachers' salaries, for operating and maintenance costs. The funds are to be allocated among the States in proportion to the number of children of school age weighted by an equalization formula based on personal income per child of school age in each State. The Federal Government would then be paying about 10 percent, instead of 5 percent as now, of the Nation's bill for public school education.

In the House, a bill authorizing substantially the same amount and kind of aid has been voted by the committee, and will presumably come to the floor during the last week of June.

In order to arrive at this point the administration has had to unravel the tangled question, raised by the Catholic hierarchy at the beginning of March, whether Congress could give aid to the public schools without providing some kind of aid for the parochial schools. President Kennedy's view has been that it is unconstitutional for the Federal Government to give to the parochial schools the same kind of aid it proposes to give to the public schools. The hierarchy did not deny this. But it argued that it would be constitutional to authorize not grants, as to the public schools, but loans over a long term and at low interest rates, and that this be done in the same legislation which makes grants to the public schools.

The administration response was that the public school aid issue should not be confused by linking it inseparably with private school loans. If the Congress later chose to provide loans to private schools in separate legislation, well and good; its constitutionality could be tested in the Supreme Court. The administration went so far as to provide the Senate Education Subcommittee with a memorandum of law concerning the constitutionality of various forms of aid to private schools. Grants and loans for general purpose across-the-board and tuition payments for all church school pupils would be clearly unconstitutional, it said. But it is probably possible, according to the memorandum, to grant loans to private schools for special national purposes, as in the National Defense Education Act, without constitutional objections. This memorandum pointed the way to the present plan to give aid for special purposes to private schools through expansion of the National Defense Education Act.

This was, it seems to me, the right course to take. It would be a grave matter, divisive in its effect throughout the Nation, if Congress were prevented from voting aid to the public schools unless it also voted aid to to the parochial schools. Speaker RAYBURN was surely right in his insistence last week that the original priorities be kept, that public school aid be considered before the question of limited aid to parochial schools.

On the other hand, the 5 million children in the parochial schools are just as important to the Nation as any other children. If, as has been made clear in an admirable series of articles by Terry Ferrer in the New York Herald Tribune, the parochial schools are in serious financial trouble, anything that can be done to help them which does not violate the constitutional principle of separation of church and state should be done.

It is often said by skeptics and by opponents that there is too much emphasis on money, and that what ails American education is not so much poverty as mediocrity. This might be described as a profound half-truth. It is true that a good educational system requires a lot more than money. It requires, in fact, a rising standard of intellectual interest and of moral purpose in the whole community. But it is also true that without money, without much more money, without at least twice as much money as is now spent on public education, the intellectual and moral standards of our schools will deteriorate in years to come. For with the enormous increase in the school population which is just ahead, the money now available will not pay for enough schoolrooms and enough qualified schoolteachers.

The most important and the most appealing point raised by the opponents of school aid is that education is a matter that belongs to the States and to the localities. There is no doubt of this. None of the supporters of the administration bill denies that education belongs to the States and localities, and there is nothing in the bill which impairs in any degree their control of the schools, their power to build them, their power to decide what shall be taught in them, their power to choose the men and women who shall teach in them.

With this principle undisputed, we are nevertheless confronted with a condition which cannot be wished away by ignoring it. The fact is that most of the States and localities cannot raise enough money to provide the public education which must be provided in the years ahead of us. In the past 10 years the States and localities have made a mighty effort. They have tripled their expenditure on public education from $5.8 billion in 1950 to $15.3 billion in 1960.

They cannot do what has to be done in the next 10 years, which at a conservative estimate is to raise the expenditure on education of $30 billion a year. Why not? Because the demands on State and localities have caused them to tax and to borrow at rates which cannot be raised much further. Besides the schools, they have gigantic burdens of public improvements made necessary by the growth of cities. In the postwar years State and local tax revenues have tripled and their debt has quadrupled. Furthermore, even prosperous States and localities are prevented from utilizing fully their taxpaying ability by a host of administrative, jurisdictional, and political factors.

Federal tax revenues on the other hand have less than doubled since the war and Federal indebtedness has risen only 6 percent, representing a decreased proportion of our GNP. The Federal Government has vast taxgathering advantages: Broad geographic distribution, freedom from fear of migration of people or industry, more efficient and better financed tax administration. The fiscal machinery of the Federal Government is such that given an adequate recovery and adequate economic growth, it can quite effectively and painlessly provide aid to the public schools.

The essence of the bill now before Congress is that it brings to the support of public education in America the fiscal powers of the Federal Government. Only if this is done can public education in America look to the future with hope.

Mr. MANSFIELD. Mr. President, will the Senator from Utah yield?

Mr. MOSS. I am happy to yield to the majority leader.

Mr. MANSFIELD. I should like to propose a unanimous-consent agreement. I have "touched bases," I believe, with all Senators who are interested in the proposed legislation now pending. I understand that debate on the McNamara amendment may be completed within 20 minutes or so, and I ask unanimous consent that at the conclusion of disposition of the McNamara amendment—which would be within 30 minutes?

Mr. McNAMARA. Yes.

Mr. MANSFIELD. I want that noted in the RECORD that 2 hours be allocated for each amendment thereafter, and 4 hours on the bill, with the time to be divided equally between the proponents and the opponents, and with the agreement to be prepared in accordance with the regular form.

The PRESIDING OFFICER (Mr. DODD in the chair). Is there objection? Without objection, it is so ordered.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President——

Mr. MOSS. I yield.

Mr. DIRKSEN. At this time, I should like to ask the majority leader whether he has calendared the rest of the week, and what measures are likely to come up between now and the weekend.

Mr. MANSFIELD. At the conclusion of action on the pending bill, it is intended to bring up Calendar No. 886, House bill 7057, which has to do with the tax treatment of clay and shale; Calendar No. 851, House bill 8444, the District of Columbia elections bill; Calendar No. 844, House bill 6141, the so-called Hiss Act; Calendar No. 842, House bill 6775, the dual rate shipping bill; Calendar No. 862, Senate bill 2194, the District of Columbia unemployment bill; House bill 8072, the District of Columbia appropriation bill. It will be reported today, I believe. It can be considered sometime later in the week, and it is our intention to ask unanimous consent to have that done if conditions work out accordingly. The foreign aid bill, H.R. 9033, is in the Senate committee. It will be reported Wednesday and will be brought up on Friday of this week. I wish to notify the Senate that, so far as the leadership can find out, this is a definite commitment.

After that, the public works bill, which passed the House yesterday, will be reported next Tuesday, September 19, and be brought up as soon thereafter as reasonably possible.

The supplemental appropriation bill will be reported on September 20 or 21, and it will be called up as soon as possible.

I wish the Senate to pay close attention to this one: The resolution amending rule XXII will be taken up this Saturday, September 16.

Then, we will take up Calendar No. 853, S. 2426, the election bill, reported by the Senator from Nevada [Mr. CANNON].

We will have calendar calls at any time from now on, after the morning hour. Conference reports will always be in order.

It is the intention of the leadership to suggest that, once we adjourn sine die, the Senate return on Wednesday, January 10, next year.

One more matter. There is a bill which will be passed by the House, I understand, and will be taken up in the Senate Finance Committee. I do not know the number of it. The Senator from Delaware is interested in it. That will be brought up this year.

Mr. DIRKSEN. Mr. President, if the Senator will yield further, I have discussed the matter of reconvening in January with some Members on the minority side. Normally, the Congress would come into session on Wednesday, January 3, but I see no objection whatsoever to coming in on January 10.

Mr. MANSFIELD. In discussing the matter, we looked at the calendar and realized we would be fairly well caught up with the business of this session. In view of that fact, it was thought advisable to consider returning on January 10.

Mr. DIRKSEN. One other question to the distinguished majority leader: I am rather reluctant to make the suggestion in view of his complete cooperation throughout this session, but I am wondering if he contemplates a session on Saturday of this week.

Mr. MANSFIELD. Yes, indeed, but I do not anticipate any votes on that day. I could be mistaken. I intend to call up the resolution on rule XXII, and we do intend to lay down a petition that day seeking to invoke cloture. That petition will be under the sponsorship of my distinguished colleague, the minority leader [Mr. DIRKSEN] and myself.

Mr. McCLELLAN. Mr. President, will the Senator from Utah yield so I may ask the majority leader a question?

Mr. MOSS. I yield.

Mr. McCLELLAN. I may have misunderstood—I am not sure—but did I correctly understand that on this coming Saturday the majority leader will bring up a resolution to amend rule XXII?

Mr. MANSFIELD. Yes.

Mr. McCLELLAN. Did I also correctly understand the distinguished majority leader to say that on the same day there will be laid down a cloture petition?

Mr. MANSFIELD. Yes; a petition for cloture, by the majority leader and the minority leader.

Mr. McCLELLAN. On the same day? Will it be done on the same day that a motion is made to call up the resolution to amend rule XXII?

Mr. MANSFIELD. That is correct. It takes 1 day after that, and then 1 hour after the Senate meets on the following day, but one, to proceed. I think we all ought to face up to this matter as soon as possible.

Mr. McCLELLAN. I was not raising a debatable question. I wanted to be sure I understood what the majority leader said. Debate will come on the motion to take up, I assume, and there may be some debate at that time.

Mr. MANSFIELD. The Senator is always sure and always knows what his objective is.

Mr. DIRKSEN. Mr. President, I think I should ask unanimous consent that all of this colloquy not be taken out of the time being allotted to the McNamara amendment.

Mr. MANSFIELD. I agree. I ask unanimous consent that the 30 minutes allotted to the McNamara amendment will still hold.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. MOSS. I yield.

Mr. KEATING. Are we to understand the cloture petition will apply to a proposed amendment of rule XXII and any amendments thereto?

Mr. MANSFIELD. It will be offered under the regular procedure.

Mr. PASTORE. Mr. President, will the Senator yield for a parliamentary inquiry on that point?

Mr. MOSS. I am happy to yield.

Mr. PASTORE. I should like to propound a parliamentary inquiry. In the event that the proposal for the modification of rule XXII is laid before the Senate on Saturday, and a petition for cloture is sent to the desk on the same day, will that preclude a motion to postpone further discussion of this change until next January?

The PRESIDING OFFICER. Will the Senator state his inquiry again?

Mr. PASTORE. I will state it again. In the event that the resolution proposing a modification of rule XXII of the rules of the Senate is laid before the Senate as the pending business on Saturday next, and on the same day a petition is filed for the application of cloture, will that preclude at any time thereafter a motion being made to postpone further discussion of the change of the rule until the coming session in January of 1962?

The PRESIDING OFFICER. The Chair is advised by the Parliamentarian that such a motion would not be in order.

Mr. PASTORE. May I propound a further parliamentary inquiry?

The PRESIDING OFFICER. The Senator will state it.

Mr. PASTORE. What if the motion to postpone further discussion is filed on the same day as the petition for the application of cloture? Would it be considered relevant to the same issue?

The PRESIDING OFFICER. That would not be in order, because one cannot move to postpone consideration of something which is not before the Senate.

Mr. MANSFIELD. Mr. President, if I may be heard, I would hope the Senate would consider facing up to the problem this year, rather than postponing it. Senators may recall that the distinguished minority leader and I made a pledge to this body that before we adjourned the 1st session of the 87th Congress we would have reported to the Senate a proposed change in rule XXII. That has been done. A resolution has been reported from the Committee on Rules and Administration. I would hope the Senate would face up to the issue and decide it one way or the other this year—and next week.

Mr. KEATING. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. MOSS. I yield to the Senator from New York for that purpose.

The PRESIDING OFFICER. The Senator from New York will state his parliamentary inquiry.

Mr. KEATING. Mr. President, I make the following parliamentary inquiry: If at the time the proposed amendment to rule XXII is laid before the Senate, the majority leader at that time files a cloture petition would the proposed amendment be open to amendment?

The PRESIDING OFFICER. The Chair rules it would be open to amendment when it is before the Senate.

Mr. KEATING. I take it that would be true at any time prior to the time when the Senate may vote cloture. Is that correct?

Mr. PASTORE. Mr. President, will the Senator yield to me?

Mr. KEATING. The Presiding Officer has not answered my parliamentary inquiry.

The PRESIDING OFFICER. The Chair is advised that the filing of the cloture petition would not prohibit the offering of amendments to the resolution.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. MOSS. I yield.

Mr. PASTORE. In view of the statement made by the distinguished majority leader [Mr. MANSFIELD] I wish to make my position clear.

I am in favor of resolving the question, if it can be resolved. I think it would be most unfortunate, if we could not get the application of cloture, to have this question drag on and drag on, at a time when nearly every Member of the Senate is tired and in a testy mood. I would rather see the question debated and resolved in clear daylight, when we have the time to do it.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. MOSS. I yield.

Mr. DIRKSEN. In answer to the distinguished Senator from Rhode Island, I think the good faith of the majority leader and of the minority leader are involved in this question. When the extended discussion was terminated in January, mainly because it appeared that the President would be inaugurated and a Cabinet might not be confirmed, Senators will recall the meeting we had at that time, in which it was agreed the question would go to the Committee on Rule and Administration, and that the majority leader, in his capacity as chairman of the Committee on Rules and Administration, would undertake to have a resolution reported to the Senate.

That resolution is on the calendar. It comes to the Senate without recommendation. In view of the discussion we had and the representations made at that time, in good faith, I think there must be something better than a mere token effort made in order to evidence that good faith.

I think I speak for the majority leader and his understanding of the matter at the time the agreement was consummated.

Mr. MANSFIELD. That is correct.

Mr. PASTORE. I do not question the motives or the sincerity of the Senators. I realize that both the majority leader and the minority leader have no alternative but to follow the procedure they have laid down.

It would be unfortunate to have a filibuster at this time of this particular year, when the world seems struggling to come apart at the seams. Here we are quarreling among ourselves now, when the question could be settled when we really shall have the time to go around the clock and to resolve it once and for all.

Mr. MANSFIELD. Mr. President, I express the hope that we would under no circumstances go around the clock. While daylight hours are getting shorter, as fall approaches, there is still plenty of daylight to consider the resolution. I would hope there would be no filibuster of any kind. I think in this instance it would be nothing but a delaying tactic, no matter by which side engaged in, either the proponents or the opponents of this particular proposal.

So far as the debate is concerned, I think what we shall have to say will not change one vote in this body. We know what is the issue. We can face up to it. If we wish to make long speeches we can make them to the folks back home who may be interested; but let us get on with the business of the Senate, and quit, and settle the issue.

Mr. PASTORE. I agree with the majority leader. I hope and pray what he suggests will be what will happen—but I have my honest doubts.

Mr. MOSS. Mr. President——

The PRESIDING OFFICER. The Senator from Utah has the floor.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. MOSS. I am glad to yield to the Senator from Georgia.

Mr. RUSSELL. I merely wish to say that a large number of Senators have made plans to remain here to discuss this issue, relying on the statements of the majority leader and of the minority leader. We have no specific plans as to the length of the discussion, but I am of the opinion that no more important question will come before the Senate in this session of Congress or in the next session than the question of changing the rules.

I hope it is not proposed to bring that question to a conclusion without giving any of the Members of the Senate who desire an opportunity to express their views on it. Certainly it is one of the most important questions which will be before the Congress at this session, and I am sure we can see that the Members do have a right to at least express their views on the subject.

Mr. MANSFIELD. Mr. President, will the Senator yield further?

Mr. MOSS. I am happy to yield.

Mr. MANSFIELD. I agree that Senators have a right to express their views, but I would hope that they would express them temperately and briefly.

I point out to my colleagues that this is purely, only, and entirely a matter of the Senate and for the Senate. This is our business, and we should try to decide on it in our own way and on the basis of our own responsibility.

Mr. RUSSELL. Mr. President, I undertake to assure our distinguished and beloved leader that we shall discuss the matter temperately. [Laughter.]

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. MORSE. Mr. President, will the Senator yield so I may ask the majority leader a question?

Mr. MOSS. I yield.

Mr. MORSE. We have just entered into a unanimous consent agreement on the education issue. There is no doubt about the fact that the NDEA amendment will be germane, but I want to make perfectly certain, so we can understand that the proposal to extend NDEA,

as well as the impacted areas legislation, will be considered germane under the unanimous-consent agreement.

Mr. MANSFIELD. That was our understanding.

Mr. DIRKSEN. Yes.

Mr. MANSFIELD. Will the Chair so note?

The PRESIDING OFFICER. That will be the understanding.

Mr. MOSS. Mr. President, I conclude my remarks on the bill before the Senate by quoting two paragraphs from a letter I have received from John W. Fitzgerald, principal of the Morningside Elementary School, Granite District, Salt Lake County, Utah. This letter has to do with the general subject of Federal aid to education. The first two paragraphs read:

> May I compliment and commend you for your support of education, especially your fight for Federal aid? We, in Granite School District, with an enrollment this year in grades 1 through 12 of 41,000, with seven elementary schools being on part or complete double sessions, and with no relief in sight, know the problem at first hand.
>
> The people of Granite district, as you well know, pay one of the highest tax in the State for schools. Our local effort cannot meet our needs. Our classes are crowded. Already at Morningside we have 38 enrolled in sixth grade classes. Thirty-one students in second grade classes is the least we have in a class. Thirty-five to thirty-seven attend classes in the third, fourth, and fifth grades, except the first graders who, as you know, are on double sessions, with each teacher having 22 to 24 in a session, 3 hours each session. Before the school year is over we expect an additional 50 boys and girls.

Mr. President, this points up the great problem we have to consider. We have before us a bill limited in its scope. Unfortunately, we cannot address ourselves to the full bill we previously had before the Senate.

I plead for action in this body to approve at least the aid to be provided by this bill, so that we in America can move forward in the field of education, so that we can maintain the lead we established years ago, but which we may be about to relinquish by our negligence in support of our schools.

The support must come, as Walter Lippmann pointed out so eloquently, from the powers of the Federal Government to give the financial assistance needed.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. MOSS. I am happy to yield to the majority whip, the distinguished Senator from Minnesota.

Mr. HUMPHREY. I commend the Senator on his statement and associate myself with the substance of his statement as to the urgent necessity of general aid to education, and particularly as to the necessity of action upon the particular proposal now before us. Public Laws 815 and 874 have helped a great deal. They relieved a difficult situation at the time of the Korean war.

I held the hearings on these laws, and I recall all too well the action of the committee and of the Congress when those two particular public laws became a part of the Federal Code. I feel that the action which the chairman of the Subcommittee on Education is proposing here; namely, for a 1-year extension, is the sound and proper way to proceed, because it would permit us again to review the effectiveness of Public Laws 815 and 874. It would permit us to review the entire educational needs of the Nation. As I have indicated to the Senator from Oregon, later in the debate I intend to address myself to the subject of education and the Federal Government's responsibility.

For example, there is the field of higher education, in which we will face a great problem in the very near future, with our college population doubling in the next 10 years. We shall face increased needs in the field of technical, professional, and vocational education. In those special fields of endeavor, it is proper for the Federal Government to extend a helping hand. We have done so in the past under the vocational education programs. We have done so in the field of medical education. We have done so in the field of scientific research, which, by the way, is one of our great educational efforts to date. I shall look forward to the opportunity again in the coming Congress to work on the question of assistance to education and strengthening our educational program.

POPE JOHN'S APPEAL FOR PEACE

Mr. HUMPHREY. Mr. President, yesterday Pope John XXIII once again made an appeal for peace and called upon the world's leaders to enter into sincere and free negotiations to remove the threat of war. In these trying days when the specter of war haunts mankind, the words of a great spiritual leader, Pope John, deserve the world's careful attention.

Mr. President I hope and pray that the Pope's words will be carefully weighed by those in whose hands the future of the world rests.

Those were words of encouragement. They were words of courage from a courageous man. Willingness to negotiate does not demonstrate weakness. It demonstrates a concern for mankind, and the kind of moral courage that is required of great leaders.

I ask unanimous consent that an article from the New York Times of September 11 on the Pope's message be inserted at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 11, 1961]

POPE BIDS CHIEFS END WAR THREAT—URGES LEADERS TO NEGOTIATE EAST-WEST DIFFERENCES TO PRESERVE PEACE

(By Arnaldo Cortesi)

ROME, September 10.—Pope John XXIII called on the leaders of the East and West today to negotiate their differences and remove the threat of war that hangs over the world.

In a moving and impassioned appeal for peace, the Pope mentioned no person or nation, but he was clearly addressing the Kremlin no less than the White House when he said:

"It is truly upon wisemen that the issue depends that force shall not prevail, but right, through free and sincere negotiations, that truth and justice shall be vindicated by safeguarding the essential liberties and the unsuppressible values of every nation and of every human person."

POPE APPEARS STERN

The Pope was serious and stern visaged as he delivered the address in tones of earnest entreaty.

He urged the leaders to "face squarely the tremendous responsibilities they bear before the tribunal of history and what is more before the judgment seat of God." He entreated them "not to fall victims to false and deceiving provocations."

Pope John said the leaders had enough time to negotiate and agreement because he did not believe the danger of war was imminent.

"By the mercy of God," he said, "we are persuaded that up to the present time there is no serious threat of either an immediate or a remote war. In making this reference of our own to a subject that the press of all nations is discussing, we mean nothing more than to take still another opportunity of appealing with confidence to the serene and sure wisdom of all men who guide the nations of the world."

The Pope's appeal was delivered just after he had celebrated a mass for peace in the large audience hall of his summer residence at Castel Gandolfo.

TWELVE CARDINALS AT MASS

About 15,000 people stood in the hall and in the square of Castel Gandolfo just outside the main entrance to the Pope's residence. Twelve Cardinals and members of the papal court attended the ceremony.

The mass was broadcast by radio networks, including Radio Free Europe, in seven West European countries and by a number of stations in the United States and Canada. The peace appeal was also made available to Western Europe on international television.

As soon as the Pope finished speaking, the Vatican radio started broadcasting his appeal in more than 30 languages. Several of these programs were beamed to Iron Curtain countries.

Pope John ended his appeal by asking all believers to pray for peace.

"We have prayed together and in so doing we have felt great joy in our hearts," he said. "Let us continue to pray in this way as St. Paul invites us to do.

"Let us pray with one another and for one another and for all the scattered creatures of God who make up the Holy Church and the human family, which is also all His own."

The Pope extended his "most urgent invitation" to "priests, to consecrated souls, to the innocent and to the suffering. Let us all together beg the Father of Light and of Grace to enlighten the minds and move the wills of those who hold the chief responsibility for life or death of the peoples."

Pope John said: "The world has no need of victorious wars and defeated peoples, but of renewed strength and salvation and of fruitfulness and calm of peace. This is its need and this it is for which it cries aloud: The dawn of salvation and the growth of peace."

PROJECT HOPE

Mr. HUMPHREY. Mr. President, in the Washington Post and Times Herald of September 8 appeared a story under the following headline: "ICA Aid Says Hospital Ship *Hope* Is Not Worth the Money Its Sponsors Ask."

I am sorry that that statement appeared, because it is my view that Project Hope, one of our people-to-people programs, has been a real suc-

cess. It has carried the message of American concern for humanity through the use of American technology, particularly in the fields of medical science and the healing arts. It has carried the message of American education and American democracy to literally millions of people as the ship has journeyed in the Asian areas of the world.

Dr. William B. Walsh, who is president of the People-to-People Health Foundation that sponsors Project Hope, made an answer to that critical article, and I believe that answer is worthy of the attention of every Senator.

I ask unanimous consent that the answer of Dr. Walsh, together with a report on the activities of Project Hope in Indonesia and a report on the activities of Project Hope in Vietnam, be printed at this point in the RECORD.

There being no objection, the statement and reports were ordered to be printed in the RECORD, as follows:

STATEMENT BY WILLIAM B. WALSH, M.D., PRESIDENT OF THE PEOPLE TO PEOPLE HEALTH FOUNDATION, SPONSORS OF PROJECT HOPE

A statement critical of Project Hope, attributed to an unnamed ICA official, has appeared in the press. It creates some serious misconceptions for the American people who have donated wholeheartedly to the *Hope*, and therefore requires a reply from me.

Obviously the ICA informant, who refused to reveal his name, has never been near the SS *Hope*. He called our hospital ship "showcase democracy." Let's examine this.

Granted, operation of a floating medical training school is not a dime store basement operation; $85 billion in foreign aid, invested since World War II, testifies that world needs are not solved by bargain-basement viewpoints. But the SS *Hope* has been one of the biggest bargains in all our foreign-aid efforts—in good will, understanding partnership, and service to fellow humans overseas.

The SS *Hope* has been a resounding success. This is attested by leading Indonesian and South Vietnamese, and our Ambassadors in the countries she has served, by USIA and State Department reports, and by dozens of Senators and Congressmen, who, unlike the anonymous ICA official, have troubled to get first hand information on her operation. Her success is apparent from the fact that other nations now want to operate such ships.

Granted, it is not cheap to operate under the American flag. But what is the point of billions invested in foreign aid if we are to decide that to save a million dollars we will run down the flag on a great project?

The anonymous critic of Project Hope says, in effect, "Take off all your wonderful volunteer American medical men and women. Take off all the 'expensive' union seamen ambassadors of good will. Do away with the vast amount of donated American medical products. Remove the American chaplains. Don't give this ship the subsidy benefit granted by the U.S. Government to all other merchant ships. Strip her of all American identity. Charter her to a country overseas."

Our anonymous critic does utter violence to the very principle behind our whole foreign-aid program—that of keeping the flag of freedom flying as a symbol to other nations of the right of self-determination. He does a disservice to the vast amount of worry and cooperation contributed to the *Hope's* success by legions of splendid Government people, from the White House through many agencies. He casts a slur on the contribution of organized labor—there's a great story yet to be told of the crewmen's part in this great project. From his ivory tower, he passes judgment on the efforts of the many leaders of industry and the professions who have given money and time to make this ship a reality.

We are proud to report that the SS *Hope* has been run as economically as possible. After all, most everything has been donated. Actual operating costs, such as safety management and crew requirements, were worked out very carefully by the operating agent, American President Lines, who donated all their management skill and took not a penny in fees.

The ship is due back in San Francisco next week some time, with a tired but satisfied medical complement and crew. Instead of impugning their efforts, let's give the *Hope* a rousing welcome. Through a partnership of private and Government effort, her 12-month cruise in southeast Asia has been a real breakthrough in an area where we have invested billions of dollars. If the *Hope* is showcase democracy let's have more of it.

REPORT ON ACTIVITIES OF PROJECT HOPE IN INDONESIA

The hospital ship *Hope* visited Djakarta, Surabaya, Bali, Sumbawa, Makassar, Ambon, Kupang, Bima, Lombok, Semarang, and Djakarta again; also operated in Bandung, Solo, Djokjakarta, and Malang.

Two hundred Indonesian doctors and three hundred Indonesian nurses in the various ports participated in the medical program of training and treatment.

Seven hundred major operations were performed.

Eighteen thousand patients were treated by the joint Indonesian-American committees.

Eight thousand patients were selected for special treatment on the hospital ship or at shore facilities by the joint medical teams.

Orthopedic teams began working in the Ibu Sukarno Hospital in Djakarta and the Solo Rehabilitation Center in December, and have continued their work ever since.

During the disasters in the South Moluccas and the Flores, medical supplies and relief goods were sent to the suffering islands.

Six thousand books and medical journals were given to hospitals and clinics.

Eight hundred lectures and seminars were held.

Eighty-six thousand pounds of medical supplies were left in Indonesia.

Eighty thousand pounds of powdered milk was left. This was supplied by the U.S. Department of Agriculture and *Hope* simply acted as agent for the delivery.

A screening chest survey was done in the outer islands on civil servants, schoolteachers, and children.

Americal medical personnel participating in Hope in Indonesia included: 73 physicians and dentists, representing all specialties of medicine, 26 nurses, 12 medical technicians, 4 medical secretaries, 2 pharmacists, 1 dental hygienist, 1 physical therapist, 1 dietitian, 1 medical equipment maintenance man.

(It might be mentioned that two members of the hospital ship lost their lives as a result of illness during the period the ship was in Indonesia.)

REPORT ON ACTIVITIES OF PROJECT HOPE IN VIETNAM

Between 10,000 and 11,000 patients seen. Over 500 operations of a major variety performed, both ashore and afloat.

Programs in 18 different specialities of medicine, including oral surgery and dentistry were carried out.

An orthopedic rehabilitation center in Saigon was opened, for which we gave them equipment, even including bed linen and some food. It is planned that we will maintain this center and maintain an orthopedic training program there.

The *Hope* staff worked ashore in clinics, in six civilian hospitals and one military hospital in Saigon.

Field units went both north and south out of Saigon to Cantho, Phung-Hiep, Hue, Dalat, and Nha-Trang.

The first mass inoculation program for children (including inoculations for diphtheria, typhoid, tetanus, and pertussus) was initiated and carried out. Local vaccination teams were trained. Program involved over 250,000 doses of vaccine. They were provided with ample syringes and 40,000 disposable needles to get them started.

Two thousand books provided for the local medical school library.

Twenty-eight interns and residents spent the entire tour in training on the *Hope*. It should be pointed out that these boys gave up their vacations to serve on the *Hope* and expressed the feeling that it was the most worthwhile thing they had done.

Two hundred Vietnamese nurses were rotated through in short periods for observation, teaching, and demonstration with 35 of these 200 remaining on board for a prolonged period.

There were weekly medical meetings. Because the ship remained in Saigon for the entire period, a regular medical school routine was simulated and there were daily rounds and daily conferences in all 18 specialties involved.

Oral surgery was introduced to Vietnam for the first time and we have been asked to maintain a continuous program in oral surgery in that country.

BERLIN CRISIS

Mr. HUMPHREY. Mr. President, the seriousness of the Berlin situation is of concern to us all. On September 3, 1961, the Minneapolis Tribune printed its poll showing that more than half the State's adults felt the United States should risk war with Russia over Berlin. I have selected five articles which perhaps give an insight into the feelings of the majority of the citizens of the great State I am privileged to serve.

I ask unanimous consent that these articles, along with the Minnesota poll, be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Minneapolis Sun, Sept. 3, 1961]

MAJORITY THINK UNITED STATES SHOULD RISK WAR OVER BERLIN CRISIS

The "stand firm on Berlin" attitude of a majority of Minnesotans in early July was still the view of more than half the State's adults in late August, despite the heightening of the crisis.

When the Minneapolis Tribune's Minnesota poll asked a representative cross section of voting age men and women whether we should risk war with Russia over Berlin, 54 percent of them answered "Yes."

The question asked was:

"Do you think the United States should or should not risk war with Russia over Berlin?"

The results of two surveys, carried out 6 weeks apart:

[In percent]

	July 7-11	August 18-22
Should risk war	58	54
Should not	32	33
Qualified answers	1	1
No opinion	9	12
Total	100	100

In terms of statistical meaning, there has been very little change in Minnesotans' reaction since the July study.

The late-August survey also indicates:

Nearly 4 out of 5 people are in favor of having the Western Powers—the United States, France, and Britain—enter into new talks with Russia over Berlin and the whole German question.

A majority believe Russia is not ready to risk war over Berlin.

The idea most frequently expressed by people on what can be done to prevent war in the Berlin crisis is stand firm.

One of the questions asked by interviewers during the statewide survey was:

"Are you in favor of, or against, having the United States, France, and Britain begin new talks with Russia about Berlin and the German question?"

The answers:

[In percent]

	Total	Men	Women
In favor	79	85	73
Against	10	9	11
Other replies	1	1	1
No opinion	10	5	15
Total	100	100	100

Support for new talks is found rather uniformly among city, town, and farm residents, and among Democratic, farmer-laborites, Republicans, and independent voters.

Another question was:

Do you think the Russians would or would not risk war with us over Berlin?

The replies, compared with the results of a similar survey in July:

[In percent]

	July 7-11	Aug. 18-22
Think they would	27	30
Think they would not	62	57
Other replies	(1)	1
No opinion	11	12
Total	100	100

[1] Less than 1 percent.

Women are more apprehensive than men; 35 percent of the women—as compared with 26 percent of the men—think the Russians are willing to chance war on the Berlin question.

Interviewers also asked:

"What do you think can be done by us to prevent war over Berlin?"

The leading suggestions fall into these groups:

1. Stand firm, refuse to give in to Russia.
2. Negotiate; hold talks; have a summit meeting.
3. Strengthen our military forces in Berlin; increase defense spending.
4. Continue our present program; do nothing more than we're now doing.

One percent of the people suggest prayer. Another 1 percent are in favor of "compromise." Two percent believe nothing can be done; "we're going to have a war."

More than one-third of Minnesota's adults (36 percent) have no ideas to suggest. In many cases, though, it's not because they lack opinion, as these remarks of a Minneapolis man show:

"I don't know what can be done; talking won't help. Giving in would stop a Berlin war, but we would be fools to do that."

[From the Minneapolis Morning Tribune, Sept. 5, 1961]

WEST BERLIN'S FUTURE

Western observers are showing increasing concern over the fate of West Berlin now that it has been sealed off from East Berlin by the Communists in order to halt the flow of refugees across the border.

As long as West Berlin remained as an escape hatch, it had a reason for being. It stood as a monument to freedom inside one of the Soviet Union's satellites, East Germany. It served as a symbol of hope to those East Germans and East Berliners who knew they could flee to that sanctuary if conditions became too severe inside the Communist empire.

Now that symbolism has been destroyed. West Berlin is a city that no longer has any meaningful contacts with East Berlin. The East Berliners no longer can come across the border to see what life is like in a free and democratic city. They no longer can stroll along West Berlin's streets to view the consumer goods that are available in profusion to the "capitalists" of West Berlin—and to those of East Berlin, too, if they had the money. The East Berliners now truly are living behind the Iron Curtain.

So what does this leave for West Berlin? To date, neither the West German Government, nor the West Berlin city government, nor the Western allies has come up with a good answer. The Soviet Union meanwhile, continues to attack the contacts between West Germany and West Berlin, charging that West German spies are using West Berlin as a base for their operations. It is even challenging the use of the air corridors to West Berlin by civilian planes.

Under these circumstances, it is not enough for the allies to say that their essential positions in West Berlin were not damaged by the closing of the border between East and West Berlin. It is not enough for Chancellor Adenauer to predict cheerily that everything will turn out all right in the end. It is not enough for the Western allies to contend stoutly that they will not be driven out of West Berlin—although they must say this and mean it, too.

Unless some new kind of symbolism is found for West Berlin—unless some new reason for being is discovered for that city—it may well wither and die on the vine. Premier Khrushchev may be able to wait for economic factors to make West Berlin so inhospitable that the West Berliners themselves would begin to move out. And if the West Berliners should give up, what would there be left for the Western Powers to defend?

Unless the Western allies and West Germany find a satisfactory answer to this question of West Berlin's future, the Soviet Union may win an easy victory there. It has been said that he who controls Berlin controls Germany, and he who controls Germany controls Europe. Is this not sufficient reason for insisting that the Western allies consider West Berlin's future as a matter of first importance?

[From the Minneapolis Star, Sept. 4, 1961]

WEST MUST KEEP BERLIN RADIO—REDS WOULD LIKE TO SILENCE VOICE OF FREEDOM

(By Roscoe Drummond)

BERLIN.—President Kennedy has said there are three Western rights in West Berlin which are not negotiable: the right of its people to a government of their own choosing, the right of Western access, and the presence of Western troops to prove that we will defend these rights.

I would like to add a fourth.

The fourth Western right which we ought not to yield or negotiate away is the Western voice of freedom in Berlin, which has the largest audience of any radio station in all East Germany, which symbolizes the very heart of what we stand for—freedom of thought—and which the Soviets yearn to snuff out.

I refer to RIAS (Radio in the American Sector), which is the only free radio station with strong enough signal to be heard widely throughout East Germany. Its reporting is so nearly the lone source of truth about what is going on in the world that it is listended to by more East Germans than heed what is put on the air by the Ulbricht Government.

It ought not to be sacrificed on the altar of negotiation. The Soviets would never pay the price it is worth to the West. They would take its liquidation as a welcome dividend, but they would not give anything significant or reliable in return.

Let's be clear about this. The only way Western rights in West Berlin can be secured is to show that we have the will and the means to defend those rights—by force if necessary.

These rights will not be any more secure by giving away the freedom and the facility to report the truth.

Recently East Berlin newspapers and radio commentators have pounced on President Kennedy's reference to "any actual irritants in West Berlin" which the United States would be ready to remove. They have suggested that above all they would like to rid themselves of RIAS.

Of course they would. But there is no evidence whatsoever that the core of Western rights to West Berlin would be more secure if RIAS were liquidated.

RIAS is an irritant to the Soviets and East German Communists only because any freedom of speech, any freedom of the press, is an irritant. But just because the Soviets would like us to throttle the Western voice of freedom in West Berlin is no reason we should do so.

The denial of freedom of speech and freedom of the press in East Germany is an irritant to us, but I hear no suggestion from Khrushchev or Ulbricht that they would put its removal on the agenda of negotiation with the West.

Let's not throw away RIAS for nothing. In fact, let's not throw away RIAS for anything. I doubt that President Kennedy intends to do so. Let us not be tempted into the mistake of believing that abandoning RIAS would reduce by one iota the Soviet threat to Western rights in West Berlin. It wouldn't.

It would only mean that we would be abandoning our only effective communication with the otherwise nearly totally isolated East German people and depressing by our own action the morale of West Berlin.

The very violence of the East German attack on RIAS is evidence of its effectiveness. During the time I have been in Berlin, RIAS has been the continued target of Communist vituperation, describing it as the "swamp flower of the U.S. Government" and accusing it of being "inducer of youths to become incendiaries" and as "director of the NATO spies."

I have examined the RIAS programs in detail and they contain no appeal to the East Germans to revolt, no call to arms. They are provocative if factual reporting of the news and calm expression of Western views are provocative. They are provocative only if it is provocative to report to

the East Germans news and views they cannot get elsewhere.

Now that the border has been sealed by Khrushchev, the work of RIAS is more necessary and more wanted by the East Germans than before. It is a revealing fact that RIAS is receiving more letters from East German listeners now than before travel to West Berlin was banned.

No German radio station has the kilowatt strength under the Amsterdam treaty to reach East Germany effectively. RIAS is needed as the Western voice of freedom. We ought not to let Khrushchev talk us or threaten us out of it.

[From the New York Times, Sept. 5, 1961]

ISOLATED WEST BERLIN SHOWS SAG IN MORALE

(By Sydney Gruson)

BONN, GERMANY.—A reporter standing off a distance from the emotion packed weeks in West Berlin finds a sharp and sad conviction coming to the surface.

It is that the morale restorative administered by Vice President JOHNSON'S visit and the reinforcement of the U.S. garrison was a temporary emotional thing.

The letdown appears to be setting in. Now that it is happening, everybody says it was inevitable. But everyone seems surprised that it has begun so quickly.

Here are a few examples picked at random to indicate the mood simmering just below the surface calm of the West Berliners:

When President Heinrich Luebke of West Germany visited the West Berlin refugee reception camp August 20, he was asked by an elderly woman: "Herr President, is it safe to remain in West Berlin?"

A baggage porter at Tempelhof airfield was showing off a dollar tip he had received from an American tourist.

"Not bad," said a second porter. "Aren't you going to change it?"

"Not on your life," was the reply. "When the Communists come, West marks will be like East marks but the dollar will keep its value."

A hairdresser signed a contract on August 9 to enlarge and redecorate his shop. On August 13, the East German Communists sealed the border. The hairdresser canceled the contract a few days ago.

Everybody who has been in West Berlin over the past 3 weeks has his own examples of an uneasiness and pessimism that will not be shaken off by the answer President Luebke gave the woman at the refugee camp.

"It takes a little while for the Anglo-Saxons to move," President Luebke told her. "But they have given their sacred oath to maintain this city."

Without questioning the Western allies' word, more and more West Berliners have come to see a difference between their own and the allies' interpretation of what "maintaining this city" should mean.

As the allied pledge is understood, military force would be used if the Communists cut off military or civilian access to West Berlin, moved physically against the allied presence or against the ability of the West Berliners to lead a new life.

The first and second conditions that could lead to allied military action are easily demonstrable. The West Berliners do not expect the Communists to give the allies any such clear case.

But there is an equally strong conviction that the Communists will slice away successfully at the city's links with West Germany on which its economic well-being depends, and at its openly anti-Communist stance.

These are examples that the West Berliners cite as being significant of the trend.

Also, the character of the annual gathering in West Berlin of former residents of Germany's eastern territories now under Polish sovereignty has quietly changed. The onetime easterners used to come to West Berlin from all over West Germany. The gathering this weekend was confined to a West Berlin regional conference, apparently on the suggestion of both the West German Government and the allies.

Inevitably unless something is done soon the economy is going to be threatened.

[From the Washington Post, Sept. 7, 1961]

SINCE VIENNA

(By Walter Lippmann)

Last June at the meeting in Vienna the President realized how seriously Mr. Khrushchev meant business about Berlin. A Western policy had to be formed at once and measures had to be taken before the end of the year. However, it is apparent now that while the Vienna conversations alerted and aroused the President, they did not provide him with the practical working basis of a policy. In order to have a policy he needed to know not only that Mr. Khrushchev would move on Berlin, but how he intended to go about it.

Not knowing this, the President and his advisers supposed that Khrushchev in 1961 would repeat what Stalin had done in 1948, that he would try to conquer West Berlin by blockading it. Thus far, the assumption has proved to be wrong. As a result, the Western allies were caught unprepared to deal with the actual, as distinguished from the supposed, Soviet strategy, which is revealed by the action of August 13. For instead of blockading West Berlin, Khrushchev sealed off East Berlin.

The administration had failed to take into account the fact that Khrushchev could act powerfully, but with measures short of war, to reduce the Western position in West Berlin. It has long been known that an embargo was a possibility. But the preoccupation of the President's advisers with the memory of Stalin's blockade in 1948 prevented them from preparing adequately for the formidable measures short of war which were available to Khrushchev.

The effect of the miscalculation has been far reaching. It led the administration to concentrate its energy on convincing Khrushchev that the West would fight if he interferred with physical access to West Berlin. This is true. It will fight if he interferes with Western access to West Berlin. It was a prudent precaution to make this plain to Khrushchev. But it should not have been sold to the American people and to the world as a policy. The exclusive and excessive preoccupation with proving our will to fight a blockade left us unprepared to deal with the actual embargo. On August 13 we had no policy, and there is reason to ask whether we are on the way to having one now.

By concentrating so exclusively on deterring another blockade, the President found himself accepting the advice which came to him from Paris and from Bonn and in Washington from the veterans of Stalin's blockade. He was told that if he stood firm, he could stand pat. Khrushchev was bluffing and if the President did not flinch first, Khrushchev would flinch first, and would once more retreat, as he did in 1958, leaving everything as it is. Until it was swept away by events, this pipedream clouded the vision and narcotized the will to face the realities of the German situation.

On August 13 Khrushchev went into action. He used a very different strategy than the one which this country had been told to prepare for, and so the test of wills turned out to be not a wrestling match but jujitsu. By the embargo, which was illegal and cruel but was a measure well short of war, Khrushchev struck a deep and damaging blow at the Western position in West Berlin and West Germany.

His highly sophisticated action could not, I think, have been improvised in the few weeks after the President had called for a degree of mobilization. The sealing off of half a city is a highly technical operation. The action had all the marks of long deliberation on how to strike most surely and most accurately, without the risk of war, at the Achilles' heel of the Western position. Moreover, only if we assume that the plan has long been in Khrushchev's mind can we explain why he has been swearing that he would get the Berlin bone out of his throat this year and at the same time that he would do it without a blockade and a war.

The Achilles' heel of the Western position is that the moral of the West Berliners, their will to stay in the city and to resist pressure and blandishment, depends on their faith in the Atlantic alliance. They have to believe that they will live to see the alliance bring about the unification of the two Germanys and the restoration of their own city as the German capital. This belief is what Khrushchev struck at on August 13. Without attacking West Berlin, he raised a wall which was designed not only to stop the refugees but also to prove to the Germans that the Western allies were unable to reunify Germany. The Germans understood this at once. But so unprepared was Washington for the reality of the German question that days passed before it realized how momentous a change had been brought about. Washington had no policy to deal with what actually happened—unless sending the Vice President and General Clay to West Berlin can be called a policy.

For a true measure of what has happened, we may take an official statement, made in 1959, by Dr. Grewe, who is Dr. Adenauer's Ambassador in Washington. He was writing about the previous Berlin crisis. "West Berlin cannot, in the long run, be held," he said, "if its population must come to the conclusion that the West has in fact accepted the division of Germany." Why? Because if Berlin cannot again become the captial of Germany, many of its people, particularly the younger ones, will drift to the West and others will make their peace with the East.

We are now in the preliminary stages of those negotiations which both sides have declared they want. The negotiations will begin with the stark fact that Khrushchev has forced the Western allies to acquiesce in, to acknowledge tacitly, the partition of Germany. He is, to be sure, some distances from his full objective which, in the current campaign, is to bring about what he calls the codification of the German settlement, that is the formal and legal recognition that World War II has ended with the partition of Germany. But during this summer he has put himself in the position of negotiating from the accomplished fact that the partition has taken place and that it has not been opposed. He holds in the iron grip of the Red army the thing on which negotiation will turn.

With the division of Germany a physical fact, the significance of West Berlin has been greatly reduced. Berlin is no longer the escape hatch from the East. It is very much less than it was before the entry point of Western propaganda and intelligence. Its economic expansion is throttled down, and almost certainly its working population will decline. Above all West Berlin is no longer the visible symbol and tangible pledge that

communism will be pushed back of the Oder-Neisse line, perhaps back of the Vistula River. What is left is a human and moral commitment, which will be honored, to protect the physical basis of the way of life which people of West Berlin now enjoy.

There is no denying that our bargaining position has been diminished. It will take a very high order of statesmanship to repair it. Such statesmanship does not come cheaply. Besides insight and imagination it will need the kind of moral courage which is very rare, the courage to tell the people hard and unpopular truths which it has long been thought inexpedient to speak about.

In another article I shall attempt to describe some of the problems of negotiating about Berlin.

[From the Minneapolis Tribune, Aug. 31, 1961]

WESTERN RIGHTS IN BERLIN REST ON AN AGREEMENT SIGNED IN 1944

(By Graham Hovey)

Many Americans are not clear as to what our Government means when it refers to the "rights" of the Western allies in Berlin. This brief review, suggested by several readers, may be useful.

Our legal case for the presence of American, British, and French forces in West Berlin rests on a document signed in London September 12, 1944. This was an American-British-Soviet agreement "on the zones of occupation in Germany and on the administration of Greater Berlin."

It was amended subsequently to allow for inclusion of France as one of the occupying powers. In final form it provided:

"Germany will, for the purposes of occupation, be divided into four zones, one of which will be alloted to each of the Four Powers, and a special Berlin area, which will be under joint occupation by the Four Powers."

It specified the boundaries of each zone and provided also for division of the territory of Greater Berlin, which, it said, "will be jointly occupied by the armed forces" of the four countries. A key paragraph said:

"An interallied governing authority (Kommandatura), consisting of four commandants, appointed by their respective commanders in chief, will be established to direct jointly the administration of the 'Greater Berlin' area."

The special arrangement was made for Berlin on the assumption by all parties that it would someday become again the capital city of a reunified Germany.

Our side contends that Russia cannot end this agreement or modify it without American, British, and French consent.

We say the fact that Russia frustrated joint administration and eventually set up Communist rule in its sector, dividing Berlin into two cities, does not abrogate the 1944 agreement or end Western rights in the city.

Thus, what is illegal in Berlin today is not the presence of Western troops in West Berlin, but the fact that the Communist East German regime has established its "capital" in East Berlin.

This interpretation also makes illegal, of course, the recent East German action to shut down the flow of East Germans and East Berliners into West Berlin.

The other pertinent agreement between Russia and the West in the Berlin crisis is one reached in New York May 4, 1949, providing for the lifting of the 10-month Soviet blockade. A key paragraph said:

"All the restrictions imposed since March 1, 1948, by the Government of the U.S.S.R. on communications, transportation, and trade between Berlin and the Western Zones of Germany and between the Eastern Zone and the Western Zones will be removed on May 12, 1949."

It is this agreement on which the allies base their contention that Russia cannot turn over responsibility for their rights of access to Berlin to the East German regime, even if it signs a separate "peace" treaty with that regime.

There are countless "ifs" and "might have beens" that constantly fascinate students of the Berlin problem, but these are the documents on which our side's legal case for access and presence in the threatened city rest.

The present Berlin crisis was touched off not by recent Soviet actions but by Moscow's note of November 27, 1958, saying it would "no longer consider itself bound" by the agreement of September 12, 1944, "and the related supplementary agreements."

Since then, even when Soviet pressures were temporarily relaxed, Western statesmen have been grappling with the excruciatingly difficult problem of how to defend these rights in a city 100 miles inside the Iron Curtain.

THE ROLE OF MUTUAL SAVINGS BANKS IN OUR FOREIGN-AID PROGRAM

Mr. HUMPHREY. Mr. President, recently I received a letter from Mr. William F. McKenna, director-counsel of the National Association of Mutual Savings Banks. His letter to me was prompted by my amendment to the recent foreign-aid bill, S. 1983, which urged the development of cooperatives and savings and loan associations in Latin America as a part of our aid program.

Mr. President, I would like to invite the attention of my colleagues to some excerpts of what Mr. McKenna had to say in his letter:

We happen, we think justifiably, to believe that mutual savings banking presents a type of financial organization best adapted to adoption by underdeveloped nations. It is not too great a step from confidence in leaders of the tribal or clan system to reliance on a group of trustees in whom the people can repose confidence to safeguard the modest amounts they can afford to set aside as savings. As has been proven throughout the more developed areas of the world where mutual savings banking thrives, the sums accumulated through the moderate savings of many people can be made available for economic development in that area suited to the local demands.

The National Association of Mutual Savings Banks, by invitation of the International Cooperation Administration, has been cooperating in its Cooperative Review Committee to contribute ideas for the most effective utilization of U.S. aid to underdeveloped nations. A copy of the material contributed to date by the National Association of Mutual Savings Banks is enclosed.

What we would like to impress upon you is that the mutual savings banking industry with over $40 billion in assets in the United States and a long history of successful operation in Europe is ready, willing, and able to offer its know-how to underdeveloped nations in encouraging thrift on a basis that unsophisticated nations can understand to accumulate funds that can contribute to local economic development in a framework of private enterprise.

We would be happy if you see fit to add these remarks to those you have already inserted in the CONGRESSIONAL RECORD as evidence of still another $40 billion industry that falls within the spirit and broad connotation of cooperatives, credit unions, and savings and loan associations.

Mr. President, I ask unanimous consent that the two memorandums referred to in Mr. McKenna's letter be inserted at this point in the RECORD.

There being no objection, the memorandums were ordered to be printed in the RECORD, as follows:

MEMORANDUM TO INTERNATIONAL COOPERATION ADMINISTRATION REGARDING REVIEW AND STUDY OF COOPERATIVES IN FOREIGN ASSISTANCE AND SOCIAL DEVELOPMENT

(From Grover W. Ensley, executive vice president, National Association of Mutual Savings Banks)

The following material has been arranged in conformity with the outline of the working paper provided by the International Cooperation Administration Cooperative Review Committee for the guidance of nongovernmental organizations.

According to the types of cooperatives included within the broad definition provided by the Review Committee, mutual savings banks fall within the category—C. Services and Welfare.

Mutual savings banks are organized to proved thrift facilities for the mutual benefits of those who save. The major portion of the assets of the mutual savings banks of the United States is in mortgages (nearly 70 percent). Their establishment in underdeveloped countries could be expected to provide similar mortgage funds, thus mutual savings banks can also be considered under the broad definition of self-help credit facilities for housing.

A. BACKGROUND

Mutual savings banks have functioned successfully since 1810, fulfilling a role in the socioeconomic development process of the countries in which they now operate. They have helped individuals, most of them of small means, to gain a measure of financial security in an economic environment subject to many fluctuations. No longer dependent on private or public charity or assistance during periods of unemployment, sickness or other financial emergencies, those who have saved in mutual savings banks have experienced financial independence and personal freedom—ingredients essential to the full development of the democratic process. Since their deposits in mutual savings banks have been invested in long-term productive enterprises, both by private corporations and governmental organizations, depositors in mutual savings banks have had a stake in the economic progress in their community and Nation.

II. (d) Through their State and National organizations mutual savings banks in the United States have developed programs and services to strengthen the savings banking system and to extend it to other areas of the United States. In particular, they have supported the introduction of legislation providing for Federal chartering of mutual savings banks; they have assisted citizens of Anchorage, Alaska, in the formation of the Alaskan Mutual Savings Bank which expects to begin operation in the fall of 1961; through the facilities of the National Association of Mutual Savings Banks, they have recently organized a central industry fund, one purpose of which is to provide assistance in the establishment of new mutual savings banks; and NAMSB is a member of the International Thrift Institute—a service and educational organization promoting savings banking throughout the world.

III. Before a mutual savings bank can be established in the United States or for that matter in foreign countries, enabling legislation to provide for chartering must be enacted. Attached is a model bill developed by the national association for guidance in State chartering legislation, attached also

is a proposed bill providing for Federal chartering.

The second step in establishing a mutual savings bank is the formation of a group of individuals willing to act as incorporators and to contribute to a guarantee fund. The incorporators would then elect a board of trustees which in turn would be charged with the responsibility for managing the affairs of the new bank. Contributors to the initial guarantee fund would be repaid as the bank's earnings permitted, usually at a rate no higher than that paid to depositors. Members of the board would be prohibited by law and the tradition of trusteeship from profiting personally from any of the bank's operations. As vacancies occur on the board, new members would be elected. The supervision of the new bank would be under State and/or Federal authority and, as in the case of the United States, some type of deposit insurance would be required.

IV. The attached model legislations for either State or Federal chartering could serve as the starting point for the development of legislation in new countries appropriate to that country's needs and customs. The national association is interested in any effort to establish new savings banks. To this end it is ready to send savings bankers to the areas in which new savings banks are contemplated, where they may provide technical assistance in setting up operating procedures, developing investment programs, and in planning thrift promotion efforts. It is possible that the national association could even provide some modest form of financial assistance, calling upon its recently organized central industry fund.

V. Local government officials can play a major role in support of enabling legislation as well as serving as incorporators and/or members of the board of trustees. Interest on the part of these officials can be achieved by indicating the broad objectives and functions of mutual savings banks, to wit: stimulating those of small means to set aside a portion of their income for future personal needs, thus helping to build financially independent citizens; and providing funds for home mortgage loans. As indicated in the attached reprint, a major problem of the under-developed nations is the shortage of capital to finance housing and essential government services and to assist in the development of natural resources and the establishment of industries. Another is the rising number of people who, for the first time, are dependent on wages for their subsistence. These wage earners present a particularly urgent problem. They must be housed; they must be provided with some facility, private and/or public, to help them weather periods of unemployment, sickness and old age; and they must be helped to develop skills in managing their own finances. It is apparent that mutual savings banking as it is now practiced in the United States and 33 other countries of the world, provides the answer to these interrelated problems.

VI. The major problems which may be encountered in the development of mutual savings banks in the less developed countries appear to be:

1. The difficulty in obtaining the necessary initial guaranty fund.

2. Inadequate skilled and professional staff.

B. U.S. foreign aid in development and functioning of cooperative institutions such as mutual savings banks could take the form of helping to solve the two major problems as cited above. Contributions to the initial guaranty fund could come from a number of sources, including perhaps the Inter-American Development Bank. As suggested earlier, some of the guaranty fund for a new mutual savings bank might be contributed by Central Industry Fund, and, of course, there may be savings bankers who as individuals would be interested in contributing to the guaranty fund. Alternatively, the local government may consider savings banks sufficiently important to provide some form of underwriting.

When mutual savings banks were first organized, those who had incorporated the banks and provided the initial guaranty fund frequently served without pay as the officers of the banks. These individuals were educated and relatively sophisticated in the management of funds. Today, mutual savings banks are managed by skilled and professional personnel. Recognizing that such personnel are practically nonexistent in some of the underdeveloped countries, a vigorous educational program to train bank employees and officers should be undertaken. The National Association of Mutual Savings Banks and its member banks have cooperated in the past with ICA's bank training program. The savings banks stand ready to increase their participation in training and exchange programs. In addition, savings bankers, as stated earlier, are willing to travel to communities seeking to establish a savings bank where they could assist in setting up operating procedures and training programs.

CONCLUSION

By establishing mutual savings banks, assistance would be given to the newly emergent countries striving for rapid financial and economic progress. Mutual savings banks can also function as one of the tools for achieving a wider distribution of economic power. The establishment of mutual savings banks would give adequate recognition to the role of the private sector in economic development.

Savings banking as it has operated for 150 years has demonstrated its ability to promote savings and to invest these savings in production enterprises for the economic growth of the nations in which they have functioned. They have promoted thrift, first by providing facilities for savings. They have also promoted thrift by rewarding savers, and making savings readily available to the depositor. They have contributed to economic growth by channeling the voluntary savings of millions of individuals of modest income into productive, long-term investments. To expand and modernize productive capacity and upgrade general levels of living, capital formation is essential. This can be achieved with price stability only through a steady rise in personal savings. The existence of savings banks would materially assist the encouragement of voluntary savings by individuals and thus provide noninflationary funds for long-term investment. The NAMSB is eager to cooperate in any efforts, public or private, to establish new mutual savings banks abroad.

MEMORANDUM TO INTERNATIONAL COOPERATION ADMINISTRATION REGARDING REQUEST FOR INFORMATION ON MUTUAL SAVINGS BANKS FOR USE BY THE ICA COOPERATION REVIEW GROUP

(From Grover W. Ensley, executive vice president, National Association of Mutual Savings Banks)

I. INTRODUCTION

Mutual savings banks now exist in 34 countries of the world. While there are differences in the scope of their operations and degree of government supervision and support, their broad structure, objectives, and economic functions are remarkably similar. Basically, mutual savings banks are what their name implies—"mutual" in that the earnings from their operations are shared only by those who make the earnings possible—the depositors, that is—there being no stockholders to claim a portion of the banks' earnings; "savings" in that their prime function is to promote thrift among all ages and all income levels, thus serving as a prime facility for both stimulating savings and moving them into the capital market; and, finally, "banks" in that savings are deposited with the bank, thereby becoming liabilities of the bank owed to the depositor.

While mutual savings banks do not fall within the strictest definition of a cooperative since depositors do not select trustees of the institution, these banks have always functioned effectively as closely supervised, publicly motivated institutions through which individuals can help themselves to a better financial future. In addition, the fact that they are "mutual," assures the sharing of the benefits of their operations among depositors only.

Mutual savings banks are supervised by public authorities and their operations and investment programs are so circumscribed as to provide maximum safety of deposits. In recent years, the housing needs of most of the countries in which mutual savings banks are now located, particularly in the United States, have resulted in a substantial increase in home mortgage loans of mutual savings banks. Here, too, the movement of personal savings into desired economic and social goals gives to mutual savings banks their publicly oriented bias.

These features of mutual savings banks make them institutions which with obvious modifications and necessary changes could be adapted to the economic and social needs of the underdeveloped areas of Asia, Africa, and South and Central America. Two factors are here involved: (1) Many of the citizens of these new nations are wage earners for the first time. They need some savings facility, private or public, to help in developing skill in managing their own finances. They also must be housed. (2) There is a shortage of capital in these nations for financing housing, providing essential government services, developing natural resources, and establishing industries.

A system of mutual savings banks in these countries could stimulate a regular savings program among wage earners and could, at the same time, provide capital for housing and other long-term economic advances.

II. HISTORY

Mutual savings banks were first estabished in the early 19th century in response to the need to provide the rising groups of individuals who were for the first time dependent on wages for their subsistence, with some measure of financial security against unemployment, sickness, and other family emergencies. Quite definitely, these early institutions were seen as agencies for alleviating pressures on public or private charities. The early organizers of the banks were public-spirited citizens, philanthropists, and public officials who undertook to receive deposits in very small amounts, to invest them prudently for the benefit of the depositors, and make them available when needed. The first organizers of the banks not only undertook to manage the funds but contributed to a guaranty fund that would protect depositors until the bank itself could accumulate sufficient reserves from earnings for this purpose.

The first mutual savings bank was organized in 1810, in Scotland. The idea spread rapidly throughout Great Britain and was transplanted to the United States where the first banks were organized in 1816—one in Philadelphia, now the Philadelphia Saving Fund Society, and the other in Boston, The Provident Institution for Savings in the Town of Boston. Thereafter, in the United States and the European countries, many savings banks were formed, all along lines similar to the first ones in Scotland.

III. ORGANIZATION

Once chartering provisions are incorporated into the banking legislation of a State

(in the case of the United States) or by a national government (in the case of the European countries), a body of individuals applies for a charter from the proper governmental agency. As incorporators they contribute to a "guaranty" (i.e., initial reserves) fund to protect deposits until the bank itself can accumulate reserves from its earnings.

The first incorporators choose a board of trustees, which establishes bank policy. These trustees do not share in the profits from the earnings of the bank and tradition and supervisory rulings prevent any self-dealing on the part of the members of these boards in their management of the banks' operations and its investments.

IV. RELATIONS TO DEPOSITORS

Mutual savings banks are organized to accommodate the thrift needs of individuals. As banks of deposit, they accept sums of money from individuals who may withdraw them without delay.

The names of some of the mutual savings banks in the United States suggest the groups of individuals they were trying to serve and the small amounts of money they were willing to accept as deposits—Dime Savings Bank, Farmers & Mechanics Savings Bank, Boston Five Cents Savings Bank, Emigrant Industrial Savings Bank, and Seamen's Bank for Savings.

Since they are mutual institutions, without stockholders, all benefits of the operations accrue to depositors. The trustees may not benefit personally from any of the bank's operations. The earnings realized on savings bank investments are distributed in the following manner: A portion of each year's earnings is retained and added to a reserve fund. This fund protects the depositor against any possible losses on investments. Earnings, also of course, pay operating expenses. The remaining earnings are distributed to depositors in the form of interest credited to their accounts at regular periods.

The consistent record of interest payment to depositors in mutual savings banks is unequaled by any other type of organization. In 1960, interest paid to savings bank depositors totaled $1.2 billion.

The ability of mutual savings banks to stimulate thrift among the indviduals in their communities is directly related to the three cardinal bases on which they operate—(1) safety, provided by prudent management of the bank by highly respected community leaders and by the reserve funds accumulated slowly from earnings; (2) ready availability of deposits, made possible by their reserve funds, their cash positions, and their holdings of short-term Government securities; and (3) maximum returns, consistent with safety and availability, made possible by the nature of their investments.

V. INVESTMENTS

Diversity and flexibility have always characterized the investment programs of mutual savings banks, with the major emphasis, however, being placed on mortgage loans. At present, mortgages account for two-thirds of the total assets of mutual savings banks. Thus, more than $26 billion is invested in mortgages, principally on individual homes.

U.S. Government securities also have been dominant investment outlets for deposits in mutual savings banks. These securities are purchased to provide maximum safety and ready cash. U.S. Government securities currently represent 15.2 percent of total assets.

The remaining assets are divided among corporate securities—the types and amount of which are carefully regulated by State banking officials—and State and municipal securities.

VI. SAVINGS BANKS IN FOREIGN COUNTRIES

Savings banks exist in 33 foreign countries in the world. There follows a discussion of some of these foreign thrift facilities.

Argentina: National Post Office Savings Bank, with 4,354 branches plus 15,531 branch offices in schools. Organized by the Government in 1915; all deposits insured by the Government.

Australia: 5 savings banks, with 776 branch offices. Four trustee savings banks, similar to U.S. mutual savings banks, plus the Commonwealth Savings Bank, operated by the Government since 1912.

Austria: 175 savings banks, with 265 branches, plus the Post Office Savings Bank operated by the Government, with 2,226 agencies.

Belgium: The General Bank for Savings and Pensions (operated by the Government), plus 2 municipal and 27 private savings banks. In 1918, the Bank for the Belgian Congo created a savings department.

Canada: 2 local savings banks with 31 branches; 2 provincial Government savings banks with 69 branches; post office savings bank, with 1,497 branch offices; the "Caisses populaires Desjardins," with 1,139 member banks.

Colombia: Three savings banks held more than one-third of the nation's savings.

Denmark: 482 savings banks plus 486 branches.

Finland: 390 savings banks plus 567 branches.

France: 585 savings banks with 3,200 branches; Post Office Savings Bank with 14,651 branch offices.

West Germany: 866 savings banks with 11,093 branch offices; plus 5 postal savings bank offices.

Great Britain: 210 savings banks plus 1,000 branch offices. Also postal savings in 19,000 branch offices.

Italy: 89 savings banks with 2,519 branch offices. Also Post Office Savings Bank.

Japan: Post Office Savings Bank, with 15,265 agencies. Also 81 commercial banks have savings departments.

Luxembourg: State Savings Bank with 50 branches.

Mexico: Five savings banks.

Netherlands: 279 savings banks with 246 branches. Also Post Office Savings Bank with 2,030 offices.

New Zealand: 5 local savings banks with 34 branches; Post Office Savings Bank with 973 offices.

Norway: 600 savings banks, plus 254 branches which hold more than half of Norwegian savings, plus a Post Office Savings Bank which plays a minor role in savings.

Portugal: 21 savings banks with 82 branches; Post Savings, with 703 offices.

Saar: 13 savings banks with 204 branches.

Spain: 80 local savings banks with 1,347 branch offices. Also postal savings.

Sweden: 434 ordinary savings banks with 1,100 branches; also postal savings.

Switzerland: 72 cooperative savings banks; 26 municipal savings banks; 1 state savings bank; 19 other savings banks; plus 246 branches.

Turkey: Only savings bank is the Istanbul Savings Bank, which has eight branches.

Uruguay: National Post Office Savings Bank with 124 branch offices.

Savings facilities also exist in Brazil and Thailand though we do not at this time have very accurate or detailed information about them. While the promotion of savings is apparent in almost all of the countries of the Western World, the continent of South America, including Central America, is an exception. The few savings facilities in the Latin American nations generally are restricted to postal savings accounts.

While the mutual savings banks of the United States have not yet made any direct contributions to the establishment of savings banks in foreign countries, they stand ready to do so. In the first place, the National Association of Mutual Savings Banks, which represents the savings banks of the United States at the national level, is a member of the International Thrift Institute. The object of this institute is "the promotion of thrift throughout the world by the cooperation of all savings banks." The institute serves as a center of information and service for savings banks throughout the world and through its information and education programs seeks to extend and improve savings banking throughout the world. The headquarters of the institute is at Singel 542, Amsterdam, the Netherlands, and Mr. M. H. Verrijn Stuart is managing director.

In the second place, the national association has recently organized a central industry fund for the purpose of extending and strengthening the mutual savings banking industry. Mutual savings banks can become members of the fund by responding voluntarily to the membership pledges requested from time to time by the corporation. One significant use of the fund would be to provide assistance in the formation of new savings banks. It is contemplated that the fund will have its first opportunity to realize its aims by assisting the incorporators of the Alaskan Mutual Savings Bank of Anchorage. It is conceivable that, as the fund develops, some of its resources could be used to assist in the establishment of savings banks in new areas of the Western World.

In addition, individual savings bankers have expressed their willingness to provide technical assistance to newly established banks.

VII. CONCLUSIONS

The inclusion of savings banks in the newly emergent nations of the world would be valuable for several reasons:

1. They would be able to provide long-term capital for investment in such needed developments as new and improved housing and other capital facilities.

2. They would serve to educate the people not only in the values of thrift and saving but also in more general areas of economics. Education in this field is one of the more-needed branches of technical assistance in many parts of the world; and "learning by doing" would make the means almost as valuable as the end.

3. The concept of mutuality as developed in savings banks throughout the United States and Europe is one that should have a strong appeal to people in recently liberated countries. In the ideological battle between communism and freedom, it is important to show that people of a community can work together for the common good as individuals rather than as part of an impersonal government operation.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the following bills of the Senate, each with an amendment, in which it requested the concurrence of the Senate:

S. 336. An act to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to make available to individuals suffering speech and hearing impairments the specially trained speech pathologists and audiologists needed to help them overcome their handicaps; and

S. 1292. An act to amend the act of June 19, 1948, relating to the workweek of the

Fire Department of the District of Columbia, and for other purposes.

The message also announced that the House insisted upon its amendments to the bill (S. 739) to amend the Civil Service Retirement Act, as amended, with respect to the method of computing interest earnings of special Treasury issues held by the civil service retirement and disability fund, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MURRAY, Mr. MORRISON, and Mr. CORBETT were appointed managers on the part of the House at the conference.

The message further announced that the House had agreed to the amendment of the Senate to the bill (H.R. 5490) to provide for more effective participation in the Reserve components of the Armed Forces, and for other purposes, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 8666) to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HAYS, Mr. FARBSTEIN, Mr. MONAGAN, Mr. ADAIR, and Mr. SEELY-BROWN were appointed managers on the part of the House at the conference.

AID TO SCHOOLS IN FEDERALLY IMPACTED AREAS

The Senate resumed the consideration of the bill (S. 2393) to extend for 1 year the temporary provisions of Public Laws 815 and 874 relating to Federal assistance in the construction and operation of schools in federally impacted areas and to provide for the application of such laws to American Samoa.

Mr. MCNAMARA. Mr. President, I had reached a point in my presentation at which I had made reference to what our school buildings need. I ask that a statement I have prepared in this connection be printed in the RECORD at this point.

The PRESIDING OFFICER (Mr. HICKEY in the chair). Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

WHAT ARE OUR SCHOOL BUILDING NEEDS?

It is common knowledge that there is a grave shortage of school buildings in the United States. In many communities, the average size of classes is ranging far above the desirable maximum of 25 pupils. Forty or more pupils in one room is not unsual. Some schools have had to resort to double sessions, a plan which requires half the children to attend school only in the morning, and the other half to attend only in the afternoon. School basements and school libraries have often been converted into makeshift classrooms. Buildings which should be retired are still in use. These are the ways the shortage makes itself felt.

REASONS FOR THE SHORTAGE

There are many reasons for the shortage, some well known, some little understood. For about 18 years, from 1930 to 1948, hardly any schools were constructed. During the depression of the thirties, credit was restricted and interest rates were high. In those times of almost universal belt tightening, the public often would refuse to support bond issues for new schools. The expenditure for school construction throughout the Nation in 1934 was less than one-sixth of what it had been in 1930. Government relief measures were inadequate to meet the need.

In 1941 conditions began to improve, but World War II forced the Government to place restrictions on building materials, and much less was spent on school construction than during the worst years of the depression. In 1944, the low year, only $54 million were spent for building schools throughout the whole United States. Until 1948 less was spent each year on school construction than had been spent in 1930. The Korean war further delayed construction, but expenditures for new schools have mounted steadily since 1944. In 1954, only a decade later, a total of more than $2 billion was spent in this Nation for new schools, but still the shortage continued.

Like "Alice in Wonderland," the people of the United States found that as far as the shortage of classrooms was concerned, they had to run faster and faster in order to stand still. The reason was the great rise in the birthrate during and after World War II. Between 1930 and 1939, an average of 2,437,400 babies were born each year in the United States. Between 1940 and 1949, the figure was 3,166,600, and between 1950 and 1954, it was 3,882,000. An estimated total of 4,091,000 children were born in the United States in 1955.

More than the high birthrate contributed to the shortage of school buildings. Not only are there more children in the Nation at present, but a higher percentage of them go to school than in the past, and they remain in school longer. This is a sign of great social progress—something to cheer, not to mourn—but it does require additional school buildings. State legislation steadily extends the age of compulsory school attendance, and laws barring child labor grow more strict. Every State now requires that a child attend school through the age of 16; four of these keep children in the classroom through the age of 17; and five more States, through the age of 18. All States require school attendance by children 8 years old, and 37 States demand that children begin school at the age of 7. Five set the beginning age at 6.

The long-range view of increasing school attendance is extraordinary. In the past 80 years, the population of the United States has more than tripled, but high school enrollments have been multiplied by about 75. Obviously, high school buildings should have been multiplied by about 75 during the same period, but partly because of the 18-year school building vacation caused by depression and war, this did not occur. There never have been enough school buildings in this or any other nation to enable all children to go to school. America simply has not had time to build up to its ideals. The low birthrate which prevailed during the depression has saved the high schools from being overcrowded during recent years, but soon the secondary schools will be besieged by new pupils, as the elementary schools are now. The shortage of school buildings essentially is a reflection of the fact that universal education is more than a law or an ideal. It is something which must be built, which this Nation has agreed to build, but which it has not completely built yet.

The fact that change is constant in this Nation contributes further to the shortage of school buildings. People move much more than they used to. Drawn by new industries begun during the war and by less calculable forces, countless families have left their home States during the past decade. The result has been far more drastic shortages of classrooms in some regions than the increase in the national birthrate would indicate, and empty classrooms in others. From 1940 to 1950 the population of the United States increased 14.5 percent, but the three Pacific States as a group had a population growth of 48.8 percent. Four States offered a net loss in population during the same period.

Such population shifts often create problems in the deserted region as well as in the place to which families move. Fewer people remain behind to pay off bonded debt on schools which have already been built but are not yet paid for.

Another kind of population shift which creates problems is that from the city to the suburbs. Many large cities have empty classrooms in spite of an acute shortage of school space all around them. A surplus of classrooms in one place cannot be applied against a deficit in another.

NEW DUTIES OF SCHOOLS

Another big reason for the shortage of school buildings is the great expansion of school duties described in the section on "What Should Our Schools Accomplish?" This is another aspect of the American people's need to build up to their ideals. Nearly every time new courses of instruction are added, more room is needed in the school building. The big change from schools concerned mostly with teaching the fundamental skills of the intellect to schools attempting to offer vocational education, college preparation, and all else in the modern high school catalog, almost automatically outmoded existing school plants. As has been pointed out in the section on organization, bigger schools were needed to make practical the bigger, more highly specialized faculties and to make maximum use of elaborate equipment. The one-room schoolhouse, and even the two- and three-room schoolhouse, became as old fashioned as the wooden plow.

There is one more big reason for the great demand for new schools: Americans want a better quality of school building than ever before, just as they are demanding homes and automobiles and almost everything else of better quality. The standard of living is up, and schools are not to be left behind. It is easy to say that the ideal school is Mark Hopkins at one end of a log and the pupil at the other, but most Americans want their children in well-heated, well-ventilated, fireproof quarters, with the best lighting obtainable for young eyes. They want separate classrooms for each grade, and they do not want the classes too large. They want auditoriums for school plays, lunchrooms where children can eat, and gymnasiums for basketball games. They want school buildings to be handsome both inside and out. They want at least 5 acres of lawn, parking space, and playgrounds to surround each elementary school, and 10 acres for each high school. In short, the American people are not inclined to stint themselves when it comes to building schools.

This has been proved time and again by boards of education and citizen committees working with school architects in all parts of the Nation. It is easier to get a bond issue passed for a good school than for a poor one. The school building apparently has become the chief public expression of American concern for children. Often the school is the finest building for miles around, a center of community pride as well as community activities. One of the great reasons

why new schools are demanded is that there is so much new hope and new energy in America. Much of this new hope and energy is built or kindled by schools themselves. It is not unnatural that the success of the American system of education is one of the causes of the need for more educational facilities. If Americans believe strongly in the advantages of education, they must believe equally strongly in providing the facilities where education can take place.

THE EXTENT OF THE SHORTAGE

There is a great deal of conflicting information on the size of the Nation's classroom shortage. Although the range of these estimated needs is wide, there is one common factor which runs through all of them: the shortage is immense.

The task of compiling figures to show the Nation's total building need would appear at first to be a simple one: ask each school district what is needed, total it for each State, and add all State totals. Then subtract the number of classrooms being built, count the number of children born but not yet in school, and divide their number by the number of children expected to be in each classroom. Thus a projection of need is born.

Regrettably, this system is not infallible. There is no uniform test of need; it may be one thing in one community and something entirely different in another. There is no national agreement on the number of children of a certain age to be taught in a single classroom, and assigning a low number of pupils to a classroom (which means more classrooms) runs one head-on into the problem of teacher supply. There is no certain way of knowing that a building finished today will not be far from the center of community population in the next several years, and there is no way to know for sure that buildings anticipated for the future will be assured by bond elections which have not yet been called.

Moreover, there are variances in the number of buildings which the States and territories have said they will need. For example, when the U.S. Office of Education obtained results for phase 2 of its school facilities survey, one territory reported that by September 1959, it would need 4,271 classrooms. The same territory reported, in answer to a questionnaire sent out by this committee, that by September 1960—1 year later—its classroom need would be 11,672. This is a difference of 173 percent. One State reported its 1959 need as 28,126 and its 1960 need as 43,530. Still another State said its 1959 need would be 26,698 classrooms, but that in 1960 it would be only 3,490.

These are flagrant examples, to be sure, but they point up the confusion which arises when an attempt is made to survey the total classroom need in this country. Much of the confusion comes from a lack of communication between the school districts and the States, on one hand, and the States and the Federal Government, on the other, compounded by a difference in the definition of terms.

This committee is not persuaded that there is a high value in pinpointing the national building need, so long as it is certain that the need is within a certain range. Building needs are always local, and they can change by alterations in community attitudes toward the school program. The chief purpose of national estimates of school needs is their effect on national legislation.

Nevertheless, this committee attempted to determine, from the chief State school officers, an estimate of the total national building need. One purpose of this survey was to determine whether the States and territories are keeping up with their building need, getting ahead of it, or losing ground. Simultaneously, an attempt was made to determine the existing and projected need for nonpublic school buildings, but the information available on this subject was so fragmentary that it was discarded entirely. The summaries dealt with here are public school need only.

The committee's survey questionnaire went to all States and territories, and was returned by 41. These 41 stated that their total need for classrooms for the 1955–56 school year was 165,693. When projected for all States and territories on the basis of the school enrollment represented by the 41 States and territories, the total classroom need for the entire Nation is 198,625 at present. If the expected enrollment of 1959–60 were enrolled now, the need would be for an estimated 375,000 classrooms. This 1959–60 need will be affected favorably by construction between now and then, and unfavorably by retirement of buildings presently in use and by population shifts away from existing buildings. How much of the 1959–60 need will be met by new construction cannot be known since it is a matter for future determination. The present construction rate, based on figures furnished to this committee, however, is less than 60,000 classrooms per year. If this rate continues or decreases, simple arithmetic shows the need has no chance to be met.

Three-fourths of the present need, or about 150,000 classrooms, is caused by a backlog of shortage; and the other fourth, or 50,000 classrooms, is stated to be due to increased enrollments. Thus the backlog can be expected to diminish very slowly. These are the figures reported to this committee.

Of the 41 States and territories which reported, only 10 said their present building program was gaining on need; 12 said they were holding their own; and 19 said they were losing ground. Thus only 10 out of 41 are eating into their backlog of building requirements, while the remaining States and territories either are managing only to keep up with increased need without affecting backlog or are losing ground to an ever-increasing cumulative need.

Just as forecasts of future need are not strictly calculable, neither is future cost. Construction costs vary from year to year and from one part of the Nation to another. If needed reorganization of school districts can be accomplished quickly, the necessary new classrooms could be built less expensively than they can be built now. Whether school boards stick to their apparent resolve to build classrooms of high quality, with additional facilities such as gymnasiums, cafeterias, and auditoriums, or whether they decide to resort to emergency construction measures will have great effect upon cost. Because so many of these factors are imponderable at the present time—and subject to change from one estimate to the next—this committee has made no attempt to pinpoint the shortage of school buildings in terms of dollars. Responsible people have estimated the sum which should be spent on school buildings by 1960 as everything from $10 billion to $15 billion. These figures are useful mainly to give a rough idea of the extent of the problem, and as a framework for national planning. More precise estimates will have to await additional research, many decisions made at the State and local levels concerning the reorganization of school districts, and the quality of buildings wanted. If the people of this Nation continue to want school buildings of high quality, if resistance to the reorganization of school districts continues in many States, if the birth rate remains high, and if construction costs rise, most estimates of the amount of money needed for new schools will prove to be low.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. McNAMARA. I am happy to yield briefly to the Senator from Montana.

Mr. MANSFIELD. Mr. President, several days ago I wrote a letter to the President of the United States to ask his views on the proposed legislation pending before the Senate at this time. I am now in receipt of a reply, which I should like to read to the Senate for its consideration:

SEPTEMBER 9, 1961.

Hon. MIKE MANSFIELD,
Majority Leader, U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: You have asked my views concerning legislation to extend aid for schools in federally impacted areas and to extend the National Defense Education Act.

As you know, my recommendations to the Congress for legislation to help achieve educational excellence in this country included continuation of the federally impacted area program and extension and strengthening of the National Defense Education Act. I still believe that both of these steps are urgently needed.

An extension of these programs should make it possible for the Congress to make a careful review of their content and costs next year. School aid to federally impacted areas could then be reexamined to update its operation and effect possible economies. Also, the increased demands which are being thrust upon this Nation make it especially important that we give consideration next year to strengthening those provisions of the National Defense Education Act which improve the quality of education in this country.

Therefore in my judgment a 1-year extension of school aid for impacted areas and the National Defense Education Act provide the best assurance that reevaluation of legislation affecting education will take place early next year.

Sincerely yours,

JOHN F. KENNEDY.

I hope, therefore, that what we will be able to do is agree in the Senate to the proposal which was reported by the Committee on Labor and Public Welfare, the proposal which is now pending; and I would express the further hope that to this, on a 1-year basis, would be attached an amendment for the extension of the National Defense Education Act.

I would express the hope also that we would consider, in view of the circumstances, time limitations, and other factors, that at this time these would be the two main items for consideration before the Senate, and that those Senators who have other amendments would seriously consider withdrawing them. This, of course, is something which they and they alone must decide, because it is the privilege of any Senator to offer an amendment to any bill pending in the Senate. But I do make this suggestion, which I hope will be given serious consideration.

Mr. McNAMARA. Mr. President, we are told that the way to meet this classroom shortage is by State and local action.

Contrary to the myth which has general currency, liberal Democrats do favor State and local solutions to problems.

But only if they are capable of solving them, and only if continued delay in solution does not jeopardize the national interest.

In this age of missiles, of electronics, of indeed the problems of man's very survival, I will not offer the patent evidence on the Nation's interest in education.

I only wish to point out one fact.

We have in this session of Congress recognized the mistakes of recent years in our military preparedness programs.

It took a slowly developed crisis in Laos, and a bristling, bomb-testing Khrushchev at Berlin to convince us. We will not enjoy such obvious omens to help us make amends in education.

The attrition taken by an inadequate school system will only become apparent at a far later date, if we are even here to see it. The needs are obvious—can they be met by State and local action?

At the beginning of the 86th Congress the Senate Subcommittee on Education was privileged to take testimony from Dr. Walter Heller, now Chairman of the President's Council of Economic Advisers. Part of his testimony was entitled "The Fiscal Position of State and Local Governments."

Mr. President, in view of recent developments, I ask unanimous consent that the statement be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE FISCAL POSITION OF STATE AND LOCAL GOVERNMENTS

In spite of the foregoing arguments, it is often alleged that State and local governments are in a strong fiscal position to meet the rapidly expanding needs in the field of education. Indeed, it is pointed out that very substantial advances have been made in the levels of teachers' salaries, in the building of schools, and in the aggregate provision for education, without the benefit of Federal aid. This assertion, though true, not only ignores the Federal Government's growing responsibility for supporting schools to achieve national ends, but also fails to take account of the hard fiscal facts of life with which State and local governments are confronted today:

1. They have been under relentless pressures in the postwar period, pressures which have multiplied State-local spending and gross debt almost fourfold and State-local revenues approximately threefold from 1946 to 1958. (See table 3.)

2. State-local spending, taxes, and debt have risen relatively much faster than Federal during this period in spite of Korea and the cold war. Federal expenditures and taxes roughly doubled, while Federal debt rose only 7 percent in the period ending 1958.

3. Unabated upward pressure of spending during the recent recession, combined with flattening out or actual decreases of revenue, have put many State and local governments in severe financial straits: Some (for example, Massachusetts, Michigan, and New York) are incurring deficits this year, and a recent survey by Newsweek magazine indicated that 36 of the 49 States would have to ask their 1959 legislatures to increase tax rates.

TABLE 3.—*Postwar growth of State-local and Federal expenditures, revenues, and debt (selected fiscal years 1946 to current)*

Fiscal year	Expenditures [1] (in billions)		Revenues (in billions)		Gross debt (in billions)	
	State-local [2]	Federal (cash) [3]	State-local [4]	Federal [5]	State-local	Federal
1	2	3	4	5	6	7
1946	$12.3	(6)	$13.4	(6)	$15.9	(6)
1947	(6)	$36.1	(6)	$43.5	(6)	$258.3
1948	18.9	36.5	17.4	45.4	18.7	252.3
1950	25.2	43.1	20.4	40.9	24.1	257.4
1952	27.8	68.0	25.4	68.0	30.1	259.1
1954	33.1	71.9	28.9	71.6	38.9	271.3
1956	39.1	72.6	34.5	77.1	49.2	272.8
1957	43.2	80.0	38.1	82.1	52.7	270.5
1958	[6] 47.0	83.3	[6] 40.7	81.9	[6] 56.0	276.3
1959	-------	[6] 94.1	-------	[6] 80.4	-------	[6] 283.0
INDEX OF POSTWAR GROWTH						
1946	100.0	-------	100.0	-------	100.0	-------
1947	-------	100.0	-------	100.0	-------	100.0
1948	153.7	101.1	129.9	104.4	117.6	97.7
1950	204.9	119.4	152.3	94.0	151.6	99.7
1952	226.0	188.4	189.6	156.3	189.3	100.3
1954	269.1	199.2	215.7	164.6	244.7	105.
1956	317.9	201.1	257.5	177.3	309.4	105.
1957	351.2	221.6	284.3	188.7	331.4	104.
1958	382.1	230.7	303.7	188.3	352.2	107.0
1959	-------	260.7	-------	184.8	-------	109.6

[1] Federal aids are included in both Federal and State-local expenditures.
[2] Excludes expenditures of publicly owned utilities and liquor stores.
[3] These figures are more than the conventional or administrative budget figures in that they include social security, highway, and other trust fund receipts and payments to the public.
[4] Excludes Federal aids; includes taxes, charges and miscellaneous, insurance trust revenue, and excess of receipts over expenditures of publicly owned utilities and liquor stores.
[5] The 1947 State-local figures are not available while 1946 Federal figures are not representative because of the impact of World War II.
[6] Estimated.

Sources: State-local data for 1946–52 from U.S. Department of Commerce, Bureau of the Census, "Historical Statistics on State and Local Government Finances, 1902–53," table 1, pp. 17, 18, and for 1954–57 from "Summary of Governmental Finances." Series G–GF 56 and G–GF 1957. Federal data from U.S. Department of Commerce, Bureau of the Census, "Statistical Abstract of the United States: 1958," table 458, p. 368, and Bureau of the Budget, "1959 Federal Budget, Mid-year Review," pp. 19 and 42.

The explosive postwar resurgence of State-local government is primarily a response to the fourfold pressures of population, prosperity, public works backlogs, and price inflation.

First, the sheer force of numbers—the growth of total population by 40 percent from 1946 to 1965 (projected)—has immensely increased the demand for local government services. Population imbalance intensifies the problem. The expensive age groups are expanding much faster than the productive age groups. From 1946 to 1965, school-age population (ages 5 to 17) is rising by 78 percent, and the 65-and-over age group is rising by 63 percent. But the most productive group in between is rising by only 21 percent. In other words, the schoolage population is increasing almost twice as fast as the total population and 4 times as fast as the 18–64 age group.

Second, prosperity generates more demands for new and improved State-local services than revenues to pay for them. As the average family's disposable income (after taxes) rises from $5,300 in 1956 to $7,100 in 1975 (as estimated by the Committee for Economic Development), people are demanding new services and higher levels of existing services from government. In the 1930's and 1940's, when we were fighting first for economic and then for military survival, only one Government—the National Government—could cope with these national crises. But currently and in the foreseeable future, both the pressure of numbers and the pressure of quality will focus primarily on new and improved State and local services: schools, roads, health, parks, sewer systems, smoke abatement, urban redevelopment, and the like.

Third, these pressures are further compounded by the huge backlog of public construction born of depression and war, combined with vast new demands arising from the flight to the suburbs and deterioration of the core of our metropolitan centers. Various estimates have placed average annual State-local public construction outlays in the second postwar decade at a level nearly double that of the first. Compilations and estimates made by financial analyst Harry L. Severson, based on the pivot year 1956, dramatically established this point, as follows:

Year	Total construction expenditures	School construction expenditures	Percent average is of 1956	
			Total	Schools
1946–55:	*Billions*	*Billions*		
Total	$56.0	$12.3		
Average	5.6	1.2	56	48
1956	10.0	2.5		
1957–66:				
Total	172.5	40.4		
Average	17.2	4.0	172	160

Note that in relation to the 1956 rate of spending, the average annual rate of construction expenditures in general would rise by nearly three-quarters, and the school construction rate by three-fifths.

Fourth, inflation has hit State-local government disproportionately hard. Such governments are heavy buyers in markets for services and products whose prices have risen especially fast. The so-called price deflators—roughly equivalent to price indexes—for various segments of the economy reflect this pressure. Taking 1947 as 100, the preliminary 1958 "deflator" for gross national product as a whole was 133; for Federal purchases of goods and services, 146; for new construction, 150; and for State-local purchases, the highest figure of all, 162. Even between 1954 and 1958, when the consumer price index increased only 8 percent, the price per unit of goods and services purchased by State-local governments rose 16 percent.

Superimposed on rising prices for goods and personal services is the sharply rising cost of money. Interest rates on the huge volume of State and local bonds have risen not only absolutely but relative to other interest rates. As table 4 shows, the yield on high-grade municipal bonds has risen from 2 percent in 1951 to 3.84 percent in December 1958.

Even more revealing is the ratio of municipal to U.S. Government bond yields: In 1951 it was 78 percent; by December 1958 it was 101 percent. In spite of the exemption of State and local bond interest from Federal income taxes, State and local governments now have to pay higher rates on long-term money than the U.S. Treasury. In other words, the market for municipals has become so heavy that the tax exemption privilege has lost much of its effectiveness in holding down State-local interest rates. This implicit Federal subsidy is going more and more to the bondholder and less and less to the hard-pressed school districts and other State-local units.

TABLE 4.—*Percent that interest rates on high-grade municipal bonds are of U.S. Government taxable bonds and on Aaa corporate bonds*

Period	Annual interest rates			Percent that interest rates on high-grade municipal bonds are of—	
	High-grade municipal bonds (Standard and Poor's)	U.S. Government taxable bonds	Aaa corporate bonds (Moody's)	U.S. Government taxable bonds	Aaa corporate bonds
(1)	(2)	(3)	(4)	(5)	(6)
1951	2.00	2.57	2.86	77.8	69.9
1952	2.19	2.68	2.96	81.7	74.0
1953	2.72	2.94	3.20	92.5	85.0
1954	2.37	2.55	2.90	92.9	81.7
1955	2.53	2.84	3.06	89.1	82.7
1956	2.93	3.08	3.36	95.1	87.2
1957	3.60	3.47	3.89	103.7	92.5
1958	3.56	3.43	3.79	103.8	93.9
October	3.94	3.76	4.11	104.8	95.9
November	3.84	3.70	4.09	103.8	93.9
December	3.84	3.80	4.08	101.1	94.1

Source: U.S. 86th Cong., 1st sess., "Bond Yields and Interest Rates," Economic Indicators, January 1959, p. 29.

The impact of these multiple pressures has been cushioned to a considerable extent, first by substantial balances built up in State and local treasuries during the war, and then by revenues flowing from rapid economic growth during the period 1948 to 1957. But the 1958 recession drove home how razor-thin the State fiscal margin has been. State-local expenditures continued their uninterrupted rise from an annual rate of $38.6 billion in the first half of 1957 (as shown in the national income account) to $43.4 billion in the second half of 1958, a 12-percent increase. But tax revenues rose much less rapidly from $33.4 billion to $36.3 billion, a rise of only 9 percent.

The foregoing is not to say that State and local units should relax for a moment their efforts to adjust their administrative structures and revenue systems to provide more adequate support for governmental services. In fact, the problem cannot be solved by action at one level of government alone—it must be a concerted attack at all levels of government.

What, then, can be done at the State-local level? First, every effort must be made to collect taxes already on the books, both fully and equitably. For example, only one-third of the 31 income tax States have adopted withholding—this, in spite of the fact that in the States which have adopted it, withholding has increased collections materially (in several States, from 5 to 10 percent) without any increase in tax rates. In the property tax field, it is high time that efforts were mobilized to raise average levels of assessment from 15, 20, and 25 percent to the levels well above 50 percent which leading States have achieved, at the same time removing the inequities in valuation which serve as a barrier to full use of the property tax. We are all painfully aware from our own property tax bills that this source is already doing yeoman service in the interest of school financing (producing 99 percent of all local school district taxes), and that the main task should now fall to other sources of revenue at the State and National levels. But efforts for greater equity and higher assessed valuations should be unremitting.

Apart from improved administration, every source of State revenue must be closely examined for possible additional contributions to schools and other governmental functions. One can readily find States that have done a courageous fiscal job in this respect. Several States of widely differing characteristics draw nearly half of their State tax revenues from the income tax although the 49 States as a whole draw only about one-sixth of their taxes from this source. Similar comparisons can be made for the sales tax. When speaking of possible additional State and local tax potential, we should consider (without any necessary policy implications) that only 31 States have a personal income tax, only 35 have a sales tax, and only 19 have both. Also, we may note that State cigarette taxes range from 2 cents to 8 cents a pack, and beer taxes from 50 cents to $13 a barrel.

Moving from such specific avenues of inquiry to the more general question of whether State-local efforts to support public education are adequate, taxpayers and legislators in each State should ask themselves several questions in the course of deciding how much additional financing should be provided at the State-local level and how much of the job logically falls within the Federal Government's province.

First, is a large enough percentage of the State's personal income being devoted to schools? Second, is the deficiency, if there is one, due to too little overall tax effort? Third, is the State making a sufficient allocation of its total tax dollar to schools, or are its schools getting less than their fair proportion of the total tax dollar? Fourth, is school financing in any given State too heavily dependent on local tax sources, particularly on the property tax or too heavily dependent on State tax sources? Fifth, where one finds an adequate total taxing effort (in terms of school expenditures as a percent of the State's personal income) and yet finds teachers' salaries far below average, can this be attributed to poor organization, in particular to an excessive number of administrative units?

The foregoing process of self-appraisal will surely bring to light many State and local jurisdictions whose fiscal effort on behalf of schools is below par and should be stepped up. Yet, as noted earlier, the States and localities labor under substantial fiscal handicaps. Limited tax jurisdiction, fears of interstate migration and competition, and sharply focused interest-group pressures characterize all States. By and large, State and local governments rely chiefly on property and consumption taxes which are more regressive and repressive than Federal taxes. In addition, the level of per capita income in our poorest States is only one-third to one-half that of the richest States. Under these circumstances, some States already find themselves near the end of their fiscal rope, and many if not most others, will be hard pressed to raise the revenues needed to close the gap between expanding State-local services and the natural growth in State-local revenues.

The demonstrated pressures on, and limitation of, State-local tax sources intensify the need for Federal support. Exclusive reliance on State and local taxation to do the job simply means that it will not be done. Unless a program of Federal support is adopted, the National Government will, in effect, be asking the States and localities to assume educational costs which (a) they should not be asked to assume because they are spent in furtherance of the Federal Government's programs and responsibilities, and (b) they cannot be asked to assume in full because of limitations on their taxable capacity.

Mr. MCNAMARA. The best confirmation of Dr. Heller's data can be found in the classroom shortage chart which I have inserted in the RECORD.

Only Federal assistance can meet these shortages with both the speed and magnitude necessary.

I sometimes wonder if we are aware of what our present society would be like without the efforts of the Federal Government.

Our ability to move from coast to coast, by air, auto, truck, or train, is largely the result of Federal action.

By land grants, construction grants, mail subsidies, and other efforts, we either built or maintained these great systems of transport.

Our ability to provide hospital space in every State in the Union can be traced to the Hill-Burton Act.

The aged, widows, and dependents and the handicapped are able to live in the reaches of dignity because of the social security programs.

The involuntary unemployed need not suffer the indignities of poverty because of our Federal unemployment insurance system.

So that the full sweep of Government partnership in our efforts to progress can be realized, I would like to insert in

the RECORD data outlining Federal financial effort in the 50 States.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the Federal grants to each State.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Total Federal grants-in-aid to State and local agencies and to individuals, plus specific amount granted for selected purposes—fiscal year ending June 30, 1959

ALABAMA

Total grants:	
Total grants-in-aid to State and local agencies (62)	$131,529,385
Total Federal grants to individuals (93)	81,213,106
Grand total for State and local agencies and to individuals (94)	212,742,491
Amounts granted for some selected purposes:	
Farmers:	
1. Soil bank program (66)	33,257,392
2. Agricultural conservation (63)	5,752,696
3. Agricultural experimentation (1)	82,541
4. Agricultural extension work (2)	1,872,575
Subtotal of No. 1 through 4	41,705,204
Agricultural miscellaneous:	
1. Removal of surplus agricultural commodities (11)	3,134,844
2. Value of commodities donated (9)	2,270,059
3. State and private forestry cooperation (7)	384,903
4. Cooperative projects in marketing (6)	45,503
5. Watershed protection and flood prevention (8)	198,420
Subtotal of No. 1 through 5	6,033,729
Total to farmers (No. 1 through 4) and agricultural miscellaneous (No. 1 through 5)	47,738,933
Highways and airports:	
1. Federal highways (trust fund) (12)	41,583,312
2. Other road construction projects (13)	22,947
Subtotal of No. 1 and 2	41,606,259
3. Federal airport program (57)	950,591
Total of No. 1 through 3	42,556,850
Health and hospitals:	
1. Hospital construction (33)	4,072,592
2. Public health services (26 through 32)	809,356
Total of No. 1 and 2	4,881,948

Total Federal grants-in-aid, etc.—Continued

ALABAMA

Amounts granted for some selected purposes:	
Welfare:	
1. Old-age assistance	$37,372,070
2. Aid to dependent children (42)	5,906,306
3. Disabled (43)	3,706,414
	489,234
5 Vocational rehabilitation (45)	1,452,307
Total of No. 1 through 5	48,926,331
Unemployment:	
1. Unemployment compensation and employment service administration (51)	3,952,689
2. Veterans, Federal and temporary employees (86, 87)	11,217,853
Subtotal of No. 1 and 2	15,170,542
3. Veterans' readjustment benefits (92)	16,897,926
Total of No. 1 through 3	32,068,468
Colleges and research agencies:	
1. Research and training grants (17, 35, 70–82, 88–90)	2,644,060
2. Land-grant colleges (20)	100,541
Total of No. 1 and 2	2,744,601
Municipal aid:	
1. Urban renewal and public housing (54, 55, 56)	4,871,415
2. Waste treatment (34)	816,090
Total of No. 1 and 2	5,687,505
Schools:	
1. School construction (Public Law 815) (22)	1,578,114
2. Maintenance and operation (Public Law 874) (23)	3,076,487
3. Vocational education (21)	990,257
4. National Defense Education Act (25)	1,710,314
Subtotal of No. 1 through 4	7,355,172
5. School lunch and milk program (3, 10)	5,312,426
Total of No. 1 through 5	12,667,598
Fiscal 1959:	
State tax revenue	[1] 246,649,000
Total Federal grants-in-aid (equivalent to 86.3 percent of State tax revenue)	212,742,491

ALASKA

Total grants:	
Total grants-in-aid to State and local agencies (62)	36,530,044

Total Federal grants-in-aid, etc.—Continued

ALASKA

Total grants:	
Total Federal grants to individuals (93)	$6,641,177
Grand total for State and local agencies and to individuals (94)	43,171,221
Amounts granted for some selected purposes:	
Farmers:	
1. Soil bank program (66)	
2. Agricultural conservation (63)	47,350
3. Agricultural experimentation (1)	204,093
4. Agricultural extension work (2)	105,493
Subtotal of Nos. 1 through 4	356,936
Agricultural miscellaneous:	
1. Removal of surplus agricultural commodities (11)	68,418
2. Value of commodities donated (9)	49,544
3. State and private Forestry cooperation (7)	
4. Cooperative projects in marketing (6)	23,814
5. Water shed protection and flood prevention (8)	
Subtotal of Nos. 1 through 5	141,776
Total to farmers (Nos. 1 through 4) and agricultural miscellaneous (Nos. 1 through 5)	498,712
Highways and airports:	
1. Federal highways (trust fund) (12)	13,174,591
2. Other road construction projects (13)	1,838,469
Subtotal of No. 1 and 2	15,013,060
3. Federal airport program (57)	1,686,142
Total of No. 1 through 3	16,699,202
Health and hospitals:	
1. Hospital construction (33)	11,622

3. Veterans' readjustment benefits (92)	$11,736,522
Total of Nos. 1 through 3	19,582,406
Colleges and research agencies:	
1. Research and training grants (17, 35, 70–82, 88–90)	7,071,617
2. Land-grant colleges (20)	104,260
Total of Nos. 1 and 2	7,175,877
Municipal aid:	
1. Urban renewal and public housing (54, 56)	1,474,854
2. Waste treatment (34)	855,231
Total of Nos. 1 and 2	2,330,085
Schools:	
1. School construction (Public Law 815) (22)	6,156
2. Maintenance and operation (Public Law 874) (23)	313,364
3. Vocational education (21)	992,587
4. National Defense Education Act (25)	135,364
Subtotal of Nos. 1 through 4	1,447,471
5. School lunch and milk program (3, 10)	5,458,569
Total of Nos. 1 through 5	6,906,040
Fiscal 1959:	
State tax revenue	[1] 382,075,000
Total Federal grants-in-aid equivalent to 40.9 percent of State tax revenue	156,216,851

WYOMING

Total grants:	
Total grants-in-aid to State and local agencies (62)	49,188,459
Total Federal grants to individuals (93)	9,243,590
Grand total for State and local agencies and to individuals (94)	58,432,049
Amounts granted for some selected purposes:	
Farmers:	
1. Soil bank program (66)	548,587
2. Agricultural conservation (63)	2,174,008
3. Agricultural experimentation (1)	324,262
4. Agricultural extension work (2)	279,794
Subtotal of Nos. 1 through 4	3,326,651

Total Federal grants-in-aid, etc.—Continued

WYOMING

Amounts granted for, etc.:	
Agricultural miscellaneous:	
1. Removal of surplus agricultural commodities (11)	$170,276
2. Value of commodities donated (9)	123,304
3. State and private forestry cooperation (7)	2,333
4. Cooperative projects in marketing (6)	19,300
5. Watershed protection and flood prevention (8)	236,652
Subtotal of Nos. 1 through 5	551,865
Total to farmers (Nos. 1 through 4) and agricultural miscellaneous (Nos. 1 through 5)	3,878,516
Highways and airports:	
1. Federal highways (trust fund) (12)	27,832,898
2. Other road construction projects (13)	1,291,157
Subtotal of Nos. 1 and 2	29,124,055
3. Federal airport program (57)	192,417
Total of Nos. 1 through 3	29,316,472
Health and hospitals:	
1. Hospital construction (33)	609,933
2. Public health services (26 through 32)	127,974
Total of Nos. 1 and 2	737,907
Welfare:	
1. Old-age assistance (41)	1,851,548
2. Aid to dependent children (42)	710,840
3. Disabled (43)	273,021
4. Blind persons (44)	35,415
5. Vocational rehabilitation (45)	96,871
Total of Nos. 1 through 5	2,967,695
Unemployment:	
1. Unemployment compensation and employment service administration (51)	778,724
2. Veterans and Federal employees (86)	394,850
Subtotal of Nos. 1 and 2	1,173,574
3. Veterans' readjustment benefits (92)	1,001,238
Total of Nos. 1 through 3	2,174,812
Colleges and research agencies:	
1. Research and training grants (17, 35 70–82, 88–90)	565,667

Total Federal grants-in-aid, etc.—Continued

WYOMING

Colleges and research agencies:	
2. Land-grant colleges (20)	$72,898
Total of Nos. 1 and 2	638,585
Municipal aid:	
1. Urban renewal and public housing (54, 55, 56)	
2. Waste treatment (34)	227,919
Total of Nos. 1 and 2	227,919
Schools:	
1. School construction (Public Law 815) (22)	207,234

Source: Data on Federal grants-in-aid from "Annual Report of the Secretary of the Treasury on the State of Finances for the Fiscal Year Ended June 30, 1959," Government Printing Office, table 88, pp. 612–626. Numbers in parentheses refer to column number in Treasurer's report.

Mr. McNAMARA. Mr. President, it is my hope that these exhibits will serve to recall once again the necessity of a Federal assistance program for the Nation's elementary and secondary schools.

I believe that education is just as necessary to the defense of this country as are guns and tanks and planes, and all the other implements of war.

It is regrettable that we have reached a point in Congress where we will have to settle for far less than the establishment of the general principle of Federal aid to education that I had hoped we might provide for in this session of Congress.

I could go on at some length, and perhaps the record should be made by quoting from those who appeared before the White House Conference on Education. That Conference is largely forgotten now. It established the need for education throughout the country.

However, after consultation with the senior Senator from Oregon, who is handling the bill on the floor, and who is the chairman of the Subcommittee on Education, and at the behest of the majority leader, the distinguished Senator from Montana [Mr. MANSFIELD] and also in the light of the letter from the President which has just been presented to the Senate, I feel that at this point I can best serve the cause of education by withdrawing my amendment.

Therefore, Mr. President, I withdraw the amendment.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. McNAMARA. I yield.

Mr. MUSKIE. It was my privilege to cosponsor the amendment with the distinguished Senator from Michigan. I consider it an honor to fight by his side in this crucial national cause. It seems clear that the tactical situation in the other body dictates that we concentrate our efforts in such a way as to achieve the maximum result at some later time. Therefore, I concur in the action of the senior Senator from Michigan in withdrawing this important amendment, which I hope some day, in the not too distant future, will see its way into the law of the land.

Mr. MORSE. I wish to commend the Senator from Michigan on his statesmanship. The Senator from Michigan and I and other Senators would like to see school construction legislation adopted at this session. However, we are legislative realists, and we believe the thing to do is to wait until January for pressing further on a school construction program. I think it is wise that we make the record we are making now, and to limit ourselves to the President's wishes in the matter. I think there are sound reasons backing up his wishes which are for an extension of NDEA and impacted area legislation for 1 year. I shall press forward with my bill on that matter and my amendment to it covering NDEA.

I thank the Senator from Michigan for his wonderful cooperation with the chairman of the subcommittee with respect to the procedure that has just been outlined to the Senate.

While I am on my feet, I wish to say that a group of us had a conference this morning. We feel that the only issue we should seek to take to conference with the House is the issue as to the period of time for which the impacted areas and the NDEA programs should be extended. We think the arguments and the facts all support the President's position that those programs should be extended for only 1 year. Every school district will thereby be protected. There is not a school district which will lose a dollar. An opportunity will then be afforded for the President to receive the reports which will be submitted about these programs before the Senate convenes again. This will give Congress an opportunity to consider the program anew in January.

There is no question, I may say to the school people back home, that they will get NDEA and impacted areas legislation extended again, based upon whatever modifications are warranted in light of the facts which will be produced by investigations which are being made. However, I think we simply could not justify a freezing into the law for another 2, 3, or 4 years of the inequities or the abuses which may exist. Therefore, I sincerely hope, in view of the cooperation which the Senator from Michigan is extending to the Senate, that the Senate will proceed to limit its action in this issue to a 1-year extension of the NDEA and impacted areas legislation.

I shall not press for an amendment in regard to the District of Columbia. I had a discussion with my colleagues in regard to that subject. That proposal will be raised immediately upon my return to the Senate next January. I shall offer it both as a separate bill and also as an amendment to any education bill which is introduced.

Mr. McNAMARA. Mr. President, I yield the floor.

Mr. MONRONEY. Mr. President, I call up my amendment designated "9–11–61—D." I ask unanimous consent that the reading of the amendment in its entirety be dispensed with. The amendment merely extends for 2 years the present defense impacted areas bill as it now is, and extends for 2 years the National Defense Education Act.

Mr. RUSSELL. Mr. President, reserving the right to object, this is a very important amendment, as I understand it, and is the only issue left in the bill. Would the Senator from Oklahoma be willing to have a quorum call?

Mr. MONRONEY. I would not object.

Mr. GOLDWATER. Mr. President, before the Senator suggests the absence of a quorum, would he be willing to have my name added as a cosponsor of his amendments?

Mr. MONRONEY. I would be honored to have the Senator from Arizona add his name as a cosponsor.

Mr. President, I ask unanimous consent that the name of the distinguished junior Senator from Arizona [Mr. GOLDWATER] be added as a cosponsor of the amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUSSELL. Mr. President, I shall not object to the request of the Senator from Oklahoma if he does not object to having a quorum call.

Mr. MONRONEY. I do not object.

The PRESIDING OFFICER. Without objection, the reading of the amendment will be dispensed with; and without objection, the amendment will be printed in the RECORD.

The amendment is to strike out all after the enacting clause and insert the following:

TITLE I—EXTENSION OF PUBLIC LAWS 815 AND 874, EIGHTY-FIRST CONGRESS

Amendments to Public Law 815

SEC. 101. (a) The first sentence of section 3 of the Act of September 23, 1950, as amended (20 U.S.C. 633), is amended by striking out "1961" and inserting in lieu thereof "1963".

(b) Subsection (b) of section 14 of such Act is amended (1) by striking out "1961" each time it appears therein and inserting in lieu thereof "1963", and (2) by striking out "$40,000,000" and inserting in lieu thereof "$60,000,000".

(c) Paragraph (15) of section 15 of such Act is amended by striking out "1958–1959" and inserting in lieu thereof "1960–1961".

Amendments to Public Law 874

SEC. 102. (a) The Act of September 30, 1950, as amended (20 U.S.C. 236–244), is amended by striking out "1961" each place

where it appears in sections 2(a), 3(b), and 4(a) and inserting "1963" in lieu thereof in each such place.

Effective date

SEC. 103. The amendments made by this title shall be effective for the period beginning July 1, 1961.

TITLE II—EXTENSION OF NATIONAL DEFENSE EDUCATION ACT OF 1958

Amendments to title II (loans to students in institutions of higher education)

"SEC. 201. (a) Section 201 of the National Defense Education Act of 1958 is amended by striking out "for the fiscal year ending June 30, 1962, and such sums for the fiscal year ending June 30, 1963, and each of the three succeeding fiscal years as may be necessary to enable students who have received a loan for any school year ending prior to July 1, 1962" and inserting in lieu thereof the following: "each for the fiscal year ending June 30, 1962, and for the two succeeding fiscal years, and such sums for the fiscal year ending June 30, 1965, and each of the three succeeding fiscal years as may be necessary to enable students who have received a loan for any school year ending prior to July 1, 1964".

(b) Section 202 of such Act is amended by striking out "1962" each place where it appears therein and inserting in lieu thereof "1964".

(c) Section 206 of such Act is amended by striking out "1966" each place where it appears therein and inserting in lieu thereof "1968".

Amendments to title III (financial assistance for strengthening science, mathematics, and modern foreign language instruction)

SEC. 202. (a) Section 301 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" both places where it appears therein and inserting in lieu thereof "five succeeding fiscal years".

(b) The last sentence of section 302(a)(2) of such Act is amended by striking out "two fiscal years in the period beginning July 1, 1960, and ending June 30, 1962" and inserting in lieu thereof the following: "four fiscal years in the period beginning July 1, 1960, and ending June 30, 1964".

(c) The second sentence of section 304(b) of such Act is amended by striking out "two succeeding fiscal years" and inserting in lieu thereof "four succeeding fiscal years".

Amendment to title IV (national defense fellowships)

SEC. 203. Section 402 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendments to title V (guidance, counseling, and testing; identification and encouragement of able students)

SEC. 204. (a) Section 501 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

(b) The second sentence of section 504(a) of such Act is amended by striking out "two succeeding fiscal years" and inserting in lieu thereof "four succeeding fiscal years".

(c) The first sentence of section 504(b) of such Act is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

(d) The first sentence of section 511 of such Act is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendments to title VI (language development)

SEC. 205. (a) Section 601 of the National Defense Education Act of 1958 is amended by striking out "1962" both places where it appears therein and inserting in lieu thereof "1964".

(b) Section 611 of such Act is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendment to title VII (research and experimentation in more effective utilization of educational media)

SEC. 206. Section 763 of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendment to title VIII (area vocational education programs)

SEC. 207. Section 301 of the Vocational Education Act of 1946 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amendment to section 1009 (improvement of statistical services)

SEC. 208. Section 1009(a) of the National Defense Education Act of 1958 is amended by striking out "three succeeding fiscal years" and inserting in lieu thereof "five succeeding fiscal years".

Amend the title so as to read: "A bill to extend for two additional years the expired provisions of Public Laws 815 and 874, Eighty-first Congress, and the National Defense Education Act of 1958, and for other purposes."

Mr. RUSSELL. Mr. President I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Oklahoma yield for the purpose of a quorum call?

Mr. MONRONEY. I yield for that purpose.

The PRESIDING OFFICER. The Senate is operating under a time limitation. To which side will the time for the quorum call be charged?

Mr. RUSSELL. Mr. President, since this is a very important amendment, which relates to the only subject of importance which is left in the bill, I ask unanimous consent that there be a quorum call without the time for the quorum call being charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. METCALF in the chair). Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Montana will state it.

Mr. MANSFIELD. Is the Senate operating under controlled time at present?

The PRESIDING OFFICER. Yes. The time now is controlled in accordance with the unanimous-consent agreement which was proposed by the Senator from Montana.

The time available on the pending amendment is 2 hours—1 hour for the proponents and 1 hour for the opponents.

Mr. MANSFIELD. Who will be in control of the time?

The PRESIDING OFFICER. The Senator from Oklahoma [Mr. MONRONEY] has control of the time for the proponents of the amendment, and the Senator from Oregon [Mr. MORSE] has control of the time for the opponents of the amendment.

Mr. MANSFIELD. How much time is available on the bill?

The PRESIDING OFFICER. Four hours are available on the bill, and that time is under the control of the majority leader and the minority leader.

Mr. MONRONEY. Mr. President, I yield myself 15 minutes.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 15 minutes.

Mr. MONRONEY. Mr. President, this amendment, which I have offered for myself and Senators KERR, FULBRIGHT, SMATHERS, HOLLAND, CASE of South Dakota, COTTON, SCOTT, and GOLDWATER would substitute the verbatim text of the House passed bill, H.R. 9000, for the bill reported by the Senate committee.

It would extend the programs of Federal aid to impacted areas under Public Laws 815 and 874 and the Hill-Elliott National Defense Education Act for a period of 2 years. Except for the 2-year extension rather than 1 year, there are no substantive differences between this amendment and the committee proposal. The bill before the Senate would extend Public Laws 815 and 874 for 1 year; and the senior Senator from Oregon [Mr. MORSE] has indicated his intention to offer an amendment, in behalf of the committee, similarly extending the provisions of the Hill-Elliott Act for 1 year.

Its sponsors urge the adoption of this amendment—in other words, calling for a 1-year extension—for the following reasons:

First. There is no valid reason for limiting any of these programs to 1 additional year.

Second. There is serious doubt as to whether it will be possible to secure a conference with the House if the Senate passes a different bill.

Third. Failure to conform to the House action and provide a 2-year extension of Public Laws 815 and 874 would raise a serious danger that these programs will not be revived at all at this session of Congress, so that no funds will be available for the current school year, inasmuch as the program expired on June 30—that is, the programs under the National Defense Education Act and under the Impacted Areas Act.

Fourth. Failure similarly to extend the Hill-Elliott Act for an additional 2 years will bring to a halt many of the gains which have been made under this fine legislation, and will inevitably result in confusion and uncertainty in the program.

It seems to me that there certainly are these four compelling reasons why the Senate should adopt the 2-year plan, because if the Senate does not do so, we shall be in a very difficult situation, because of the necessity of arriving, perhaps in the closing week of the activity of the House, at any program which will save this very vital aspect of the school system.

As Senators know, there are more than 1,650,000 schoolchildren whose educational opportunities will be seriously affected by this extension. It is true that a 1-year extension—if the House were to act on such a measure or were to agree to a conference on such a proposal or were to agree to a 1-year extension program—would give these schoolchildren a period of grace until June 30 of next year. But 3,821 school districts are affected; and in many of them there are many individual schools, and much of their revenue—in some cases 50 percent or more—depends upon the enactment now—and I emphasize the word "now"—of this legislation.

I, for one, am unwilling to have the Senate take the grave risk, with perhaps only 3 or 4 more days remaining, of hoping to have the House agree to do business with the Senate in conference, or, failing that, to have the Senate accept responsibility for failure to enact any bill at all on the subject.

I have listened to some of the debate on the 1-year extension proposal; and I fail to find any legitimacy in the argument that we must continue these laws for only 1 year in order to have a chance to review the acts. It seems passing strange that the same committee which only a few months ago, when this matter was before us in connection with the defense impacted areas act, urged a 3-year program, now insists that a 2-year program is too long, despite its previous sponsorship of the 3-year program, and without any further review.

This program is as well known to Members of the Senate as the palms of their hands. We have lived with the program, and we know about it, and we know the very grave difficulties which would face the schools in the defense impacted areas—areas defense impacted, not because of their own fault, but because of the activities of the Federal Government.

Mr. MUNDT. Mr. President, will the Senator from Oklahoma yield?

Mr. MONRONEY. I yield.

Mr. MUNDT. Do I correctly understand that the amendment of the Senator from Oklahoma would extend not only the defense impacted areas legislation but also the National Defense Education Act, as they are now operating, for 2 years, instead of 1 year?

Mr. MONRONEY. That is correct—and thus have this measure on all fours with the House-passed bill, thereby eliminating any need for a conference; and thus we can complete the congressional action on the bill, and can send it to the President this afternoon—with the realization that in that way the school districts and the schoolchildren will have some assurance of this aid for both this year and next year.

Mr. MUNDT. As one who earlier submitted an amendment providing for extension of only the impacted areas legislation for 2 years, I wish to state that I believe adoption by the Senate of the amendment submitted by the Senator from Oklahoma will better take care of the situation since it would avoid a conference; therefore, I wish to have my name added as a cosponsor of his amendment.

Mr. MONRONEY. Mr. President, I ask unanimous consent that the name of the Senator from South Dakota [Mr. MUNDT] may be added to my amendment, as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUNDT. Mr. President, I think the amendment of the Senator from Oklahoma is a very sound one and a very excellent one, as is usually true of any amendment he submits.

Mr. MONRONEY. I thank the Senator from South Dakota.

Mr. President, I should like first to discuss extension of Public Law 815, providing Federal funds for school construction in impacted areas, and Public Law 874, providing Federal funds to help meet operating and maintenance expenses in impacted areas. It is now argued that these programs should be extended for only 1 year, for two reasons: First, because there are serious defects in the programs, which should be reviewed and corrected; and, second, because this is what the President wants.

In regard to the first contention, it is a little difficult for the Senate simultaneously to follow the committee in opposite directions. On May 12, 1961, the Senator from Oregon submitted from the committee a report on S. 1021 in which the committed stated:

> During the 7 days of hearings on S. 1021, dozens of witnesses testified on the proposed amendments to Public Laws 815 and 874, as well as on title I of the bill. * * * The committee was impressed also by the testimony as to the manner in which these programs have been administered. Witness after witness urged the committee that Federal payments under these laws be continued at their present levels, at least until the effect of title I legislation had been ascertained. Strong senatorial support was given to the committee from many Senators who appeared in person speaking about the urgent need for the continuation of these laws and the widespread and favorable acceptance of these two programs. * * * The committee has considered very carefully the recommendations for reducing the level of payments under these two laws in the light of all of the testimony and the evidence presented, and has recommended a 3-year extension without any significant change of those provisions which would otherwise expire June 30, 1961.

I suggest to the Senate that if the problems in connection with these programs are such that the programs should be continued for only 1 year, pending investigation, this is a discovery which has been made by the committee and by the senior Senator from Oregon since the hearings closed and since Senate bill 1021 was reported to and was passed by the Senate.

The second argument is that these programs should be extended for only 1 year, because this is the course the President desires. Here, again, we are faced with the difficulty of simultaneously following the President in opposite directions. When the matter was being considered by the House, the managers of the proposed legislation were advised that a 2-year extension would be perfectly satisfactory. Under these circumstances, it is difficult for me to believe that the President has any strong feelings in favor of a 1-year extension for any reason other than to accommodate and support the position recommended by the chairman of the subcommittee.

Whatever may be the position of the President in this matter, I think the proper attitude on the part of the Senate was suggested by the chairman of the subcommittee in his comments on the Senate floor on May 16 of this year. The Senator stated, in connection with the debate on S. 1021:

> We had the benefit of the advice, testimony, and consultation of the administration, principally through the Department of Health, Education, and Welfare. I am certain that I violate no confidence when I say that the Representative from New Jersey [Mr. THOMPSON], who occupies the same position of legislative responsibility in connection with this bill over on the House side that it is my honor to have here on the Senate side, in the course of the consideration of the matter, had a lengthy conference with the President in regard to the original S. 1021 bill. As the Representative from New Jersey will tell Senators, we made it very clear to the President that we welcomed the assistance we were getting from the White House and from the Department of Health, Education, and Welfare; we also made it very clear, however, that the final legislative responsibility rests with the Congress. * * *
>
> As we weighed the testimony and the facts and figures which were presented to us we felt, as I think the Senate will agree, that the committee was correct in its recommendation that the federally impacted areas legislation should be extended unchanged for another 3 years.

A somewhat different situation exists with respect to extension of the Hill-Elliott National Defense Education Act. This act expires June 30 of next year. The urgency of its extension at this time is probably best summarized in a statement by a group of distinguished American scientists which was placed in the CONGRESSIONAL RECORD by the Senator from Alabama [Mr. HILL] several days ago. These scientists and educators stated:

> We, the undersigned, are disturbed by the serious damage which will be done to the vital program of the National Defense Education Act if the Congress fails to extend that act before adjournment of the 1961 session. If action is delayed until 1962, State legislatures which must appropriate matching funds, school and university officials who must now plan for the 1962–63 academic year, and students whose educational plans are in part dependent on NDEA programs will be unable to plan with confidence. Unless the act is extended now, the school year of 1961–62 will inevitably be one of confusion, uncertainty, and partial loss of the gains already made.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a memorandum discussing this valuable program.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

> The year 1958 witnessed the beginnings of an extremely rewarding partnership between the Federal Government and State and local educational agencies; a partnership designed to reinforce the long-range defense posture

of our Nation by assuring a maximum realization of our educational potential. The year 1958 witnessed the passage of the National Defense Education Act, legislation implementing concrete school aid programs in recognition of the obvious fact that education plays a critical role in the strength of a nation.

The act acknowledged that the Soviet Union, which two generations ago was little more than a nation of peasants, today is challenging our America, the world's greatest industrial power, in the very field where we have claimed supremacy; the application of science to technology. Silently, yet eloquently underscoring the degree of the crisis back in 1958 as Congress enacted the Defense Education Act was a lone sphere orbiting the globe, the earth's first manmade satellite, sputnik.

At the opening of the hearings on this measure, Dr. Lee A. DuBridge, president of the California Institute of Technology, placed Soviet progress in proper perspective and related this Nation's need to assume a positive course of action:

"We must obviously examine every aspect of our national life to make certain that our sources of strength are secure," he said. "It is not that sputnik alone has forced us into this position. The rising threat of the Soviet power has been visible for many years. But sputnik has served as a dramatic symbol of the Russian danger. We can indeed be very thankful that sputnik has awakened the American people to their dangers and to their opportunities before it is too late.

"Our intellectual resources are the key to our future, and so it is imperative that they not be neglected. * * * The prime responsibility * * * rests, of course, on the local community, but it is also true that the minds of our people constitute a critical national asset. Hence the Federal Government cannot remain indifferent to the strength of the educational system and to the free access to it by all able students. * * * The needs of national defense and of national welfare demand a well-educated citizenry," Dr. DuBridge concluded.

There is a striking similarity between these remarks made in 1958 and those President Kennedy expressed in his message to Congress relative to American education on February 20 of this year (H. Doc. No. 92):

"Our progress as a nation can be no swifter than our progress in education. Our requirements for world leadership, our hopes for economic growth, and the demands of citizenship itself in an era such as this all require the maximum development of every young American's capacity.

"The human mind is our fundamental resource. A balanced Federal program must go well beyond incentives for investment in plant and equipment. It must include equally determined measures to invest in human beings—both in their basic education and training and in their more advanced preparation for professional work. Without such measures, the Federal Government will not be carrying out its responsibilities for expanding the base of our economic and military strength."

Hearings were first held in 1958 to determine specifically what the Federal Government might do to bolster certain deficiencies in American education affecting national defense. At that time the task appeared to be one for all our people, for both great political parties, for both the executive and legislative branches of our Government, for the States, the counties, the cities, and towns and local communities, for the schools, the colleges, the universities, and for all the other private and public resources that constitute the basis of our scientific and educational endeavors.

The particular task of the committee was to consider how best to stimulate and strengthen science and education for the defense of our country at the same time preserving the traditional principle, in which we all believe, that primary responsibility and control of education belongs and must remain with the States, local communities, and private institutions.

The National Defense Education Act became law in response to the growing threat to American security represented by sputnik and Soviet advances in ballistic missiles. Yet, in light of the current Berlin crisis, and the recent decision of the Kremlin to resume nuclear detonations, certainly the need for such a program has not decreased, but, on the contrary, has continued to grow as the Russian menace has continued to grow.

A 1958 statement of Dr. Detlev A. Bronk, president of the Rockefeller Institute of Medical Research and president of the National Academy of Sciences, is just as pertinent and timely today as it was when presented to the committee some 3 years ago:

"We cannot compete with Russia and China and other potential enemies in terms of numbers of men and women. Because of that, it is especially important that we have a very high level of education in our country in order to compete against greater numbers with men and women of greater competence. Only in this way can we defend our national strength and be effective champions and defendants of the human freedoms on which the whole free world depends."

Dr. Edward Teller, developer of the H-bomb, told the committee:

"I am quite sure that in science more than in other fields the young generation is the one which carries the greatest burden, and therefore the children who are now in school will be the ones on whom we will have to depend primarily 10 years from today."

Asked whether we should therefore do everything possible to encourage these students, Dr. Teller replied, "That is what we have to do or I think our way of life will not survive." On the same subject, Dr. Wernher von Braun, one of the world's greatest authorities on rockets and missiles, agreed that proper training and education of scientists, regardless of cost, "is a matter of national survival."

Recommendations of the National Academy of Sciences and National Research Council, presented by M. H. Trytten, Director of the Office of Scientific Personnel, outlined four principles and objectives for the selection of Federal support programs:

"1. All our youth should receive a broad basic education. Our scientists should be broadly educated, not narrow high-grade mechanics. The prevention of war, however, is not a matter of scientists alone. We need to consolidate our position in the world, to understand other peoples, their history, their cultures, and ways of looking at things.

"Our representatives abroad must be able to speak their languages. Successful diplomacy is as important as military threat. To this end, and for many other reasons, we need leaders in social, political, economic, and cultural areas as well as in science.

"2. We realize, however, that there is some imbalance in our educational program at present. Science, mathematics, and languages are not being stressed as much as they should, and their position in the curriculum should be strengthened.

"3. The Federal role should be to assist, guide, and catalyze the educational efforts of the State and local communities. The Federal Government should not assume major financial support of the schools, but it has a justifiable concern for insuring that education in all schools of the country be maintained at a high level.

"4. In initiating Federal programs, procedures should be established within the States which will insure that the general objectives of each program are met, allowing at the same time considerable freedom to the States for the determination of program details."

These recommendations closely parallel proposals made a few months earlier by then President Eisenhower before an audience in Oklahoma City:

"We need scientists in the 10 years ahead. (My scientific advisers) say we need them by thousands more than we are presently planning to have. The Federal Government can deal with only part of this difficulty, but it must and will do its part. * * * We should among other things have * * * a system of incentives for high-aptitude students to pursue scientific or professional studies; a program to stimulate good-quality teaching of mathematics and science; provision for more laboratory facilities; and measures, including fellowships, to increase the output of qualified teachers," President Eisenhower said.

Moreover, as suggested by the recommendations of the National Academy of Sciences, it became apparent as the hearings progressed that a major handicap in the conduct of our foreign affairs is the lack of language preparation for our representatives overseas. Because of these deficiencies they are too often unable to engage in the kind of person-to-person relationship which plays such a vital part in accurate information about foreign affairs, as well as in building friendship for our Nation throughout the world.

These problems underlined the urgent need for action in 1958. The fact that the identical problems and needs persist today renders it mandatory that the legislation shaped to meet these problems and fill these needs be continued. Fully trained competent people cannot be produced overnight. The National Defense Education Act was not intended to be and could not have been a crash program. The act represents a thoroughly researched, carefully investigated, and now appropriately tested program to help State, local, and private efforts to give greater support to basic scientific research, to quality in education, to instruction in the physical sciences, to training in foreign languages, and to the development of our full intellectual, cultural, and scientific capabilities.

U.S. Office of Education figures for the period immediately prior to 1958 indicate that before the Defense Education Act, only one out of three students took a chemistry course during their high school training. Only one out of four took physics, one out of three took intermediate algebra, only one out of eight took trigonometry or solid geometry and only one out of seven took a modern foreign language. Equally shocking is the fact that at that time about 100,000 high school seniors attended schools where there was offered no advanced mathematics of any kind. This, then, was the problem as it existed in 1958; specifically those subject areas most vital to national security were suffering from substantial neglect in the curriculum.

With this broad picture of the problems which the act was intended to resolve, let us now examine the precise solutions offered by the legislation, taking up each part of the act individually. Let us further review how these general problem areas were refined down to specific deficiencies which could be attacked by individual titles of a single piece of legislation.

Finally, let us survey the act's accomplishments since its inception. How well has the National Defense Education Act succeeded in overcoming the shortcomings in our education system? Recognizing that in the final analysis this is the inevitable crux of any legislative discussion concerning the possible renewal of an existing law, let us examine the act by individual title, summarizing the

achievements realized as a result of its having been in operation over the past several years.

Title II of NDEA provides loans to students in institutions of higher education. College costs are at the highest point in history. For the average student in a publicly controlled institution, the annual bill has risen to $1,500; and for his counterpart in a private institution it is $2,000. Even working full time through the summers and part time during the school year, many college students cannot meet that kind of expense singlehanded. If their families cannot help them, nor their colleges, nor someone else, they will have no choice but to drop out of college.

This is precisely the dilemma faced by thousands of young people each year. Some do not even make an attempt in the first place; figures show that only half of the top quarter of each year's high school graduating class enter college. Of those who enter, only about half continue on to graduate. There is little doubt that financial need is one of the biggest factors in the dropout.

Title II provides for substantial financial assistance to worthy and needy students. This assistance is in the form of loans that bear no interest until repayment begins, and the borrowing student need not begin repayment until he has been out of school for a year. A student may obtain as much as $1,000 a year for 5 years if he fulfills the conditions of the act.

The student loan program has achieved a measure of success which even its most ardent supporters would not have predicted. As of June 30 of this year 230,000 students have received loans under this program totaling nearly $130 million, and during the coming academic year another $93 million will be lent to 220,000 students. Many students with a desire for and the ability to profit from higher education were, by this program, given opportunity for advanced schooling which otherwise would have been an economic impossibility. Illustrating this is the fact that in fiscal 1960 many institutions found that they had so underestimated their needs, they would not be able to make commitments to students planning to enter college in the fall of 1960 unless they either denied or reduced loans during the year. To remedy this situation, a supplemental appropriation of $9.7 million was made by Congress to assure institutions of receiving sufficient funds to fulfill approved requests. More funds were appropriated in fiscal 1961, but again they proved inadequate and a supplemental appropriation was made to meet the student demand.

This program has already had significant effects on higher education, the most result probably being the striking change in attitude toward the uses of loans to enable deserving students who are economically restricted to meet the costs of higher education. In 1955-56, 83,000 students borrowed from all institutional loan sources only $13.5 million to provide funds for higher education, while in 1959–60, four times this amount was borrowed from NDEA funds alone. Indicative of this change in attitude is the fact that of the 1,357 institutions participating in the national defense student loan program, 639 of them had never before had loan funds on their campuses. Other colleges which did have loan facilities but were using them in an extremely limited manner are now greatly expanding their loan programs.

A second, but no less important effect of the program has been illustrated by the approach of many colleges and universities to financial assistance to students. Most institutions are now effectively using the "umbrella" approach, which entails bringing together all of the school's financial aid resources such as loans, scholarships, grants-in-aid, and work opportunities to more effectively meet the problems of the particular needs of each financially needy student. Colleges are now making many modifications of their own loan terms in light of NDEA practices. The loans-for-higher-education program has been solidly integrated into the entire financial aid program.

Further indication of the impact this program is having in meeting the needs of deserving students are these facts developed from a questionnaire sent to students who made national defense student loans: 9 out of 10 borrowers indicate that the availability of their student loan determined whether they were able to start or continue in college; 2 out of every 5 borrowers came from families whose annual incomes are $4,000 or less and 5 out of every 7 came from families whose incomes are $6,000 or less; a little over 9 out of 10 borrowers have no more than $500 in personal savings; 74 percent of the borrowers have brothers and sisters of college age.

There has been yet another significant development, and one which has been expressly encouraged by the act. This is the combination of counseling facilities of colleges and secondary schools to encourage an increasingly greater number of deserving but needy high school seniors to seek higher education. Illustrating the fact that this counseling combination has been effective is the fact that in 1959, 11,133 loan applications were approved by participating institutions from high school seniors planning to enter college in the fall. In the following spring of 1960, 18,000 such applications were approved. This total of 29,133 approved loans for the 2-year period for high school seniors represents about 20 percent of the total loans approved in both 1958–59 and 1959–60. From this percentage, it is obvious that the program is successfully appealing to financially restricted, qualified high school seniors desiring a college education.

Not to be overlooked is the fact that one of the major purposes of the student loan program is to encourage students benefiting from these loans to enter teaching in elementary and secondary schools by giving special consideration to them in granting loans and also by annually reducing the amount of the total sum owed proportionately to the number of postgraduate years spent in teaching, the total deduction not to exceed 50 percent. A recent survey shows that a little over one-half of the student borrowers have indicated they plan to teach in elementary or secondary schools after graduation.

The student loan program also provides special consideration in making loans for students having superior academic background in the fields of science, mathematics, engineering, or a modern foreign language. In 1958–59, 5,056 students had their loan applications approved because they were in need of the funds and had superior academic background in these fields. In 1959–60, this figure jumped to 24,950. Such a remarkable increase should certainly be considered proof that this program is successfully providing for more and more of the Nation's youth the means for advanced education so necessary to progress which would have otherwise been an economic impossibility for them. Loans to college freshmen have so far outnumbered those to any other class, that it can certainly be said to be obvious that many talented high school seniors now confidently plan to attend college because of this loan program.

Witness after witness appearing before both the House and Senate Committees on Education during the Defense Education Act hearings emphasized our need to strengthen instruction in the elementary and secondary grades in science, mathematics, and modern foreign languages. The fundamental weaknesses reported were three: (1) Neglect of these three subject areas in the curriculum, (2) an inferior quality of instruction, and (3) an inadequate budget for such things as laboratory equipment and audiovisual materials.

Regarding the latter weakness, Dr. Glenn O. Blough, then president of the National Science Teachers' Association, and associate professor of education, University of Maryland, testified: "The proper, resourceful teaching of science is expensive, compared to other fields of education. But efforts to teach science without adequate laboratory and demonstration equipment deprive students of experiences with the very heart and soul of scientific endeavor. In other words, to teach science without proper equipment is practically useless."

Title III meets this combined need for equipment and supervision. (Title VI provides teacher training for language instructors, and another act provides for a teacher-institute program for science and mathematics instructors under the administration of the National Science Foundation.)

Under title III, funds for equipment may be spent to acquire (1) equipment suitable for education in science, mathematics, or modern foreign languages in the elementary or secondary schools, or both, and (2) minor remodeling of laboratory or other space suitable for such equipment. Such funds are provided on a matching basis, and each Federal dollar must be equaled by either State or local money.

Some title III money is also reserved as loans for private schools. Each year 12 percent of the available funds is set aside and each State shares in this amount on the basis of its private school enrollment.

Finally, title III also authorizes funds to be paid over a 4-year period to State educational agencies for expanding or improving their supervisory or related services to public elementary or secondary schools in science, mathematics, and modern foreign languages.

It is an obvious and well-known fact that although many of our Nation's schools are well equipped, having excellent curriculum programs and qualified top-grade teachers, there are also many others which fall far short in equipment and personnel of fulfilling the educational needs of the students of their communities. The primary objective of title III is to provide for the elementary and secondary pupils in our country's public and nonpublic schools the needed equipment and materials necessary to assure superior and quality instruction in the subjects of science, mathematics, and modern foreign languages. Reports from State administrators and private school officials during fiscal year 1960 have been favorably indicative that the title III program is effectively implementing the achievement of this objective. These 1960 reports show purchases of larger amounts of material and equipment in schools where, prior to NDEA inception, these facilities were practically nonexistent.

In the courses of science and mathematics, the purchase of badly needed materials and equipment has resulted in modernization of classes and great improvement in the quality of instruction. In many cases, these purchases have led to the addition of new courses, and in all instances the addition of greatly improved facilities has generated striking increases in student interest and enrollment in the fields of science and mathematics. A number of States are experiencing gains as high as 50 percent. Many States have reported that the increased interest and the great improvement in the quality of these courses has, as an unexpected but gratifying side effect of the act, stimulated improvement in other instructional fields such as English and social studies.

One State administrator reported a 72-percent increase in foreign language enrollments. In a statement analyzing the effect on language classes of this title, he reports:

"Schools have increased enrollments in language study at all levels; students are more interested; dropouts are fewer; elementary programs are rated by teachers and administrators involved as highly desirable and effective. * * * The time given to languages did not lessen achievement in other areas, and in some instances, students performed better in other subjects."

Many States reported that the addition of new laboratory equipment, audiovisual aids, and new science materials and facilities has greatly contributed to the increased interest and enrollments in the science subjects. One State reported the following effects of the title III program:

Improved greatly the existing science laboratories in project schools and stimulated the building and equipping of new laboratory space.

Motivated attendance of science teachers in science institutes, resulting in improved teaching.

Increased the number of course offerings and student enrollment.

Caused schools to reprogram the offerings in mathematics and science so as to challenge more of the talented students.

Caused many elementary and secondary schools to incorporate into their science curriculum more meaningful and experimental approaches in methodology and content.

In dollars, projects, and classrooms, the powerful impact of title III during the first 2 fiscal years is demonstrated by the following figures:

One hundred and thirty million dollars' worth of new instructional equipment supplied through approximately 57,000 local school district projects.

More than 2,500 new electronic language laboratories, making possible the use of new and improved methods of teaching languages in the secondary schools. When the NDEA became law, about 64 such laboratories were in use in secondary schools.

More than 5,000 classrooms and laboratories remodeled to accommodate new equipment.

State supervisory staffs in science, mathematics, and modern foreign languages increased from a total of 33 in 1958 to approximately 209 today.

Yet another important effect of this program is the strengthening of State leadership and services which is one of the basic requirements of a stronger educational system. One State official was quoted as saying that this program has had more impact on the improvement of instruction in his State than any other effort in education in the past 25 years.

Still another notable point is the fact that under this title, the private nonprofit elementary and secondary schools have utilized loan funds to greatly broaden and improve their educational programs. Roughly half of these schools obtaining loans indicate plans to offer courses in science and modern foreign languages for the first time. Many of these schools assert that prior to NDEA they had been unable to furnish well-equipped laboratories for student instruction and use. All of these improvements greatly add to the schools' ability to attract and hold well-qualified instructors, meet certification standards, and more adequately prepare their students for college entrance.

It is apparent from these facts that the long-range beneficial effects of this program toward a stronger, more efficient national educational system are both immediately and potentially virtually limitless.

Title IV looks to the providing of more college teachers. It does so on the very eve of a crisis: Within the next few years, colleges will encounter an enormous increase in students, the first wave of the so-called baby boom which followed the end of World War II. The impact will find colleges short of room, but—worse still, it will find them short of teachers.

In the last few years, when the ranks of teachers with doctors' degrees should have been swelling, they have actually been thinning. The number of people earning Ph. D.'s has remained about the same since 1954, and of each year's total, only about half chose college teaching as a profession and only a fifth were new college teachers. In certain critical fields—science and engineering, for example—the proportion has been even less. Of those earning doctorates in chemistry in 1956–57 and 1957–58, only one-tenth entered college teaching. In recent years colleges have been adding about 3,000 to 4,000 teachers with Ph. D.'s every year; but additions like these will be woefully inadequate for the future. Conservative estimates say that in the coming decade colleges must recruit between 15,000 and 22,000 teachers a year.

One of the reasons for the shortage of college teachers is the fact that graduate programs are not widely available. Out of approximately 1,350 degree-granting institutions in the United States, only about 160 give doctoral degrees; and many of these have resources for only a few graduate students. In 1956–57, one-third of the new doctoral degrees granted in the entire Nation were granted by institutions in only three States.

To the solution of this double problem—the uneven distribution of graduate programs and the economic needs of the students—title IV addresses itself. It takes two approaches: Providing students with funds, and increasing the number and scope of graduate programs of study.

This title of the act provides funds for 5,500 fellowships which may be awarded over a 4-year period by the Commissioner. Each fellowship is for a period of 3 years or less. The graduate school in which the fellow is enrolled receives each year up to $2,500 to help pay the cost of the approved graduate program. The basis for approval of an institution's program is the Commissioner's finding: (1) That the program is either new or expanded; (2) that it is both a substantial addition to the Nation's graduate training facilities and that it contributes to the wider geographic distribution of such facilities; and (3) that the institution, in accepting students for fellowships, must give preference to persons interested in becoming college teachers.

Already, under title IV, 4,000 graduate fellowships have been awarded to students preparing for college teaching. With each of these fellowships the graduate school receives a grant of up to $2,500, and by the end of this coming academic year a total of $16 million will have been allocated to the participating graduate schools to help them establish the new and expand the existing graduate programs in which the national defense fellows are studying. This is obviously a great step forward in providing the qualified instructors necessary for our fast expanding higher education systems and rapidly increasing college enrollment.

The national defense graduate fellowship program has the unique characteristic among Federal fellowship programs of making no restriction as to the field of study and there is no priority set among the various areas of study in the award of fellowships. One of the major objectives of title IV is to encourage graduate students to prepare for college teaching. To obtain evidence that this objective is being achieved questionnaires were sent to all students who had received fellowships in 1959–60. These questionnaires were so phrased as to determine to what extent the award of the fellowships had affected the student's future career plans. When returned, the questionnaires indicated that 24 percent of the students would not have entered graduate school in 1959 if they had not received the fellowships and that 65 percent did not decide to work for a doctoral degree until they had received the award. Prior to receiving a fellowship, only about 21 percent had decided to become college teachers. Additionally, these students stated that the awards would save them an average of 2½ years in the time required to earn a doctoral degree. This would seem to be a significant figure, since one of the primary obstacles to earning a doctoral degree is the extreme length of time required.

Thus title IV is an integral part of the Defense Education Act, offering a great part of the answer required to the not-far-distant problem of overcrowded and understaffed college classrooms.

Every year about 200,000 able young people, some exceptionally talented, drop out of high school or turn their backs on college. For nearly half of them the problem is a simple lack of money; but all the rest drop out precisely because they no longer wish to attend school. Their lack of desire is more complex than lack of money and infinitely more complicated to overcome. Many have never discovered that they are bright and have never conceived of themselves as college material. Nearly all of them have aimed their individual sights toward goals far beneath their actual potential, chiefly because no one ever helped them look further and higher.

Title V of the National Defense Education Act established a broad program of guidance, counseling, and testing to reduce this flagrant waste of the Nation's intellectual resources. It aims at bringing closer the day when the benefits of wise guidance will be available to all children. Its immediate goals are two: More guidance, including testing, in every State, and enough professional counselors and other guidance staff to do the job.

Part A of title V authorizes funds for grants to State educational agencies for better guidance programs, including both testing and counseling. To assist in training the professional people to carry out the programs established in part A, part B authorizes counseling and guidence training institutes. The Commissioner arranges by contract with colleges and universities for them to operate these institutes.

Concrete statistics have already proven the worth and value of subtitles A and B of title V. During the 2 years of operation of title V–A, there has been a 50-percent increase in the number of qualified full-time equivalent counselors employed by secondary schools. As a whole, the counselor-pupil ratio for the Nation has gone from 1 to 750 to 1 to 610, a considerable stride toward the 1 to 300 which is established as acceptable. During the school year of 1959–60, aptitude and ability tests given to public secondary school students under title V–A exceeded 6.8 million, over one-third of the 19 million given in the country.

The progress just stated for the Nation as a whole becomes especially remarkable when cited for individual States in which major efforts have been prompted by this title. For instance, the number of full-time guidance counselors in North Carolina increased from 18 in 1958–59 to 100 in 1960–61. In Oklahoma, the expenditures for local guidance, counseling, and testing programs increased from $300,000, $70,000 of which was Federal funds, to $956,414, $185,000 of this figure being Federal funds, over the period January 1959 to July 1960.

Under section B of title V, 8,420 high school counselors and teachers preparing to be counselors have received training at 236 counseling and guidance training institutes, and during this academic year another 580 counselors will be attending 17 regular session institutes. Over the entire

Nation the effect of these institutes has been felt. Students from virtually every State have enrolled in these institutes in gratifying numbers.

The success and value of these institutes is shown in a number of ways. Counselors and teachers who have attended these institutes report great improvement in their skill as counselors accompanied by greater interest in and enthusiasm for this type of work. They express greater satisfaction in their jobs and in many instances have been inspired to continue their counseling education at their own expense.

An important part of achieving a strong and workable national education system is this program, which is finding an answer to the problem of giving our Nation's students necessary counseling and guidance required to salvage the myriad able and talented students who might otherwise fail to continue their education beyond high school and to properly channel their abilities.

Title VI of the act is directed toward the development of good teachers in modern foreign languages. The United States has substantial interests in overcoming the shortcomings in language instruction in our schools. Our investments outside our own shores are the largest of any nation in the world; our diplomatic corps represents us everywhere; our Armed Forces are stationed in many areas of the globe; and our citizens are the world's most ubiquitous tourists. Despite all this, we stand in desperate need for more and better modern foreign language instruction.

Title VI attacks the problem at its root—the shortage of good language teachers. Through part A it seeks more teachers of important but rarely taught languages; through part B it seeks better teachers for the elementary and secondary schools.

Actually, part A encourages three things—more study of neglected languages and also of the areas where they are spoken and more research on language instruction. Language and area centers are authorized to provide instruction not only in the languages themselves, but in the economic and cultural aspects of the countries or areas in which they are spoken. Students undergoing advanced training in one of the neglected languages are eligible to be awarded stipends. Part A also authorizes the Commissioner to make studies and surveys to determine the exact needs in foreign language instruction. In addition, the Commissioner is authorized to develop specialized materials that will be useful in training those who teach languages and related subjects.

The language institutes in part B focus on one thing—the improvement of the teaching of modern foreign languages in all of our elementary and secondary schools, particularly through new teaching methods and instructional materials. They offer advanced training to language teachers, both present and prospective, and to anyone who trains or supervises such teachers.

Title VI, divided into subtitles A and B, is effectively instrumental in the much needed strengthening of instruction in the languages uncommonly taught. There is an urgent need in education, Government, business, and industry for people who are proficient in these languages. Through the provisions of this title, scholars throughout the Nation are enabled to apply their talents and energies to the immediate need for improving language instruction.

There are three major ways in which language instruction has been strengthened by this Federal support, which is matched by the participating institutions:

First, institutions with programs in the uncommon languages and related studies have been able to intensify their language instruction programs—in some instances, to the extent of doubling the amount of class instruction. Forty-seven language and area centers are being supported this year with $1,751,000 in Federal funds. To this the institutions are not only contributing a matching amount but are adding another $1 million. This brings the total Federal investment in the first 3 years of the program to $3.8 million and the institutional investment to $4.8 million.

Secondly, as a result of the preceding improvement, a greater number of students are attracted by these language and area studies.

Third, the program is greatly implementing achievement of a balance at individual institutions between language and area studies. In the past, area studies of necessity have been disproportionately emphasized, but with the aid of the language and area program these institutions are able to focus more attention to the study of languages.

Supplementing these benefits are the additional two provisions under subtitle A of title VI, the allocations for modern foreign language fellowships and research and studies to provide the basis for improving and expanding the teaching of modern foreign languages in the schools and colleges.

The fellowship provision is in close association with the language and area centers program. Its primary objective is to provide economic aid at the graduate level in order to facilitate and expedite the flow of capable and proficient trained specialists in the uncommonly taught and neglected languages into institutions of higher education and public service.

Illustrating the success of the fellowship program is the fact that in fiscal year 1961, 769 fellowships were awarded for study in 37 languages at 47 graduate schools. This, in addition to the 171 fellowships awarded in fiscal year 1959 and the 472 fellowships awarded in fiscal 1960, means that a total of 1,412 graduate fellowships were awarded in the first 3 years of this program. Of the 769 fellowships awarded in fiscal 1960, 261 were renewals of fellowships awarded in 1959 and 1960.

Under the research and studies provisions, a total of 161 projects have been initiated at a cost of $8.5 million. The development of tests for languages teachers and of instructional materials emphasizing the speaking and understanding aspects of learning languages shows portent of having a definite and direct influence on language instruction. A large part of the instructional materials are presently being used on an experimental basis and the tests are in the process of completion.

Particularly significant in the research and studies program is the development of badly needed specialized instructional materials for the neglected languages. Roughly 200 such special materials for all countries on the globe are being developed at a cost of over $3.5 million of fiscal 1959, 1960, and 1961 funds. Included in these are linguistic analyses of various languages, basic courses, readers, reference grammars, dictionaries, manuals, bibliographies, and reports on conferences which have been held to more accurately determine needs and resources available for the development of a varied number of languages.

Through the language research and studies program under title VI, the resources of modern foreign language teaching and scholarship can be focused on one of the primary deficiencies in this Nation's education system.

Part B of title VI, the provision for language institutes, is successfully designed to equip language instructors with a greater proficiency and fluency in the language they teach and to provide them with new and more effective methods of language teaching.

The institutes program has enjoyed a high degree of success. From the start of the program up to and including institutes being conducted during the current academic year, 7,000 elementary and secondary school language teachers will have received training at 133 language institutes.

Over 25,000 language teachers made application to attend the 1961 summer and regular session institutes. This figure is about 2½ times the number who had applied to attend the 1960 institutes. Only about one-sixth of the qualified applicants could be accommodated at the 68 summer institutes in 1961.

Obviously these institutes are a dynamic and positive achievement toward solving the increasing problem of adequate language instruction in American schools. The results of this program have demonstrated an unprecedented experience in professional stimulus, in the improvement of language proficiency, and in cultural enrichment. It is calculated that, as a result of this advanced specialized training, 700,000 pupils throughout the Nation received the many benefits of greatly improved language instruction in the fall of 1960.

A new and important development which promises to have far-reaching effects upon our relations with Latin American countries is the implementation of a Latin American studies program. The program, which will be developed within the present authorization and appropriations of title VI, will focus new attention on Latin American languages and studies and will prepare high level specialists to work in Latin America. The Latin American studies program is, in a sense, a part of President Kennedy's Alliance for Progress.

The objective of title VII is exploration of the new educational media. It provides for research and experimentation in the more effective utilization of television, radio, motion pictures, and related media for educational purposes in a two-part title. Part A authorizes getting the facts on new media, and part B provides for the dissemination of this gathered material.

Quoting directly from the wording of the act, title VII calls for "* * * research and experimentation in the development and evaluation of projects involving television, radio, motion pictures, and related media of communication which may prove of value to State or local educational agencies in the operation of their public elementary or secondary schools, and to institutions of higher education, including the development of new and more effective techniques and methods (1) for utilizing and adapting motion pictures, video tapes, and other audiovisual aids, filmstrips, slides and other visual aids, recordings (including magnetic tapes) and other auditory aids, and radio or television program scripts for such purposes; (2) for training teachers to utilize such media with maximum effectiveness; and (3) for presenting academic subject matter through such media." The Commissioner is authorized to encourage this research and experimentation by either making grants-in-aid to public or nonprofit private agencies, organizations, and individuals, or by entering into contracts with public or private agencies, organizations, groups, or individuals.

Part B of title VII makes possible four ways the Commissioner may disseminate information on new education media: (1) Make studies and surveys; (2) publish catalogs, reviews, bibliographies, and other needed materials; (3) provide upon request, advice, technical assistance, and demonstrations to State and local agencies and institutions of higher education; and (4) publish an annual report of developments in the use of communications media for educational purposes, including projects initiated under the title.

Title VII is a vital and salient provision of the Defense Education Act. Part A of this program provides funds for progressive research and experimentation in modern educational media and new teaching tools which will necessarily be utilized to keep

up with the immediate and fast-growing demand for a greater number of qualified teachers for the much greater number of students.

Indicative of the interest in and success of this title of the act is the impressive fact that on the basis of only 3 years' activity, 150 title VII research projects have been initiated in 39 States and the District of Columbia. It is certainly apparent from this figure alone that this program will provide vitally important information in the form of research evidence about application and results of the uses of newer educational media such as educational television, teaching machines, language laboratories, and projection equipment.

In the next 2 years the results and findings of the projects now in progress will be available; new and additional projects will provide additional sources of knowledge relative to teaching and learning—thereby adding to the eventual success of the objectives of the National Defense Education Act: to provide for our country a strong, workable, and efficient system of education.

Subtitle B of the title VII program which provides for dissemination of information on the new educational media has already seen the completion of 40 high-priority projects and another 37 are now underway. A portion of these projects were emergency remedies to immediate and painfully urgent problems. Some were important segments of a long-range information program, the basic purpose of which is to provide the information pertinent to, and the means for, appropriate modification and improvement of present educational practices. Other projects under this portion of title VII have provided and are providing bases for solutions to fundamental problems regarding the role of these communication media in our schools.

The number of conferences, reports, surveys, and research results in the new media fields which have been developed under title VII are so numerous as to be virtually impossible to list. The results have been, and will prove to be even more invaluable in determining the educational uses of communication media. This title offers assurance of highest quality research in this field for years to come.

Title VIII established area vocational education programs. Every engineer needs five assistants behind him if he is to put his knowledge and skills to their best use. Yet, in the United States, though engineers are in short supply, we have more engineers than technicians. Scientists are performing jobs that technicians could do to better advantage. Our Nation needs these trained people in all areas of scientific development—electricity, electronics, atomic energy, engineering, chemistry instrumentation, tool design, aviation, and industrial planning. Not to produce them fast enough means denying ourselves many of the fine advances of science; it means weakening our first line of defense, skilled manpower, at the very moment we should be making it as strong as we can.

Title VIII, which aims at alleviating this manpower shortage, is in fact an amendment to another act. Actually, it adds a new title, title III, to the George-Barden Act, which for a dozen years has augmented the vocational education programs of less-than-college grade begun by the Smith-Hughes Act back in 1917. The new measures will provide training for highly skilled technicians in recognized occupations requiring scientific knowledge in those fields which are necessary for the national defense.

The effects of this title, which provides area vocational education programs to train less-than-college-grade individuals of varied ages, have been wide range and highly gratifying. Despite being initially handicapped by the fact that the program started after school programs and budgets were already planned in the 1958–59 school year, such programs speedily gathered momentum in 1960, the first full year of operation. Vocational educators across the Nation competently and efficiently met the challenge and assumed the responsibility for the training of highly skilled technicians. The greater portion of the preliminary phases of this program have been completed and it is apparent that the States have laid a solid and lasting foundation for the years ahead.

Factual statistics firmly support the great success and acceptance of this program. During fiscal 1960 a total of 101,279 persons, over twice as many as in fiscal 1959, were enrolled in 1,503 programs and courses for the training of technicians under title VIII. Approximately 32,937 persons were enrolled in 498 preparatory programs and 68,342 in 905 extension programs. The growth of this program in the first 2 years indicates that there will be a substantial increase in all these figures in fiscal 1961.

Preparatory courses offered to date consist of nine occupation fields: electronic, mechanical, electrical, chemical, aeronautical, production, civil, instrumentation, and data processing and computer programing. It is predicted with assurance that new curriculums in various other areas of technology will be established as the program develops.

After 2 years of operation under NDEA, title VIII has made possible a rigorous quality of instruction in the preparation of skilled technicians, many in geographic areas where such instruction was not previously available. This has resulted in greater commitments of funds by the States themselves, at their own initiative, to the area concept of vocational instruction.

Additionally, unit extension courses have been introduced which emphasize the applications of science and mathematics in special technologies such as tool optics, missile telemetry, servomechanism, radar theory, automation electronics, microwave theory, theory of transistors, electronic data processing, stress analysis, technical report writing, cost analysis, time study, quality control, and tool planning.

Title IX, the only part of the National Defense Education Act not charged to the Office of Education, authorizes the National Science Foundation to establish a Science Information Service and a Science Information Council. The second advises and consults with the first and both share one overriding objective: Providing the scientist with information he needs quickly and effectively.

The Science Information Service is charged with two responsibilities: It provides indexing, abstracting, translating, and other services necessary to disseminating scientific information; and it undertakes programs to develop better and faster methods of making information available, such as mechanized systems. The 19-member Science Information Council assists the Science Information Service in carrying out this twofold assignment.

Finally, section 1009 of title X, the only part of title X which authorizes a program, provides funds to improve the statistical services of State educational agencies. The goal sought here is a general improvement in the accuracy and availability of statistics on public schools in this Nation.

Under title X, many States have found it possible to begin or extend significant efforts toward improving the adequacy, reliability, and timeliness of educational data developed at the State and local school system level.

At present some 43 States are conducting extensive surveys, reviewing and evaluating existing statistical services, and, based on their findings, are realizing significant improvements in the systems and procedures for recording, collecting, verifying, and processing data. Recognizing the necessity for having a strong staff organization to carry out the provisions of statistical services, over half the States are taking positive steps to improve their organization, and 39 States have added competent professional and clerical personnel to strengthen internal services or increase field services.

With regard to the goal of obtaining comparable information from the individual States, to date all States are taking positive steps toward implementing the standard terms, items, and definitions which have been cooperatively developed and made available to the States in the areas of school finance and school sites, buildings, and equipment. This development represents a major breakthrough.

The addition of expansion of facilities for automatic data processing in 37 States, accelerated inservice training for State and local personnel, and improved dissemination of educational information through the use of modern techniques to improve the scope and quality of reports and publications, are among other important areas of improvement under title X.

At the time of its enactment, the National Defense Education Act was described as an effort to "mobilize our Nation's brainpower in the struggle for survival." On the basis of solid accomplishments realized in the brief period which has transpired since, it would appear that the act is indeed mobilizing our intellectual resources to the benefit of national security.

It is unthinkable that a program which has clearly demonstrated so much worth to the crucially important programs of education and national defense should not be extended for a minimum of 2 additional years so that it may continue to rapidly approach its extraordinary potential.

A statement on the matter which digests to a very few precise words the pertinent reasons why was recently released by some of the foremost men of American science. Though the full text of this statement was inserted in the August 25, 1961, CONGRESSIONAL RECORD, certainly a portion of it bears repeating:

"We, the undersigned, are disturbed by the serious damage which will be done to the vital program of the National Defense Education Act if the Congress fails to extend that act before adjournment of the 1961 session. If action is delayed until 1962, State legislatures which must appropriate matching funds, school and university officials who must now plan for the 1962–63 academic year, and students whose educational plans are in part dependent on NDEA programs will be unable to plan with confidence. Unless the act is extended now, the school year of 1961–62 will inevitably be one of confusion, uncertainty, and partial loss of the gains already made.

"The job is well started, but far from complete. The National Defense Education Act has been in effect for only 3 years. The first year was largely one of tooling up. The second and third were years of growth and improvement. There is good momentum now. However, failure to extend the National Defense Education Act this year will bring many of the gains to a halt. Extending this act this year will enable the Nation to continue to build upon the improvements that have already been started. These improvements in science education are too vital to the welfare of the Nation to allow the act to be weakened."

Signing this statement of firmest conviction were: Detlev W. Bronk, James B. Conant, Lee A. Du Bridge, Frederick L. Hovde, James R. Killian, George B. Kistiakowsky, W. A. Noyes, Thomas Park, and J. A. Stratton.

To this distinguished list of names I invite every Senator present to add his own, indicative of the ground swell of congressional support for a 2-year extension of this

tried and truly proven program. To those who support the Nation's security and the Nation's schools, I invite support for NDEA renewal, as this action will continue the substantial contribution to both. To those willing to act, I invite action now, because the need for extension is an immediate need. Join the many who, with a great concern for both the defense program of the Nation and the educational program of the Nation, call for immediate renewal of the National Defense Education Act for a minimum period of 2 additional years.

Mr. MONRONEY. Mr. President, there is now pending on the Senate calendar a bill to extend the National Defense Education Act and make major revisions in its provisions. Adoption of this amendment extending the provisions of the act, as would the House, for a 2-year period in no way prevents the leadership from calling up S. 2345 in the next session, nor in any way prevents the Congress from taking action on the substantive improvements in the program which have been recommended by the committee.

I should point out that the pending bill would extend all the provisions of the act for at least 3 years and in many cases would make them permanent. This illustrates the fact that there is in effect no opposition to the continuation of this excellent program.

A real merit of this amendment lies in the fact that it can eliminate the necessity of a conference with the House on the extension of these vital programs for American education supremacy. Upon the adoption of this amendment, the House and Senate bills would be identical and there would then be no reason why the House bill could not be passed by the Senate and sent immediately to the President for signature.

It is late in the session. There is no Senator who does not appreciate the fact that there is some danger in a course which requires a conference. The Rules Committee has in effect adjourned. While it may be argued that it would be possible to secure a conference on programs that are as strongly supported as these, the fact remains that there is also some danger that they might be imperiled by this course of action. What, then, is the reason for taking any risk at all of killing these essential programs?

I suggest to the Senate that the real reason is, not that there is anything wrong with the programs, but what was frankly stated in the report filed by the chairman of the subcommittee on the pending bill. This report states:

> It is further the considered judgment of the majority of the committee that only a 1-year extension of the programs, at this time, is advisable. This position is based upon the belief that the special needs of the impacted areas should be related to the provisions of a general Federal aid to education measure, designed as was title I of S. 1021 to provide broad-purpose financial assistance to school districts through the education agencies of the 50 States. It was for this purpose that section 204 of S. 1021 was drafted. Since it is the belief of a majority of the committee that, within the lifespan of the 87th Congress, S. 1021, or a similar measure, will be enacted into law, an extension of the impacted areas legislation for longer than a 1-year period is not warranted.

The whole argument comes down to this: Shall we endanger these programs in an effort to use them as carrots to lead the reluctant congressional mule to accept a general Federal aid to education bill next year? For we will be endangering these programs and we will be doing so for that sole purpose.

I need not yield to any Member of the Senate in my efforts on the floor or my support for the introduction of legislation to enact a general aid to education bill. I was the author, with the senior Senator from Pennsylvania [Mr. CLARK], of the amendment which added Federal aid for teachers' salaries in 1959. I sat here and secured as a cosponsor my desk mate, the then Senator Kennedy, of Massachusetts. He cosponsored this measure along with many other Senators, and it was the success in obtaining the large number of distinguished cosponsors that lead to making a breakthrough for including teachers' salaries as well as construction in any Federal aid bill that was to be considered by the Senate.

I am as interested today in the passage of Federal aid to education legislation as I can be. Let no man spread on the record from the floor of the Senate the statement that is not so because of my amendment, which was proposed purely out of my firm conviction that we dare not run the risk of not having a conference, or of not completing action on a conference with the House, and thereby destroy the impacted areas law or a timely extension of the National Defense Education Act, because I feel that this effort is all a part of bringing our educational facilities up to date. I do not wish to try, and I do not think it is necessary that we try, to blackmail anybody or try to show that this is an indivisible part of the National Defense Act. If this strategy were sound, it would have worked in the House of Representatives.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MONRONEY. I yield myself 5 more minutes.

The mess in the House of Representatives is partly the result of the poor liaison work, partly the result of other issues being injected into the question, and partly the result of the feeling that the legislation must be extended for 2 or 3 years to sweeten the potion of Federal aid which will not stand the test of broad daylight.

Mr. GORE. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. GORE. How long has this particular program been in effect?

Mr. MONRONEY. The distinguished Senator from Tennessee and the junior Senator from Oklahoma, who were then Members of the House of Representatives, helped to nurture and enact the law for the first time at the conclusion of World War II—about 1950—when we had to face the danger to the educational systems in the vast areas that had been built up to serve this country in time of war, with the Lanham Act expiring and with no funds to continue the schools.

Mr. GORE. So the Senator is not proposing an innovation. He is not suggesting that the Senate experiment with a program. He is suggesting the continuation of a program which the Congress and the country has approved over the past 15 years.

Mr. MONRONEY. That is absolutely correct.

I came to the Senate in 1951. I know the program had been in effect a year or two when I came to the Senate.

Mr. METCALF. It was 1950.

Mr. MONRONEY. It is a vital program. I point out that the same committee which today is urging a 1-year extension of the law in May urged a 3-year extension. That was put in as a part of the omnibus bill. It was hoped it would pass. I hoped it would. I had hoped to help pass the National Defense Education Act. The strategy did not work out.

Now we are told we should not extend the law for more than 1 year, even at the risk of losing the program by not being able to get a conference with the House.

I am confident that the program can stand on its own four legs, and the National Defense Education Act can stand on its own four legs. We do not have to borrow a pair of legs for either program.

Mr. GORE. I congratulate the distinguished and able Senator for his leadership. I assure the Senator of my support.

Mr. MONRONEY. I appreciate deeply the support of my distinguished colleague.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. MONRONEY. I am happy to yield to my colleague from Massachusetts.

Mr. SALTONSTALL. I appreciate the Senator's yielding to me. I was not able to be present to hear the first portion of the Senator's speech.

Do I correctly understand that the amendment provides for a 2-year extension of the so-called impact aid and for a 2-year extension of the scholarship program?

Mr. MONRONEY. That is correct. It provides for an extension of the National Defense Education Act exactly as was provided in the bill passed by the House. We can pass the bill with my amendment, so that the bill can go to the President with both of these time-tested and well-supported pieces of legislation continued, rather than to provide a lingering death of a few months. It will be only 9 months until the expiration of any 1-year program.

Mr. SALTONSTALL. I am very happy to support the Senator's amendment.

I think any program of this character, which has always been provided on at least a 2-year basis, should be extended for 2 years, particularly in relation to the problems we face in Massachusetts. In Massachusetts there are, as the Senator knows, town meetings which are held in March and April. The citizens plan the appropriations for the year ahead. They vote at the town meetings.

If we prescribe in the bill the program is to last for only 1 year, the citizens at the town meetings which will take place in March and April will be left in the dark as to what will happen the following year. The town of Bourne, where Otis Air Force Base is situated derives approximately 40 percent of its school funds from the impacted area legislation. It is very important to be able to establish a program a year ahead and to know for 2 years instead of 1 what will occur.

I am happy the Senator has offered the amendment. I hope it will be agreed to.

Mr. MONRONEY. The Senator is absolutely correct. This is true not only with regard to town meetings but also with regard to school boards in Oklahoma. Teachers are being sought, by competitive school districts, for the 1,800 school districts which are to be so helped. The school boards must make contracts. These men are not able to read the mind of Congress. If we should be so arbitrary as to provide a 1-year limit on the program, every teacher who is employed—and many of the districts employ good teachers because the money provided makes it possible to secure them—will be worried as to whether he should take an offer from State A, State B, community X, or community Y, so that he will be sure to be working in a school district. Some of the school districts may find it necessary to cut 40 percent, or in some cases 50 percent, of the teachers or the salaries of the teachers.

Mr. SALTONSTALL. The program lends stability.

Mr. MONRONEY. It lends stability. It helps to build up real educational institutions. Nothing is as dangerous to education as instability.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. MONRONEY. I am happy to yield to the Senator from Connecticut.

Mr. BUSH. I congratulate the Senator for his able presentation of the case this afternoon.

If it were not for the identical nature of the amendment with the House bill I would ask the Senator to modify his amendment, or would submit an amendment to his amendment, to extend the impacted area legislation to 3 years or to 4 years.

Mr. MONRONEY. I should be willing to do that, except that we cannot, under the situation we face, if we expect to have the program continue.

The argument I make, I believe, is a most cogent one. We dare not risk having the bill lost because of a lack of resolution in the Congress. One body cannot legislate alone. Two are required.

Mr. BUSH. I appreciate that. I think the Senator is correct. Therefore, I shall support the Senator's amendment, exactly as it is offered, and I shall vote against any proposed changes in it, so that there will not be any danger. If the amendment is agreed to it will not be necessary to go to conference with the House. We can pass the 2-year extension of the program.

I express a deep regret that we find ourselves in this legislative box, so to speak, from which we cannot get out or even consider getting out with a bill which would have more stability, a bill which would give more stability to the budgets of the school districts and which would provide more assurance with respect to the employment of teachers.

The Senator has made an excellent point. If one goes to a district like Groton, Conn., one sees it is very heavily impacted by Federal work. It is very difficult for the people of the community to attract teachers, unless they can give to the teachers some assurance of permanent positions. If we should stop the assistance to impacted areas it would be necessary for many of the school districts to let many teachers go. In addition, the communities would not be able to hire the additional teachers needed for growing communities, which they should be in a position to do.

I think the Senator is rendering a great service in sponsoring the 2-year program, in spite of what his former seat mate said a few hours ago on this floor, when he called for a 1-year extension of both the impacted area legislation and the National Defense Education Act.

I am very happy the Senator has given me an opportunity to support him.

Mr. MONRONEY. I am very glad to support the President on his goals and on his programs, but I agree with what the chairman of the Subcommittee on Education previously said, when he advocated the 3-year extension of this program, that the President's business is to be President and that he should leave to the Senator from Oregon [Mr. MORSE] the strategy of doing what is right on the floor of the Senate.

I am not much impressed with the argument now made that it should become a holy writ, because someone has sent word from the White House that he wishes to have a 1-year extension instead of a 2-year extension.

The bills are identical. There is no difference between my amendment, and the House bill. The amendment can be passed and can be signed into law.

The PRESIDING OFFICER (Mr. SMITH of Massachusetts in the chair). The time of the Senator from Oklahoma has expired.

Mr. MONRONEY. I yield myself 3 additional minutes.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. MONRONEY. I am happy to yield to my distinguished colleague from Florida, a cosponsor of the amendment.

Mr. HOLLAND. I congratulate the Senator for his fine leadership. I am glad to be a cosponsor of the amendment.

It looks as though we are coming to the time when we may see a reenactment of this important defense impact school bill, which really is nothing more than a continuation of a measure which has proved good in 10 years of experience.

I say to my distinguished friend that in my own State the prospect is for greater defense impact in the immediate future, rather than lesser. It has recently been announced there will be a great expansion at the guided missile base at Cape Canaveral. Already more than 9,000 children in that county—Brevard County—have been added to the total of schoolchildren by reason of defense activities there. That county and all its districts are taxing themselves to the maximum permitted by our constitution, and still they are not able to educate wholly at their own expense the more than 9,000 children already sent there by Uncle Sam. The number of those children will become considerably larger in the near future.

For the RECORD I invite attention to the fact that there has never been any intent to put upon Uncle Sam's shoulders the full cost of educating all these schoolchildren. The Federal Government reimburses for approximately half of the cost of educating the children, which I think is indicative of the fact that the areas affected are willing to do a full and fair share.

Mr. MONRONEY. And this is on a per-pupil basis. This is not on any slide rule basis, in outer space, but is on the basis of genuine pupils behind their desks.

Mr. HOLLAND. The Senator is exactly correct. We stand ready to continue on that basis.

We have no unwillingness at all to have a careful investigation made. If there are districts in my State or in any other State which are abusing the law and abusing the Federal Government under the law, I think that fact can easily be brought out, and a correction can be made. It seems to me now we should pass at least a 2-year extension of the program. Next year will be an election year. It will be difficult to hold Congress in session for a long period of time, such as has been the case this year.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has again expired.

Mr. MONRONEY. Mr. President, I yield myself 2 more minutes.

Mr. HOLLAND. That will not be an appropriate year to continue a discussion which has already produced too much bitterness in our country, with respect to a general Federal aid to education measure. It has come at a time when unity, it seems to me, is worth more to our country than ever before.

I believe the Senator is exactly right in proposing to separate this program, which is built upon the idea of being just before we are generous, because it is simple justice for the Federal Government to carry a part of the expense of schoolchildren in the defense-impacted areas. I congratulate the Senator. I shall support him in every way I can.

Mr. MONRONEY. I thank the Senator from Florida.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. STENNIS. I commend the Senator from Oklahoma for his amendment and his very fine presentation. I am one of those who voted two or three times against the extension of Federal aid to impacted areas by adding amendments to appropriation bills, with the assurance that we would be given an opportunity to pass a real Federal aid to impacted areas bill. To come here with

a 1-year extension of a policy that is 20 years old, which has been operating effectively, and to which no one objects, it seems to me would not be keeping faith. We would not be keeping faith with our direct responsibility.

If time is available, I should like to make some additional remarks on the merits of the bill later.

Mr. MONRONEY. I thank the distinguished Senator from Mississippi.

Mr. President, I reserve the remainder of my time.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. MONRONEY. I am happy to yield to the distinguished Senator from Kansas. For that purpose I yield myself 3 additional minutes.

Mr. CARLSON. I should like to inquire if the amendment of the Senator from Oklahoma does not contain the text of the House bill.

Mr. MONRONEY. It is identical, and would require no conference with the House.

Mr. CARLSON. I assure the Senator that I heartily support the amendment. I think the amendment represents one way in which we would be certain to get legislation. Should we write another amendment in the bill and go to conference, in my opinion, there is a possibility that the impacted areas would not receive aid. I commend the Senator for his amendment and will support him in any way I can, in the hope that his amendment will prevail.

I believe it is time for the Nation to give serious consideration to the question of Federal aid to education, but this is not the time to do so. I hope that during the next session of Congress further study will be given to the subject of Federal aid to education.

Surely at a time when our economic and cultural life as a Nation is in a rapid change, we should give serious thought to improved methods of financing and promoting the educational programs for the children of our country.

Mr. MONRONEY. Mr. President, I thank the distinguished Senator from Kansas. I strongly favor Federal aid to education. From the standpoint of practical considerations, it would be better to remove confusion and separate the two issues than to try to realize some vague hope that may be conjured up by the strategists at 1600 Pennsylvania Avenue, many of whom have never served in Congress, and who are advising on these problems. We should go forward with the separation of apples from peaches, and not try to mix them up in one grand stew, thinking that the result will be an elixir of success for all time.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. MONRONEY. I am happy to yield. How much time does the Senator from Arizona desire?

Mr. GOLDWATER. Five minutes.

Mr. MONRONEY. I yield 5 minutes to the distinguished Senator from Arizona, and I shall yield additional time if he should need it.

Mr. GOLDWATER. I thank the Senator from Oklahoma.

I congratulate the able Senator from Oklahoma for offering his amendment. I agree that if we were to follow the approach of the opponents, in all probability we would prevent the Federal aid to impacted areas bill being passed this year. I think any attempt to shorten the extension to 1 year would kill the bill, because of the obvious intent in that movement to make of the issue a political lever for next year, so that it can be used for furthering Federal aid to education.

I wish to make abundantly clear that Federal aid to impacted areas is not Federal aid to education. I have heard the proponents of Federal aid say time and time again that impacted areas relief is Federal aid. It is merely a form of reimbursement by the Federal Government to each school district which has been deprived of local tax resources because of certain activities of the Federal Government. It is in fact, if not in name, essentially a program of Federal payments in lieu of taxes.

That program is important in every State. I agree that we must continue it, even though I am opposed to Federal aid to education. I have sponsored legislation for years that would provide in lieu moneys in place of taxes that we in the western country cannot collect from the Federal Government.

For example, I have in mind the effort that was successful in getting the Department of Interior to provide in-lieu moneys for national parks. The Grand Canyon National Park embraces quite a little village, which can tax only two people. But in the area are about 120 students. If the school district did not have the in-lieu money, the children would be required to drive 120 miles a day to attend high school.

Under the present program, which is essentially the same as the extension of the two laws about which we are talking, the problem has been solved.

Basically, Public Laws 815 and 874 provide for Federal payment to local school districts for school construction and maintenance for each schoolchild in the district whose parent is either living or working on a Federal installation. By this means the Federal Government reimburses the school district for the loss of tax revenue resulting from tax-free Federal installations.

To cite an example, a school district in Tucson, Ariz., was in perfect financial shape. It had a little money in the bank. Then along came the Hughes Aircraft Co. The Air Force awarded that company a contract and also gave it five sections of land. The factory, which was built on tax-free land, was exempt from the payment of taxes to the school district. The district could not tax the five sections which comprised the bulk of the property. Bringing into the school district some 3,000 children put it in very bad shape. They came in under both those laws. Yet, even those laws, adequate as we think they are, do not adequately provide assistance in a case like that.

I think the proposed action is very wise, because the House has made it abundantly obvious that it will not pass Federal aid to education measures this year.

The House has made clear by the passage of a 2-year extension of the Federal aid to impacted areas bill and the National Defense Education Act that that is as far as it will go. If we encumber the proposed amendment with any more amendments and go to conference, I know that I shall be one of the conferees, and I know that we shall not——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MONRONEY. I yield to the Senator 4 additional minutes.

Mr. GOLDWATER. We shall not be able to reach an agreement in conference. The House is much stronger. The House will prevail. I hope that the Senate in its wisdom will accept the substitute offered by the Senator from Oklahoma so that we can get on with that business. We have made enough political hay out of Federal aid to education this year to last a while. We can go home and come back in January and look forward to some more of it.

The construction and maintenance of educational facilities in this country is not in the desperate shape some of our colleagues would like to believe it is. A little earlier in the session I introduced some figures that are quite interesting in this respect as to the number of working persons in the United States engaged in production.

The number of working persons in the United States engaged in production increased between 1956 and 1960 by about 1 million, as follows: All private industries, 455,000; public education, 473,000; and all other government, 87,000.

More people have gone to work in the field of education in that period than in any other segment of our society.

The same report showed that in 1960, for the first time, the average earnings in public education exceeded those in private industries, $4,752 versus $4,710. Public education has passed the average of all Government employees in 1958. The 4-year increases referred to in the publication were up, in public education, $925, and private industries, $644.

We are concerned about building schools. I wish that all building could follow the schools' examples in this country. The July issue of the Construction Review, which is published by the Department of Commerce, shows that public educational construction in the first 6 months of 1961 increased 14 percent over the same period in 1960, while simultaneously all construction had risen only 1 percent. Private construction had declined by 3 percent.

According to the same publication, the volume of public educational construction during 1961 will exceed $3 billion for the first time in history.

According to a projection of expenditures for the Federal Government and State government produced by the Committee on Economic Development, in 1968 this country will be spending, without Federal help, $28 billion a year for its schools.

There is nothing in the trend to indicate that this will stop. More school bonds have been sold this year than in any other year, and that has been the

history for the last 10 years. We are building classrooms at the rate of 70,000 a year, and the President said we need to build 60,000 a year. What we ought to do today is to take care of one bill. This has no relationship to Federal aid to education. Therefore, anyone who is a little squeamish about voting for Federal aid to education need not worry about voting for impact aid. It is not aid to Federal education. It cannot be so construed.

Mr. METCALF rose.

Mr. GOLDWATER. I do not have any time to yield.

Mr. MONRONEY. I yield 2 additional minutes to the Senator.

Mr. METCALF. I merely wished to challenge the statement of the Senator that this is not Federal aid to education. I will be glad to yield some time to the Senator to engage in colloquy along that line.

Mr. GOLDWATER. I would be glad to explain to the Senator why it is not. It is merely a payment for services that have been rendered. It is money made available to meet certain obligations which have to be met.

Mr. METCALF. Mr. President, I yield 5 minutes to the Senator from Arizona, for the purpose of this colloquy.

Mr. GOLDWATER. In other words, we merely send a bill for the average daily attendance, whether it be by Indian children coming in from the reservations or pupils of parents who work in factories on tax-free land.

Mr. METCALF. The Senator from Arizona has described this as an in-lieu tax payment.

Mr. GOLDWATER. Yes.

Mr. METCALF. This is not an in-lieu tax payment. It is not measured by the taxable value of the land taken. It is measured by the cost of educating these federally affected children.

The only time that any in-lieu tax payment can come into the picture is when it is necessary to find out whether or not there is an entitlement. After that, it does not make any difference whether the land is the least valuable land, such as we have in eastern Montana, or some of the desert land in Arizona, or whether it is the most valuable land, as is the case in connection with some laboratories in Connecticut. The money is paid out of the Federal Treasury. It is Federal aid to education.

Mr. GOLDWATER. I agree that local taxes have nothing to do with the amount of the payment. It is based on the cost per pupil. In some States it is higher and in some States it is lower. In some school districts it is higher and in some school districts it is lower. If it is not lieu money, I do not know what to call it. The principle of lieu taxes is not unusual. We have it in other segments of the Government. We have it throughout the Department of the Interior. It is not judged by local taxes. It is judged on the basis of how much it is costing to get this thing done.

Mr. METCALF. Lieu taxes, as I unstand—and we have them in other areas also—are ascertained on how much the land would have paid in taxes had it been on the local or State tax rolls. Then a payment is made in lieu of the taxes that would have been paid. In the situation we are discussing there is not any relationship to how much the land would have paid had it been on the local tax rolls.

Mr. GOLDWATER. I disagree with the Senator. When a payment of $319 is made on the basis of average daily attendance, it is all figured on the basis of $319 that could have been collected and if the $319 could have been collected from a tax source, it would have been. The school district I am talking about, in the city of Tucson, Ariz., had no problem until the Federal Government caused an impaction. Then the Federal Government did what I think is the right thing; it paid its share. It paid for the students who were going to that school, and the school district could use that money in any way it wished.

Mr. METCALF. We are in complete accord that it is the right thing to do. Let us take, for example, the so-called category B children, who live on Federal property but whose parents work off Federal property. According to the Senator's theory, the 50 percent which is paid by the Federal Government should be paid because industrial or commercial property in the area would pay about 50 percent of the taxes for the upkeep of the schools. Is that correct?

Mr. GOLDWATER. The Senator is merely stating what the bill recites. I do not see how that argument applies here. The Senator says this is Federal aid to education. I say it is not.

Mr. METCALF. Yesterday I placed in the RECORD the census report, which showed that in no State did industrial or commercial property pay 50 percent of the cost of school maintenance. In the lowest State it was 9.3 percent, and in the highest State it was less than 40 percent. The difference between what the industrial or commercial property would pay and the actual 50-percent payment, even under the theory of the Senator from Arizona, is Federal aid to education. It is an outright grant for education.

Mr. GOLDWATER. It is not an outright grant. It is lieu money because we cannot tax the Federal Government's property. That is all it amounts to.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. GOLDWATER. May I have 2 additional minutes? I will conclude very briefly. The Senator believes it is Federal education and I say it is not Federal education. Of course, we could debate this subject for a long time.

Mr. METCALF. I thank the Senator for engaging in this colloquy. I yield 5 additional minutes to the Senator from Arizona.

Mr. GOLDWATER. It is very important that we act favorably on the Monroney substitute, because if we try to clutter up the bill with any more amendments, such as the one suggested by the Senator from Michigan, I am convinced we will leave here without any expansion of these two public laws. I do not believe there is a State in the Nation which is not affected by it and the National Defense Education Act. I could dwell at great length on the shortcomings of it, but I do not intend to do so. I will reserve what I have to say in that connection until next year, when extensions will be attempted to be made over and above what we are doing today. So I urge the Senate to vote favorably for the Monroney amendment.

Mr. METCALF. Of course, the amendment offered by the Senator from Michigan has been withdrawn.

Mr. GOLDWATER. I know.

Mr. MONRONEY. Mr. President, I yield 3 minutes to the Senator from Maryland [Mr. BUTLER].

Mr. BUTLER. Mr. President, since its inception, the so-called federally impacted areas school aid program has received my support, and it is my firm intention to continue to support it. This program cannot and should not be related to the general aid to education program, however, because there is a material and substantial distinction. Impacted area aid merely compensates for extraordinary expenses occasioned by activity of the Federal Government. This is not the case with general aid.

It is ironic to note, however, that earlier this year when the President of the United States made known the administration's school aid program, he undertook to curtail drastically appropriations for its implementation, notwithstanding that it is the only part of the entire program which has been demonstrated to be necessary and justifiable and not in contradistinction of constitutional prerogatives.

Much has been said about the need for general aid, but the demand for it has been almost exclusively by the professional educators—not the school boards who control the money and are aware of their financial status and needs.

As a matter of fact, at their annual convention in May of this year, the delegates of the National School Boards Association, representing 90 percent of the Nation's school directors, overwhelmingly approved a resolution that opposed a further extension of Federal aid to education until the school boards of America express the need for such funds. Further, it is my understanding that not a single school board in the country has expressed support to the Congress for the broad general aid proposals sponsored by the Democratic administration.

Overlooked by many is the fact that in 1960 Secretary Flemming of the Department of Health, Education, and Welfare conducted a survey to which 40,000 school districts responded and only 237, mostly small, reported that they had classroom shortages or were up against their bonded indebtedness.

And notwithstanding President Kennedy's protestations that 60,000 schoolrooms per year must be built, the record shows that during the 5-year period 1956–61, 69,860 per year were built without general Federal aid.

Other inequities are inherent in any general aid bill—especially S. 1021, which was reported by the Senate committee and passed by the Senate earlier this year. These inequities are dramatically revealed by comparing the $40,600,000 that New York would have received under the bill for its 10,600-classroom

shortage with the $58 million Texas would have received for a classroom shortage of 809.

Nevertheless, notwithstanding these and many other fundamental objections, the administration saw fit to foist upon the Congress and the American people a proposal to drastically increase general funds to education while at the same time cutting back the impacted areas program which is acknowledged almost universally as being not only necessary but desirable.

Not only did the President attempt to curtail funds for the program, but in his attempt to get support for his far-reaching and unnecessary, but yet politically attractive, general aid program, he included the diminutive impacted-areas provisions in the general aid to education program.

By so doing, it became patently clear that the administration was attempting to put Representatives and Senators on the horns of a dilemma. To vote for the general school aid bill would be to vote for reduced impacted areas aid. To vote against the general bill would also be a vote against impacted areas legislation.

Some Members, like myself, feel impacted areas aid is completely necessary and justified and that a reduction at this time would be unwise. Likewise, we feel that general aid is unwarranted and unnecessary for the reasons I have already pointed out and that, in addition, it is constitutionally questionable. The obvious political design was to force such legislators to vote for the general aid bill because, as I already noted, to vote against it would be to vote against the impacted areas aid program as well. Wisely, the Senate Labor Committee in reporting S. 1021, the general aid bill, rejected the President's proposed impacted areas reductions and chose, rather, to maintain the previous level of assistance.

I, and many other Senators, nevertheless voted against the bill because of our conscientious feelings on general aid. The result was that I, and I am sure many other Senators, were criticized as being against aid to federally impacted areas. Such criticism is ludicrous to say the least, but it was a result intended by the administration.

In my own case, criticism resulted notwithstanding the fact that at that precise time a bill, S. 1109, was pending before the Senate Committee on Labor and Public Welfare introduced on February 28, 1961, by the senior Senator from California and myself that would have extended the provisions of Public Law 815 and Public Law 874 for 2 years, until June 30, 1963. Our bill antedated that which is now pending before the Senate, S. 2393, by some 5½ months and was the first introduced during the 87th Congress to provide continued relief for impacted areas.

But it matters not to me whose name is on the legislation enacted. The important thing is that it must be enacted and I shall do everything I can to be of assistance in obtaining that result. It should not be defeated because the Democratic administration chooses to put legislators in an untenable position—a position in which they cannot truly represent their people. But if it does fail for that reason, that administration should take, and be willing to accept, the full brunt of blame for its defeat. Impacted areas aid should be enacted or rejected on its own merits and should not be made part of another program promulgated on entirely different bases, and die because of stronger feelings on that issue.

In that connection, it would be well to call to mind the history of impacted areas legislation. It originated as the result of the inundation of school districts by excessively burdensome educational expenses occasioned by Federal activity in the area. In 1950 it was recognized, and justifiably so, that the Federal Government should render assistance for the very simple reason that it in no small way was the actual cause of the additional expenditures—either by taking that which was previously tax-yielding property or by causing such an influx of personnel that it was difficult for the school boards to handle the new students.

Two laws evolved as a result: Public Law 815 providing for the construction of minimum needed school facilities; and Public Law 874 providing assistance for operating expenses of schools with an enrollment of 3 percent or more of federally connected children.

During fiscal year 1960, this program benefited approximately 1,500,000 of such federally connected children. In my State of Maryland, approximately 77,000 were benefited in an amount approximating $7,425,000. Fifteen counties received aid, the greatest amounts going, of course, to the nearby counties of Montgomery and Prince Georges which received $2,271,819 and $1,952,359, respectively. The Kennedy proposed cuts of earlier this year would have resulted in a loss to Montgomery County of $1,130,116 and to Prince Georges of $951,881. Maryland as a whole would have suffered to the extent of $3,237,819. Such arbitrary cuts by the Democratic administration without prior announcement would have seriously upset previous planning in the affected counties and, as well, existing programs would have been irreparably disrupted.

The important thing, however, is that the proposed reductions were part of an overall design by the administration to ram through Congress general aid legislation by any means possible because of the greater political advantage to be gained thereby. It was an effort to force some legislators to sell their principles because of the impact the loss of impacted-areas aid would have on their States.

Fortunately, the Senate Labor Committee, with its Democratic majority, rejected their leader's decision to cut this aid for the very reason that the facts do not yet warrant a reduction. This is certainly true, and on that point, the committee stated that:

> The committee has considered very carefully the recommendations for reducing the level of payments under these two laws in the light of all of the testimony and the evidence presented, and has recommended a 3-year extension without any significant change of those provisions which would otherwise expire June 30, 1961. This extension is accomplished by simply changing the dates at the appropriate places in the two laws.

That was the view of the committee back in May of this year. It knew a cut in this aid would not only be unwise, but that it would also be extremely inequitable. Also in May, the committee was of the opinion that a 3-year extension of the 815 and 874 program was needed with little modification.

Now, approximately 3 months later, it has, in at least one important respect, completely altered its views and has decided that only a 1-year extension is warranted because:

> It is further the considered judgment of the majority of the committee that only a 1-year extension of the programs, at this time, is advisable. This position is based upon the belief that the special needs of the impacted areas should be related to the provisions of a general Federal aid to education measure designed as was title I of S. 1021 to provide broad-purpose financial assistance to school districts through the education agencies of the 50 States. It was for this purpose that section 204 of S. 1021 was drafted. Since it is the belief of a majority of the committee that, within the life span of the 87th Congress, S. 1021, or a similar measure, will be enacted into law, an extension of the impacted areas legislation for longer than a 1-year period is not warranted.

The purpose is, of course, obvious. The administration is determined to tie the general aid and the impacted areas programs together, and the committee in the statement I just read acknowledges the fact. Such an attempt will, of course, be much more significant next year—election year—than it is now. The administration, again, will be attempting to extract votes from legislators by unusual means.

That a 1-year extension is not a reasonable extension is evident from section 204 of S. 1021 referred to in the above committee quotation. Section 204 was approved by the committee in May and passed by the Senate that same month. That section calls for a study and report by the Commissioner of Education which was to be submitted by January 1, 1963. It was obviously presumed in May that that much time would be necessary for such a study and report. Now, apparently from some unknown reason, not only is the extension not necessary, but the report and study are no longer needed.

I support the pending Monroney amendment because I feel it is essential and necessary that this program be extended for a minimum of 2 years. During that period a study could be undertaken to justify the program's continued existence thereafter or could determine the extent to which the program should be curtailed.

I said earlier that the impacted areas aid program should be enacted or rejected on its own merits and should not be a part of any other program because the problems which give rise to impacted areas aid are peculiar to that program alone. The pending amendment which also provides for a 2-year extension of the National Defense Education Act

would couple two such inconsistent programs. I would prefer that these two issues, which are separate and distinct in theory and approach, could be voted upon separately. I shall, however, vote in favor of this amendment notwithstanding the fact that the National Defense Education Act will also be extended, and I do this because it is imperative that impacted areas aid be passed at this session of Congress. There may be many arguments in favor of extension of the National Defense Education Act also. However, separate programs, in my opinion, should be treated separately. Nevertheless, it is my hope that all Senators will vote in favor of the Monroney amendment so that impacted areas aid can be continued without change.

Mr. MONRONEY. Mr. President, inasmuch as the opposition does not have a speaker available at this time, I ask unanimous consent that I may suggest the absence of a quorum, without the time being charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MORSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). Without objection, it is so ordered.

Mr. MORSE. Madam President, I yield myself 5 minutes.

I shall state to the Senate what parliamentary procedure I shall follow at the end of the time on the Monroney amendment. I shall offer an amendment to the Monroney amendment which proposes to extend the impacted areas and NDEA program for 1 year each instead of the 2 years proposed in the Monroney amendment. The Parliamentarian assures me that the amendment is a proper one. That amendment will be offered on behalf of myself and the Senator from New York [Mr. JAVITS]. I think it is very important, Madam President, that the recommendation of the President be presented to the Senate for the first vote on this subject.

As I said yesterday and earlier this morning, I bespeak the position of the President. The President has made his position very clear in a letter which he sent to the majority leader this morning, in which he expressed as his judgment, for the reasons set forth in the letter, that the program be extended for 1 year. I shall read the President's letter again:

SEPTEMBER 9, 1961.

DEAR SENATOR MANSFIELD: You have asked my views concerning legislation to extend aid for schools in federally impacted areas and to extend the National Defense Education Act.

As you know, my recommendations to the Congress for legislation to help achieve educational excellence in this country included continuation of the federally impacted area program and extension and strengthening of the National Defense Education Act. I still believe that both of these steps are urgently needed.

An extension of these programs should make it possible for the Congress to make a careful review of their content and costs next year. School aid to federally impacted areas could then be reexamined to update its operation and effect possible economies. Also, the increased demands which are being thrust upon this Nation make it especially important that we give consideration next year to strengthening those provisions of the National Defense Education Act which improve the quality of education in this country.

Therefore in my judgment a 1-year extension of school aid for impacted areas and the National Defense Education Act provide the best assurance that reevaluation of legislation affecting education will take place early next year.

Sincerely yours,

The letter is signed by the President.

Madam President, the Senate should keep in mind the recommendation of the President in regard to this matter, because I can assure the Senate—if there is any doubt about the fact that his state of the Union message will give emphasis to this program—that the President proposes to make Federal aid to education a major part of his program next year. The President feels—and rightly so, I believe, the opponents to the contrary notwithstanding—that enactment of the Monroney proposal would to a very large extent reduce the possibility of obtaining favorable consideration of a general aid-to-education bill next year, for it would give to Senators who are not in support of any Federal aid to education at all, except in the limited fields of the National Defense Education Act and the impacted areas acts, a good excuse to continue to withhold support from an aid-to-education bill, because their local interests would then have been taken care of, and that matter is of primary concern to that group.

I believe the President was entirely correct when, during the great campaign he conducted in 1960, he pledged to the American people a general aid bill for the school children of the Nation. I think his leadership should be followed procedurally, because of the second point I now wish to raise in opposition to the Monroney proposal. I wish to point out that a 1-year extension of both the National Defense Education Act program and the impacted areas programs will not injure even one school district, but will extend to each school district the existing programs. When we return in January, we can consider anew the entire matter of general aid to education and can consider a reappraisal of both the National Defense Education Act program and the impacted areas programs in light of the facts which will be presented to the President during the intervening period.

This leads me to my third point, Madam President—namely, that it is being assumed that there is nothing at all wrong with the impacted areas program. But, Madam President, actually there may be a great deal wrong with it. Earlier this year—as I have pointed out in the debate—the President proposed a general tapering off or reduction of the National Defense Education Act program, in order to do away with what he considers the waste and the unjustifiable expenditures to some school districts. At the time, as chairman of the Education Subcommittee, I argued against the President's recommendation; and members of the subcommittee went with me to a series of conferences during which we convinced the administration that its proposed tapering off of the program should be postponed until all the facts were obtained.

It will be observed that title II of Senate bill 1021—and this is the origin of section 204 of that bill, as passed by the Senate—calls for a study and an investigation of the administration of the federally impacted areas program, for the purpose of seeking to obtain the facts and to bring an end to the waste and the unjustifiable expenditures under the program.

The PRESIDING OFFICER. The time of the Senator from Oregon has expired.

Mr. MORSE. Madam President, I yield myself an additional 5 minutes.

The PRESIDING OFFICER. The Senator from Oregon is recognized for 5 minutes more.

Mr. MORSE. Again, Madam President, I report to the Senate that the President is very much disturbed—and justifiably so—about preliminary reports which he has already received from the Comptroller General. Yesterday afternoon, in the course of my speech, I discussed some of them. I pointed out, not the general pattern, but that in some instances school districts are receiving, under the federally impacted areas program, funds which, in fact, they ought not be entitled to receive. Furthermore, I made no exception of my own State. My very able colleague [Mrs. NEUBERGER] is now presiding over the Senate, and I want her to know that yesterday I cited, as one of the examples brought out by the Office of Education, Gearhart, Oreg.—a fine resort and residential town in which many retired persons and many working persons live. It is receiving some funds under the federally impacted areas program, although there is no Federal project in Gearhart or in that district. But some residents of Gearhart work at Astoria, at a Naval Reserve base; and others work many, many miles away on a dredge whose headquarters is in the customs office in Portland, Oreg. However, all of us know that the expenditure of funds under the federally impacted areas program should not be justified under such circumstances.

I cited the report of the Comptroller General—and yesterday I placed the entire report in the RECORD—on similar instances. In one of them a surgical supply manufacturing company is selling surgical supplies to the Federal Government at a point located miles away from the school district concerned. Yet, because a few of its customers happen to be Federal agencies, the school district is receiving funds under the federally impacted areas program, merely because some persons who live in that area work for the surgical supply company.

The President is concerned about such unjustifiable expenditures. He was so much concerned about them that in the first part of the year he wanted to taper

off the entire program. But we convinced him that that would be a mistake.

The President has called for all the facts; and the Senate Subcommittee on Education has asked the Department of Health, Education, and Welfare to submit all the facts to it. Next year, when we have all the facts before us, we can decide to what extent the program should be modified.

So I deny the claim that there is nothing wrong with the Federal program. There are some abuses of it and there is some misuse of funds, and they should be corrected.

Next, I wish to make the point that all of this is linked to a general education program, and we should keep it linked in that way. We should not break up the program, so that we provide a politically expedient opportunity for those who are opposed to Federal aid to education to satisfy their own local, selfish interests, while proceeding to deny to schoolchildren who do not live in such so-called federally impacted areas the aid they should receive.

Madam President, I wish to say there are many, many school districts that are more impacted with children, from the standpoint of their difficulty in meeting their educational needs, than are the overwhelming majority of the school districts which are now receiving Federal funds under the aid program.

The PRESIDING OFFICER. The time of the Senator from Oregon has again expired.

Mr. MORSE. Madam President, I yield myself an additional 5 minutes.

The PRESIDING OFFICER. The Senator from Oregon is recognized for an additional 5 minutes.

Mr. MORSE. Furthermore, Madam President, we should keep in mind the fact that 63 percent of the school districts which are receiving funds under the federally impacted areas program receive less than 5 percent of their budgets from the federally impacted areas program funds. Only 25 school districts—as I pointed out yesterday—receive in the neighborhood of 60 percent or more of their budgets in that way.

So this program is not of the vital importance to many of the school districts that some of its ardent proponents would have us believe. I think the President is quite correct when he says to the Senate, "I want it for another year, I urge it for another year. Congress will then take a look at it, in connection with the education program, and Congress will then extend it on the basis of the facts as they are presented."

Madam President, every Member of the Senate knows that next year Congress can extend the National Defense Education Act program and the federally impacted areas program consistent with the facts which will be brought out then, and modify them in accordance with whatever the facts warrant. We hope, in connection with a Federal aid program, that we can adopt legislation as we did this year by means of Senate bill 1021, so as to benefit the forgotten two-thirds of the schoolchildren of the Nation. I hope it will never be forgotten in this debate that what is sought by the amendment is Federal aid for only one-third of the American schoolchildren, and nothing for the other two-thirds.

I come now to the fourth point, which is the most delicate of all, but is one which we ought to face up to. There has been much discussion about the fact that if the Monroney proposal is adopted, we shall not have to go to conference, as if that were an argument for adopting the amendment. To the contrary, I think it is an argument against adopting it, because we all know the attitude that has been taken by the House of Representatives. We all know that the attitude of the House this year on too much legislation, including education legislation, has been a take-it-or-leave-it attitude. I think we ought to find out, if we believe in a bicameral form of government, whether the House will confer with the Senate, according to our constitutional processes, and iron out, conscientiously, any differences that exist between us.

Of the many reasons why we ought to vote for a 1-year extension, rather than a 2-year extension, I think an important one is to make clear to the House that we believe in a conference system. We have been told too many times this year by the House that we can either take it or leave it, because if we do not take it there is a serious question as to whether there will be a conference. Some Senators have said to me in the cloakroom, "Are you sure the House will go into a conference?" I have said, "In my judgment, that is not material." We have the job of passing, in the Senate, legislation that we think on its merits ought to be passed. The House has the responsibility, I say most respectfully, of conforming itself to the legislative processes of the Congress, and those processes involve conferences.

We also ought to face up to the fact that the House in many instances this year, has followed a procedure in which Members of the House have not had an opportunity to vote on the substantive merits of legislation before them.

It is for those reasons, and others I may advance in the closing moments of this debate, that I shall urge the Senate to support the President, and give to the schoolchildren and parents of this country their best chance for a general education aid bill next year, by adopting a 1-year extension, so there will be before us for consideration in the legislative program of next year the National Defense Education Act and the federally impacted areas legislation.

I have never concealed that desire as a matter of sound legislative procedure in this body. What we are after, in the long run, from the standpoint of our national security, is the building up of the strength of our educational system. I am sure most people in this country believe that can best be done by a general Federal aid to education bill. It was the promise the President made over and over again in his campaign of 1960. It was the promise the President made this year in connection with his messages to Congress in regard to education. It is a promise which, as parliamentarians, we should help the President keep.

Therefore, I hope the Senate this afternoon will adopt the Morse-Javits substitute for the Monroney amendment, which will extend NDEA and the impacted-areas program for 1 year, and thereby not do the slightest damage to a single school district in this country.

Mr. CLARK and Mr. STENNIS addressed the Chair.

Mr. MORSE. The Senator from Pennsylvania must leave. I first yield 5 minutes to the Senator from Pennsylvania.

Mr. CLARK. Madam President, debate in the Senate has become a futile art. I am sure most Senators deplore it. We are about to vote on one of the most important propositions to come before the Senate in this session. I am not naive enough to think that any arguments I might make during the course of this discussion—one cannot call it a debate—would change any votes, but it is a bit discouraging to note that, as I rise to say these few words, there are on the floor only three Democrats and one in the chair, and, as I count them, five Republicans. Surely, the art of debate in the Senate has fallen into substantial disuse. What we say now is said only for the RECORD, and perhaps for posterity, and not for the purpose for which Senate debate was intended, of convincing the doubtful.

Yet I would nonetheless like to adduce three reasons why all Senators should vote to support the substitute amendment of the Senator from Oregon, which will confine the extension of aid to impacted areas for 1 year and the extension of NDEA for 1 year, and why we should vote against the proposal of the Senator from Oklahoma to extend both programs for 2 years.

The first reason is that, if we support the Senator from Oklahoma, and not the Senator from Oregon, we shall have killed all reasonable chance of Federal aid to education until after the 1962 elections. We shall have killed it for the remainder of this Congress. Let no one think to the contrary. Those who vote against the amendment of the Senator from Oregon, and in support of the amendment of the Senator from Oklahoma, whether they intend it or not—and I charge no motivation to any Senator—are voting to kill Federal aid to education for the remainder of the 87th Congress.

In my opinion, it is not possible to support the Monroney amendment and to convince any reasonable man that the end result will not be the death of Federal aid to education for the remainder of the 87th Congress.

My second reason for urging support of the Morse amendment, in opposition to the Monroney amendment, is that I believe the dignity of the Senate is involved. Throughout this year we have had gun after gun pointed at our heads by the Members of the other body. We have been arrogantly told, "If you do not do what we say, we will not even go to conference." We are now being told that if we dare to limit impacted areas

and NDEA legislation for as little as 1 year, that is the end of the matter.

We had this issue on the floor of the Senate not so long ago in connection with coverage of veterans' life insurance. The Senator from Louisiana [Mr. LONG] said, "The issue is, Shall the Senate surrender to the House, or are we a body of equal dignity, of equal importance?"

The answer of the Senate was clear. We shall not surrender our legislative prerogatives under the threat that if we do not there will be no legislation passed. We believe we have equal dignity in this body with the other body to decide what is wise in terms of legislation.

We do not wish to have it said, "The Senate only proposes, while the House disposes."

When the Senate voted with the Senator from Louisiana last week on that issue, it did the right, the wise, and the just thing. I hope it will be equally right and wise and just on this issue.

The third reason why we should support the Senator from Oregon and reject the amendment of the Senator from Oklahoma is applicable only to those of us on this side of the aisle. Let no Democrat delude himself, after the vote, that he can vote against the Senator from Oregon [Mr. MORSE] and remain a supporter of the President of the United States. The President of the United States has laid it on the line. It is there for all to see. He has said, "I want a 1-year extension, so that I can have some opportunity next year to make good my program to help the little boys and little girls in our schools; to help roll back the Communist menace on the intellectual front; to help see to it that the boys and girls of America get the best education in the whole wide world, which they can never get without Federal aid to education."

Madam President, I propose to support the President of the United States. I hope an overwhelming number of my colleagues on this side of the aisle will take the same stand.

That brave young man, fighting for freedom, fighting for a strong America, fighting for a secure America, knows that he must have Federal aid to education to accomplish his goal. He has asked us for a very little thing—a very little thing, indeed. He has asked us to give him an opportunity next year to get the House of Representatives back on the trail of the New Frontier, to give him an opportunity to persuade the voters of America next year that his program is as right and just as we thought it was when we voted for S. 1021 by a large majority and sent it to the House of Representatives.

I plead with my colleagues to support the President, and in so doing to help make America secure and free.

Madam President, this is to some extent an emotional appeal. I feel deeply about this subject. People may say, "What difference does it make whether we extend the law for 2 years or 1 year?" It will be said, "How technical, how legalistic, can you get?"

There are times in the Senate when the issue is drawn. It may be a narrow issue. It is a narrow issue, as small an issue as the extension for 12 months or the extension for 24 months of the law, yet the issue is clear. It is there for all to see. It has been drawn by the President of the United States. Let no one run away from it. Let no one be deluded in his thinking about the Monroney amendment.

If the Monroney amendment shall be agreed to, we shall have sold the boys and girls of America and their educational system down the river. Second, we shall have repudiated the President of the United States. Third, we shall have decided for all time that the Senate of the United States will be the doormat of the House of Representatives.

Mr. MONRONEY. Madam President, I yield myself 2 minutes.

I am very sorry my distinguished colleague has assumed the attitude that those in favor of the Monroney amendment, and particularly the author of the amendment, are selling the schoolchildren down the river for all time.

The senior Senator from Pennsylvania knows as well as I know, and as well as do the other Members of the Senate, that many times in many difficult places we have joined together to try to effectuate a satisfactory and overall Federal aid to education bill.

I yield not to the Senator from Pennsylvania nor to the chairman of the subcommittee as to devotion in trying to improve the education of the children of America.

I believe we should be realistic in regard to the problem. It is foolish to try to use this very vital part of our educational system as the chromework which will mysteriously sell, in some way, somehow, a general aid to education bill.

A hypnosis has gone through this Chamber that unless the two issues are married for all time there will be no opportunity to pass a Federal aid to education bill.

I feel the junior Senator from Oklahoma and the senior Senator from Pennsylvania and many others in this Chamber know as much about the legislative techniques as the present occupant of the White House. Certainly the President has been busy enough with international affairs that he has not been reading the minds of Members of the House and Members of the Senate. I would hate to think that the President is devoting his time to consider whether it is more important to have a 1-year or 2-year extension of the school program, when the balance of civilization hangs tenuously between all-out nuclear war and peace.

I know where the President is getting his information. He is getting it from a group of legislative liaison men, many of whom have never had a day's experience in the Congress, some of whom are fresh from the ivy-covered academic halls, who sit down at 1600 Pennsylvania Avenue and dream up what Congress ought to do.

I have fought for the President's programs in many ways, some when it hurt in my State. I have fought for foreign aid and many other things when there was no vote profit.

I do not wish to be told that we have a choice in regard to selling the young people of this country down the river, because I do not wish to have a group of legislative and liaison people give commands to the Senate.

I am fully aware of the situation in the House. I served in the House for 12 years. I do not know how many members of the Rules Committee are still in town.

If there is any difference between our bill and the bill passed by the House, it must go to the House, and it must be reported by the Committee on Rules before it will get a rule.

Suppose we send a 1-year program to the House. What is so vital and so sacred about that?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MONRONEY. Madam President, I yield myself 2 more minutes.

Suppose we send a 1-year program to the House, which is considered to be so sacred. Do Senators really believe it will come back a 1-year program? Of course, it will not. The difference will be split down the middle, if the conferees ever get out of the conference, and it will be an 18-month program. It will end in the middle of the school term.

My amendment has been very carefully thought out. It was not introduced in opposition to anything. It was introduced in favor of the program.

The National Education Association has probably devoted more time and energy to getting a real Federal aid to education program than any other organization in the country. This association has taken no position on the vitality and the necessity for the 1-year program versus the 2-year program.

We have a right to be Senators, surely, but I do not feel that we would be accepting a subordinate position simply because the House has sent to us a good 2-year bill, a bill which incorporates the National Defense Education Act, which the subcommittee has suddenly discovered has some future value, at least, and should be added as an amendment.

If we are correct in that regard, perhaps we are correct in the 2-year extension on both acts.

Certainly the bill was not a finished product when it was sent to the Senate, if that provision was so vital it had to be offered as an amendment.

I think we are entitled to vote for what we feel is proper. I feel the Federal aid to education will be benefited and not damaged by separating the two approaches. We should not try to make a glorious mixture of putting in the proposal all kinds of spices in the hope of making it appetizing to those who otherwise would not favor Federal aid to education.

Mr. STENNIS rose.

Mr. MONRONEY. Madam President, I am happy to yield such time as he may need to my colleague from Mississippi.

Mr. STENNIS. Madam President, will the Senator yield me 5 minutes?

Mr. MONRONEY. I yield 5 minutes to the Senator from Mississippi.

Mr. STENNIS. Madam President, I thank the Senator for yielding to me, and I commend him for the very fine fight he is making for a very important and sound amendment.

I point out that only a few weeks ago we had a very splendid debate, in which it was stoutly maintained that to be on solid ground it was necessary to have a 5-year program to plan for the major parts of our foreign aid program. Despite that, with reference to our own schools in impacted areas we are told that 1 year is sufficient for the program.

Madam President, what is proposed really is not a part of a Federal aid to education program. It is the proposal to espouse an old, established policy of 20 years' standing, which has to do more with the defense posture of this Nation than any other single element.

When I became a Member of the Senate in 1947 there was not a more confused subject handled on this floor than the effort to get authorizations and appropriations for various school districts in areas all over this Nation. During the war there was the old Lanham Act, the original legislation on the subject. After an annual battle and scrap, trying to devise formulas to leave some schools in and put others out, general legislation was passed in 1950, which has been the established policy of the Nation and the Congress, and has been noncontroversial, ever since.

Federal aid to schools in federally impacted areas has been the established policy of the Congress for the past 12 years. Legislation providing assistance to school districts to help meet their operating and maintenance expenses where such districts are providing education for federally connected children was first enacted in 1950. The wisdom and justice of the policy is hardly an issue anywhere. It is only fair that a proper proportion of the unusual and additional expenses made necessary by the increased enrollment resulting from Federal activities in a community be borne by the Federal Government.

The Congress cannot afford to delay enactment of reasonable and effective extension of Public Laws 815 and 874 of the 81st Congress. Moreover, the question should not be confused with the more controversial question of general aid to education. This is not primarily a school aid program after all, but rather is a part of our defense posture. The conditions making this assistance necessary and proper have been brought about by the Federal Government in its continuing efforts to keep our defense forces strong.

Under Public Law 815, payments are made to help build schools in districts burdened with substantial increases in their school membership due to Federal activities. Under Public Law 874, payments are made to school districts to help meet their operating and maintenance expenses where such districts provide education for federally connected children. Also, both laws provide for free public education for children who live on military bases or other Federal reservations where the local education agencies are not able to provide free public education without such assistance.

Local and State school authorities and the legislatures of the several States are compelled to plan ahead in order to provide funds and facilities with which to provide for their educational needs. School business is big business. It is one of the most important functions of our State and local governments. It is absurd not to anticipate needs as far in advance as possible and to carefully plan to meet them. Those who have the responsibility to make and execute these plans should have the fullest cooperation of the Congress in the matter of providing for federally connected children.

Much has been said recently of the necessity for a long-range program for foreign aid. It has been argued that it is poor business for this Nation to attempt to operate such a program on a year-to-year basis. It was urged that the 5-year program would permit wise planning and would support necessary commitments. As a comparison, certainly everybody knows that adequate school facilities cannot be provided simply on a year-to-year basis.

Since 1950 and the original enactment of this law, extensions have regularly been for 2 or 3 years. It is rather unreasonable that we should now propose to extend the law for only 1 year. It is inexcusable that this great problem should be kicked around for purely political reasons. We should be entirely above the practice of baiting areas who have assumed such a large defense responsibility for the entire Nation as have these communities whose schools are so greatly affected by Federal activities. It would be tragic for the Congress to extend this law for only 1 year in order to build political pressure for the enactment of a general aid to education bill in the next session.

I want to say as much, also, for the proposed extension of the National Defense Education Act. The need for an adequate extension of this program is as compelling as is the need for extension of aid to impacted areas. The National Defense Education Act expires on June 30, 1962. The program is most vital to the welfare of our country and is an essential national defense measure. We cannot afford uncertainty as to the life of this program. The result would be to slow down our efforts to provide an adequate supply of trained manpower at a time when the need is of such tremendous importance to our national defense.

Again, let me point out that planning in support of such a program will greatly suffer if we fail to act now to extend this program beyond June 30, 1962. It is entirely possible that with no further assurance of Federal grants after that date, the adoption of State budgets for colleges and other institutions of high learning, without provision for this program, will prevent participation in the program, even if Congress should later extend it. At the next session of Congress, it can very easily take several months before we can enact an extension of the law. The effect would be to slow down and discourage active participation in a vital defense program. Needless delay will produce tragic results.

Let me appeal to the reason and commonsense of the Senate in this matter. We cannot afford to gamble on the life of functions so necessary to our national welfare and defense. There can be no harm done in extending both the programs for impacted areas and the National Defense Education Act for 2 years. On the contrary, if we force these essential activities to continue under the uncertainties involved with extensions for shorter periods of time, we are skating on thin ice and recklessly risking the best interest of the Nation in these most critical times.

I strongly urge that the Senate extend these vital programs for the necessary 2-year periods.

Madam President, within the past few years, the United States has been establishing new missile and bomber bases and radar sites that have to do with our early warning systems. We are placing a great many of the large installations in relatively remote areas, in rural school districts. Such school districts are hit with an impact of 500, 750, or a thousand children resulting from those installations. There is no opportunity for such communities to cope with that kind of development.

Today is September 12. School terms all over the Nation are beginning. Federal aid to education in impacted areas expired months ago, and we are still debating, not the merits of the legislation, but whether its extension shall be for 1 year or 2 years. Confronted with the task of taking care of additional children, how can the trustees of a school board, local, or State, make any kind of definite, progressive and constructive plans, if the enactment of legislation is running behind by 90 days? Trustees of school boards will not know whether the proposed legislation will be available for 1 year or 2 years.

The program is so well established that, with all deference to everyone, I think a 5-year term for the program should be established. The necessary money should be appropriated in proportion to the existing need, according to a new formula, if necessary, depending upon the facts. But let the program be definitely established so that school authorities will know that there will be a definite program, that formulas are prescribed, and that the necessary money to meet that policy will be forthcoming.

Again I commend the Senator from Oklahoma. I hope he can put the subject to rest. I repeat that the bill on its merits has nothing to do with the Federal aid to education measure. Within the past few weeks I believe I voted three times against amendments to appropriations bills or other proposed legislation which would have extended Federal aid to impacted areas, even though I was strongly for the program, as was the case with many other Senators.

But now the program is having its day in court. Let us not trim it down or let uncertainty and confusion bring the program into disrepute because someone hopes to inaugurate next year a new policy on a subject that is different, even though education is the basic subject matter on both.

I hope the Monroney amendment will be agreed to and that this subject will be put to rest. Let those who are involved be assured that in determining the policy Congress will not delay the program or confuse it with other programs this year or any other year.

Mr. President, I yield back the remainder of my time.

Mr. MORSE. Madam President, I yield to the Senator from Rhode Island [Mr. PASTORE] such time as he would like.

Mr. PASTORE. Madam President, I think the question confronting the Senate today is a very simple one. We are not debating whether or not help for impacted areas should be tied in with our general philosophy of aid to education in the United States. That question was already resolved.

The question that confronts us today is, Shall we extend the proposed legislation for 1 year or for 2 years? I realize that a great deal has been said about blackjacking someone into doing something he would not choose to do. The fact is that insofar as the position of the senior Senator from Rhode Island is concerned, the question of whether the program is extended for 1 year or 2 years is purely academic. I could live with a 2-year extension of the act. I could live a 1-year extension of the act. But the controlling consideration that will govern the vote of the senior Senator from Rhode Island is the fact that we have before us a letter from the President of the United States which I think deserves our attention and some consideration on the part of Senators. The President of the United States has said: "Extend this act, but extend it for 1 year only. I have many problems that have to do with education generally in the United States of America" the President says. "I want a little more time to reappraise the situation, and I shall come back to the Congress of the United States in the first part of 1962 and give you an educational plan that will take care of every child in these United States."

That is how fundamental it is. Therefore, I am inclined to go along with the administration position that it should be extended for 1 year. We should support a 1-year extension if only to accommodate the President of the United States. The President is not going to turn his back on the impacted areas. Neither do I believe that Congress is going to turn its back on the impacted areas. I believe that neither he nor we will do that no matter what evolves here today.

However, there are many Members of the Senate who for a long time have been fighting for an adequate educational program for all schoolchildren of the country. They too deserve consideration. My position is a simple one. I have stated it. I am going to support primarily a 1-year extension because I think it is part of the sincere thinking that in the long run it will do more for all the schoolchildren of America and, therefore, for America itself. That is the plan that is being advocated by the President of the United States. We in the Senate this afternoon should not turn our back on the one President who in his whole philosophy has demonstrated more concern, more consideration and more support for the schoolchildren of this country than any other individual in a position of power and responsibility. I would hope that the extension would be made for 1 year, so that we can review this whole matter in the early part of 1962 as part of an earnest effort to perfect our overall educational program.

Mr. MORSE. I thank the Senator for his comment. I now yield 1 minute to the Senator from New York.

Mr. JAVITS. Madam President, this is not a day upon which I wish to engage in active debate here in the Senate. I would not be here at all were it not for what I consider to be a highly important duty to my constituents and to the country.

I believe that the proposal which will be made by the Senator from Oregon, in which I have the honor to join him, is the soundest proposal, and the one most likely to advance the defense of our country. Everything must be tested in that crucible.

I believe educational facilities afforded the children in this country are sadly deficient, and I believe that the proposal for a 1-year extension is best adapted to advance the national interest in respect of doing what needs to be done about our educational plan.

I have only one further word to say. I believe that every Member who votes for a 1-year extension does so knowing fully what rides on the vote, namely, the whole hope of achieving a major accomplishment in respect of our Defense Establishment and in respect of our educational plan, and also understands that there is no question about the continuance of either of these bills insofar as the affected people or the affected institutions are concerned.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MONRONEY. I yield 1 more minute to the Senator from New York.

Mr. JAVITS. By making this extension we will put ourselves in the best position to act with the sense of national responsibility that should animate us in this matter, and that purpose is best served by an extension of 1 year.

I should like to point out that at my request the distinguished Senator from Oregon will put before the Senate these matters separately, seeking a vote on the aid to impacted areas for 1 year and an extension of the NDEA for 1 year, in order to give the Members of the Senate an opportunity to evaluate their positions in respect of these rather distinct pieces of legislation.

Mr. AIKEN. Madam President, will the Senator yield?

Mr. MORSE. I yield such time as the Senator may require.

Mr. AIKEN. I would be interested in the Senator's proposal if it meant the extension of the NDEA for 2 years. Most money for education in Vermont is raised at town meetings—the town being the unit of government—and these meetings are held on the first Tuesday in March. Therefore it is unlikely that new legislation would be enacted in time for the towns to engage in their work for the coming year unless NDEA were extended for 2 years. I have no objection to extending the impacted area legislation for 1 year, but I would want NDEA legislation extended for 2 years. Otherwise we not only would have to have 246 special town meetings all over the State to raise the money, and undoubtedly a special session of the legislature also, because towns and the State would be short of money if they were relying on the Federal law being extended to provide that money. So we would find ourselves embarrassed.

Mr. MONRONEY. I ask unanimous consent that the name of the distinguished junior Senator from Pennsylvania [Mr. SCOTT] be added as a sponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MONRONEY. I yield such time as the Senator from New Hampshire may desire.

Mr. COTTON. Madam President, as one of the Senators who have joined the distinguished Senator from Oklahoma in sponsoring his amendment for the extension of both of these programs for 2 years, I wish to take only a few moments to express my opinion that this is the commonsense, reasonable, rational approach if we want to accomplish something and if we wish to insure an orderly continuation of these two vital programs.

It is all right to talk about the request of the President of the United States that there be an extension for only 1 year. Certainly, even though I stand on this side of the aisle, I would be willing and ready at all times to consider the wishes of the man who is charged with the leadership of this Nation at this time on any subject.

However, Madam President, it is almost amusing to realize how various people continue to follow a will-o'-the-wisp in their determined desire to have federalized education of their own choice.

Year after year since I have been a Member of Congress I have seen Federal aid to education go down to defeat in Congress after Congress. If there ever was a time when there were probabilities in favor of its passage, it was during this first session of the 87th Congress. We had a new President, and a popular President, in all the fresh bloom and blush of his honeymoon in the White House. And the President had a Congress with a 2-to-1 majority. Still, Federal aid to education along the lines that the majority so persistently demanded is again defeated for this session.

Madam President, I cannot refrain from saying that anyone who can read the handwriting on the wall of the mood of the other body should be able to face the reality that all we can hope to do in this session is to extend for 2 years the two vitally needed education programs provided for in this bill.

I cannot refrain from commenting and serving notice that a plan of returning certain tax funds collected in the States to the various States for use in education, as determined by the individual States themselves, is the method which will eventually have to be used for a national program of educational assistance. This is not only the most economical method, as the money is collected at home in the States and spent at home,

but it also eliminates the need of a bureaucracy in Washington.

Therefore, as soon as Congress reconvenes in its 2d session of the 87th Congress I intend to press even more vigorously for the passage of a program that will return to the States certain tax funds collected within the States.

My own bill, utilizing the tax on cigarettes, seems to me the easiest to determine and administer, because the records show exactly what taxes were collected in each State, and the return of these funds to the State treasury is very easily administered.

However, I am not wedded to the cigarette tax, and will support any Federal aid to education program which uses tax funds collected within a State, provided the source is easily determinable.

The money goes to the States; and just so long as a program is administered from Washington, the seeds of racial and religious difficulties will be in the bill and will kill it. So let us be on notice that at the next session we should try to get a Federal aid to education bill which is practical and feasible and can be passed.

In the meantime, the most sensible thing to do is to agree to the House extension for 2 years which will require no conference and will require no action on the part of the House.

As one who served for 8 years in the House of Representatives, I regret some of the statements which have been made on the floor of the Senate about the body at the other end of the Capitol. There are people in this country today who are grateful to the House of Representatives for the staying power and stamina it has exhibited in holding the line on some of the extravagant proposals of the last few months.

As one who earnestly and honestly desires Federal assistance for the education of our youth, the most important field of endeavor we can have in this country, the most vital in view of intelligent and trained leadership which we must produce at this time in world history; as one who honestly desires a reasonable, sensible, safe, and practical means of aiding education at home, and not imposing the will of the Federal Government on the communities, school districts, and States of the Union, I desire to see these two programs continued for 2 years, so that Congress may have time in which to work on general education legislation.

I am confident that in supporting the Monroney amendment we are actually aiding the President of the United States and the United States, regardless of what the President may have been prevailed upon to say to us at this time.

Mr. MONRONEY. Madam President, will the Senator from New Hampshire yield?

Mr. COTTON. I yield.

Mr. MONRONEY. Is it not also true that according to the timetable by which we all know we are working, the House is likely to be at home after next Saturday, and that the Rules Committee of the House has probably completed its work for the year? The consent of the Rules Committee would be required to send the bill to conference.

If all the miracles should happen, and there could be a conference between the Senate and the House on the disagreeing votes of the Senate and the House—1 year, in the Senate bill, 2 years in the House bill—the bill would still be in danger of missing the last supplemental appropriation bill, which has already started on its way through the House.

So even if this difference could be resolved and the difference split as best we could hope to do, by reporting an 18-month bill, if in the Senate we passed a 1-year bill we would still end without funds to implement the bill, because the House will already, perhaps, have passed the last supplemental appropriation bill, and it would be in process of going through the Senate.

This is an important consideration, since the issue is not one of transcendent importance to Federal education. There will be a great surge of power upon a general aid to education bill if it contains a provision for defense impacted areas or national defense education. It will automatically carry over onto the shoals of political disagreement, racial disagreement, and religious disagreement, and make the bill difficult of passage.

But we will be doing a little bit of bright work if we go through with what is recommended by the committee today.

Does the Senator from New Hampshire agree?

Mr. COTTON. Madam President, will the Senator from Oklahoma yield me half a minute?

The PRESIDING OFFICER. The Senator from Oklahoma has 3 minutes remaining, all told.

Mr. MONRONEY. Madam President, I yield 2 minutes to the Senator from New Hampshire.

Mr. COTTON. I shall need but 1 minute. I would be less than frank if I did not say that even though the Senate passed a bill providing for only 1 year, my hope is that the need for these programs would impel the other body to go along with us and find some way of joining with us.

However, I agree with the Senator from Oklahoma that the safe, prudent, and sensible thing to do is to make certain that there will not be a slipup by not passing the 2-year program.

I cannot refrain from adding, as a Senator from New Hampshire, that my State has the same problem Vermont has, namely, that if a 1-year program is passed, we will be in trouble, because of the time of the year in which the State has to make allocations.

Mr. PASTORE. Madam President, will the Senator from Oregon yield me 1 minute?

Mr. MORSE. I yield 1 minute to the Senator from Rhode Island.

Mr. PASTORE. Madam President, I have the highest respect for the House of Representatives—for their integrity, their patriotism, their responsibility, and their will to do what should be done for the welfare of the people of the Nation, and simply because the Senate votes a 1-year extension and the House has voted a 2-year extension, I am at an utter loss to understand the implication that the House will simply pack up and go home, when the difference could be resolved in conference in a half hour.

There are some Senators who hope that if the act is extended for 2 years, that will be the death knell of a general education bill. There are some who feel that if the act is continued for only 1 year, there will be less possibility of the President of the United States making a reappraisal and coming back to Congress next year for further consideration.

I feel that the propositions are absolutely disconnected from one another. They may be wrapped up in the same overall problem facing the people of the country with relation to school construction, education, aid, and everything else which goes into the process of educating our children. But the fact is that those who say that these impacted area programs should be disjoined are those who are hiding behind the 2-year extension in the hope that it will kill Federal aid to education. That is quite apparent from the undertone in all their remarks.

I submit that the two programs are disconnected. I think we should give aid to impacted areas. In my State there are 8,000 children who are involved. I think it would be a letdown on the part of the Federal Government if we turned our backs on those children and their schools and discontinue this program without at least giving the people of Rhode Island notice.

We in Rhode Island have been able to provide for our own education needs. When I was Governor of my State in 1947, I inaugurated a whole new tax program to supplement the salaries of schoolteachers in Rhode Island. We have continued to meet our responsibility in Rhode Island. Aid to education as we plan it will do little for the people of Rhode Island in proportion to what we give. We wish to participate in the program because we know it is for the good of all America. We will be putting more money into the program than we will ever get out of it, materially speaking. We are happy to do more than our share for progress and opportunity.

The Senator from Rhode Island is not asking for the continuation of the program for at least 1 year because he wishes to have his State shirk its responsibility to the national welfare. The President of the United States has made that appeal to this body. He is interested in education. I do not think we should close the door on his request this afternoon.

The President has lost the initial battle. He would be the first to admit it. But he has not lost the war. He wants to carry on the crusade. He expects to do it in 1962.

I say to Senators on this side of the aisle: It becomes a very solemn obligation and duty at this hour to lift up the right hand of the President of the United States and say to him, "We will help you in this crusade. If we disagree with you in 1962, we shall tell you so. If you have a plan that is feasible, that can be

worked out—one that will deserve our support, we do not intend to close the door on the consideration of that plan."

Madam President, the issue is that simple. It is that clear for the senior Senator from Rhode Island.

Mr. COTTON. Madam President, I have authority to yield myself 2 minutes on the bill from the minority side.

In view of the eloquent statement just made by the distinguished Senator from Rhode Island, I cannot refrain from making one additional observation. If the President's program for aid to education, which presumably will come before Congress next year, in the 2d session of the 87th Congress, is so doubtful of passage that it will stand or fall on whether these two programs are extended 12 months or 24 months, then indeed the outlook for a Federal aid program is very slim.

Madam President, during the last several weeks the word "plan" has been used again and again in this Chamber, in connection with the debate on various matters, and it seems to me that despite all the eloquence, the situation resolves itself as follows to some of us who represent States in which the school districts must have a chance to make the necessary plans in dealing with the school problems in federally impacted areas. A 1-year extension will not provide sufficient opportunity to make such plans; and I cannot believe that when the President comes before Congress at the next session with a similar proposal or another proposal for Federal aid to education, it will rise or fall depending on whether Congress now provides for a continuation for 12 months or for 24 months. The 24-month approach seems to me to be the commonsense one.

Therefore, Madam President, I hope the amendment of the Senator from Oklahoma will be adopted.

Mr. PASTORE. Madam President, will the Senator from New Hampshire yield?

Mr. COTTON. I yield.

Mr. PASTORE. The Senator from Hampshire has stated that regardless of the action Congress now takes, he anticipates that at the next session the President will request Congress to take action in this field. The Senator from New Hampshire has stated that he believes that the decision at this time as between a 12-month extension and a 24-month extension is not too important. But I point out that, after all, this is a question of judgment; and this is the judgment of the President of the United States. The President has said that he wishes to discuss this matter with us next year. But some Senators take the position, "No—not next year—let the President wait until after the election in 1962."

Mr. COTTON. Madam President, I yield myself another 2 minutes on the bill, and in that time I am delighted to answer the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 2 minutes.

Mr. COTTON. As the Senator from Rhode Island knows full well, the President can talk to "us boys" in Congress whenever he wishes to do so, and can bring us his program, regardless of whether we now extend the program for 12 months or for 24 months.

But during the past year, and, in fact, during the past 3 months I have seen attempt after attempt after attempt made on this floor to extend the Federal aid to impacted areas program by tying such a measure to an appropriation bill or by tying it to some other bill. And in each case, what has happened? Every attempt of that sort has been rejected—with the result that now we are in the closing hours, so we hope, of this session, and half the Members of the House of Representatives have gone home, and we are trying to take steps to extend this very necessary program.

Madam President, mark my words: Regardless of whether we now extend the program for 12 months, 18 months, or 24 months, the time will come when again we shall be operating "under the gun."

In my opinion, a 24-month extension provides a somewhat safer margin than does a 12-month extension.

Regardless of whether the federally impacted areas program is extended at this time for 12 months or for 24 months, I am sure that the President will later submit his wishes to Congress, and Congress will listen to his wishes in regard to a permanent program.

Mr. PASTORE. Madam President, will the Senator from New Hampshire yield on that point?

Mr. COTTON. I suggest that the Senator from Rhode Island use his own time.

Mr. PASTORE. Very well. Will the Senator from Oregon yield 2 minutes to me?

Mr. MORSE. I yield 2 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 2 minutes.

Mr. PASTORE. Madame President, the Senator from New Hampshire has said the President can talk to us whenever he wishes to. Well, Madam President, as recently as September 9 the President went to the trouble of dictating a letter to the Senate, and in it the President said—and the letter was addressed to the distinguished majority leader of the Senate——

Mr. MORSE. And also to my charming colleague, Mrs. NEUBERGER——

Mr. PASTORE. I now read the letter from the President:

SEPTEMBER 9, 1961.

DEAR SENATOR MANSFIELD: You have asked my views concerning legislation to extend aid for schools in federally impacted areas and to extend the National Defense Education Act.

As you know, my recommendations to the Congress for legislation to help achieve educational excellence in this country included continuation of the federally impacted area program and extension and strengthening of the National Defense Education Act. I still believe that both of these steps are urgently needed.

An extension of these programs should make it possible for the Congress to make a careful review of their content and costs next year. School aid to federally impacted areas could then be reexamined to update its operation and effect possible economies. Also, the increased demands which are being thrust upon this Nation make it especially important that we give consideration next year to strengthening those provisions of the National Defense Education Act which improve the quality of education in this country—

This is an appeal. Of course, the President can come here and talk to us—that is what he is doing in this letter—and in this letter he is appealing to the Senate and urging the Senate—

Therefore in my judgment a 1 year extension of school aid for impacted areas and the National Defense Education Act provide the best assurance that reevaluation of legislation affecting education will take place early next year.

Sincerely yours,

JOHN F. KENNEDY.

So the President has addressed himself in that way to the Senate. But I daresay that insofar as the Senator from New Hampshire is concerned, the letter will not do the President any good.

Mr. COTTON. Madam President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 1 minute.

Mr. COTTON. I listened with careful attention to the reading of the President's letter. I observed, among other things, that it was a reply to an inquiry addressed to him by the majority leader of the Senate; and in the letter the President expressed his opinion. Of course his opinion deserves respectful consideration. But, Madam President, the value of an opinion—whether the opinion of the President or that of the most junior Member of this body or that of a man on the street or that of the editor of a weekly newspaper—is its logic and its force; and I rather doubt that the President would, of his own volition, and with any great depth of feeling, come before the Congress and tear his hair to get these vital programs extended only 12 months, because certainly he does not need that short extension as a whip to be held over the heads of Members of Congress in order to get some other system supported by Congress.

That is all I have been saying; and I wish to close where I began, and then say no more: When we are trying to extend these two vital programs in such a way as to allow the school districts some necessary leeway in connection with the extension of the programs, after we have been trying to do that for the last 3 months, and now that we are working "under the gun," and inasmuch as the school districts cannot operate satisfactorily on a 1-year basis and still be able to take care of their problems in connection with these fields, commonsense indicates that a 2-year extension is better than a 1-year extension, the President of the United States to the contrary, notwithstanding.

Mr. MONRONEY. Madam President, will the Senator from New Hampshire yield 1 minute to me?

Mr. COTTON. Madam President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 1 minute.

Mr. COTTON. Madam President, I now yield that 1 minute to the Senator from Oklahoma.

Mr. MONRONEY. Madam President, it is quite interesting to hear all the pleas to support the President coming from the majority side of the committee, although the distinguished chairman of the subcommittee, the Senator from Oregon [Mr. MORSE], in the course of debate on the floor of the Senate on May 16, when he was speaking of the President's recommendations, said—and now I quote in part his remarks on that occasion:

> As the Representative from New Jersey will tell Senators, we made it very clear to the President that we welcomed the assistance we were getting from the White House and from the Department of Health, Education, and Welfare; we also made it very clear, however, that the final legislative responsibility rests with the Congress.

The subcommittee then had the benefit of all the facts and findings which had been presented to it; and the Senator from Oregon [Mr. MORSE] then assured the Senate—and I think the Senate will agree that he did give the Senate this assurance at that time—that the subcommittee was correct in its recommendation that the Federal aid to impacted areas program should be extended for another 3 years.

Madam President, Senators cannot play that situation both ways. If the President was wrong then, how can the Senator reasonably argue that the President is right now? It seems to me that Senators who take such a position are attempting to ride off on that horse in opposite directions—when they argue that the President was wrong then, but that he is right now.

Mr. PASTORE. But the fact is that the President made that statement when he was a Senator——

Mr. MONRONEY. No, Madam President; that statement was made by the chairman of the subcommittee [Mr. MORSE] on May 16 of this year; and on that very day he said that despite the President's recommendation, the final responsibility was lodged with the Congress. I could not agree more fully with any statement; and I am sure that the President himself, having previously been a Member of the Senate, knows that Congress has sole jurisdiction of the legislative procedure in connection with legislative bills.

Insofar as the substance of his recommendation is concerned, the President does have great responsibility—but not in regard to the legislative procedure to be followed by Congress. That matter is still solely the responsibility of the Congress.

Mr. PASTORE. Is the Senator from Oklahoma intimating that the President should not have written his letter of September 9.

Mr. MONRONEY. No; I think he can write all the letters he wants to write. But we should decide what procedure the Senate should follow. That decision has been the prerogative of the Senate ever since the founding of this Government.

Mr. MORSE. Madam President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Oregon is recognized for 5 minutes.

Mr. MORSE. Madam President, I wish to say to the Senator from Oklahoma that no one is more certain than I of his sincerity and his dedication to his responsibilities as a Senator. It is always a matter of great regret to me when I find myself in disagreement with him; and that seldom happens. However, on this issue we do find ourselves in disagreement.

I wish to say to him that the mere statement that the course of action he is recommending will not in any way have an adverse effect next year on the program of Federal aid to education does not prove the point; it merely expresses his opinion.

Many of us on the committee which has the primary responsibility for steering through the Senate legislation in the aid to education field feel the Senator's amendment will do irreparable injury to the chances of getting a general Federal aid to education bill next year. That represents a difference of opinion. I respect the integrity of the Senator. I think his judgment in this instance is a mistaken judgment.

With regard to the quotation the Senator read into the RECORD from the statement made by the Senator from Oregon earlier this year, it was absolutely accurate. I stand by it. What the Senator from Oklahoma did not say was that we were reporting the position taken by the President of the United States. We went to the White House and talked to the President about our position on impacted areas legislation and we convinced him. It was on the basis of the conferences with the administration that I came back to the Senate and reported that the administration was willing to go along with our provision in section 204 of title II of S. 1021, which called for a study in regard to the impacted areas problem and a report at the end of 18 months.

That provision is in the Senate-passed bill. It is not covered by the Monroney proposal. It is not in the proposal before the Senate today. But the President gives the Senate assurance that he is going ahead to investigate the charges on the need for some modification of the impacted areas legislation and report to us next year.

In regard to the comments made by the Senator from Oklahoma and the Senator from New Hampshire as to the source of the President's letter, it is a reflection on the President, in my judgment, to leave the impression here in the Senate that that letter came from anywhere but from the President's own mind. The President served in the Senate for a considerable time. He knows the situation in the Senate. The President was on the committee which considered some of these legislative matters. The President, of his own volition, told me days ago he thought it would be a serious mistake and would do great damage to the President's program if the Senate decided to go along with the House in the extension of NDEA and the impacted areas legislation for another 2 years. He told me that he intended to give his advice to the Senate.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MORSE. I yield myself another 5 minutes.

Recognizing, of course, that the Senate could forgo his advice, he said he was going to make clear to the Senate it was his judgment the two programs should be extended for only 1 year, until he could get his education program before the Congress next year.

No matter to what extent the Senator from Oklahoma is convinced to the contrary, he will be doing great damage by his proposal, if it is passed, to the general aid to education bill. He is playing right into the hands of forces in the Senate who do not want a general aid to education bill at all. I think he is pulling the rug out from under the President in regard to his desire for the parliamentary procedure that ought to be followed next year in regard to a general aid to education program.

I think the House should have an opportunity to act on the President's wishes in view of the specific recommendation he has made to the Senate. We should go to conference to let the House decide whether it wishes to deny the President's wishes in regard to the procedural matter.

The President has his executive responsibilities, too, and the President has the responsibility of passing judgment on whatever final action the Senate may take with regard to this measure.

To the Senator from New Hampshire [Mr. COTTON], I extend to him my same assurance of confidence in his motivation and integrity. I am aware that on S. 1021 he gave a live pair against the Federal aid to education bill. He has pointed out that he has seen Federal aid to education bills go down the drain time and time again. He would have helped it go down the drain this year with a live pair. I know the Senator from New Hampshire offered another form of Federal aid to education measure.

I know he thinks we ought to have adopted his Federal aid to education proposal by leaving in the States a certain percentage of the tax on cigarettes for the support of schools. I had a great many squeamish thoughts about it. I think it is unsound policy. I am surprised how often the attitude is taken in the Senate that Federal taxes raised in a State belong to that State. Federal taxes raised in the States are taxes from U.S. citizens to support the U.S. Government. A State has no claim on the Federal taxes collected in the State. That argument is made constantly in the Senate. Federal taxes are raised for a Federal purpose, based upon ability to pay, the benefit of the United States, to pay for the cost of running the U.S. Government activities.

Madam President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Mr. MORSE. Madam President, I promised to have the majority leader come to the Chamber. Would the Senator from Oklahoma object to my asking

unanimous consent, if our colleagues will agree, to suggest the absence of a quorum without the time being charged to either side? I will withdraw it as soon as the majority leader enters the Chamber.

Mr. MONRONEY. We have done it on two previous occasions, so I am delighted to agree to that.

Mr. MORSE. Madam President, I ask unanimous consent that I may ask for a quorum call with the understanding that the time will not be charged against either side, and with the further understanding that, as soon as the majority leader arrives, I will ask for the withdrawal of the quorum call.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MORSE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MORSE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. KUCHEL. Madam President, reserving the right to object, I wonder if the Senator will withhold that request for 2 or 3 minutes, until the minority leader gets here.

The PRESIDING OFFICER. The clerk will resume the call of the roll.

Mr. MORSE. Madam President, I renew my request.

The PRESIDING OFFICER. Without objection, the order for the quorum call is rescinded.

Mr. MORSE. Madam President, I understand the Senator from New Hampshire is going to yield 5 minutes to the Senator from Florida [Mr. HOLLAND].

Mr. KUCHEL. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KUCHEL. How much time is available to the minority leader?

The PRESIDING OFFICER. There are 110 minutes remaining on the bill on the minority side.

Mr. KUCHEL. Madam President, the minority yields 5 minutes to the distinguished senior Senator from Florida [Mr. HOLLAND].

Mr. HOLLAND. I thank the acting minority leader.

Madam President, if I may have the attention of the Senator from Oregon, of course it is true that we differ in our opinions as to the wisdom of general Federal aid to education legislation. I differ very strongly in my opinion from that which I know is conscientiously held by the Senator from Oregon. I do not question his soundness of conscience, and I am sure he does not question mine.

I wish to invite his attention to the fact that I stated on the floor of the Senate repeatedly, earlier in the session, that out of the debate on general aid to education, as it was proposed, we would find arising unprecedented bitterness among our people, compared to any which had arisen from any domestic argument in recent years. I think we all know, regardless of whether we are for or against any general aid to education proposal, that unhappily the prediction has come true. We have observed unparalleled bitterness arising among our people on religious grounds, on racial grounds, and on other grounds which are all unworthy of the importance of a question relating to the education of our children.

So far as I am concerned, I think the question of whether a new Federal aid to education bill should be passed next year should depend upon conditions then obtaining in the field of general education. It should have nothing to do with the question of impacted areas.

The question of impacted areas relates to our very important defense program. It is a question of doing justice to the communities totally affected by the defense program.

The general Federal aid to education program is a question of judgment and a question of generosity, but it is not a question of doing essential justice.

It seems to me there has never been any justification for tying the wholly fair program of aid to impacted areas, which has more than 10 years of successful history behind it, to any effort to pass general Federal aid to education legislation, particularly when the latter effort is coupled with a counting of the noses of many children in each State, for the purpose of apportioning funds among the States and later denying to those same children any participation in the funds when distribution is made within the State.

I do not know where the blame for that mistake should lie. Perhaps it is a necessary part of the program itself. The fact is that from one end of this country to the other people have become bitter—neighbor against neighbor, community against community, religious group against religious group—because it was proposed to count children by the millions for the purpose of distributing funds among States and then leaving out those same children when the time came for distributing the funds within the States.

Madam President, I do not think we should be doing something here deliberately calculated to revive that program and that problem next year. Aside entirely from the unwisdom of tying the two unrelated programs together, it seems to me very clear that by this amendment we are being invited to do justice to people who are adversely affected by the location of defense bases in their midst, and to do justice to the children of people who work in defense plants, as well as those others who live in the areas affected.

Unless something of this kind be done, the Federal Government will be required to set up schools of its own and to pay approximately $2 for every $1 of defense impact payments. This impacted areas program is wise and just, a program which has shown its value. It is a program upon which our people are depending in many areas. We should extend it for 2 additional years.

The PRESIDING OFFICER. The time of the Senator from Florida has expired.

Mr. HOLLAND. Will the Senator yield me 3 more minutes?

Mr. KUCHEL. The minority leader has been called away from the Chamber. Would my friend take an additional minute, until he returns? I understand we may have a yea-and-nay vote then.

Mr. HOLLAND. Madam President, it seems to me the impacted areas program commends itself to the sense of justice of our people. If we deny it, or deny it for 2 years, we shall be playing back into the same kind of hopeless position in which we found ourselves this year.

We know that we have created the greatest bitterness in history among our people. Do we wish to deliberately inflict that upon ourselves next year, at the time of a general election and a time of probably grave crisis internationally?

I think we should be doing a very improper thing to lay the predicate and the basis for another such experience by extending the law for only 1 year, when we know that before the year has passed officials from various districts affected must plan their programs, employ their teachers, and go through all the details which are necessary if their schools are to be run in an orderly fashion.

The PRESIDING OFFICER. The time of the Senator from Florida has expired.

Mr. HOLLAND. I hope the amendment of the Senator from Oklahoma will be agreed to.

Mr. KUCHEL. Madam President, the minority yields 1 minute to the distinguished senior Senator from South Dakota.

The PRESIDING OFFICER. The Senator from South Dakota is recognized for 1 minute.

Mr. MUNDT. Madam President, my views on this subject are well known. I have stated them time after time after time, as we have tried four or five times this session, through one means or another, to get the impacted area education bill extended without encumbering amendments.

We face a new opportunity to meet this situation today. As the Senator from Oklahoma has pointed out, the House has acted to extend the programs, as is, for 2 years. If we now reject all other amendments and agree to the Monroney amendment it will mean that congressional action on the bill will then be completed. It is for that reason I have joined as a cosponsor of the Monroney amendment. There will be no conference to be held with the House. There will be no delay and no conference required if we accept the identical terms adopted by the House. There will be no new opportunity to lose, for the federally impacted areas, the aid which they so desperately need now.

It should be remembered that aid to impacted school areas is not Federal aid to education—it is, rather, payments in lieu of taxes to help educate children added to the normal school loads by activities of the Federal Government. It is meeting the Federal Government's obligation to these communities only. It is not helping them to meet the educational challenges created basically by their own school load.

In the closing days of the session I urge the Senate once again to take this opportunity to move forward, to provide the aid needed with certainty, by agreeing to the Monroney amendment and rejecting all conflicting or curtailing amendments thereto.

Mr. MORSE. Madam President, I yield to the majority leader any time remaining on this side.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MANSFIELD. Madam President, I have listened with interest to what the distinguished Senator from Florida [Mr. HOLLAND] said about the state of confusion and uncertainty which may develop if the impacted area aid law is not extended for 2 years.

I have also listened to the distinguished senior Senator from South Dakota plead for acceptance of the Monroney amendment, citing the fact that he has on many occasions tried to bring this problem to a head. The Senator is correct. He has, in an attempt to extend the impacted areas aid law, tried on a number of occasions to attach the extension as an amendment to other proposed legislation.

We are now face to face with reality. I point out that most of the areas which received impacted area aid can very well go on into the spring of next year, even if no legislation is passed at this time. There are only a few areas in this country which would be up against the wall, so to speak, if the proposed legislation were not passed at this time.

I hope my colleagues on this side, at least, will give some attention to what the President requested in his letter to me, which was read earlier this afternoon. The President has indicated he would like a 1-year extension of the education aid to impacted areas and a 1-year extension of the National Defense Education Act. That will be plenty, because as Democrats we should remember that there was a plank in our platform which indicated that we were in favor of Federal aid to education, and this, incidentally, is only a part of an overall package.

There are a number of Senators in this Chamber who are for aid to impacted areas, but for no other kind of aid insofar as assistance to the schoolchildren of this Nation is concerned, or to the college students, either.

I think the President is wise in requesting a 1-year extension of these two programs. The distinguished chairman of the subcommittee, the Senator from Oregon [Mr. MORSE], who has performed magnificently this year by having reported from the committee four bills, ought to be given the support which has been requested.

I hope my colleagues will keep in mind the recommendation of the President.

I cannot return too often to what the President has said. He said—

> An extension of these programs should make it possible for the Congress to make a careful review of their content and costs next year. School aid to federally impacted areas could then be reexamined to update its operation and effect possible economies. Also, the increased demands which are being thrust upon this Nation make it especially important that we give consideration next year to strengthening those provisions of the National Defense Education Act which improve the quality of education in this country.

This is the President of the United States speaking—

> Therefore in my judgment a 1-year extension of school aid for impacted areas and the National Defense Education Act provide the best assurance that reevaluation of legislation affecting education will take place early next year.
>
> Sincerely yours,
>
> JOHN F. KENNEDY.

Mr. MORSE. Madam President, I yield myself 1 minute on the bill.

On behalf of the Senator from New York [Mr. JAVITS] and myself, I offer several amendments to the Monroney amendment which would have the effect of extending the Public Laws 815 and 874 provisions of the Monroney amendment for 1 year instead of 2 years. I ask unanimous consent that they be considered en bloc. A great deal of time will be saved if they are considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments to the amendment will be stated.

The CHIEF CLERK. In the Monroney amendment, on page 2, line 2, it is proposed to strike out "1963" and insert in lieu thereof "1962".

On page 2, line 5, it is proposed to strike out "1963" and insert in lieu thereof "1962".

On page 2, line 10, it is proposed to strike out "1960–1961" and insert in lieu thereof "1959–1960".

On page 2, line 15, it is proposed to strike out "1963" and insert in lieu thereof "1962".

Strike out the amendment to the title and insert in lieu thereof the following: Amend the title so as to read: "A bill to extend for one additional year the expired provisions of Public Laws 815 and 874, Eighty-first Congress and for other purposes."

The PRESIDING OFFICER. The question is on agreeing to the amendments of the Senator from Oregon to the amendment of the Senator from Oklahoma.

Mr. MORSE. Madam President, I wish Senators to know that I am sending up first the amendment which would amend the Monroney amendment to extend the impacted area program 1 year instead of 2 years.

Immediately after the vote on the amendment I shall send up my second amendment, which would extend the NDEA program for 1 year instead of 2 years. I do not know what the pleasure of the Senator from Oklahoma is, but I think the subject matter has been thoroughly covered. I see no reason for extended debate on the question. I am perfectly willing to enter into an understanding that the Senate proceed as has been suggested, with 5 minutes debate on each amendment.

Mr. MANSFIELD. Madam President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. MORSE. Madam President, I yield back the remainder of my time.

Mr. MONRONEY. Madam President, I yield back the remainder of my time.

A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MONRONEY. Do I correctly understand that a yea vote would be a vote to reduce the term of my amendment for Federal assistance to impacted areas from 2 years to 1 year?

The PRESIDING OFFICER. The Senator is correct.

The question is on agreeing en bloc to the amendments of the Senator from Oregon to the amendment of the Senator from Oklahoma. All time has been yielded back. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSTON (when his name was called). On this vote I have a pair with the junior Senator from New Mexico [Mr. ANDERSON]. If he were present, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

Mr. LONG of Louisiana (when his name was called). On this vote, I have a pair with the senior Senator from New Mexico [Mr. CHAVEZ]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

The rollcall was concluded.

Mr. MCCARTHY (after having voted in the negative). On this vote I have voted "nay." I have a pair with the Senator from Missouri [Mr. LONG]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withdraw my vote.

Mr. HUMPHREY. I announce that the Senator from Missouri [Mr. LONG], the Senator from Arkansas [Mr. MCCLELLAN], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ] are absent because of illness.

On this vote, the Senator from Arkansas [Mr. MCCLELLAN] is paired with the Senator from Texas [Mr. YARBOROUGH]. If present and voting, the Senator from Arkansas would vote "nay," and the Senator from Texas would vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] and the Senator from Texas [Mr. TOWER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS], and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

If present and voting, the Senator from Maryland [Mr. BEALL], the Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER], the Senator from Kentucky [Mr. MORTON], and the Senator from Texas [Mr. TOWER] would each vote "nay."

The result was announced—yeas 40, nays 45, as follows:

[No. 199]

YEAS—40

Bartlett	Hart	Moss
Bible	Hickey	Muskie
Burdick	Humphrey	Neuberger
Byrd, W. Va.	Jackson	Pastore
Cannon	Javits	Pell
Carroll	Keating	Proxmire
Case, N.J.	Kefauver	Randolph
Church	Long, Hawaii	Smith, Mass.
Clark	Magnuson	Symington
Cooper	Mansfield	Wiley
Dodd	McGee	Williams, N.J.
Douglas	McNamara	Young, Ohio
Engle	Metcalf	
Gruening	Morse	

NAYS—45

Aiken	Ervin	Mundt
Allott	Fong	Prouty
Bennett	Fulbright	Robertson
Boggs	Goldwater	Russell
Bush	Gore	Saltonstall
Butler	Hartke	Schoeppel
Byrd, Va.	Hayden	Scott
Capehart	Hill	Smathers
Carlson	Holland	Smith, Maine
Case, S. Dak.	Hruska	Sparkman
Cotton	Jordan	Stennis
Dirksen	Kerr	Talmadge
Dworshak	Kuchel	Thurmond
Eastland	Lausche	Williams, Del.
Ellender	Monroney	Young, N. Dak.

NOT VOTING—15

Anderson	Hickenlooper	McClellan
Beall	Johnston	Miller
Bridges	Long, Mo.	Morton
Chavez	Long, La.	Tower
Curtis	McCarthy	Yarborough

So Mr. MORSE's amendments to Mr. MONRONEY's amendment were rejected.

Mr. MONRONEY. Madam President, I move that the Senate reconsider the vote by which the amendments were rejected.

Mr. KUCHEL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MORSE. Madam President, I yield myself 2 minutes on the bill. I submit several amendments which would have the effect of extending the national defense education provisions of the Monroney amendment for 1 year instead of 2 years. I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MORSE. Madam President, before I move into the substance of my argument on the merits of my amendment extending for a 1-year period all titles of the National Defense Education Act, I thought it would be helpful if I were to provide Senators with a brief statement of the accomplishments of the act since its inception in 1958.

The manner in which I shall do this is designed to eliminate any suspicion of personal evaluation upon the part of the senior Senator from Oregon. The procedure I shall follow will be to quote extensively from the record of the hearings, both House and Senate, upon this act.

My first reference is taken from pages 607–608 of the House hearings and consists of excerpts from the testimony of Mr. Peter P. Muirhead, Director of Financial Aid Branch, Division of Higher Education, Office of Education. Mr. Muirhead states:

TOTAL ACT—GENERAL ACCOMPLISHMENTS IN HIGHER EDUCATION

Over $120 million has been loaned to some 230,000 worthy students in need of financial help to pursue their college studies.

Four thousand graduate students preparing for college teaching have been awarded fellowships and by the end of the next academic year about $19 million will have been granted to 149 universities to strengthen 680 new or expanded graduate programs.

With the completion of the institutes already scheduled for 1961–62, a total of about 9,100 high school counselors and teachers preparing to be counselors will have received training at 209 counseling and guidance institutes.

A total of $3.6 million will have been invested in the expansion of facilities and addition of faculty at 47 language and area centers, to which will be added another $4.67 million in institutional funds.

A total of 1,407 fellowships have been awarded for graduate study of languages and area studies not commonly taught in this country.

Some 166 language research and studies projects costing about $9 million have been negotiated.

By the end of the 1961–62 academic year, 7,045 elementary and secondary school language teachers will have received training at 133 language institutes.

While these statistics reveal the dimension of the accomplishments of the National Defense Education Act higher education programs there have been other benefits to higher education which cannot be reduced to numbers.

First, the impact of the student loan program, other than the thousands of students it has directly aided, has been a dramatic one; it has helped to revitalize and transform the student financial assistance programs at many colleges and universities. Student loans, which had never played a significant role in student financial aid activities, have now become an integral part of many institutions' efforts to assist needy students. Moreover, the loan concept has been more readily accepted by students and institutions alike. I am sure that the liberal terms of the student loan program have had much to do with this, but so has the stimulation of Federal activity in this area which has resulted in the establishment of loan funds at over 600 institutions which never had them before.

Certainly, one of the major accomplishments of the graduate fellowship program has been to focus attention on the shortage of qualified college teachers, a shortage which could get worse before it gets better. The need for college teachers is not restricted to a few fields but can be found in every intellectual discipline. This program, the only Federal effort to provide assistance to graduate schools across the board, has strengthened and helped to insure graduate training in areas of the country where help is badly needed and contributed to a better geographical balance in providing graduate training.

I read from pages 233–34 of the Senate hearings of NDEA which contains a review of general accomplishments in Oregon, placed in the RECORD by Mr. Barry Morris, of the National Education Association:

Tremendous improvement has been made already in science, math, and modern foreign language facilities. Many small high schools and a great many elementary schools are now moving from "read about" science to "learn by experience" through demonstration and experiment; math classes are now using something beyond textbook and chalkboard, with demonstration and construction instruments, models, graphs, and special equipment and materials in growing quantities; language laboratories have been installed and are operating in more than 30 high schools and junior high schools where none were in operation prior to title III. Many more schools are planning for language labs, phasing up from beginning installations to complete labs, allowing students and teachers to become used to equipment and familiar with new techniques.

The services of two consultants were provided during the 1959–60 school year and one the subsequent year. During this period of time over 200 meetings were held with elementary teachers alone during which they received instructions in how to use and improvise equipment for the purpose of illustrating concepts and principles of science.

Practically every Oregon first-class district, and better than 90 percent of smaller districts, have participated in every Oregon county. Many districts have had projects in each subject area in every one of the six application periods for title III funds so far.

Projects range in amount from $12 to $50,000, covering one science kit for small school to complete science-lab equipment, math materials, and language-lab installation in a consolidated high school which would have had very little of these without title III aid.

Many hundreds of thousands of dollars have been expended for such things as library and reference books, audiovisual equipment and materials, as well as science equipment and furniture with these expenditures matched on the local level. Equipment has been placed in many elementary and secondary schools for use by students. Teachers didn't even have demonstration equipment in these schools prior to the advent of NDEA. During the year of 1959–60, $406,600 was spent in the elementary schools and $942,300 in the secondary schools for laboratory equipment and science materials.

Stimulation has carried into other than title III curriculum areas, resulting in improvement of these areas also, with some districts making definite efforts to carry these areas along with title III areas, other planning with teachers for improvements to follow completion of title III projects. Broadening of title III to English and social studies would aid greatly in most districts, now ready for a leap forward here paralleling title III work so far accomplished in other areas.

Many schools have been able for the first time to provide advanced courses for more capable students. Such courses as science research courses, science seminars and second-year courses in biology or chemistry are now found. Approximately 8 percent of the students enrolled in science courses during the 1959–60 school year were enrolled in such courses. Innovations such as a specially equipped science trailer which is moved from school to school have come upon the scene.

Effects of title III work within the State department of education itself have become increasingly apparent; title III subject area and instructional materials consultants are the first specialists employed by the department. A new emphasis on consultative services to the school districts, providing liaison with national developments, is emerging and involving other areas of the department in a stronger and more unified effort to improve and strengthen instruction generally. Increasing use of new instructional media for professional presentations and communications by all department personnel, both within the department and in the field, has been observed.

Local interest in school patrons and similar groups has been deeply stirred by title III and other resulting activities. Visits to schools have shown large numbers of these

persons the kind of education which can be obtained when teachers have important and essential materials and tools, and as a result not only has general interest in education quickened, but it is felt that general understanding and willingness for support of the whole educational system has been strengthened.

Emphasis has been strong on new media materials from the start, with something like 20 to 25 percent of total expenditures going to audiovisual materials of all types and equipment for their use, and to supplementary printed materials of all kinds. With the great void for basic equipment in all three areas now partially filled, emphasis in many districts is shifting more strongly to audiovisual and printed supplementary materials; the trend toward the development of school building, local district, county, and regional cooperative instructional materials centers is accelerating, with interest carrying over into heavy demands for inservice work with teachers to improve present levels of utilization of new media and prepare for much wider and broader use in near future.

Local school districts in New York State have enriched their science programs by utilizing NDEA funds to assist in providing vital and challenging equipment for student use. Local expenditures for science in 1958–59, on a prior approval basis, represented 69 percent of all new moneys spent for title III categories. In 1959–60, the proportion increased to 73 percent.

Biology, which has, of late, been fiscally neglected in favor of space age areas, achieved new stature through National Defense Education Act assistance. Remodeling of existing facilities and the purchase of equipment has considerably upgraded teaching and learning opportunities.

Prior to National Defense Education Act, research in audiovisual media and methods had been conducted preponderantly by the armed services and by private foundations to meet their special needs or interests. Title VII provides a real breakthrough for research geared to a better understanding of the nature of learning in relation to the newer media.

In mathematics, perhaps the most valuable new tool of recent decades is the overhead projector. National Defense Education Act has made it possible to place many of these in mathematics classrooms, and teachers are learning to produce their own unique visual presentations of abstract ideas.

One further statement by a group of people not directly associated with DAVI is pertinent:

The operation of our schools is sometimes compared to the operation of big business, but the analogy fails in some ways. Fifty years ago, for instance, American industry invested about 75 percent of its capital dollar in plant and about 25 percent in tools. At that time American education was doing approximately the same thing. Today industry has almost reversed this allocation of capital, while education has continued its ratio with major emphasis on the building and minor on tools with little exchange except in unusual cases.

Technology can be used to do many things for education. It can begin in the administration offices, working out flexible school programs. In classrooms and laboratories, it can help with the tasks of introducing concepts, communicating new ideas, and keeping instruction abreast of the times. It can aid in independent study and testing, and can take over routine tasks in guidance and counseling offices. Educational goals must be worked out in detail so that the best instructional facility in each case—television, radio, overhead projectors, recorders, films, slides, tapes—can be suited to the goal.

Mr. Morris also commented on the general accomplishments in Florida as follows:

We set up model demonstrations in which we can examine certain phenomena under ideal conditions. We produce instructional motion pictures—edited versions of reality which permit us to slow down processes which are otherwise too fast to see, or to look through telescopes or to look inside a blast furnace or to observe the life processes within a living cell. And we provide manipulative devices which permit students to experiment, to practice, and to invent.

The National Defense Education Act has provided a tremendous stimulus to the acquisition and use of such devices by our schools and some people have raised the question of whether we will have enough of this stimulus after 4 years. The answer is "No."

For example, the recent great awakening in foreign language teaching has been based in good measure upon the use of electronic practice facilities for mastery of a foreign language as a medium of communication rather than as a subject for dissection and conjugation. Under the aegis of National Defense Education Act the number of language laboratories in my home State of Florida has grown from 1 in 1959 to nearly 100 today. But the point is, Florida still has 800 high schools with no such facilities for foreign language practice.

The physical science study committee with its new course in high school physics has made much of the traditional physics laboratory equipment obsolete. Of course it was really obsolete long before physical science study committee appeared, but it remained for National Defense Education Act to provide the funds for retooling 90 percent of the physics laboratories in Florida to permit the teaching of this new course. The new course began in 1956 as a concerted effort by some of the Nation's top physicists and science educators to approach the subject of physics from modern understandings rather than the outdated classical ones in common school use. This effort involved the writing of complete new textbooks and laboratory manuals, the devising of new kinds of laboratory apparatus and experiences, and the development of a series of some 70 motion pictures to bring meaning and impact to the communication of basic ideas.

Although my State is 90 percent converted to the use of this new physics course, only a handful of its schools have direct access to the expensive films which constitute a very vital part of the program. Even so, Florida is far ahead of the rest of the Nation where the vast majority of high schools have not yet been able to convert to the more modern physics course. Florida has been able to do so only by virtue of a sizable private foundation grant for the retraining of teachers, and through considerable local effort in replacing textbooks and laboratory manuals.

The need for continued National Defense Education Act support is heightened by other massive efforts to update and improve the teaching of related courses such as the chemical education materials program, the biological science curriculum study and the school mathematics study group.

Because of the urgency of our times we cannot wait out the usual lag which is normally required for new innovations in education to become established as widespread practices. Paul Mort, of Columbia University, has identified this lag as approximately 50 years. In the 30 years which have elapsed since the introduction of the sound motion picture we are barely halfway toward equipping our schools with adequate facilities for effective classroom use of this medium. In the 10 years since educational television was introduced, we have done little more than make a good start toward the mastery of this tool and its full application.

Accomplishments of the NDEA in California are described by Dr. Roy E. Simpson in the House hearings earlier this year:

Finally, in support of our position in favor of H.R. 6774, with suggested amendments, I now submit statements bringing to your attention our appraisal of what National Defense Education Act has meant to California during the past 2 years. The need for brevity will not make it possible to relate in detail all the positive outcomes nor to document with exact facts and figures the conclusions. However, such documentation could be made available by most of the States and location school districts throughout the Nation. In summary, the National Defense Education Act has:

1. Stimulated school districts to carefully appraise their present instructional programs, to identify weaknesses and new needs, and to move forward with new programs. In California, 3,500 such new programs are underway. Enrollments in science, mathematics, and foreign language have greatly increased; 58.4 percent in science, 44.7 percent in modern foreign language, and 44.2 percent in mathematics. Sixty percent of all California school districts, representing 90 percent of all students enrolled, have participated in programs financed under the National Defense Education Act. Forty-nine of the fifty-eight county offices have participated.

2. Encouraged greater cooperative effort among local school districts and intermediate units, and provided for better articulation of instruction at the several levels within the total public school program.

3. Provided closer cooperative planning between the public schools and the teacher training institutions.

4. Provided Federal funds matched by State funds to support extensive inservice education programs and workshops for teachers, curriculum directors, and administrators, acquainting them with the new content, new methods, new materials, and new media essential to better instruction. It is estimated that in excess of 10,000 teachers, curriculum directors, and administrators will have been involved in such programs during this school year in California, and 22,000 since the beginning of the program.

5. Provided the resources for State departments of education to make available to local school districts the leadership talent of the Nation in the areas of mathematics, science, and modern foreign languages. Such talent has been employed by State departments of education (4,000 man-days in California) to work with State department staffs and local school personnel. These leaders have come from universities, colleges, Government, industry, and commerce.

6. Made it possible for school districts to increase counselors and other guidance personnel, and to support an overall guidance program that will give greater assurance of identifying the talent of the Nation and guiding it into educational pursuits that will enable these students to realize their maximum potential and make their maximum contribution to society.

7. Encouraged research in new media such as television, teaching machines, and new electronic devices. Many of the problems facing education in the next decade will be answered in part or in full by the results of such research.

8. Led to new developments and expansion in programs preparing much needed manpower for technical fields of employment. As we move into increased automation, these developments will become increasingly significant.

"9. Demonstrated that there can be Federal aid without Federal control. The relationship between the U.S. Office of Education and State departments of education has been a very healthy one, with cooperative planning and implementation of the provisions of the act present at all times.

"10. Finally, provided funds to local school districts for the purchase of much needed equipment and materials. This is referred to last, purposely, for it is, in fact, the least significant contribution of the National Defense Education Act. The intent of the National Defense Education Act was to improve the quality of instruction; not to buy equipment. The process which a district goes through in order to determine how it may best improve instruction is much more important. The identification of the equipment needed is only a final step and would make no real contribution to instruction without the former."

Title II of the NDEA providing loan funds in higher education have been evaluated by the Commission of Education in our State hearings:

Accomplishments: Under title II more than 200,000 students in 1,400 participating institutions have received educational loans. Furthermore, through the influence of this program, loans have become one of the major forms of financial assistance to college and university students. Far from supplanting student loan programs previously existing, the title II program, by serving as a model, has apparently stimulated the use of other loan funds controlled by higher educational institutions.

Student loans are now an established and integral part of institutional student financial aid programs, and with the expected twofold increase in enrollments by 1970 and with the rising costs of education there is a continuing need for such funds. Consequently, we urge that Federal participation in college loan funds be continued on a permanent basis. The contributions which the Federal Government and the institutions will be called upon to make to the funds, in order to maintain them as desired levels, will eventually diminish as the program matures and as loans are repaid with interest.

Let us note, too, the evaluation of this title by the Honorable CARROLL D. KEARNS, ranking minority member of the House Committee on Education and Labor, in the House hearings:

Accomplishments under the act: Since the first loan funds were established under the act in February, 1959, both college and student participation in the program has far exceeded earlier expectations. The program has been widely welcomed and acclaimed by both the participating institutions and student loan recipients. The number of loans has increased from less than 25,000 in 1959 to an estimated 150,000 for the fiscal year ending June 30, 1961. Thus, thousands of college and university students are being enabled to pursue their education through this program.

Here is a statement from Jack Rand, associate school superintendent in Palo Alto, Calif., in the Senate hearings, on the accomplishments of title III:

The impact of title III of the National Defense Education Act in Palo Alto has been immediate and far reaching. It has given added impetus to a host of projects already under way in the development of the curriculum and improvement of the instruction.

Moreover, it has made available to all teachers the new and better truths of instruction, which have been born of technological revolutions since World War II. Since our requests for equipment had been named in terms of specific and well-defined projects, the NDEA has forced us to be more sensitive to national needs and national projects, revolutionizing the curriculum and methodology in several subject fields.

In the field of mathematics, for example, the NDEA has encouraged our participation in the development and use of the new school mathematics study group materials. Several members of our staff have served on writing teams that created these materials, or have participated in pilot trials of the materials themselves. The addition of libraries of mathematics books has begun to transform mathematics from a classroom skill into a research enterprise that encourages independent study and thought: allows for more individualized instruction, and the development of mathematical aptitude and talent. The introduction of overhead projectors as visual teaching aids has begun the transition of mathematics from a textbook subject to a living experience.

In foreign language, the new electronic equipment has made it possible for our teachers to come a step closer to realizing their philosophy that the only reason for learning a language is to be able to communicate in it. Now, for the first time, many of our students can listen to a foreign tongue as it is spoken by a native speaker. Though all questions are not resolved about the best approach to teaching foreign language, the installation of this equipment with the aid of NDEA funds has made possible the experimentation that is essential to the ultimate resolution to these questions.

In science, the advent of NDEA funds has accelerated our local efforts in the revision of our curriculum from kindergarten to the 12th grade. It has permitted the installation of new apparatus that is a part of such programs as the physical sciences study committee course in physics, and will support our entry into the new materials being developed nationally in biology and chemistry. It has, for example, placed microscopes in our junior high schools in sufficient quantity to permit our accelerated science students to complete a biology course in grade 9 that is fully equivalent to the regular course in grade 10; it has permitted their counterparts in grade 12 to pursue a college chemistry course as part of the advanced placement program with all the sensitive balances and other equipment necessary for the more careful and accurate work of the college level.

Accomplishments in Michigan under title III were related to our subcommittee by Dr. Lynn M. Bartlett, State superintendent of public instruction:

Our experience in Michigan with title III has been most gratifying. It unquestionably has been of great assistance in the improvement and extension of curricular offerings in science, mathematics, and modern foreign languages.

Attached to this report are two tables that give some indication of the extent of our participation.

While we were unable to secure permission of our own State legislature to participate in this program during 1958–59, when such permission was finally granted during the 1959–60 schools representing 92.8 percent of the public school membership of the State submitted project proposals totaling nearly $10 million. However, only $4,117,500 was available in Federal money.

Even though we were able to use Federal funds allocated to Michigan for both fiscal 1959 and 1960, it was still necessary for us to cut the approved portions of these submitted projects by an average of 16.8 percent.

During the current year, Federal funds allocated to Michigan under title III totaled $1,981,000. Projects submitted to us represented a combined Federal-local total of $7,241,311. The adjustment of approved requests to the amount of Federal funds available represented an average cut of 45.27 percent. In many instances this adjustment in requests has meant that the full science program planned by the district had to be delayed.

For example:

East Lansing Public Schools, Cecil MacDonald, superintendent: "We had developed lists of materials that we could really make good use of in all the areas, science, mathematics, and foreign language, and, of course, have had to cut back in accordance with whatever allotment we would have in these areas and it has meant that we can't allocate other funds to get these supplies thus we will have to lack them until funds are provided. We feel that everything we had on the lists are very essential to a good program and we have not had the funds; we can't up our local taxes as we have 4 extra mills now, thus it is just a case of waiting until more funds are available before we can follow through with our plans."

Highland Park Public Schools, Fred Davenport, assistant superintendent: "Our school district for many years has been unable to finance the adequate science facilities and with title III we are hopeful to be able to do substantial renovation. However, at this point we find that the funds available are so meager that they will undoubtedly cut down on anything we can anticipate in the future. The $58,000 requested was not a program beyond what we actually need, but the very meager reimbursement of $18,000 that we will receive will mean that we obviously will not be able to carry through. We certainly feel that this program should carry forward in the years to come so, even though small, we will be able to carry through on our various programs."

Springfield Public Schools, Bruce Sellers, superintendent: "In general we had planned to use NDEA materials in equipping our junior high areas and also for use in the elementary language and science programs. As a result of the cutback we had to go to our people and ask for additional operating funds because the requested material was so essential. Thus, for the first time in the history of Springfield schools, we had to vote for additional operating funds."

Wyandotte Public Schools, Fred Davenport, assistant superintendent: "For the 1960–61 school year the school district of the city of Wyandotte, Mich., requested $189,000 under the provision of NDEA, most of which was to be used for the strengthening, expansion, and improvement of our secondary science program. Because of an insufficiency of funds for the State of Michigan, our request was cut by the Michigan Department of Public Instruction to only $25,000. Consequently, it has become impossible for us to realize our improvement goals in secondary science at the present time even though some funds ordinarily used elsewhere in our educational program have been diverted to the science area."

Dowagiac Public Schools, John Hicks, superintendent: "Last year as superintendent of schools at Cheboygan, I was unable for the first time to equip counselors' offices adequately and to reduce the student-counselor ratio from 480 to 320 for the full-time counseling.

"This year at Dowagiac, National Defense Education Act funds, title V–A, enabled us to employ sufficient counseling help to reduce the counseling ratio from 800 students per counselor to 480. This increase in counselor time coupled with the purchase of additional needed guidance materials, I believe, will do a great deal to help our students with their educational vocational planning."

These figures clearly show the value placed upon this program by Michigan's elementary and secondary schools and demonstrate that the funds made available to Michigan were not adequate to fill the need.

Inadequate though the funds were, they have already contributed significantly to the improvement of instruction in these areas.

I also look with favor upon the proposed expansion of this title in S. 1726 to include physical fitness. In addition, urge that the Congress consider further expansion of this title in order that it might include English, history, geography, economics, and government as subjects of instruction in elementary and secondary schools.

The following statements given me by local school administrators provide some testimony as to what this program has already done for Michigan's public schools:

Grand Rapids Public Schools, Benjamin J. Buikema, superintendent: "Grand Rapids schools have profited greatly through the provisions of the National Defense Education Act. We were able to implement the science recommendations which were made as a result of a 2-year systemwide science study. Our laboratories have been modernized and our equipment and supplies have been greatly augmented. Arithmetical and algebraic principles and processes and geometric forms are being concretely demonstrated by the excellent equipment we have been able to purchase."

Allegan Public Schools, L. E. White, superintendent: "As superintendent of the Allegan Public Schools, Allegan, Mich., I wish to express myself as favoring the continuation of title III because of the terrific push it is giving toward the improvement of the quality of education in the areas of science, mathematics, and foreign language in our school system. Available funds have made it possible for our teachers to realize some of their dreams as regards to new techniques and methods which demand the use of equipment and materials heretofore out of the reach of our budget. We have more interest and growth in our foreign language department since title III was enacted than we have had in the past 25 years."

Edwardsburg consolidated schools, Edwardsburg, Mich., Don McConnell, superintendent: "Through the National Defense Education Act, the science department of Edwardsburg consolidated schools has become one of the strongest curriculum areas in our school. Without such support, it would have been impossible to equip this department in such a manner. Not only was the senior high science program improved, but through this aid, we were able to broaden our offerings at the elementary level. This financial support has not only upgraded the science curriculum, but has increased the science teachers' incentive for study in this most important field. A year ago there was only one language taught in our school system. This year there are two. Next year there will be three with a possibility of a fourth, because we are fortunate in having a language laboratory in our senior high school. If it hadn't been for title III, we really would have nothing to offer our students other than a building and inadequate equipment."

Detroit public schools, Detroit, Mich., Naida Dostal, supervisor of foreign languages: "There has been an upsurge in the interest in our inservice laboratories, in creation of audioinstructional material, revision of courses of study, and audiolingual teaching techniques. Title III is directly responsible for the first breakthrough in language teaching techniques because the teachers are highly motivated to use the instructional materials and equipment provided by the National Defense Education Act."

Ad hoc committee on foreign language instruction, department of public instruction: "Three language laboratory conferences for secondary schoolteachers were sponsored by the department of public instruction and financed by the National Defense Education Act funds. Participants in the conferences felt highly rewarded as regards new insights and knowledge gained from consultants and from observation of language laboratory teaching techniques. The evaluation of these conferences bear out that they were extremely worth while. Thus, title III made statewide inservice teacher education possible in the area of modern foreign languages.

Lansing public schools, David Schulert, science coordinator: "Title III has been valuable to the Lansing schools in many ways. Some of these could be listed as follows: (1) It has encouraged us to improve our programs in science, mathematics, and foreign language; (2) it has provided laboratories for the teaching of foreign language and science; (3) it has provided audiovisual materials to enrich the curriculum in these areas; (4) it has provided enrichment materials and supplies to allow us to work better with pupils of various abilities; the slow and the fast, as well as the average; (5) it has provided concrete materials and supplies to lead students to a better understanding of abstract processes in mathematics; and (6) in short, we have been able to make many improvements in our program as the result of this act that we would not have been able to make without it."

Greenville public schools, Allen F. Allinder, superintendent: "Participating in the National Defense Education Act program, title III, we have been able to get a considerable amount of science laboratory equipment which would not have been possible without NDEA support. The stimulus of Government participation has increased local spending to help support a fuller program in biology, chemistry, general science, physical science, physics, mathematics, and French.

"We are building a new high school building and are equipping it with science equipment which is more complete and provides a fuller science and language program than without NDEA support. Our bond issue did not provide funds for as good a program, for example, as the language laboratory facilities which we are now able to get. The title V program has been a great help.

"We consider ourselves fortunate to have been able to enrich our educational offerings by NDEA support."

Livonia public schools, Benton Yates, superintendent: "The Livonia Public School District is experiencing rapid growth. We are a district with 18,000 pupils. We are faced with a 20-percent increase in population for the next 5 years. Needless to say, providing schools and teachers for these students puts a very heavy demand on our community. Unfortunately, equipment for these schools is costly and is often cut back in order to have funds to provide the roofs over the children's heads. Many completed areas within these schools have not been furnished and equipped as well as we would like. Thus far, we have received matching funds for five secondary science biology laboratories which have been fully equipped. Likewise, we have received five language laboratories which also have been fully equipped. Elementary science equipment has also been purchased and is in constant demand within our system.

"While it is an effort for our district to match funds in order to have this equipment, I can truthfully say that without this National Defense Education Act our schools would not have most of the above materials and personnel.

"At the request of our board of education, I urge you to do all possible to extend the benefits of the National Defense Education Act."

Detroit public schools, Elmer McDaid, divisional director, exact science department: "As Detroit moves into the second year of the NDEA title III program, results of the first year are being evidenced. No. 1, our remodeling program is now moving along to coincide with the equipment that has been placed in the laboratories as a result of the NDEA appropriation. For example, Cass Technical High School is having a complete renovation of all six chemistry laboratories, new tables, and electrical and instructional equipment will be in operation as of September this year. This is only one example.

"There were 37 building remodeling applications throughout the elementary junior and senior high schools. Each school within the city of Detroit has received blocks of science and math equipment. This has resulted in Detroit's moving very fast on both school mathematics and study groups.

"NDEA funds have placed in every classroom from the 1st through the 12th grade math materials that were never available to Detroit schools before. In practically every junior high school we now have a portable science demonstration table where science is taught in a laboratory situation. This has been extremely helpful in orientation of our seventh, eighth, and ninth grade students to the high school science program.

"In every classroom from the 1st through the 12th grade, supplementary titles of science and math books are now available. These supplementary books have helped us to a great extent in the parallel inservice training programs that have been set up to implement the NDEA title III program."

"Summary: In math and science from the 1st through the 12th grade, our programs have not only been enriched but they have been extended. The physical science program alone has increased almost 50 percent in enrollment."

Title III, providing aid for science, mathematics, and foreign languages was also praised in the House hearing by the gentleman from Pennsylvania, the Honorable CARROLL D. KEARNS:

Accomplishments under the act: This basic provision of the act has proved to be increasingly effective in assisting elementary and secondary schools to improve instruction through the acquisition of laboratory and other special equipment and materials used in science, mathematics, and modern foreign languages. The act also has resulted in a very substantial improvement and expansion of State supervisory and related services in these basic fields of education.

During fiscal year 1959, more than 10,000 laboratory and other projects for improvement of instruction in these subjects were approved by 31 States. Preliminary figures for fiscal year 1960 indicate a fivefold increase in the number of such projects, with 45 States reporting nearly 47,000 projects. Some three-fourths of the expenditures are going directly into science projects.

Some States report as much as 50- to 100-percent gains in enrollment in science and mathematics courses. The act's stimulation of supervisory services at the State level is dramatically indicated by the fact that the number of specialists in science, mathematics, and modern foreign languages had increased to 194 by December 1, 1960, as compared to only 33 such specialists in a handful of States prior to the act. This provision needs to be further strengthened.

What percent of high schools of the Nation have improved their facilities under this program?

Mr. Ludington (HEW): "Our reports from States do not break it down in terms of individual schools, because the legal entity in the State is the school district. Our reports come in in terms of participating school districts and the average daily attendance of children in those districts.

"In some of the States as high as 80 percent of the youngsters are involved through the projects that are approved by the State departments of education. This program has been in existence now 2 full years in the majority of the States. We had more than a sixfold increase in the number of projects between the first and the second year."

Dr. Sterling M. McMurrin, Commissioner of Education, told our Senate hearings concerning title III:

Title III has greatly aided and stimulated improved statewide leadership in mathematics, science, and modern foreign language instruction and has increased the availability and quality of the laboratories and other special equipment and facilities needed in our elementary and secondary schools for these fields of study. Under this title there has been a sixfold increase in the number of professional supervisory personnel employed by the State education agencies in the instructional areas designated for assistance—science, mathematics, and modern foreign language. The number of electronic language laboratories installed in the Nation's high schools has increased from 64 to 2,500; and some 57,000 local projects for the improvement of instruction in these fields were approved by State education agencies during the first 21 months of the act. During this same period 129 loans were approved for private nonprofit schools.

This shows, indeed, a healthy beginning of an effort to correct for the relative neglect of these subjects. However, we must be alert to other compelling needs which have been neglected. Physical fitness constitutes such a need. There is a positive relationship between a student's physical well-being and his ability to apply himself to his intellectual tasks. Yet there is a startling evidence that far too many American children and youth are not physically fit. History amply demonstrates the relation between the physical vigor of a people and the strength of its institutions and of its capacity for self-defense.

As for title IV fellowships—the ranking minority member of the House Committee on Education and Labor, the gentleman from Pennsylvania [Mr. KEARNS] said:

Under the act's provisions, fellowships were awarded to 1,000 graduate students for study in 1959–60 and an additional 1,500 students received fellowships in 1960–61. Altogether, 138 institutions of higher education, through 472 new and expanded graduate programs, participated. Next fall, a total of 4,000 students will be studying under the act, but unless the program is extended the number will taper off after expiration of the act and fall far short of the output needed to staff our colleges and universities.

The fundamental purpose of the graduate fellowship program is to meet the increasing need for college faculty in the years ahead and, at the same time, to encourage expansion and wider geographical distribution of graduate facilities. The act is achieving these objectives in three ways:

1. The provision of fellowships to graduate students preparing for college teaching;

2. Financial assistance to colleges and universities to enable them to expand and strengthen their graduate programs; and

3. By planned geographic distribution of approved graduate programs throughout the Nation.

The basic importance of this program to the Nation is quite apparent when it is realized that college faculties probably must be doubled by 1970 if the institutions are to be expected to handle the influx of college enrollment which already is on the way. Not only must the graduate fellowship program be continued, but it should be substantially enlarged over the next 5 years.

Dr. Lynn Bartlett of Michigan commented before our Senate subcommittee on the workings of title V guidance in his State:

Even though Michigan was unable to participate in the title V–A program until the spring of 1960, 301 high schools were approved for participation in the testing program and 180 high schools were approved for guidance and counseling programs. These 180 high schools increased their counseling staff by the full-time equivalent of 90 counselors. This year the number of high schools participating in guidance and counseling has increased to 242 and the increase in equated full-time counseling time has gone to 175. The combined increase for the 2 years represents an overall increase of more than 20 percent in the total number of counselors in Michigan.

In addition the title V–A program has enabled schools to provide clerical and secretarial help to counselors. The combined increase for the 2 years is equivalent to 104 full-time clerical workers. This program has also made it possible for schools to equip counseling facilities and to provide resource materials and books for both student and counselor use. While this growth is encouraging, the need for additional assistance is shown by the fact that the rate of reimbursement this year to Michigan high schools conducting approved programs will be about 20 percent of the actual cost.

The following statements from Michigan school administrators will give you some indication of the effect and influence of title V:

Detroit Public Schools, Dr. Richard Dresher, guidance and counseling: "Three points:

"1. Title V has assisted in making it possible to lower the student-counselor ratio in Detroit from 538 to 396 in the senior high school, and from 618 to 491 in the junior high school.

"2. The educational and occupational information received under title V–A has made it possible to improve our educational and vocational guidance program in the secondary schools.

"3. Title V has increased the opportunity for training and better communication between the counselors. Therefore, has assisted in improving their competencies.

Clare public schools, Richard Wheeler, superintendent: "The Clare public schools have been able to move ahead with an improved guidance and counseling program with the financial help supplied under title V of the National Defense Education Act. For this current school year we have created a new staff position in high school guidance and counseling and have employed a fully qualified counselor to work in this position. The high school testing program has undergone some revision and has been broadened to give us a better measurement on each of our high school pupils. We have implemented our program with the purchase of special equipment such as a tape recorder and copying machine. We have also been able to add some general office equipment to further facilitate the program.

"The improved program in guidance and counseling in our high school has been very meaningful to our students. Never before have we been able to do such an adequate job in directing our students with their in-school programs and their future educational and vocational plans.

"The administration and board of education would certainly hope that title V of the National Defense Education Act can be continued or even improved. The experience we have had in our first year warrants a sound endorsement of the principle of financial support to public education through the cooperative efforts of the local, State, and Federal Governments."

Bessemer public schools, Carlos W. Heikkinen, superintendent: "Title V, NDEA enabled the Bessemer city schools to initiate a guidance program into our secondary grades. Without these funds, we would have been unable to do so.

"Our students and community are happy with our start in guidance. However, much needs to be done so that we not only continue to effectively guide our secondary pupils but also to extend this service to our junior high school. Not only do we need funds to continue our present-day program in guidance but we need help to expand and improve it. Title V, NDEA has helped to give the people of Bessemer better schools through the development of a much needed guidance program, a most important area of our curriculum.

"We in Bessemer urge not only a continuation of title V, NDEA but the provision of sufficient funds for the administration of the program."

Port Huron Public Schools, Howard Crull, superintendent: "Concerning help from title V–A in guidance and counseling program: In the year 1959–60 the school district of the city of Port Huron had 8½ counselors for a senior high school of 2,000 students and 4 junior high schools with approximately 1,600 students. During this year the school district expended $69,000 and the Federal Government through NDEA reimbursed $3,688.

"In the school year 1960–61 we increased 1 counselor, making 9½ counselors and 2 secretaries. The counselors and two secretaries have been very helpful in giving us the kind of program that we need and the counselors can spend more time with the boys and girls. The total expenditures for counseling amounted to $71,000 and the Government's help was $12,251.

"Projected for 1961–62 we will have 15 counselors and 3 secretaries. This will bring our program up to the standards set forth by the North Central Association of Secondary Schools. This is a counselor-pupil ratio of 1 to 300. This program will cost $87,000.

"Projected through 1965 we would like to keep the counselor-pupil ratio of 1 to 300 as prescribed by the North Central Association of Secondary Schools.

"The local effect with parents, school board members, teachers, and others connected with the school has been very favorable. We have given considerably more time to each child and we believe that we have given a much better total program to boys and girls and we are very favorably impressed. The redtape has been minimal and direct benefit has shown up in all of our major schools."

Lansing Public Schools, Harold E. Jacobson, director of personnel: "Title V of the National Defense Education Act has been very valuable to the Lansing school system. It has provided the opportunity for several of our counselors to improve their training. It has set statewide standards that has caused many of our counselors to seek additional training.

"It has provided funds to expand our program so that we have a better counselor-pupil ratio.

"Through the program we have been able to provide pupils and counselors with the best vocational information available. We have been able to supply our counseling centers with equipment that is making the work of our counselors more efficient and more effective.

"In total, it has helped us in acquiring the materials, equipment, and supplies that were necessary in improving our counseling program.

"The act has had a marked effect on the improvement of our counseling program. We have or will receive approximately $23,000 reimbursement for funds expended in the past 2 years."

Okemos Public Schools, George Richards, superintendent: "Title V–A has provided the Okemos public schools, Okemos, Mich., with increased guidance and counseling equipment, counseling personnel, more up-to-date guidance materials, an extended testing program, and additional clerical personnel."

Title V guidance was also evaluated by Dr. Edward C. Roeber, president of the American Personnel and Guidance Association, before the Senate Subcommittee on Education:

Title V of the National Defense Education Act, aimed to stimulate the training of counselors, and to exand the identification and counseling of more able students, has brought about many fine results. Reports from the States indicate that guidance has become more accepted as essential to a well-balanced education program; that statewide testing programs have been greatly expanded; that the ratio of students to counselors has been reduced, thus making more attention to individual students possible; that the impetus of the National Defense Education Act has been great in influencing capable personnel to enter guidance and counseling programs; that the demand for qualified counselors exceeds the number available; that curriculum changes have been made to better serve the needs of students with various aptitudes and abilities identified through guidance, counseling, and testing; and that there is a trend toward increased testing and counseling at the junior high and elementary levels to identify capacities and talents at an earlier age.

The overall national effect has been the recognition of the need for guidance, counseling, and testing to identify the aptitudes and abilities of students in order to assist in directing these talents toward their optimum development. This deep interest in the benefits of guidance services is being translated into programs of action with the assistance of grants to the States under title V, part A, and training institutes for counselors under title V, part B.

Some striking examples of the effect of the National Defense Education Act include: (1) The growth in guidance services in Iowa where from the school year 1957–58 to 1960–61 the number of guidance programs increased from 33 to 345 and the percent of secondary pupils served increased from 20 percent to 84 percent; (2) North Carolina's increase in full-time counselors from 18 in 1958–59 to 100 in 1959–60; and (3) the increase in the number of certified counselors available to local schools in Oklahoma from 49 in January 1959 to 337 as of July 1, 1960, now serving approximately 71 percent of secondary school students in the State.

In Alabama students with varying abilities and achievement levels are being identified much more readily through the statewide testing program supported by the National Defense Education Act. Many schools throughout the Nation are using special grouping, advanced placement, enrichment of curriculum, or the addition of courses to provide for able students identified through NDEA-sponsored programs.

New York reports improved testing activities, extensive improvement in educational and career information, and increased individual counseling time with students made available through support by the National Defense Education Act funds. Handbooks have been prepared and orientation activities for higher education are initiated early in a student's high school years.

RESULTS OF STRENGTHENING GUIDANCE PROGRAMS

Research has shown that where adequate guidance programs were available, dropouts were lower, failures were lessened, and higher achievement was attained by those receiving the proper guidance. For example, dropouts in the Tucson, Ariz., high schools were reduced 40 percent after guidance services were made available. Harvard researchers, in an experimental study of high school groups, found that 27 percent of those students provided with adequate counseling made honor grades compared with only 10 percent among the uncounseled; after graduation, only a third of the uncounseled students were admitted to college while over 50 percent of those counseled matriculated into higher education. In Waterloo, Iowa, West High School had a 7 to 8-percent failure rate annually; after a guidance program was launched there recently, the incidence of failure was cut in half. A school system in Louisiana reports that through its program of guidance, counseling, and testing they had reduced failures from 33 to 7 percent.

One of the outstanding studies made in recent years revealing how guidance can be of assistance is the New York City project entitled "Higher Horizons." Where guidance services were made available and a part of the ongoing school program the dropout rate was reduced 25 percent and the present going on to college was increased almost 25 percent. Many youth from the culturally deprived area in which the "Higher Horizons" project took place have an entirely new lease on life and can now look forward to a productive life and a full citizenship in our democracy.

A longitudinal study carried out in Wisconsin has indicated that full-time counselors do a much more effective job than part-time counselors. This study concluded after several years of investigation that there was a much sharper continuation in the educational plans of those who were counseled by full-time guidance workers and a much more realistic appraisal of their future than those among the uncounseled.

DIRECT RESULTS OF NATIONAL DEFENSE EDUCATION ACT, TITLE V

The National Defense Education Act has helped to bolster guidance programs in schools throughout the country. More schools are working toward adequate guidance services through NDEA support. The student-counselor ratio has been reduced on a nationwide basis from 750:1 in 1958 to 600:1 (still far below the 250:1 recommended in the Conant report). More talent has been identified by the broadened base of adequate testing under National Defense Education Act support, and more adequate supervision and direction has come from the various State departments of education relative to ongoing guidance programs.

By June of 1962, it is expected that through the National Defense Education Act guidance and counseling institute program over 9,100 counselors will have had an opportunity to upgrade their training or to begin a program of study leading toward an adequate preparation for full-time counseling. The effects of these 9,100 counselors will be felt throughout the United States. These counselors are now working or will work in secondary schools of all sizes.

Perhaps some statistics will be helpful at this point in looking at direct results of the institute programs. A survey recently completed by Klopf and Cohen of Teacher's College, Columbia University, indicates that the training programs carried out under the National Defense Education Act full-time and summer institutes have had a stimulating effect on counselor education. It was also pointed out in the Columbia study that there was great need for full-time graduate preparation for counselors rather than part-time study as the current amendments would provide. The Columbia University survey supports the need for a type of traineeship program which is now under consideration by the committee.

At my own institution, the University of Michigan, we have recently studied a comparative group of counselors who took work under the full-year National Defense Education Act guidance and counseling institute of 1959–60 and those who attended regular full-time study in the program during the decade of the 1950's. This study had led us to conclude that twice as many counselors who study in the full-year institute go on to immediate counseling duties in the secondary schools in comparison with students who have obtained their education in the regular program. The logical conclusion from this survey would indicate that the money appropriated by the Congress for the purposes of these institutes is being directly felt in increased numbers of counselors in the schools and in better trained counselors in these schools.

Perhaps, at this point, it would be appropriate to quote from an article which appeared on February 22, 1961 in the Providence (R.I.) Bulletin relative to the National Defense Education Act: "Summer and year-long institutes in guidance and counseling, in our major colleges and universities through contract with the U.S. Office of Education begun in 1959, have made a substantial contribution toward upgrading the competency of personnel engaged in or preparing to enter guidance work."

The Commissioner of Education, Dr. McMurrin, views title V accomplishments in this way:

In view of the emphasis of the act upon the encouragement of talented students and upon the related necessity of identifying talent, the progress under title V is particularly significant. The programs authorized by title V have increased the emphasis on excellence in our secondary schools. They have helped to direct the attention of schools and communities to young people of talent and they have helped counsel these students to take the necessary subjects for college entrance. Consequently, many able high school students have been assisted in obtaining entrance into institutions of higher education.

State reports indicate that more high school students, teachers, and their parents have access to the services provided by more qualified counselors in order that the abilities and aptitudes of our children and youth may be more effectively identified and developed. This added service makes substantial contributions to the reduction of school dropouts and more appropriate college and career planning.

Under the State programs authorized by title V(A), there has been a 50-percent increase in the number of qualified full-time equivalent counselors employed by secondary schools during the 2-year period. This increase is from about 12,000 to about 18,700, and is a noteworthy addition to the effort to encourage better education for American youth. The national counselor pupil ratio has improved during this time from 1:750 to 1:610, a substantial step toward the accepted ratio of 1:300.

More than 6.8 million aptitude and ability tests were given to public secondary school students in the school year 1959–60 under the act, representing over one-third of the 19 million given in the country. More than 75 percent of all secondary school students were tested in that year. While testing is not a perfect instrument for identifying talent, the contribution of the act toward the national effort in this direction is certainly noteworthy.

The counseling and guidance institutes authorized by title V(B) of the act and under funds already spent or obligated will have assisted in the training of more than 9,000 secondary school counselors. These counselors may be expected to influence at least 2,700,000 secondary students each year.

Dr. Logan Wilson, of the American Council on Education, testified before the House committee with respect to title VI, as follows:

We are pleased to note that the language-development program of modern language centers and institutes under title VI has been made permanent in H.R. 6774. The

results of this program, in our judgment, have been excellent.

The American Council is now engaged in an inventory of the language and area centers established under title VI(A) of the National Defense Education Act. Although it will be some months before the final report of this inventory is ready, we can say, on the basis of visits by members of the council's inventory staff to each of the 46 centers established by title VI(A) that rarely has a small amount of money been so well and productively invested. It is in these centers that our colleges and universities are training a cadre of specialists in rare and critical languages. Here is a genuinely cooperative venture, with the Federal Government and the institutions sharing the cost on a 50–50 basis and with each institution in full control of the operation of its campus. Indeed, it is clearly and immediately evident from the preliminary findings of the council's inventory that there is no Federal control over the operation of the language and area centers.

I hardly need to emphasize that, with the increasing demand for persons who can speak one or more of the languages of the African or Asian regions, the title VI center program must be sustained and expanded to involve more institutions, and extended downward to involve more undergraduate students. If, for instance, we are to succeed with programs such as the Peace Corps we need more undergraduate study of Hindi, Swahili, and Yoruba. The title VI centers are training the persons who will teach undergraduates those languages and others just as critically in demand.

Moreover, though it may seem odd to speak of English as a foreign language, we need to expand training programs for teachers of English as a second language. The proposed amendments to title VI will help to train teachers for elementary and secondary schools attended by American children for whom English is not the home language. Again, we might cite the Peace Corps as an example of a program which is creating a demand for persons who can teach English as a second language, a demand greater than the immediately foreseeable supply. With assistance under the title VI program, colleges and universities could expand their programs for training the specialists who will teach the teachers of English as a second language. The committee might wish to consider amendments for this purpose.

The council notes with approval the authorization to use National Defense Education Act funds to send language teachers to study in the country where a language is spoken.

We recommend further that, in all types of training under this title, stipends now paid to enrollees from public schools only, be paid to all enrollees. Only in this way, we believe, can the maximum benefits of this valuable program be achieved.

Title VI language development was supported by the Honorable CARROLL D. KEARNS, in the House hearings:

This title of the act is fundamental to the Nation's future security and to attainment of the language competency required by American representatives throughout the world. Few of the languages spoken by more than three-fourths of the world's population were being taught in the schools and colleges of the United States prior to passage of the National Defense Education Act. Furthermore, teaching methods, equipment, and curriculums were largely unsuited to national needs of our times.

Under the act, a much belated start has been made to develop our proficiency in the uncommonly taught languages of such critical areas of the world as Africa, the Far East, southeast and south Asia, the Near and Middle East, and the Soviet area. Here, the provisions of the act for language and area centers, fellowships and research have been implemented in order to accomplish the objectives of the act.

During the first 2 years of operation, the conduct of 58 institutes for upgrading the modern language teaching abilities of 3,200 elementary and secondary schoolteachers has produced highly encouraging results. Also, as a beginning, 643 fellowships were awarded for graduate study in the uncommonly taught languages. There is strong justification for continuing and substantially expanding this program.

Title VII audiovisual accomplishments were documented before the House by Wilbur S. Edwards, a member of the National Audio-Visual Association:

I have personally seen at firsthand the results of funds provided by the NDEA. For example, high school students throughout the country are studying physics under Dr. Harvey White, vice chairman of the Department of Physics of the University of California, an internationally recognized master teacher of physics, by means of 160 half-hour films constituting a complete introductory physics course. With half the funds for this course provided by the NDEA, thousands of students are studying at the feet of Dr. White; students who otherwise would not have been able to secure such an exciting and meaningful introduction to this important area of science.

Thousands of other students have been afforded an equal opportunity in chemistry under Dr. John Baxter of the University of Florida.

Occupied as you are in legislative matters pertaining to education, I think you will be interested in a few statements of teachers whose use of these materials was made possible by the NDEA:

"Dr. White can do more in 30 minutes than I could do in 2 hours."—FRANK HORTON, Central High School, Charlotte, N.C.

"We couldn't match that equipment in the films in a thousand years."—WILLIAM JOHNSON, Calaveras High School, San Andreas, Calif.

"This is the only way we could ever offer physics to our students. I haven't been able to hire a qualified physics teacher in years."—J. K. EAST, Horry County Schools, Conway, S.C.

"I had two students who topped Arkansas and Missouri combined in grades on a nationwide test. Our seniors of last year who took the course in physics as taught by Dr. White in films are having no trouble with their courses in college physics and have expressed gratitude for what they learned last year."—JOHN T. GRIFFITH, Jacksonville, Ark.

Statements of equal enthusiasm are made throughout the United States wherever media of this kind are used.

In other schools, as far down as the first grade, students are speaking Spanish because the National Defense Education Act made it possible for these schools to have superb instruction accompanied by fluently spoken Spanish on recordings and stimulating filmstrips that have made the learning of this modern foreign language fascinating.

I am sure that results equally as impressive could be told to you by other producers of materials and equipment. Through the National Defense Education Act, new excellence in education has been achieved. There are few things that work perfectly and certainly in establishing the machinery for the National Defense Education Act there are problems. But when these problems are considered in the light of the total project which is making such a significant contribution to the educational standards of our country, they are minimal.

The value of NDEA reaches far beyond its immediate area. It has been a fresh stimulus for the entire educational system. Further, it has demonstrated to the parents that it is possible to do something about education in this country. The mothers and fathers of the students who topped all students in Arkansas and Missouri on that nationwide physics test saw at firsthand the effect of the injection given by the NDEA. The NDEA has not only made an important contribution to the sciences—it has also made a vital contribution to the science of teaching with the availability of materials such as those of Dr. White and Dr. Baxter which high school teachers have understudied.

Having begun such an important work, it is the hope that the NDEA will be continued. With the problems we confront as a nation, the continuance of those forces aiding and abetting the educational accomplishments of our future citizens would seem worthy of the highest priority.

Title VII educational media accomplishments under the act, are, according to the ranking minority member of the House Committee on Education and Labor:

Since the beginning of the program the provisions of this title have provided grant support for 115 separate research projects dealing not only with educational use of television and motion pictures, but also with a wide range of new educational equipment and other media. The advance of this program under the act is basic to improving our educational processes at all levels of learning. * * * Additional funds would be provided for the conduct of demonstration projects which would show the uses and effectiveness of new techniques and new educational media. Funds granted under the present authorization have gone into the support of research and additional funds are needed if the results of the research are to be wisely effectuated.

The U.S. Commissioner of Education, Dr. McMurrin, lent his support to the title before the Senate subcommittee:

The program of research and dissemination of information under title VII, is chiefly concerned with the improvement of school and college instruction through more effective uses of the modern media of communication. Television, motion pictures, teaching machines, and related media have shown marked potential for direct improvement of learning by individual students and classes of varying size. Under title VII there have been 138 research grants and 76 contracts for dissemination activities.

This program is helping to develop a sounder base of research for the guidance of teaching practices in our schools and homes. It is helping to develop a blueprint for the future development of a sound educational television enterprise and for the development and use of teaching machines and other new media. It is giving a major stimulus to the flow and use of research information, to the reporting and indexing of materials, and to the coordination of the efforts of public and private agencies working in this field.

Title VIII vocational educational accomplishments in Michigan have been aptly described by the State superintendent of public instruction, Dr. Lynn M. Bartlett, before the Senate subcommittee:

Michigan has received $988,816.04 under title VIII for the training of technicians. During the 3-year period of our participation in this program, 12,590 persons have received or are receiving technical training.

In addition to the benefits received by individuals, several Michigan communities

have been able to conduct surveys that have been invaluable in determining the need for technical education.

The U.S. Office of Education has been most helpful in providing instructional materials and aid to States in order that programs for highly skilled technicians could be set up.

There has never been a time in the history of our Nation when the demand for skilled technicians has been so great. Michigan is a highly industrialized State with great diversification. The rocket that safely placed Comdr. Allan Shepard into suborbital space flight was produced in Michigan. This is just one indication of the strides that we are taking.

It would be most unfortunate if this program of Federal aid were not continued to enable Michigan schools to further improve and expand their facilities for technical training. We further believe that these funds should be used for developing area programs of vocational education in all recognized technical and highly skilled occupations essential to our Nation's economic well-being.

Twenty-one educational institutions in Michigan have participated in this program. Eleven of these are community colleges, 7 are secondary or vocational schools, and 3 are institutions of higher learning.

Title X statistical services were strongly supported by the Honorable CARROLL D. KEARNS:

This title authorizes Federal assistance to the States for the improvement of statistical services of the State educational agencies. From the long-range point of view, this is one of the most important provisions of the act. Without strong support for statistical services, the States and local school boards, as well as the Congress and Federal executive agencies will continue to be without adequate facts upon which to base educational policy.

The collection of information about education is a task of enormous dimensions. Our State and private educational systems embrace approximately 50 million students enrolled in at least 36,000 operating school districts, in over 17,000 private and denominational schools and in about 2,000 institutions of higher education. These systems require over 1,600,000 teachers and spend annually a total of about $24 billion.

Because the operational responsibility for public education rests in the States, and because the Federal Government is dependent upon intermediate sources for most of its information, the State educational agency is the focal point in meeting local, State, and National needs.

Accomplishments under the act: A total of 45 States were participating under this program in fiscal year 1960. However, encouraging though the start of the program has been, progress is not rapid enough to overcome continuing and serious deficiencies in the collection, tabulation, and reporting of basic education information on a timely basis. Not only should this provision of the act be extended, but it should be substantially strengthened. In fact, it appears that accomplishment of truly modern and adequate State systems of educational information at the present rate of development may well require another 20 years or more.

Madam President, I move now into a brief argument in favor of a 1-year extension of the NDEA titles.

When the National Defense Education Act was passed in 1958, it was hailed as an important and significant contribution to American education. In the comparatively short period of their effective operation, the various programs authorized by the act have done much to justify this promise.

The success of this act, in a field of Federal participation that always requires the most careful and deliberate consideration, is in itself a compelling reason for painstaking review and analysis by the Congress. It would indeed be unfortunate to deal with such legislation in such a manner as has been proposed, that is, to extend it without review or amendment for 2 years.

The education needs of our youth, perhaps our very national security, require us to recognize that these are changing times. Since 1958, the number of students graduating from high school has increased by more than 300,000 and college enrollments by more than 700,000. In the same period of time, as might be expected, the number of college teachers needed increased by more than 35,000. These examples of changing growth and need, and many others could be cited, are sufficient to illustrate the contention that, in order to achieve fully the laudable objectives of the act, it is essential to adjust and suit its various provisions to the problems that they are intended to serve.

On the basis of administrative experience, it is quite clear that the purposes of the Act would be better served by making the following amendments as soon as possible and that undue delay in taking such action cannot help but blunt the achievements of such purposes:

TITLE II (STUDENT LOAN PROGRAM)

Raise present $250,000 Federal Capital Contribution ceiling to $500,000: The effect of the existing ceiling of $250,000 is to restrict the availability of loan funds to students enrolled in our larger universities. In some States, only one-quarter as much loan money is available at the State university as compared with funds available at smaller institutions in the same State.

Extend cancellation benefits to college teachers: One of the specific purposes of the National Defense Education Act is to provide trained manpower of sufficient quality and quantity to meet the national defense needs of the United States. It is obvious that a continuing supply of well trained teachers is vital to the defense requirements of our country. In light of the expanding college enrollment during the current decade, the need for faculty is as pressing at the college level as has been the case in the elementary and secondary schools. It is therefore consistent with the purposes of the National Defense Education Act to extend the loan cancellation privilege to persons who render full time teaching service in our colleges and universities.

TITLE III (FINANCIAL ASSISTANCE FOR STRENGTHENING SCIENCE, MATHEMATICS, AND MODERN FOREIGN LANGUAGE INSTRUCTION)

Limit allotment availability in title III for equipment acquisition in science, mathematics, and modern foreign language to 1 year: This amendment would be most helpful in stimulating State and local action to utilize the funds as they are made available.

Provide reallotment authority for supervisory, related services, and administration, and equipment acquisition funds: This authority is needed to curtail the amount of lapsed funds, thus assuring that all appropriated funds are utilized where they are needed for the purposes intended.

Stabilize the interest rate for the loans to nonprofit private schools: This would permit the private schools to more effectively utilize the loan funds, in accordance with the purposes of the title.

TITLE IV (GRADUATE FELLOWSHIP PROGRAM)

Provide additional fellowships for use within existing capacity of graduate schools: The effect of this amendment would be to permit worthy graduate students to use graduate facilities not now filled to capacity while at the same time continuing to contribute to strengthening of graduate facilities throughout the country.

Permit replacement to vacated fellowships: Such an amendment would provide opportunity for maintaining the program at full strength and for aiding additional numbers of worthy individuals who have demonstrated competency in their graduate programs.

Permit flat payment of attributable costs: On the basis of data furnished by the institutions, the average cost per year is in excess of $3,000. It is quite evident both from the viewpoint of the Federal Government and from the viewpoint of the participating institutions that such a change would be both desirable and economical.

TITLE V (GUIDANCE, COUNSELING, AND TESTING)

Provide funds for title V(A), administration of State plans for improving testing, counseling, and guidance.

Provide for counseling and testing in grades 7 through 12.

The act now limits these programs to secondary grades which are not uniform in all States. Also, these services could be effective at the seventh-grade level in accomplishing the purposes of the title.

TITLE X (DISCLAIMER AFFIDAVIT REQUIREMENT)

Twenty colleges and universities have withdrawn from the national defense student loan program in protest against the disclaimer affidavit provision, and 12 have declined to participate in this program because of this provision. Presidents or boards of another 63 institutions have stated their disapproval of the disclaimer affidavit but continue to participate in the program.

The National Defense Education Act merits the same careful study for its extension that marked its establishment. Obviously, it will not be possible to accord the act the attention that it deserves during the waning days of the 1st session of the 87th Congress. Just as obviously, however, this major effort to strengthen American education should receive priority consideration and careful review during the 2d session of the 87th Congress and this can best be accomplished by extending the expiration date of the act for 1 year, July 1, 1963.

Mr. HARTKE. Madam President, I have in my hand a telegram which I received last week from William E. Wilson, superintendent of public instruction for the State of Indiana, in which he expresses his support for a 2-year extension of the NDEA and impacted areas acts.

I ask unanimous consent to have the text of his telegram printed in the CONGRESSIONAL RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

INDIANAPOLIS, IND.,
September 8, 1961.

Senator VANCE HARTKE,
Senate Office Building,
Washington, D.C.:

H.R. 9000 coming to the Senate on Monday, extends both NDEA Act, and impacted area act for 2 years as now written. Your support of H.R. 9000 as passed by the House will be most helpful to us in Indiana.

WILLIAM E. WILSON,
Superintendent of Public Instruction.

Mr. MORSE. Madam President, I send the amendments to the desk. I believe we have had a complete debate on both amendments. I have no intention of using any time now; in fact, so far as I am concerned, I am perfectly willing to let these amendments go to a voice vote.

The PRESIDING OFFICER. The amendments will be stated.

Mr. MORSE. Madam President, I ask unanimous consent that the reading of the amendments be dispensed with and that they be printed at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 3, lines 6, 7, and 8, strike out "two succeeding fiscal years, and such sums for the fiscal year ending June 30, 1965" and insert in lieu thereof "succeeding fiscal year, and such sums for the fiscal year ending June 30, 1964".

On page 3, line 10, strike out "1964" and insert in lieu thereof "1963".

On page 3, line 13, strike out "1964" and insert in lieu thereof "1963".

On page 3, line 16, strike out "1968" and insert in lieu thereof "1967".

On page 3, line 23, strike out "five" and insert in lieu thereof "four".

On page 4, lines 2, 3, and 4, strike out "four fiscal years in the period beginning July 1, 1960, and ending June 30, 1964" and insert in lieu thereof "three fiscal years in the period beginning July 1, 1960, and ending June 30, 1963".

On page 4, line 7, strike out "four" and insert in lieu thereof "three".

On page 4, line 12, strike out "five" and insert in lieu thereof "four".

On page 4, line 19, strike out "five" and insert in lieu thereof "four".

On page 4, line 23, strike out "four" and insert in lieu thereof "three".

On page 5, line 2, strike out "five" and insert in lieu thereof "four".

On page 5, line 5, strike out "five" and insert "four".

On page 5, line 10, strike out "1964" and insert "1963".

On page 5, line 13, strike out "five" and insert "four".

On page 5, line 19, strike out "five" and insert "four".

On page 6, line 1, strike out "five" and insert "four".

On page 6, line 7, strike out "five" and insert "four".

Strike out the amendment to the title and insert in lieu thereof the following: Amend the title so as to read: "A bill to extend for one additional year the National Defense Education Act of 1958, and for other purposes."

Mr. MONRONEY. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Oklahoma will state it.

Mr. MONRONEY. Do I correctly understand, with respect to the amendments offered by the distinguished senior Senator from Oregon, that a vote of "yea" would result in reducing the duration of the National Defense Education Act from 2 years to 1 year?

The PRESIDING OFFICER. The Senator from Oklahoma is correct.

Do the Senators in control of the time yield back their time?

Mr. MORSE. I yield back my time.

Mr. MONRONEY. I yield back my time.

The PRESIDING OFFICER. All time for debate has been yielded back. The question is agreeing on the amendments, en bloc, of the Senator from Oregon.

The amendments were rejected.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Oklahoma.

Mr. MONRONEY. Madam President, on my amendment, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. On the amendment of the Senator from Oklahoma, the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. GRUENING] and the Senator from Missouri [Mr. LONG] are absent on official business.

I also announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ] are absent because of illness.

I further announce that, if present and voting, the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alaska [Mr. GRUENING] and the Senator from Missouri [Mr. LONG], would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] is absent because of illness.

The Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER] and the Senator from Texas [Mr. TOWER] are absent on official business.

The Senator from Maryland [Mr. BEALL], the Senator from Nebraska [Mr. CURTIS] and the Senator from Kentucky [Mr. MORTON] are necessarily absent.

The Senator from Illinois [Mr. DIRKSEN] is detained on official business, and his pair has been previously announced. If present and voting, the Senator from Maryland [Mr. BEALL], the Senators from Iowa [Mr. HICKENLOOPER and Mr. MILLER], the Senator from Kentucky [Mr. MORTON], and the Senator from Texas [Mr. TOWER] would each vote "yea."

Mr. MANSFIELD. On this vote I have a pair with the Senator from Illinois [Mr. DIRKSEN]. If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

The result was announced—yeas 80, nays 7, as follows:

[No. 200]

YEAS—80

Aiken	Bennett	Burdick
Allott	Bible	Bush
Bartlett	Boggs	Butler
Byrd, Va.	Hayden	Pastore
Byrd, W. Va.	Hill	Pell

Chavez	Long, Mo.	
Curtis	Mansfield	

So Mr. MONRONEY's amendment was agreed to.

Mr. MONRONEY. Mr. President, I move that the vote by which the amendment was agreed to be reconsidered.

Mr. KUCHEL. Mr. President, I move that the motion to reconsider be laid on the table.

The PRESIDING OFFICER (Mr. PELL in the chair). The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The question now is, Shall the bill pass?

The bill (S. 2393) was passed.

The title was amended so as to read: "A bill to extend for 2 additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958, and for other purposes."

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES APPROPRIATION BILL, 1962—CONFERENCE REPORT

Mr. HILL. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7035) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read, for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of September 7, 1961, pp. 18816, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. HILL. Mr. President, the conference agreement on the bill provides total appropriations of $4,915,965,000, a reduction of $88,316,081 from the budget estimates, a reduction of $245,415,000 from the amounts allowed by the Senate, and an increase of $588,508,000 over the amounts allowed by the House, which did not consider supplemental estimates totaling $722,133,000 transmitted to the Senate after the House had acted upon the bill.

Mr. President, I ask unanimous consent that there be printed at this point in the RECORD, in connection with my remarks, an explanation of the disposition of each amendment, as reflected in the House's adoption of the report. I may say to the Senate that this memorandum gives a detailed explanation and breakdown in regard to each and every amendment, from the first one right through to the last one.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

Amendment No. 1, Office of the Secretary, Department of Labor: Appropriates $1,796,000, instead of $1,811,000 as proposed by the Senate, and $1,711,000 as proposed by the House. Senate approved the supplemental estimate of $100,000, for the Department's housekeeping functions arising from the personnel to be added as a result of the Wage-Hour Amendments of 1961. But in view of the personnel reductions because of reduced allowances for the Solicitor and the Wage and Hour Division, the conferees felt a cut of $15,000 could be absorbed in this account.

Amendment No. 2, Bureau of International Labor Affairs: Appropriates $500,000 instead of $510,000 as proposed by the Senate, and $444,000 as proposed by the House.

Amendment No. 3, Office of the Solicitor: Appropriates $4,116,000 as proposed by the Senate, instead of $3,616,000 as proposed by the House. Senate added $500,000 of a supplemental estimate for $700,000 for legal services in connection with the Wage-Hour Amendments of 1961. Conferees accepted the Senate allowance, which adds 96 new positions including 59 attorneys, of the 130 positions including 82 attorneys sought in the estimate.

Amendment No. 4, Bureau of Labor Standards: Appropriates $3,258,000 as proposed by the Senate, instead of $3,208,000 as proposed by the House. Senate added $50,000, the full supplemental estimate for the Bureau's responsibilities under child labor provisions of the Wage-Hour Amendments, with an estimated 1 million employees under 18 added by amendments.

Amendment No. 5, salaries and expenses, Bureau of Employment Security: Appropriates $10,500,000 as proposed by the Senate, instead of $9,600,000 as proposed by the House. Senate added $900,000 of the $1 million supplemental estimate for Federal administrative expenses in connection with the Temporary Extended Unemployment Compensation Act of 1961. Funds are derived from the Unemployment Trust Fund.

Amendment No. 6, grants to States, Bureau of Employment Security: Appropriates $405 million, instead of $406,700,000 as proposed by the Senate, and $391,700,000 as proposed by the House. Senate added $15 million of the $15,995,000 sought in a supplemental estimate, for State administrative expenses in connection with the Temporary Extended Unemployment Compensation Act. Conferees agreed on a $1,700,000 reduction under the Senate allowance in view of the declining claims load under that contemplated. Funds are derived from the Unemployment Trust Fund.

Amendment No. 7, payment to the Federal Extended Compensation Account: Appropriates $340 million instead of $390 million as proposed by the Senate, the House not having considered the item. Senate added $390 million of the $490 million requested in the supplemental estimate for benefit payments under the Temporary Extended Unemployment Compensation Act. The conference agreement represents a further cut of $50 million below the estimate. The benefit payment record has fallen sharply below the Department's estimates for the last 2 months.

Amendment No. 8, Bureau of Labor Statistics: Appropriates $12,667,000 as proposed by the Senate, instead of $12,167,000 as proposed by the House. Senate added the full supplemental estimate for $500,000 for study of economic growth and employment outlook.

Amendment No. 9, revision of the Consumer Price Index: Restores the matter stricken out by the Senate, amended as follows: Inserts $250,000 as a limitation, in lieu of $50,000 as proposed by the House, on the amount which may be used for temporary employees; and inserts the word "that" in lieu of the words "the lowest rate" in the parenthetical expression "but not to exceed a rate equivalent to ——— for general schedule grade 9."

Amendment No. 10, revision of the Consumer Price Index: Deletes the words proposed by the Senate "to remain available until June 30, 1963" which would have made the funds available for an additional year. The estimate contemplated availability of funds until June 30, 1964, and the appropriations for 1960 and 1961 so provided.

Amendment No. 11, Wage and Hour Division: Appropriates $17,307,000 instead of $17,761,000 as proposed by the Senate, and $12,261,000 as proposed by the House. Senate added $5.5 million of the $6,350,000 requested in the supplemental estimate for the additional responsibilities in connection with the Wage and Hour Amendments of 1961. Conferees made a further reduction of $454,000, to allow only 500 of the 545 employees contemplated in the Senate allowance; 871 new positions were sought in the supplemental estimate.

Amendment No. 12, Food and Drug Administration: Appropriates $23 million instead of $22 million as proposed by the Senate and $23,580,000 as proposed by the House. This allowance is $4,152,000 over the 1961 appropriation, an increase of 22.03 percent.

Amendment No. 13, land-grant college aid (Hawaii): Appropriates $3,775,000 as proposed by the Senate. This, with the funds provided in the Second Supplemental Appropriation Act, 1961, will provide the full amount authorized, $6 million, in section 14(e) of the Hawaii Omnibus Act.

Amendment No. 14, defense educational activities: Appropriates $211,557,000 instead of $211,707,000 as proposed by the Senate, and $210,857,000 as proposed by the House. The conferees agreed on $700,000 of the Senate increase, $500,000 of which is for the graduate fellowship program, and $200,000 is for guidance and counseling institutes, a reduction of $150,000 in the latter from the Senate allowance.

Amendment No. 15, defense educational activities: Amendment reported in technical disagreement, but House moved to recede and concur. This amendment adds a proviso to require the Commissioner of Education to find that each graduate fellowship awarded is consistent with the purpose of the NDEA as stated in section 101 thereof.

Amendment No. 16, defense educational activities: Corrects a clerical error, substituting the word "for" in lieu of "during" in the final proviso of the item.

Amendment No. 17, salaries and expenses, Office of Education: Appropriates $11,594,000 instead of $11,864,000 as proposed by the Senate, and $11,364,000 as proposed by the House. Senate added $500,000, of which $100,000 was for participating in the 1962 Seattle fair—disallowed by the conferees; $65,000 for the captioned films for the deaf to allow the full amount authorized—allowed by the conferees; $41,600 for 6 positions for the library services staff, of which 3 positions and $20,000 were allowed by the conferees; and $293,400, and 28 positions, for partial restoration of items disallowed by the House—of which 14 positions and $145,000 was allowed by the conferees.

Amendment No. 18, salaries and expenses, Office of Education: Strikes out earmarking of $550,000 for the Division of Vocational Education, inasmuch as the budget estimate for the past several years has been in excess of the amount named, and the allowance in this bill for fiscal 1962 is $1,056,525.

Amendment No. 19, cooperative research: Appropriates $5 million instead of $4 million as proposed by the Senate, and $5,500,000 as proposed by the House. This allowance provides $1,643,000 more than was available for the purpose in fiscal year 1961, a 49-percent increase.

Amendment No. 20, research and training, Office of Vocational Rehabilitation: Appropriates $20,250,000 as proposed by the Senate, instead of $19,250,000 as proposed by the House. House added $2 million over the budget estimate—$1 million to expand training program and $1 million for two regional institutes of rehabilitation. Senate added $1 million for 25 to 30 additional research and demonstration projects dealing with new methods of rehabilitating the severely disabled. The conferees agreed that $250,000 of the Senate increase should be used for additional training of speech pathologists and audiologists. The allowance is an increase of $4,820,000 over the 1961 appropriation, or 31.24 percent.

Amendment No. 21, preamble, Public Health Service: Senate receded. The Senate amendment proposed a salary limit of $25,000 per year, in lieu of $19,000 as now provided by law, for scientific and professional personnel, appointed under section 208(g) of the act.

Amendment No. 22, accident prevention: Appropriates $3,618,000 as proposed by the Senate, instead of $3,368,000 as proposed by the House. Senate added $250,000, for 30 positions, for training and assignment of accident prevention specialists to State and local health departments, for expansion of projects devoted to prevention of accidents in specific areas, to development of improved methods of treating accident victims.

Amendment No. 23, communicable disease activities: Appropriates $10 million instead of $10,028,000 as proposed by the Senate, and $9,778,000 as proposed by the House. Senate added $250,000 and 21 positions for the Arctic Health Research Center for activities dealing with health and sanitation problems in low temperature environments. Conferees allowed $222,000 for the purpose.

Amendment No. 24, control of tuberculosis: Amendment was reported in technical disagreement and House moved to recede and concur. Senate earmarked $500,000 of grant funds for special project grants in areas of high incidence with language to permit the use of funds for such purpose.

Amendment No. 25, control of tuberculosis: Senate amendment accepted, which reduces by $500,000, to $3,500,000, funds for formula grants, in order to make the same amount available for special project grants as set forth in amendment No. 24.

Amendment No. 26, control of venereal diseases: Appropriates $6 million instead of $6,090,000 as proposed by the Senate, and $5,815,000 as proposed by the House. Senate added $275,000 for special project grants in areas of rising incidence of V.D. Conference agreement will make available $185,000 for the purpose.

Amendment No. 27, dental services and resources: Appropriates $2,500,000 as proposed by the Senate instead of $2,182,000 as proposed by the House. Senate added $318,000, and 16 positions, for work related to the extension of dental services to the institutionalized and homebound persons and to handicapped children.

Amendment No. 28, hospital construction activities: Appropriates $203 million instead of $212,972,000 as proposed by the Senate, and $187,972,000 as proposed by the House. Senate added $25 million to provide the full authorization under the Hill-Burton Act, as amended. This allowance will provide $201,228,000 for grants, $150 million under part C, and $51,228,000 under part G.

Amendment No. 29, hospital construction activities: Reported in disagreement. House moved to recede and concur with an amendment to earmark $140,028,000 for part C, instead of $150 million as proposed by the Senate, and $125 million as proposed by the House, plus $9,972,000 to be derived from the sums set forth in the item under section 636 and part G. This will provide the maximum authority for part C, $150 million, as has been done for the past 3 fiscal years, and will leave $51,228,000 for part G, an increase of 46.37 percent over the amount available in each of the last 3 fiscal years, $35 million.

Amendment No. 30, air pollution: House recedes. Amendment changes language to give clear authority for the purposes designated by the Senate in its report and for which funds were added in amendment No. 31.

Amendment No. 31, air pollution: Appropriates $8,800,000, instead of $8,900,000 as proposed by the Senate, and $8,600,000 as proposed by the House. Senate added $300,000, and seven positions, for conduct of research on the relationship between air pollution in a variety of environments and the incidence of chronic respiratory diseases, such as emphysema. Compromise will provide $200,000, of which $100,000 is for research, and $100,000 is for direct operations.

Amendment No. 32, radiological health: House recedes. Amendment changes language to broaden the authority under section 314(c) for the use of available funds.

Amendment No. 33, radiological health: Appropriates $10,647,000 as proposed by the Senate, instead of $9,147,000 as proposed by the House. Senate added $1,500,000, of which $500,000 was earmarked for additional training programs to make available a total of $1 million for the year, and $1 million, and 75 positions, is for additional research, technical assistance, and strengthening of State and local radiation protection and control activities, including $200,000 for establishment of a northeastern laboratory to provide services to States and training of State radiation protection personnel.

Amendment No. 34, grants for waste treatment works construction: Senate recedes. Senate added a proviso to permit the allotments under section 6 to be made on the basis of $80 million, the newly authorized annual appropriation in the Water Pollution Control Act Amendments of 1961. A supplemental estimate was subsequently sent up for the additional $30 million authorization.

Amendment No. 35, foreign quarantine activities: Appropriates $6,084,000 as proposed by the Senate, instead of $5,350,000 as proposed by the House. Senate added $734,000 for the construction of a permanent pier at the Rosebank Quarantine Station to replace hazardous wharf facilities extensively damaged in 1960 by Hurricane Donna.

Amendment No. 36, foreign quarantine activities: Amendment was reported in technical disagreement, but House moved to recede and concur. This amendment earmarks the $734,000 added in amendment No. 35 for the Rosebank pier. Conferees agreed that this allowance was to fully finance the entire costs of the project.

Amendment No. 37, general research and services, National Institutes of Health: Appropriates $127,637,000 instead of $140 million as proposed by the Senate and $119,275,000 as proposed by the House. NIH proposes to allocate $27,500,000 to clinical research centers, $11,290,000 to grants for fellowships, and $31 million to training grants.

Amendment No. 38, National Cancer Institute: Appropriates $142,836,000 instead of $160 million as proposed by the Senate and $125,672,000 as proposed by the House. NIH proposes to allocate $12,500,000 for clinical research centers, $3,100,000 for fellowships and $9,055,000 for training grants.

Amendment No. 39, mental health activities: Appropriates $108,876,000 instead of $125,570,000 as proposed by the Senate and $92,182,000 as proposed by the House. NIH proposes to allocate $3 million to clinical research centers, $4,440,000 to fellowships and $34,856,000 to training grants.

Amendment No. 40, National Heart Institute: Appropriates $132,912,000 instead of $160,100,000 as proposed by the Senate and $105,723,000 as proposed by the House. NIH proposes to allocate $12,500,000 to clinical research centers, $9 million to primate centers, $4,150,000 to fellowships and $13,104,000 to training grants.

Amendment No. 41, National Heart Institute: Reported in disagreement; House moved to recede and concur therein. Senate proposed $1 million for planning a gerontological research building and facilities, to be located in Baltimore. Total cost of the building will be about $10 million.

Amendment No. 42, National Institute of Dental Research: Appropriates $17,340,000 instead of $20 million as proposed by the Senate and $14,681,000 as proposed by the House. NIH proposes to allocate $1,120,000 to fellowships and $4,791,000 to training grants.

Amendment No. 43, arthritis and metabolic disease activities: Appropriates $81,831,000 instead of $90 million as proposed by the Senate and $73,661,000 as proposed by the House. NIH proposes to allocate $1,500,000 to fellowships and $10,300,000 to training grants.

Amendment No. 44, allergy and infectious disease activities: Appropriates $56,091,000 instead of $60 million as proposed by the Senate and $52,812,000 as proposed by the House. NIH proposes to allocate $1,700,000 to fellowships and $5,400,000 to training grants.

Amendment No. 45, allergy and infectious disease activities: Reported in disagreement; House moved to recede and concur. Senate added $750,000 for the modernization of the Rocky Mountain Laboratory at Hamilton, Mont.

Amendment No. 46, neurology and blindness activities: Reported in disagreement; House moved to recede and concur. Senate added language, and funds, to authorize a new program of professional and technical assistance to help in the fight against neurological and sensory diseases.

Amendment No. 47, neurology and blindness activities: Appropriates $70,812,000 instead of $80 million as proposed by the Senate and $57,624,000 as proposed by the House. NIH proposes to allocate $2,500,000 to clinical research centers, $1,780,000 to fellowships and $10 million to training grants.

Amendment No. 48, NIH Management Fund, Clinical Center Cafeteria: Reported in disagreement; House moved to recede and concur. Senate proposed the amendment of the authorization to operate a cafeteria to provide the charging of rates to recover the "reasonable value of the meals served" in lieu of the "cost of such operation." Under the latter phrase the prices had been raised to the point where the NIH staff were refusing to patronize the cafeteria.

Amendment No. 49, grants for cancer research facilities: Senate receded from its disagreement to the item, appropriating $5 million for nonmatched grants. There was included in the 1961 act a similar sum which was awarded to seven applicants, varying from $45,000 to Johns Hopkins University to $2,923,000 to the University of Wisconsin.

Amendment No. 50, grants for hospital research facilities: Reported in disagreement; Senate struck out the item proposing $10 million for construction grants, allegedly authorized by section 433(a) of the PHS Act. House moved to recede and concur with an amendment to provide $10 million as authorized by section 636 of the act, contingent upon the enactment of H.R. 4998, 87th Congress, or similar legislation.

Amendment No. 51, scientific activities overseas: Appropriates $9 million instead of $10,084,000 as provided by the Senate, and $8 million as proposed by the House. The funds will be used by the NIH in medical research, by the Bureau of State Services in communicable disease and environmental health studies, and by the National Library of Medicine.

Amendment No. 52, Office of the Surgeon General: Appropriates $5,375,000 as proposed by the Senate, instead of $5,275,000 as proposed by the House. Senate added $100,000 of which $47,000 would be used to support the increased volume of international activities, and $53,000 would be used for additional consultative services in management analysis.

Amendment No. 53, old-age and survivors insurance: House receded. Senate struck out the limitation of $320,000 for acquisition of land. House added $320,000 over the budget estimate for the land, the price of which had been estimated on the basis of a limited appraisal made in the fall of 1960.

Amendment No. 54, old-age and survivors insurance: House receded. Senate struck out the proviso limiting the advances to States for disability determinations under section 221(e).

Amendment No. 55, grants to States for public assistance: Appropriates $2,401,200,000 instead of $2,501,200,000 as proposed by the Senate and $2,285,800,000 as proposed by the House. Senate added $215,400,000, the full supplemental budget estimate, of which $200,400,000 was for the new ADC of unemployed parents program; $11 million for vendor medical assistance payments; and $4 million for payments to dependent children in foster families. Later experience has resulted in a substantial reduction in the funds estimated to be needed for the new ADC programs.

Amendment No. 56, grants for training of public welfare personnel: Senate receded. Senate added $2 million, a reduction of $1,500,000 from the supplemental budget estimate, for the Federal Government to pay 100 percent of the cost of training public welfare personnel.

Amendment No. 57, salaries and expenses, Bureau of Public Assistance: Appropriates $3,442,000, instead of $3,663,000 as proposed by the Senate, and $3,221,000 as proposed by the House. Senate added $442,000 as requested in a supplemental budget estimate for Federal administrative expenses of the newly enacted program of aid to dependent children of unemployed parents and in foster family homes, and of training grants. The ADC program needs have fallen substantially below estimates and funds for the training grants have been disallowed so that the conference allowance is deemed adequate.

Amendment No. 58, grants for maternal and child welfare: Appropriates $69,100,000 as proposed by the Senate, instead of $67,100,000 as proposed by the House. Senate added $2 million to provide the full amount authorized, $25 million, for grants for maternal and child-health services.

Amendment No. 59, grants for maternal and child welfare: Earmarks the $2 million increase in amendment No. 58 for grants for maternal and child-health services.

Amendment No. 60, research and training (special foreign currency program): Appropriates $1,607,000 instead of $2,213,000 as proposed by the Senate, and $1 million as proposed by the House. Senate added $1,213,000 to allow the full budget estimate. Conferees agreed on one-half of the Senate increases.

Amendment No. 61, salaries and expenses, Gallaudet College: Appropriates $1,256,000 as proposed by the Senate instead of $1,200,000 as proposed by the House. Senate added $56,000 to improve faculty salary scales and to pay salaries at the regular rates to faculty for summer work.

Amendment No. 62, construction, Gallaudet College: Appropriates $601,000 as proposed by the Senate, instead of $127,000 as proposed by the House. Senate added $474,000 to permit (1) addition to the Speech and Hearing Center, $300,000; (2) maintenance building, $81,000; (3) completion of auditorium and parking facilities, $53,000; and (4) planning an arts building, $40,000.

Amendment No. 63, salaries and expenses, Office of Field Administration: Appropriates $3,265,000, instead of $3,345,000 as proposed by the Senate, and $3,225,000 as proposed by the House. Senate added $120,000, and 18 positions, to provide an analyst and a secretary to serve the analyst and aging representative in each regional office. Conferees allowed only a secretary for each of the regional offices.

Amendment No. 64, general provision, indirect costs of research: Senate receded. House inserted the general provision to limit the payment of indirect costs of research to 15 percent of the direct costs, and Senate struck out the section. Fiscal year 1962 will be the fourth year in which this provision has been included in the bill.

Amendments No. 65 and No. 66, general provisions: Change section numbers.

Amendment No. 67, National Labor Relations Board: Appropriates $19,989,000 as proposed by the Senate, instead of $18,213,000 as proposed by the House. Senate added the full supplemental estimate, $1,376,000, and $400,000 of the $667,000 cut by the House. No funds are provided to carry 31 unauthorized positions in fiscal year 1962.

Amendment No. 68, National Mediation Board: Appropriates $1,804,000 as proposed by the Senate instead of $1,604,000 as proposed by the House. Senate added $200,000 requested in a supplemental budget estimate for a supplemental board to handle a backlog of some 2,500 cases, for 2 years. Management and labor jointly contribute sums somewhat in excess of the Federal appropriation.

Amendment No. 69, general provision: Language proposed by the Senate is stricken out. Senate added a section to forbid the use of research grant funds for entertainment expenses, including alcoholic beverages.

Mr. HILL. Mr. President, as we know, the main differences, of course, between the bill as passed by the Senate and the bill as passed by the House were the appropriations for the National Institutes of Health. The House allowed a total for the Institutes of $641 million; the Senate added increases totaling $194,670,000, to allow $835,670,000. In conference the conferees compromised on a precise split, allowing $97,335,000 over the House allowance.

During the consideration of the conference report in the House yesterday, there was inserted a table showing the distribution, by activities, of conferee increases over the House allowances. I ask unanimous consent to have printed in the RECORD a table showing the distribution, by activities, of the total allowances for NIH, $738,335,000.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

National Institutes of Health—Distribution by activities of conference allowances, fiscal year 1962

[In thousands of dollars]

	Research grants	Clinical research centers [1]	Primate centers [1]	Fellowships	Training	State control program	Community demonstrations projects	Professional and technical assistance	Chemotherapy contracts	Other direct operations	Totals
General research and services	79,247	(27,500)	----------	11,290	31,000	----------	----------	----------	----------	6,100	127,637

[1] The entries under "Clinical research centers" and "Primate centers" are included in the entries in the column "Research centers."

Mr. HILL. Mr. President, I move that the conference report be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 7035, which was read as follows:

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 15, 24, 36, 41, 45, 46, and 48 to the bill (H.R. 7035) entitled "An Act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes", and concur therein;

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 7, and concur therein with an amendment, as follows:

In lieu of the sum "$390,000,000", insert "$340,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 29, and concur therein with an amendment, as follows:

In lieu of the amount proposed by said amendment, insert the following: "$140,028,000 plus $9,972,000 which the Surgeon General is authorized and directed to transfer from the sums set forth herein for section 636 and for grants or loans for facilities pursuant to part G."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 50, and concur therein with an amendment, as follows:

Restore the matter stricken out by said amendment, amended to read as follows:

"HOSPITAL AND MEDICAL FACILITY RESEARCH

"For research and demonstration in the development and utilization of services and hospital and other medical facilities, including grants for construction and equipment of experimental or demonstration hospitals and other medical facilities, as authorized by section 636 of the Act, $10,000,000: *Provided*, That none of these funds shall be used to pay in excess of two-thirds of the cost of such construction and equipment: *Provided further*, That this paragraph shall be effective only upon enactment into law of H.R. 4998, 87th Congress, or similar legislation."

Mr. HILL. Mr. President, I move that the Senate agree to the amendments of the House to the amendments of the Senate numbered 7, 29, and 50.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama.

The motion was agreed to.

Mr. HILL. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a detailed table covering the whole bill.

There being no objection, the table was ordered to be printed in the RECORD.

Departments of Labor, and Health, Education, and Welfare, and Related Agencies Appropriations Act, 1962 (H.R. 7035)

[Figures in parentheses not added in totals]

	Appropriations, 1961	Budget estimates, 1962	House allowance	Senate allowance	Conference allowance
DEPARTMENT OF LABOR					
Office of the Secretary	$1,582,840	$1,995,000	$1,711,000	$1,811,000	$1,796,000

Departments of Labor, and Health, Education, and Welfare, and Related Agencies Appropriations Act, 1962 (H.R. 7035)—Continued

[Figures in parentheses not added in totals]

	Appropriations, 1961	Budget estimates, 1962	House allowance	Senate allowance	Conference allowance
DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE—Continued					
Social Security Administration:					
Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance (trust fund)	($232,200,000)	($240,750,000)	($241,070,000)	($241,070,000)	($241,070,000)
Grants to States for public assistance	2,177,000,000	2,501,200,000	2,285,800,000	2,501,200,000	2,401,200,000
Grants for training public welfare personnel		3,500,000		2,000,000	
Hospitalization and services for repatriated mentally ill Americans		364,000	364,000	364,000	364,000
Salaries and expenses, Bureau of Public Assistance	2,726,900	3,742,000	3,221,000	3,663,000	3,442,000
Salaries and expenses, Children's Bureau	2,493,500	2,668,000	2,668,000	2,668,000	2,668,000
Salaries and expenses, White House Conference on Children and Youth	150,000				
Grants to States for maternal and child welfare	51,833,000	64,750,000	67,100,000	69,100,000	69,100,000
Cooperative research in social security	350,000	1,500,000	700,000	700,000	700,000
Research and training (special foreign currency program)		2,213,000	1,000,000	2,213,000	1,607,000
Salaries and expenses, Office of the Commissioner	372,800	590,000	590,000	590,000	590,000
Transfer from OASI trust fund	(296,000)	(332,000)	(322,000)	(322,000)	(322,000)
American Printing House for the Blind	400,000	400,000	400,000	400,000	400,000
Gallaudet College:					
Salaries and expenses	1,074,000	1,200,000	1,200,000	1,256,000	1,256,000
Construction	2,512,000	127,000	127,000	601,000	601,000
Howard University:					
Salaries and expenses	5,490,000	7,007,000	7,007,000	7,007,000	7,007,000
Plans and specifications	225,000	211,000	211,000	211,000	211,000
Construction of buildings	1,433,000	4,447,000	4,447,000	4,447,000	4,447,000
Construction of auditorium-fine arts building (liquidation of contract authority)		95,000	95,000	95,000	95,000
Office of the Secretary:					
Office of the Secretary	2,209,000	2,382,000	2,382,000	2,382,000	2,382,000
Transfer from OASI trust fund	(326,000)	(352,000)	(352,000)	(352,000)	(352,000)
Office of Field Administration	2,942,000	3,363,000	3,225,000	3,345,000	3,265,000
Transfers	(1,200,000)	(1,285,000)	(1,285,000)	(1,285,000)	(1,285,000)
Surplus property utilization	786,000	862,000	862,000	862,000	862,000
Office of the General Counsel	650,000	713,000	713,000	713,000	713,000
Transfers	(646,000)	(696,000)	(696,000)	(696,000)	(696,000)
White House Conference on Aging	785,000				
Total, direct appropriations, Department of Health, Education, and Welfare	3,866,255,131	4,190,774,081	4,016,072,000	4,451,303,000	4,256,367,000
Indefinite appropriations	3,612,000	4,062,000	4,062,000	4,062,000	4,062,000
Total, direct and indefinite appropriations, Department of Health, Education, and Welfare	3,869,867,131	4,194,836,081	4,020,134,000	4,455,365,000	4,260,429,000

U.S. Soldiers' Home (trust funds)	(5,899,000)	(6,052,000)	(6,052,000)	(6,052,000)	(6,052,000)
Total, direct appropriations, all titles of the bill	4,984,804,331	5,000,219,081	4,823,395,000	5,157,318,000	4,911,903,000
Total, indefinite appropriations, all titles of the bill	3,612,000	4,062,000	4,062,000	4,062,000	4,062,000
Grand total	4,988,416,331	5,004,281,081	4,827,457,000	5,161,380,000	4,915,965,000

[1] Funds provided under a new title "Hospital and medical facility research" under authority of sec. 636 of the act, instead of under sec. 433(a) as proposed by the House contingent upon the enactment into law of H.R. 4998, 87th Cong., or similar legislation.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. HILL. I yield to the distinguished Senator from Minnesota.

Mr. HUMPHREY. I commend the Senator from Alabama for his efforts in the entire field of health, education, and welfare——

Mr. HILL. May I interrupt the Senator to say it was the teamwork of the members of the committee on this particular appropriation bill that did the job.

Mr. HUMPHREY. The Senator is always very generous. I wish to ask the Senator a question because, some time ago, when the appropriation bill was before the Senate, I expressed my personal concern that funds under the amended section 636 of the Hill-Burton Act be made available for the construction of a total experimental hospital at Rochester, Minn. This hospital project is well known to the administration, the President, and the Secretary of Health, Education, and Welfare. It has been discussed in detail with the executive branch officials. Since, as I indicated at that time, a successful pilot project has been demonstrated there, and since they have prepared additional plans for further experiment and research using a total hospital facility, I wanted to ask the distinguished Senator from Alabama whether or not it is his understanding that sufficient funds to aid in this worthy project would be made available by this appropriation.

Mr. HILL. Sufficient funds are provided in the bill, and I would say that, certainly, the Public Health Service, which will have the allocation of these funds, should, and will, give the most careful and understanding consideration to this particular project. When we were having our hearings on the community facilities bill, which is the authorization act to authorize the funds, representatives of the Rochester hospital who were at the committee meeting presented testimony which was very impressive so far as the committee was concerned. I am sure the Public Health Service should and will give full consideration in every way to the project.

Mr. HUMPHREY. Will the Senator agree with me that to get a good start with the use of these funds, it would be well to have at least a major project that could develop the full experiment as to hospital design, construction, and administration?

Mr. HILL. So far as construction is concerned, if there were a major project, there would be much in favor of the project, particularly where certain experiments and research had been carried on by the parties who are now interested in the particular project to which the Senator has addressed himself.

Mr. HUMPHREY. The Senator knows the hospital to which I have referred, at Rochester, Minn., the Mayo Clinic has created a pilot project and has submitted a professional report on the project, and has demonstrated ability to carry on patient care. The Senator is familiar with the experimentation that has gone on so far. Is he not?

Mr. HILL. I am. As I stated, during consideration of the communities facilities bill, representatives of the Rochester hospital came before the committee and made a presentation, telling us of the research that had been carried on and the work that had been done as a result of the research, and giving us a picture of what they expected to do.

Mr. HUMPHREY. Does the Senator believe it quite possible, with the use of matching funds, to begin the administration of this new program under section 636 by granting funds for a single hospital project such as I have mentioned here?

Mr. HILL. I was temporarily distracted while consulting with the majority leader. Would the Senator mind repeating his question?

Mr. HUMPHREY. In light of what has been said here about the hospital project, as to which there was testimony, does the Senator believe it would be possible to begin the administration of this new program under section 636 by granting funds for a single hospital project such as I have mentioned?

Mr. HILL. It would be quite possible to begin administration of the new program under section 636 by granting funds for a hospital project such as the distinguished Senator has addressed himself to.

Mr. HUMPHREY. I am very grateful to the Senator. May I say the Senator has pioneered once more in what I consider to be some valuable work in the field of health care. As the Senator from Alabama said a while ago, very little controlled research has been done to determine the best design of hospital facilities for the most advanced utilization of personnel, and a project that would improve the design and provide for better utilization of personnel would be in the public interest.

Mr. HILL. It would be in the public interest in many ways. In particular, it might well lead to that which is so much to be desired, namely, the lowering of hospital costs for patients.

Mr. HUMPHREY. I thank the Senator.

I may add that I was disappointed to learn that the conferees on H.R. 7035—the appropriations bill for the Department of Labor and the Department of Health, Education, and Welfare—eliminated completely the $2 million provided by the Senate for training of public welfare personnel. This action by the Senate represented a reduction of $1.5 million from the original $3.5 million requested by the President for this purpose.

I understand the entire sum has been eliminated. Is that correct?

Mr. HILL. The Senator is correct. The conferees could not and did not agree on the sum.

Mr. HUMPHREY. The aim of social welfare programs must be the bringing of the individual above the maintenance of life at some minimum level. Social rehabilitation is an extremely difficult task in some of these cases. This job calls for highly trained personnel, as well as those with experience. New methods and new techniques are being perfected. Social workers should have every opportunity to return to school and acquire this knowledge.

During Senate debate on this appropriation bill, I expressed the hope that the House conferees would find it possible to accept the entire $2 million recommended by the Senate Appropriations Committee. This vital program should have been activated many years ago. Certainly we should start this year.

Denial of this $2 million appropriation by the conferees will have a demoralizing effect upon public welfare workers. These welfare workers had appropriate expectations that opportunities might be opened to them to prepare themselves more significantly for their responsible and important work, particularly in view of the amendment to the Social Security Act this year to provide 100-percent Federal financing of public welfare workers' training grants.

The Secretary of the Department of Health, Education, and Welfare has stated on several occasions that he does not want public welfare personnel acting simply as conduits for money. He believes that they must have responsibility and preparation for helping people who need their highly skilled services in rehabilitation and welfare. I am sure it is because of this conviction that the Secretary has requested a group of distinguished national leaders in the social welfare field to study problems in the public welfare area and to make recommendations for changes and improvements.

Mr. President, I ask unanimous consent that a list of the members of this ad hoc committee on public welfare, organized at the request of the Secretary, be printed at this point in the CONGRESSIONAL RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

AD HOC COMMITTEE ON PUBLIC WELFARE

Sanford Solender, chairman, executive vice president, National Jewish Welfare Board.

Joseph P. Anderson, executive director, National Association of Social Workers.

Philip Bernstein, executive director, Council of Jewish Federations and Welfare Funds.

Clark W. Blackburn, general director, Family Service Association of America.

Robert Bondy, director, National Social Welfare Assembly.

Rudolph T. Danstedt, director, Washington branch, National Association of Social Workers.

Fred DelliQuadri, dean, New York School of Social Work, Columbia University.

James R. Dumpson, commissioner, New York City Department of Welfare.

Loula Dunn, director, American Public Welfare Association.

Fedele Fauri, dean, School of Social Work, University of Michigan.

Very Rev. Msgr. Raymond Gallagher, director of youth services, Diocesan Catholic Charities, Cleveland, Ohio.

Dorothy Height, associate director for training, Young Women's Christian Association.

Raleigh C. Hobson, director, City Department of Public Welfare, Richmond, Va.

Mrs. Trude Lash, executive director, Citizen's Committee for Children of New York City.

Norman V. Lourie, deputy secretary, Pennsylvania State Department of Public Welfare.

The Honorable Justine Wise Polier, justice of the domestic court, city of New York.

Joseph H. Reid, executive director, Child Welfare League of America.

Mrs. Pauline Ryman, director, social services department, Henry Ford Hospital, Detroit, Mich.

Harleigh Trecker, dean, School of Social Work, University of Connecticut.

John W. Tramburg, commissioner, State department of institutions and agencies, Trenton, N.J.

Dr. Ellen B. Winston, commissioner, North Carolina State Board of Public Welfare.

Dr. Ernest Witte, executive director, Council on Social Work Education.

Dr. Whitney M. Young, Jr., executive director-elect, National Urban League.

Mr. HUMPHREY. Mr. President, I understand that the ad hoc committee on public welfare has given its report to Secretary Ribicoff. While I have not seen this report, it is my understanding that it underlines emphatically the importance—yes, the urgent need—for properly trained and qualified personnel.

Congress recognized this importance in 1956, when we amended the Social Security Act to provide for services to encourage self-help and to strengthen family life. As part of that package, in a sense, we also authorized $5 million in the form of grants to the States for the training of public welfare personnel. Any study of our public welfare programs would quickly demonstrate that $2 million is a modest amount to start this program of training for welfare personnel—the great majority of whom have had little or no formal educational preparation for their occupation.

As I said initially, denial of the $2 million approved by the Senate for the training of public welfare personnel is most unfortunate. I shall certainly make every effort to assure that funds for such training are made available in the future years.

Mr. HILL. Mr. President, in spite of the hope which the Senator expressed on the floor at the time the appropriation bill was under consideration, the House conferees did not find it possible to agree on the $2 million provided by the Senate for training of public welfare personnel. Therefore it could not be agreed to and was not agreed to in conference.

Mr. HUMPHREY. I hope the Department will make a supplemental appropriation request, because I think such a program will pay dividends, just as hospital construction funds do. It provides for better trained personnel, and therefore better administration.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. HILL. I yield to the Senator from Colorado.

Mr. ALLOTT. I wish to say, for the benefit of the distinguished senior Senator from Minnesota, I think the chairman of the committee did a magnificent job in the committee. There were some things we did not get that we would have liked. On the whole the conference was very successful.

It was a very tough conference. I do not know how many sessions were held, for I did not count them, but I know there were numerous sessions, as the chairman knows. The chairman did a fine job of disposing of a lot of questions, including that relating to the University of Hawaii under the Morrill Act, and many other questions.

I pay tribute to the chairman for his patience and understanding in trying to work out the problems, because the conference was a very difficult one.

Mr. HILL. I thank the distinguished Senator from Colorado for his kind and generous remarks. The distinguished Senator from Colorado is a member of the subcommittee which handled the bill, and was a member of the conference committee. Certainly the distinguished Senator from Colorado is entitled to a full share of the credit for any work done by the subcommittee or by the Senate conferees at the conference. He was present. He worked hard. He was most helpful on all questions.

Mr. FONG. Mr. President, will the Senator yield?

Mr. HILL. I yield to the distinguished Senator from Hawaii.

Mr. FONG. I commend the distinguished Senator for a very fine conference report. I know the Senator worked very hard.

In behalf of the State of Hawaii I wish to thank the Senator and his colleagues for standing firm for the appropriation for the University of Hawaii, $3,750,000. The University of Hawaii will find very good use for the money. This was provided under the Morrill Act. We in Hawaii were entitled to 90,000 acres of land, but since there was no land available the Hawaii Omnibus Act carried an authorization of $6 million. Last year Hawaii was given $2,225,000. The Senate provided for the appropriation of the full amount, but not the House. This year the Senate stood firm and strong.

I congratulate the distinguished Senator from Alabama and the members of the conference committee for standing firm for Hawaii.

Mr. HILL. I thank the Senator for his kind and generous words. The University of Hawaii had no more stanch or better friend in the conference than the distinguished Senator from Colorado [Mr. ALLOTT].

Mr. FONG. I know the distinguished Senator from Colorado worked very hard.

Mr. HILL. He did, indeed. He worked hard and he fought hard. Sometimes it is not only necessary to work hard but also to fight hard.

Mr. FONG. I know the Senator fought hard.

Mr. HILL. The Senator did both.

Mr. FONG. I thank the Senator from Colorado, also.

THE EFFECT OF SOCIAL SECURITY LAWS ON THE AMISH AND MENNONITES

Mr. LAUSCHE. Mr. President, this afternoon at 2 o'clock I was in a conference at the office of the Commissioner of the Internal Revenue Service, Mr. Caplin, who had invited to his office representatives of the Amish and Mennonite faith. In the office there were assembled about 100 Amish people.

The purpose of the meeting was to work out, if possible, some method under which the Federal revenue laws could be enforced dealing with social security without subjecting the Amish and the Mennonites to seizure of their cattle and especially of their horses, used on the farms.

Mr. Caplin stated to the Amish people that he was, under his oath obliged to enforce the law, that he had no discretion in the matter, and whether the duty was pleasant or unpleasant he had to enforce the mandate given to him by Congress dealing with the laws applicable to the collection of taxes.

One of the Amish representatives, Bishop Fisher, after Mr. Caplin had made the statement, asked for the floor, and said to the Commissioner:

> Mr. Commissioner, we recognize that you are bound by the law, but we have a law of our religion, and that religion says that we must take care of our families, of our poor, and of our aged. We abide by that law. We do not wish to be compelled by Federal law to break our faith and our tenets.

The chairman of the Committee on Finance [Mr. BYRD of Virginia] is in the Chamber at the present time. I say to the Senator that these people do not wish to be compelled to be members of social security. Their religion severely imposes upon them the obligation to take care of their aged, their families, and their poor. They ask for no help.

Today those 100 hard-working, law-abiding, decent people left an impression with me which will prompt me at the next session to fight for the adoption of a law which will excuse them from the obligation of paying social security taxes. I know they absolutely refuse to accept the payments which become due to them under the social security system.

I have never heard so forceful a statement before:

> Mr. Commissioner, you are bound by the law, but we are bound by the law of our religion to take care of our aged, of our poor, and of our families.

I suggest to Senators that they give heed to the problem of the Federal Government trying to bend and to distort and to break these people in their religious beliefs. It is contrary to every principle of our democracy, which says "freedom of religion shall be yours."

We tell the Amish and the Mennonites, "You will have to abandon your religion. You will have to comply with what Congress tells you."

It is wrong. It ought not to be.

APPOINTMENT OF MAJ. GENE HAL WILLIAMS TO BE BRIGADIER GENERAL

Mrs. SMITH of Maine. Mr. President, on August 24, 1961, there was considerable debate on the Gene Hal Williams nomination for promotion from major to brigadier general because he was the State adjutant general of West Virginia.

Among the arguments made by some of those supporting the nomination was their militarily equating National Guard Nominee Williams with such famous military leaders as Alexander the Great, General Pershing, and General Eisenhower.

In view of such military equation as was introduced in the debate at that time, I think that the Members of the Senate will be interested in an item in today's Washington Daily News and Washington Post quoting one of the military leaders with whom National Guard Nominee Williams was equated—Gen. Dwight D. Eisenhower.

In escorting Congressmen on a tour of the Gettysburg battlefield, General Eisenhower spoke of military divisions in the Civil War and said rather pointedly:

> Promotion was very slow in that division. They were Regulars, not National Guard.

So spoke the military leader with whom National Guard Nominee Williams had been equated in the August 24, 1961, debate in the Senate.

THE BERLIN CRISIS

Mr. SALTONSTALL. Mr. President, I wish to invite the attention of the Senate and the country to a sobering and thoughtful article by Walter Lippmann which appeared in the Washington Post and Times Herald and other newspapers this morning.

He writes with imagination, yet realistically about the Berlin crisis. He explores both the dangers and the possibilities. And he urges us to approach this delicate situation with a new venturesomeness.

Mr. President, because of the timeliness and the importance of what Mr. Lippmann has to say in this article, I request unanimous consent that it be printed in full at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 12, 1961]

ON NEGOTIATING ABOUT BERLIN

(By Walter Lippmann)

As we get ready to negotiate about Berlin we need to know concretely what is our commitment. A month ago the answer to this question was plain enough. When we said we would defend the freedom of West Berlin, we meant, to be precise, that people and goods must continue to move freely along the air corridors, the turnpikes, the railroads, and the canals. If access on these routes is open, West Berlin will have the physical basis of its freedom, freedom to elect its government, personal liberty, and economic freedom as part of the West German economy. This physical basis of West Berlin's freedom is what we are committed to defend, if necessary by war.

But while this commitment is still in full force, the Soviet action of August 13 in sealing off East Berlin has raised a new problem. It is whether the half city can continue to flourish, whether it will not wither on the vine. Dr. Adenauer's ambassador has said that Berlin will wither if the physical partition of Germany, which was consummated on August 13, becomes an accepted and established fact. So we can no longer say that if the access routes are kept open, this in itself will make secure the future of West Berlin.

If the half city is to continue to flourish its people must be given reason to believe that they have a function to perform in the future of the German nation. It is not easy to give them that belief, and while, as Vice President Johnson has said rather too imprecisely, our lives, our fortunes, and our sacred honor are pledged in West Berlin, we are in fact pledged to protect access. But we are not and cannot be pledged to a guarantee of the prosperity of West Berlin. All we can promise is to try, provided the West Germans cooperate to negotiate a status for West Berlin which will give its inhabitants a sense of security and confidence in the future. This cannot possibly be done merely by standing firm and standing pat.

The President will now have to decide whether his objective in the coming negotiations is merely to keep open the access routes or whether he will try for a wider objective—not only for the physical freedom of West Berlin but for its dignity and prosperity. This is a hard and complicated decision.

If he concentrates on this narrow objective, he can probably achieve it by standing firm on the decision to resist if the

access routes are closed. For while the Soviet Union will still have great opportunity to harrass the access routes, it does not have a vital interest in blockading them. But not to interfere with access, or not to interfere very much, will not be sufficient. The allied rights of access must be reconfirmed in some kind of contract. For otherwise, the people of West Berlin will be left in a dangerous and demoralizing uncertainty. The Soviet price for a reconfirmation of the rights of access will now have to be explored.

Assuming the best, that the price is moderate and honorable, the outcome will leave West Berlin free. But after the action of August 13, Berlin, however free, will be a doomed and dying city. To keep West Berlin not only free but alive and flourishing it will have to be given a significant and attractive function to perform in the years to come. If this can be done at all, the coming negotiations will have to go far beyond freedom of access. There will have to be a new attempt to negotiate a wide settlement in Germany and in central Europe.

Our position today would be far stronger if, last June instead of conceding the initiative to Khrushchev, we had launched a campaign for a wide settlement. But as events have shown, Americans, in the West European opinion, have not been prepared by their leaders for any such big diplomatic adventure.

A wide settlement is inconceivable unless West and East agree on some arrangement which opens the door to the eventual reunion of the two Germanys. The difficulties of reaching such an agreement are enormous.

There is, of course, the Soviet opposition which is now embodied in the physical partition of Berlin. But we must not forget how strong is the Western opposition to German reunification. It is not an open opposition. But it is much stronger than has been fully appreciated in this country. The two chief Western European institutions are NATO and the Common Market. In both there is a basic assumption that in fact Germany will remain divided. There is no place for East Germany in NATO—not unless we suppose the inconceivable which is that the Soviets would permit East Germany to join NATO. And there is no place for East Germany in the Common Market as long as it is a Communist state and its main economic powers are with the Soviet bloc.

Although it is never openly avowed, the whole of Europe, West and East, from France to Poland and Czechoslovakia is deeply committed to the partition of Germany. As for the Bonn Republic, its attitude is ambiguous. It does not countenance partition but it has learned to live comfortably without reunification.

This would seem to argue that there is an all-European consensus. In considerable measure there is, and that is why there is no crusading spirit in Europe to reunify Germany. But in France and in Germany the key to policy is not that they object to the fact of partition. It is that they fear the effect of acknowledging it.

Why? Because if the partition were signed, sealed, and delivered—which is what Khrushchev is after—the interests of the West Germans in the Atlantic Alliance may be weakened.

Both Dr. Adenauer and General de Gaulle fear greatly what the Germans would do then. Might they not come to believe that they must deal not with NATO but with Moscow? Dr. Adenauer and General de Gaulle are haunted by the fear that one of Dr. Adenauer's successors may do once again what the Germans have so often done in the past—make a deal with the Russians at the expense of the West.

The men charged with German affairs in Paris and Washington are predisposed to think that, all things considered, the status quo is better than anything which can be negotiated. The wider objective, which is to work out a future for West Berlin, has few official supporters. In the calculus of risks it seems too venturesome.

It is venturesome. But nothing ventured, nothing gained. It will probably be the opening of what the President might call a new frontier in European politics, beginning with a recognition of the fact that there are two German states, and that unless and until they reunite, West Berlin must be held in trust as an international city. Moreover, in order to stabilize this divisional arrangement, there almost certainly would have to be an agreement on controlled nuclear disarmament and reduction of conventional armament from, let us say, the Rhine to the Vistula.

A philosopher of history can say that the world is still too primitive to construct rationally such a solution. But he might add that if catastrophe is averted, some such settlement might gradually come into being.

If this solution is premature, then, negotiation will have to turn on the narrower objective which would be a contract concerning physical access to West Berlin. Without such a contract the Germans and the rest of us will have no relief from permanent apprehension and anxiety.

The President himself cannot negotiate such a contract with Mr. Khrushchev. The critical decision to be taken in the West is what price to pay for the contract. This decision must be made with the firm cooperation of the West German government. After the German election, Bonn will have to nerve itself to face the fact that unless there is a very wide central European settlement, the partition of Germany will become frozen as an accomplished fact.

TAX TREATMENT OF CERTAIN CLAYS AND SHALE FOR TAXABLE YEARS BEGINNING PRIOR TO 1961

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 886, H.R. 7057.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 7057) relating to the application of the terms "gross income from mining" and "ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products" to certain clays and shale for taxable years beginning before December 14, 1959.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment, to strike out all after the enacting clause and insert:

That (a) ELECTION FOR PAST YEARS.—In the case of brick and tile clay, fire clay, or shale used by the mineowner or operator in the manufacture of building or paving brick, drainage and roofing tile, sewer pipe, flower pots and kindred products (without regard to the applicable rate of percentage depletion), if an election is made under subsection (c), for the purpose of applying section 613(c) of the Internal Revenue Code of 1954 (and corresponding provision of the Internal Revenue Code of 1939) for each of the taxable years with respect to which the election is effective—

(1) gross income from the property shall be 50 per centum of the amount for which the manufactured products are sold during the taxable year except that with respect to any manufactured product, gross income from the property shall not exceed an amount equal to $12.50 multiplied by the number of short tons used in the manufactured product sold during the taxable year, and

(2) for purposes of computing the 50 per centum limitation under section 613(a) of the Internal Revenue Code of 1954 (or the corresponding provision of the Internal Revenue Code of 1939), the taxable income from the property (computed without allowance for depletion) shall be an amount which is the same proportion of the taxable income from the manufactured products sold during the taxable year which the gross income from the property (determined under paragraph (1)) is of the total amount for which the manufactured products are sold during the taxable year.

(b) YEARS TO WHICH APPLICABLE.—An election made under subsection (c) to have the provisions of this section apply shall be effective for all taxable years beginning before January 1, 1961, in respect of which—

(1) the assessment of a deficiency,

(2) the refund or credit of an overpayment, or

(3) the commencement of a suit for recovery of a refund under section 7405 of the Internal Revenue Code of 1954,

is not prevented on the date of the enactment of this Act by the operation of any law or rule of law. Such election shall also be effective for any taxable year beginning before January 1, 1961, in respect of which an assessment of a deficiency has been made but not collected on or before the date of the enactment of this Act.

(c) TIME AND MANNER OF ELECTION.—An election to have the provisions of this section apply shall be made by the taxpayer on or before the sixtieth day after the date of publication in the Federal Register of final regulations issued under authority of subsection (f), and shall be made in such form and manner as the Secretary of the Treasury or his delegate shall prescribe by regulations. Such election, if made, may not be revoked.

(d) STATUTES OF LIMITATION.—Notwithstanding any other law, the period within which an assessment of a deficiency attributable to the election under subsection (c) may be made with respect to any taxable year for which such election is effective, and the period within which a claim for refund or credit of an overpayment attributable to the election under such subsection may be made with respect to any such taxable year, shall not expire prior to one year after the last day for making an election under subsection (c). An election by a taxpayer under subsection (c) shall be considered as a consent to the application of the provisions of this subsection.

(e) TERMS; APPLICABILITY OF OTHER LAWS.—Except where otherwise distinctly expressed or manifestly intended, terms used in this section shall have the same meaning as when used in the Internal Revenue Code of 1954 (or corresponding provisions of the Internal Revenue Code of 1939) and all provisions of law shall apply with respect to this section as if this section were a part of such Code (or corresponding provisions of the Internal Revenue Code of 1939).

(f) REGULATIONS.—The Secretary of the Treasury or his delegate shall prescribe such regulations as may be necessary to carry out the provisions of this section.

DESIGNATION OF HAWAII VOLCANOES NATIONAL PARK

Mr. BIBLE. Mr. President, I ask the Presiding Officer to lay before the Sen-

ate the amendment of the House of Representatives to S. 1317, relating to the Hawaii National Park.

The PRESIDING OFFICER laid befor the Senate the amendment of the House of Representatives to the bill (S. 1317) to change the designation of that portion of the Hawaii National Park on the island of Hawaii, in the State of Hawaii, to the Hawaii Volcanoes National Park, and for other purposes, which was, in line 3, strike out "July 1, 1961," and insert "upon the enactment of this Act,".

Mr. BIBLE. Mr. President, it is a very simple amendment to change the effective date of the act. I move that the Senate concur in the House amendment to S. 1317.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. BIBLE. I yield.

Mr. ALLOTT. May I inquire of the senior Senator from Nevada the exact effect of the change?

Mr. BIBLE. I am happy to inform the Senator from Colorado that the effective date put on the act by the Senate was July 1, 1961, and the House did not pass the bill until after that date. The House amended the bill by providing "upon the enactment of this act."

This would change the name of the Hawaii National Park to the Hawaii Volcanoes National Park.

Mr. ALLOTT. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Nevada.

The motion was agreed to.

THE 1961 FEED GRAIN BILL SAVES MORE THAN $150 MILLION

Mr. PROXMIRE. Mr. President, the value to feed grain producers and the U.S. taxpayer of the 1961 feed grain program, in contrast to the program which it replaced, was again demonstrated by the September crop report issued yesterday by the U.S. Department of Agriculture.

The report predicted a 1961 corn yield of 60.4 bushels per acre in contrast with 54.5 bushels per acre in 1960 and a 10-year average of 44.1 bushels. The 1961 yield per acre of grain sorghums was predicted at 44.0 bushels per acre, which compares with 39.8 bushels last year and 23.8 bushels for the past 10 years. These are by far the highest yields per acre for the crops in U.S. history. If they had been coupled with the price support for all, no restriction on acreage programs of the previous several years, a recordbreaking addition to existing stocks would have resulted at great expense to the U.S. taxpayer. That means that the feed grains bill which Congress passed this year and the President signed into law is saving acquisition costs of more than half a billion dollars. In addition, on the basis of all of our experience, it means that in the long run we are saving more than $150 million in cost to the Treasury and the taxpayer on the 30-percent loss ratio we usually experience.

The same report estimates 1961 corn for grain acreage at 58.3 million acres or 81.6 percent of 1960, and grain sorghum acreage at 10.9 million acres or 71.2 percent of 1960. If an acreage equal to the 1959–60 average had been devoted to corn for grain this year—71.5 million acres—1961 corn production would likely amount to 4,218 million bushels—at 59 bushels per acre. This compares with with a predicted 1961 production of 3,520 million bushels—a reduction of 698 million bushels at 17 percent.

That the predicted increase in yields per acre of corn for gain and sorghum grain is primarily caused by extraordinarily favorable weather conditions is borne out by two sets of facts.

First. Corn and soybeans are generally grown in the same major areas. The predicted 1961 acreage of soybeans is 3.5 million acres—15 percent—greater than 1960, while predicted corn acres are 13.2 million acres—18.5 percent—lower. At the same time the predicted yield per acre of soybeans is up 13 percent over 1960 while corn yield is up only 11 percent. Since the soybean yield per acre shows a greater rate of increase than the yield of corn, it is clear that the use of better land and increased fertilization was not the major factor in increasing corn yields—particularly in view of the fact that total 1961 fertilizer usage is below that used in 1960.

Second. The yield per acre of corn for grain in the September Crop Report is 60.4 bushels or nearly 11 percent greater than the yield of 54.5 bushels predicted in the July report. For sorghum grain, predicted yield per acre increased from 41.8 bushels in August to 44 in September—19 percent. Certainly the quality of the land on which these crops were planted did not change from July to September. Likewise, very little, if any, of these crops can be fertilized after the first of July.

The point I am making with the statistics is that the bill, which was passed at the urging of the Secretary of Agriculture and the President of the United States, and enacted into law, has been criticized very broadly as a burden on the taxpayer. On the basis of the facts, the situation is clearly and exactly the opposite. It has not only assisted very greatly in increasing farm income, but it has also made a vast difference in the cost to the Treasury and the taxpayer, a difference which I very conservatively estimate in the long run as being at least $150 million, and probably more.

I yield the floor.

THE 50TH NATIONAL MEETING OF AMERICAN HOTEL ASSOCIATION

Mr. KERR. Mr. President, may I take a moment to call attention to the fact that the American Hotel Association will have its 50th national meeting in Washington, D.C., September 28 to 30.

Frequently classified as the seventh largest industry in America, from the standpoint of invested capital, and the number of employees, the hotels of the country do comprise an important element in our economy.

While I count among my friends many of the hotel leaders of America, I am especially proud of the fact that we have a number of national hotel chains whose headquarters are in Oklahoma. For instance, the Alsonett Hotels, of which C. H. Alberding is president, includes 46 hotels in 17 States. Then, there are two hotel chains which are converting to housing for the elderly, providing living accommodations for retired people. These are the MacArthur and Weaver Hotel chains. Between them these two organizations represent 33 establishments in 15 States. Then, my longtime friend John Mayo, who owns and operates the Mayo Hotel in Tulsa, also owns and operates a number of other properties in other States.

J. W. Cargile, Aldridge Hotel, McAlester, is now president of the Oklahoma Hotel Association. Then, George W. James, Hotel Skirvin, Oklahoma City, is State legislative chairman, and C. R. Holley, Lawtonian Hotel, Lawton, Okla., represents the State on the board of directors of the national association. And they have a very illustrious executive secretary, B. E. Harkey, who also for a number of terms was the speaker of the house in our Oklahoma Legislature. There are 60 hotels in Oklahoma which are members of the State association, representing the finer hotels and motels in that State.

The census of business reveals a total of 15,906 hotels, motels, and rooming houses in Oklahoma. In many instances, however, these are really motor courts, tourist homes, and so forth, rather than bonafide hotels and motels.

Hotels alone in this country employ approximately 450,000 persons. The nature of their work permits them to engage many handicapped people, affording jobs to people who might otherwise be without employment. Also, their resort operations provide seasonal work for many local people, including young folks.

The industry today is suffering from extensive overbuilding, and the trend of national hotel occupancy has been steadily downward since 1946 to the present. The occupancy has dropped from the high of 92 percent in 1946 to 65 percent in 1960.

In peacetimes, many of us are likely to think of the hotel industry as a luxury operation, or to take their establishments for granted. But when war strikes, the Goverment moves in and takes over a large number of properties utilizing them for housing and feeding civilian and military personnel engaged in the war effort. Also, many of them were used during the past two wars as military hospitals.

The first inns in America were located in the New England States, close to the Atlantic seaboard. History records the fact that some of these were opened as much as 300 years ago.

I am sorry that, in all likelihood, Congress will have adjourned by the time that the Washington convention opens September 28, or I would have enjoyed attending some of their sessions and mingling with my many friends in that industry. I am sure that we Members of the Senate, who have occasion to utilize the Nation's hotel facilities, wish

this group well, and express the hope that their forthcoming convention will be eminently successful.

ORDER FOR ADJOURNMENT TO 11 O'CLOCK TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate concludes its business tonight, it adjourn to meet at 11 o'clock a.m. tomorrow.

The PRESIDING OFFICER (Mr. PELL in the chair). Without objection, it is so ordered.

THE BELGRADE CONFERENCE

Mr. FONG. Mr. President, today representatives of two so-called nonalined nations arrive in Washington to talk with President Kennedy.

Both Indonesia's President Sukarno and Mali's President Keita recently attended the summit conference of 25 neutralist nations in Belgrade. Both subscribed to the Belgrade resolutions adopted at the conslusion of their conference September 6.

The self-styled nonalined delegates convened at a time of great international tension provoked by the Soviet Union. East Berlin had been sealed off behind barbed wire and barricades, and East Germans attempting to leave this Communist paradise ran the risk of being shot. The Communist vise around West Berlin was daily being tightened on orders from Moscow in a determined effort to push the free world Allies out of West Berlin. Ominous war clouds were gathering over Europe.

In the midst of all this, on the day the nonalined delegates convened in Belgrade, the Soviet Union—in total disregard for the health and welfare of the world's 3 billion inhabitants—exploded an atomic device in the atmosphere, polluting the air with radioactive fallout. During the Belgrade Conference, the Russians tested a total of three atomic devices in the air, increasing atmospheric radioactivity many times.

Yet, in the final resolutions adopted in Belgrade, there was not a single word of protestation by the nonalined nations against the Soviet Union for its deadly action against the whole of humanity.

There was not one word of protest in the Belgrade resolutions against the vicious Soviet treatment of East Germans, nor was there one word in favor of liberating the East German people from the colonial yoke imposed upon them by Moscow. The 25 nonalined nations in Belgrade condemned only the colonialism of the West, but never aimed a harsh word against the largest colonial power on earth today: the Soviet Union.

As a matter of fact, in the entire Belgrade document issued by the 25 nonalined nations, there was not a single word of protest or condemnation against any policies or any actions of the Soviet Union.

Every criticism, every denunciation, every protest was directed against the West: against France on Algeria and Tunisia; against Portugal on Angola; against the United Nations actions in the Congo; against the United States on our military bases overseas, including our naval base at Guantanamo, Cuba, every one of which we occupy under treaties agreed to by the host countries.

We can only conclude from their own words that the nonalined nations are not neutral but are decidedly biased against the West. The so-called neutral nations choose to ignore the indisputable legal rights of the West, and they rendered only lip service to moral rectitude.

At the same time the 25 nonalined nations severely criticized the West, they called upon us for help—for food to feed their hungry, for funds to develop their resources and industries, for technicians to instruct them. Every single one of the 25 nonalined nations is slated to receive U.S. assistance under the administration's plans now before the Congress for the coming year—even Cuba, which will share in the United Nations technical aid program to which we contribute.

The American people are asking why we should continue to help nations which, by their words and deeds, reveal a strong prejudice against the West.

For years, in an unparalleled demonstration of humanitarianism and generosity, the American people have dispensed assistance to nearly every country of the world.

We did this even though we fully realized that, in all-out general nuclear war, our foreign aid beneficiaries would be able to contribute very little in the first few hours of holocaust, the very hours which will spell victory or defeat for us.

But we were hopeful, that by helping other nations to strengthen their local defense forces and their local economies, they would become strong enough to resist Communist penetration and aggression. Always respecting their territorial integrity and their national independence, we were hopeful that, in turn, they would at the very least lend their voices in support of our efforts to preserve and extend individual freedom, national self-determination, and world law and order.

But the failure of the neutral nations in Belgrade to take a moral stand for what clearly is right and what patently is wrong; their equivocation on some issues; and their frequent disparagement of the West have jolted the American people, who are wondering, Why should we continue to help other nations when they will not even raise their voices in freedom's cause? The American people are wondering, Why should we continue to help nations that refuse to let us know on whose side they will be when the chips are down?

And the chips may very well be down in Berlin and in the United Nations.

Whether the nonalined nations recognize it or not, freedom itself is at stake in Berlin. If the free world does not defend this outpost, the Communists will know we will not defend any freedom outpost anywhere in the world. They will be emboldened to exert pressure on other areas of the world to make them yield to Communist demands. They will believe they can expand their empire at will.

Eventually, the Russian bear would be knocking on the door of such nonalined nations as Mali, Indonesia, India, Yugoslavia, and all the rest. Those who still delude themselves on this score need only to look at Poland, Czechoslovakia, Rumania, Hungary, and all the other Soviet satellites as incontrovertible evidence that national independence disappears when Soviet Russia takes over.

Thus, the issues involved in the current international crises instigated by the Soviet Union are not merely legal issues involving the West alone. They are great moral issues involving all of mankind. The world's destiny is at stake, for two diametrically opposed outlooks on life are struggling for supremacy.

One, the Communist system, survives by armed force, rules by fear, and denies God. It relegates man to a status of a mere pawn, a cog in the governmental machine, without a voice in his own destiny, without freedom of speech, freedom of press, freedom of worship, or even freedom to decide for himself where he shall work or live.

By sharp contrast, our system is essentially humanitarian, containing a sense of moral responsibility and faith in Divine Providence. Under this system, man attains a status of dignity, equality, liberty, free to think and to express himself.

These opposing systems are today locked in a war to the finish, from which no man and no nation can escape.

Decision day for the so-called neutral or nonalined nations is fast approaching. Right now, they can exercise a choice: to support free world efforts to maintain freedom, or to join the Communist efforts to enslave the world, or sit tight and not take sides.

But, unless the other nations of the world who are willing to stand up for freedom and to fight for freedom win this great struggle, the nonalined nations will no longer have any choice. The Communists will be telling them what they can do.

In a few days, the United Nations will convene in New York City. It is the Communist aim, as the world saw very clearly last fall, to destroy the United Nations as an effective instrument for peace.

Where are the nonalined nations on this issue? In the Belgrade resolutions 25 nonalined nations called it "absolutely necessary to evolve a more appropriate structure for the Secretariat of the United Nations."

Just what did they mean by this? Do they mean they intend to support Mr. Khrushchev's troika proposal for a three-man United Nations directorate, consisting of one Western representative, one neutral, and one Communist, which could only take action by unanimous vote?

Unquestionably and understandably, the prospect of neutral representation in the United Nations Secretariat has tremendous appeal for neutral nations, who desire a greater voice in United Nations activities. But this advantage would prove illusory and maybe suicidal

for the neutral nations. Eventually the troika would prove the undoing of the United Nations, for under it the Communists would have a veto over every proposed action of the United Nations Secretariat. The Communists could paralyze the United Nations administrative arm, just as Communists have paralyzed the Security Council many times since 1945.

Is this what the nonalined nations want—to destroy the one world organization which is their greatest guardian and protector against the ruthless domination of an aggressive power?

Do the nonalined nations want to return to the jungle law of world politics—the survival of the fittest, the biggest, and the strongest?

These are some of the questions which Mr. Sukarno, Mr. Keita, Mr. Nehru, and other leaders of nonalined countries should be called upon to answer in the near future.

Their bias against the West, so evident at Belgrade, indicates they may already have made their decision between East and West.

Whether this decision was motivated by fear of totalitarian reprisals, by convictions contrary to the West, or by knowledge that the West is fair game for criticism without reprisals, we can only conjecture.

If these nations are in truth against the West, they need only to let the Belgrade resolutions speak for them.

If because of fear they did not censure the Communists, then they had better reconsider, for fear will breed the very consequences they wish to avoid.

If they are really undecided but find the West a convenient scapegoat for the world's ailments, then they had better change their mind. The hour is late. The countdown has begun.

EDUCATIONAL TELEVISION

Mr. MUSKIE. Mr. President, in education, as in so many other fields, technological developments have opened new vistas in the expansion of knowledge and in the better use of our resources. As a nation which has grown by innovation and the wise application of new techniques, we should be in the forefront in the use of such techniques as audiovisual aids.

One of the results of our tremendous population expansion since World War II has been the extreme pressure of increased school enrollment on school facilities and teachers. Audiovisual aids can help us to make better use of available facilities and to expand the scope of the classroom teacher.

Earlier this year the Senate passed a bill providing grants to the States for the construction of educational television stations. It is my hope that this Congress will enact that program.

In Maine three private colleges have joined in the establishment of an educational television station. They are about to begin their programing. It is hoped that the University of Maine will be able to initiate its program of educational television in cooperation with the State Department of Education.

The potential of educational television for Maine is very great, and it has excited the interest of many Maine citizens. The proposal advanced by the University of Maine would, for example, bring educational television to 98 percent of our population.

Maine is a relatively large State in the northeast, covering one-half the total area of New England. It is sparsely settled through much of its area, with a substantial rural population and with many small schools. For these small schools educational television could open new doors of learning for children, especially in the field of science, arts, social studies, and language. Educational television would not replace teachers, but would increase their power to teach.

It is my hope that educational television will come to Maine because it is so important to the future of our children and our State.

Recently, the enterprising editor of a small weekly shopping newspaper carried a series of articles on educational television. Mr. Kenneth G. Larrabbee, publisher of the Shopping Notes of Yarmouth, Maine, was skeptical about educational television, but, as a good reporter he conducted an exhaustive investigation of the subject. The results of his studies are illuminating.

Because his comments are of value outside the State of Maine as well as within the State of Maine, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From Shopping Notes, Aug. 10, 1961]

What is educational television? What does it attempt to do? How well has it accomplished this in areas where educational TV exists?

To answer these questions, we shall refer to and quote liberally from the Ford Foundation booklet, "Teaching by Television." The Ford Foundation has been a prime developer and instigator of educational TV, and has subsidized this new educational development to the extent of approximately $31 million in the past 6 years.

Educational television has two broad categories: cultural and informational programs * * * for an adult audience, and programs that are part of a school or college curriculum. This latter is that which Maine is immediately and primarily considering. Much of the effort of the Ford Foundation has been directed toward multiplying the effectiveness of able teachers.

We would like to elaborate a moment on this last sentence, emphasizing that educational TV is not an easy or inexpensive way out of our educational responsibilities. It requires able teachers capable of competent preparation, interpretation, and followup. Educational TV programs presently considered successful comprise only a small proportion of the total classroom time and are no substitute for adequate faculties and facilities. Educational TV is a plus to the conventional educational process and, if we are to be realistically intelligent, must be so considered.

The Ford Foundation admits that it is too early to draw final conclusions about television's ultimate role in education. It has determined that grounds for encouragement exist, that students generally learn as much—and in some cases significantly more—from televised instruction as from conventional instruction.

In addition, experience to date has shown that the team approach to teaching, particularly at the elementary and secondary levels, opens up exciting new possibilities for capitalizing on the varying teaching skills among teachers in any given school system. Television courses have been much more carefully planned and organized than conventional courses, and the combination of the skills of the studio teacher and of the classroom teacher has made possible a cooperative teaching effort far better than either teacher could achieve alone.

"One of the biggest single problems * * * has been that today's school buildings were not designed for instruction by television * * * exploration is needed on how to deal effectively with differences among individual students." Obviously, the first reference—that to school building design—refers to the difference in size of class when TV becomes a factor in education. One prominent college in surveying the economic aspects of educational TV, found that it was advisable to have a class of at least 200 students in order to maintain the normal expense ratio. Most of the elementary and secondary schools which use educational TV as an essential ingredient of the educational process have similarly large classes. For example, "the principal characteristics of * * * the experiments * * * was the large class. At the elementary level, the television classes ranged in size up to 175. At the junior and senior high level, they were much larger, ranging in size from 200 to 500."

Typical teaching procedure of a television class consists of an approximate 5-minute period of preparation and introduction by the regular classroom teacher, or a 20-minute studio broadcast and a following period by the classroom teacher devoted to questions and answers, and to stimulated discussion. Followup guides, usually studio prepared, are used as guides to the classroom teacher and students. Finally, it should be emphasized that no student received all of his instruction over television—the televised instruction received represented only a small portion of the total.

Evaluation: In addition to above values, the following has been determined: Brought about a rethinking of the curriculum and course objectives. By bringing a superior teaching to the attention of a great many classroom teachers, television proved to be a valuable means of improving the in-service training of teachers. Television brought into the classroom far richer educational experiences than had been possible before—a much wider audience (on open-circuit TV) than the students in classrooms—other school systems were tuning in and that parents were watching regularly. School librarians reported that the TV students—stimulated by provocative teaching—were making much more extensive use of the library than other students. Several school systems reported substantial savings in teaching positions and in classroom space with no sacrifice in quality. Tardiness and absences fell off sharply among students in the television classes. Discipline was not a problem. Classroom teachers, far from being relegated to a minor role, assumed a new importance.

Problems: Inadequate facilities: Auditoriums and cafeterias were not designed for use as classrooms, and they were far from ideal. Finding, recruiting, and training studio teachers. The problem of training classroom teachers in the techniques of handling large classes, particularly in the techniques of eliciting student participation. Students, too, need to learn the techniques of learning in a large class situation. The problem of integrating the telecast part of the lesson and the classroom followup

into a unified, meaningful whole * * * a question that needs much fuller exploration. The problem of reorganizing the curriculum to take maximum advantage of television as a teaching tool. The problem of adapting the new technique of teaching by television to the varying abilities of students. The problems of scheduling. Finally, there is the never-ending problem of quality.

A look ahead: Today the question is no longer whether television can play an important role in education. That question has been answered in the affirmative. * * * The continuing activation of new educational television channels, the flexibility offered by videotape * * * and the emergence of networks linking schools and colleges are all aspects of the broadening frontier of educational television. * * * It is important to bear in mind, however, that television is essentially neutral. It can transmit the bad as well as the good, the mediocre as well as the superior. Consequently, it demands the very best of creative, imaginative talent if it is to do its job well. * * * Television is not a panacea that will cure all the ills of American education or solve all its problems. It has been described, and rightly so, as the most important new educational tool since the invention of movable type, but, like the textbook the new medium is essentially just that—a tool. Like any tool, it can be misused or badly used. But if it is wisely and imaginatively used, television can play a major role in broadening and enriching the education of American students.

In our research on educational television, we have run upon some startling facts on education in Maine generally.

Did you know that in 139 communities, the schools have less than 100 population; that of 240 high schools and academies in Maine, only 29 were properly accredited in 1960; that of 458 communities having public schools, only 207 have formal music programs, only 35 formal art programs; that, per capita, Maine spends more money than 50 of the other States on highways, and less money than 38 of the other States on education?

Educational television boils down in Maine to a very difficult choice—whether we need most desperately that relatively small amount of money most for educational TV, for organizing better schools in neglected areas, for raising teacher standards and salaries, for implementing the University of Maine or for any one of a hundred other needy areas of the total educational picture.

Is it right that we should superimpose educational TV upon a poor educational system? Let us put it another way: Would educational TV so stimulate educational consciousness as to spur us to provide other necessary improvements? If so, the answer is obvious. On the other hand, would we consider it as pie in the sky, a remedy for all evils, an inexpensive substitute for an expensive educational process and, in smug assurance, lull ourselves back to sleep in the hot sun of our own complacency?

On the practical aspects of an operational educational TV system, there are good questions. How, in the face of the single studio outlet, is it proposed to coordinate the entire State to a single educational TV broadcast? We are assured that this is possible through a breakdown into regional broadcasts. This is enabled by the acquisition of three video tape recorders—via a grant assured by the National Education and Radio Center—which will permit different and simultaneous broadcasts to different areas in conjunction with planned facilities. And what about the beaming of an educational TV lesson into the 139 communities with less than 100 students—the most needy segment of our educational system of which educational TV advocates express concern—and who, through necessary economic pressure, are limited to from one to four rooms and teachers for the entire school program? It would appear that to feed a fourth-grade lesson, for example, into a room occupied by four grades and a single teacher would be most impractical. We await a conference with Don Taverner at which we hope this question will be answered.

On another page are financial figures from the Jansky and Bailey report, "Educational TV for Maine," prepared for the University of Maine and completed last October. In order to properly interpret these figures, we should point out that the starred figures (*) refer to expenses which will be borne by the WCBB—Bates, Bowdoin, Colby—outlet and that totals are inclusive of both the private college and the State contributions to the entire network.

Additionally, it should be understood that both plus and minus considerations have not been taken into account for obvious reasons. On the plus side, it is reasonable to anticipate the considerable assistance of outside sources, as in the case of the above-mentioned tape recorders whose value approaches $200,000. Educational TV being in a still early development, such help can be a considerable factor in the next few years. Again the loud and insistent pushing of this new medium by the Gannett and Hildreth interests would seem to indicate that their good will should extend somewhat further than merely telling the legislature that it should meet and enact educational TV.

We hope to wind up this series over the next week or so, pending the receipt of a few more facts we need to draw conclusions. In the meantime, we have a bit of editorial comment we would like to present.

Even a superficial survey of our education in Maine abounds in facts as cited earlier. It is evident, factual, and appalling to so stumble onto some of the weaknesses. And, even more appalling, is the discovery of the total imbalance of our State budget in relation to education and in comparison with other States. The total abdication of responsibility for maintaining a realistic balance is a legislative disgrace.

MAINE EDUCATIONAL TELEVISION

[The Jansky & Bailey report]

Capital investment:	
Phase 1a: Orono studio and transmitter	$540,107.70
*Phase 1b: Augusta studio and transmitter	514,027.70
*Phase 2: Permanent interconnections	155,450.00
Phase 3: Presque Isle transmitter	318,633.95
Phase 4: Calais transmitter	266,133.95
Phase 5: Translators to fill coverage areas not adequately served by stations. Estimated cost $63,300–$15,000 each	
Total capital cost (not including translation)	1,794,353.30

Operating expense (does not include personnel)

Above facilities in use	35 hrs. per wk.	50 hrs. per wk.	70 hrs. per wk.
Annual total	$115,050	$155,050	$177,450
*Phase 1b and 2	57,700	60,600	63,500

NOTE.—This budget does not include printing and distribution costs of teachers' guides, testing, travel, and other expenses attributable to Department of Education administration of the in-school program.

Typical annual staff requirements

	35 hrs. per wk.	50 hrs. per wk.	70 hrs. per wk.
Phase 1a. Orono	$44,500–$54,000	$86,350–$104,550	$103,850–$124,250
*Phase 1b. Augusta	10,500	13,000	19,500
*Phase 2	6,500	6,500	6,500
Phase 3	10,500	13,000	19,500
Phase 4	10,500	13,000	19,500
Phase 5			
Total	76,000–85,500	131,850–150,050	159,850–180,250

[From Shopping Notes, Aug. 24, 1961]

Preparatory to a summation of this series, we have visited WGBH–TV in Boston. This has been one of the more successfully managed educational television projects. Our debt to their personnel is considerable, for they were most generous of their time, arranging a private showing of a film of typical course excerpts, answered fully our numerous questions, and concluded by giving us a number of study guides used by teachers of television courses.

The great majority of students in Massachusetts are now using educational TV in one or more courses. WGBH–TV was originally instituted as an adult educational project and it was by specific request of the many school systems now involved that courses were provided for classroom consumption. This was a point emphasized over and over again in the discussions. That educational TV cannot, successfully, be imposed upon one or more school systems but must, instead, in order to be successfully employed, be needed and wanted by any specific system.

Statewide educational TV systems are still not common. Nebraska is the most comparable State using such a system and has, as do we, a sparsely settled population in a large land area. In Nebraska, experience to date indicates success both from point of scholastic attainment and of economics.

It takes little imagination to envision the scholastic advantages of educational TV when properly used. In the field of modern languages, for example, extremely successful experiments have been carried out with elementary students whose minds appear peculiarly adaptable in their early years to language instruction, particularly from the speaking angle. Social studies, civics and geography are naturals for this medium. We saw demonstrations of fascinating interest. Discussions with Nehru, Eleanor Roosevelt, Carl Sandburg and others on topics of interest to each of us today and which brought in colorful and authoritative manner these people and topics face to face with students. Courses in music appreciation dramatically break down a symphony orchestra, a jazz band, folk music, etc., to show the child of what instruments they are composed, of their purpose and structure. Far more comprehensive than a mere concert presentation, the course first creates interest and then instructs. Science employs the great university laboratories and museums together with noted scientists to inspire and instruct. Natural history can be traced dramatically by a trip through the fabulous Agassiz Museum at Harvard.

It is impossible to see what is actually going on in this new educational medium and to come home and reflect less than complete enthusiasm; to be willing to see our children denied its advantages.

Nor do we propose to do this. But we do propose to emphasize, again and again, that educational TV is no cure-all, no easy way out; not something which will be eagerly grasped by all teachers and by all school systems in the early stages; that it is no substitute for competent local teachers; that it will require intensive training of instructors on both State and local levels. Being new, it is still suspect in the eyes of many within and without the profession.

Economically, and on the State level, educational TV is relatively inexpensive, representing a very minor potential part of the budget. Actual construction of the system—and here we run somewhat higher than the proposed figures for reasons of experience in such things—will probably run, in total, slightly over $2 million in the initial years. Total annual operating expense, including not only the figures specifically proposed, but the less tangible expenses of training, of printing and distribution of guides, etc., etc., could run in the neighborhood of half a million dollars, in these same years. The future development of this medium makes speculation beyond the next few years impossible and impractical.

Locally, the implications vary. One of the fears of some teachers appears to be that this will be a form of automated teaching, replacing teachers on the local plane. Nothing could be further from the truth. From what we have seen, we strongly suspect that—because educational TV is necessarily rigid, and great effort will be necessary with the slower than average student as well as special effort with the better students—educational TV will mean an overall and considerable increase in teacher staff as the medium develops. It is obvious that the incompetent teacher will be ruthlessly exposed. But this is of concern only to that undesirable part of our system today. It does appear that in the larger schools, potential savings are at least theoretically possible. Here, however, we must realize that the rapidly expanding population is creating a teacher shortage which educational TV could merely tend to alleviate in slight degree. In the towns of small schools—less than one room per year—the teacher staff will undoubtedly require supplementary people and space. This opens up an exciting possibility. Many, many of our citizens today are equipped to teach mathematics, various sciences, etc. Many of these people may be made available for specialization in work which holds their interest and which requires but a few hours a week in the rewarding work of teaching. By acting as special subject teachers in small schools, these people could accomplish much at relatively minor addition to the school budget. It is reasonable to assume that brush-up courses in the various subjects could be presented on TV for credit to these people.

Except for the factors mentioned above, a start in TV on the local level entails little expense. As on the State level future development of this medium makes conjecture on the future impossible.

[From Shopping Notes, Aug. 31, 1961]

It is not only in the field of communications that a dramatic change has occurred in recent years. What was, 50 years ago, the skill and ingenuity of mechanics is now the science of chemistry and physics. The new sophistication of old principles now requires understanding of the atom and of space. A Henry Ford was owner, business manager, designer, comptroller, and labor expert, and combined these with numerous other responsibilities to the satisfaction of the first decades of this century. Today, each of these responsibilities requires not a single expert, but a team of specialists coordinating and pooling their knowledge painstakingly and meticulously gathered. This is not because men are less intelligent; it is because the learning of man, with the advent of the printing press, became cumulative and, when diligently applied, soon passes the point to which undeveloped intelligence, ingenuity, and ambition may bring it.

And it goes much further than this. A people which permits education to lag exposes itself to a self-consuming delusion of superiority which can delay corrective action to the point of no return. A hallmark of our times is the sad fact that as we envision travel to the Moon, Mars, and Venus, we fail to adapt our intelligence to cope with the vital problems of conflicting political vehicles, or to the acceptance of a moral code to which we pay only hypocritical obeisance.

One of the glories—and one of the disgraces—of today is television, representing an ideal of communications which has long been the dream of farseeing men. Its screen is a key to the world, by which we may know our neighbors across the seas intimately and understandingly, by which we may see the wonders of the globe from the depths of the sea to the infinity of space. We may pace the ruins of an ancient civilization on the spot or by a visit to Agassiz Museum. The rhetoric of a Churchill, the pathos of a Marian Anderson, the sensitivity of a Rubinstein, the passion of a Van Gogh, the tolerance of a Gandhi—all of these and infinitely more press to open wide a door to present and future, the while we rigidly bar that door and wallow in portrayal of murder and rape.

Television, a gift with infinite potential for good, becomes a toy for the cultivation of boredom and mass hypnosis. Inane amusement, not undesirable as surcease from the rigors of today, becomes a part of those rigors.

Nor is it impossible to so produce a program of value that it is interesting. We watched, recently, a 2-hour forum on race relations which, in Boston, was repeated by insistent demand.

The promise of television is bright. Its role in the future of man is infinite in both scope and direction. The need for education in today's world is an incontrovertible fact which must be accepted and acted upon if the world is to live in harmony, indeed, if it is to survive.

We have reviewed, over past weeks, the problems and the potentials of educational television after consultation with many authorities and study of numerous reports from educationally oriented organizations. Short of a very long book, it is impossible to satisfactorily picture educational television in all of its aspects.

But our conclusions are simple and direct: educational television is the wave of the future upon which education will become increasingly dependent. Educational TV is not, and never can be, a substitute for the good teacher. Rather, it is a supplement to vastly increase a good teacher's productivity in terms of accomplishment and which will bring face to face with the student the innumerable new developments in all phases of life which it is impossible to otherwise teach. Educational TV is, in relation to the total educational budget, a minor expense and, if we accept it as of significant value, we must accept the tax effort as worthy and necessary.

For the foreseeable future, it appears that the practical approach in Maine is via VHF channels available to all and of superior quality to other media. This means that channels 7 and 12, presently in contention, must be reserved immediately or be lost for the indefinite future. Since the close of the legislative session, developments have occurred which indicate an immediate special session is necessary which will act to safeguard these channels. Much as we deprecate special sessions, we urge that this is necessary, and that you write Gov. John H. Reed urging him to call the session immediately.

RELATIONSHIP BETWEEN THE PRESIDENT AND THE VICE PRESIDENT

Mr. SMATHERS. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an article published in the Louisville Courier-Journal of August 27, 1961, entitled "After 7 Months, L.B.J.'s as Close to J.F.K. as Kitchen Cabinet," and an article which appeared in the same newspaper of August 29, 1961, entitled "The Great Usefulness of LYNDON JOHNSON."

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Louisville Courier-Journal, Aug. 27, 1961]

AFTER 7 MONTHS, L.B.J.'S AS CLOSE TO J.F.K. AS KITCHEN CABINET—SUCCESS OF VICE PRESIDENT'S MISSION TO GERMANY CALLS ATTENTION TO UNIQUE ROLE HE PLAYS AS TROUBLESHOOTER

(By Robert L. Riggs)

WASHINGTON, August 26.—The universal praise poured on LYNDON B. JOHNSON this week for his mission to Bonn and West Berlin gives new emphasis to the unique relationship between the President and Vice President.

In the 7 months of this administration, the personal and official relations between John F. Kennedy and JOHNSON have been warmer and stronger than between any other pair in those two high offices.

What makes this news is that anyone who had predicted a year ago at Los Angeles that such a relationship could develop would have appeared ridiculous. It was hard enough then to conceive of the two running on the same national ticket.

It is true that by assigning JOHNSON to attend to many Presidential chores, Kennedy is following the pattern established by Dwight D. Eisenhower in his dealings with Richard M. Nixon. But there is a real difference.

BRIGHT YOUNG MAJOR

There were times when Nixon's credentials were a bit vague. You didn't always know whether he was the spokesman for the President or whether he was talking on his own authority. Eisenhower never appeared to feel close to Nixon. He obviously respected Nixon's talents, but seemed to look upon him as a bright young major on staff duty with whom he musn't get too chummy.

This and much worse is what might have been expected between Kennedy and JOHNSON. There were so many barriers that could have kept them apart.

Mere geography, which imposes differing political obligations upon men, was one barrier between the New Englander and the Texan. The chief fear, however, was that the hard-driving, ambition-ridden JOHNSON, used to getting his own way, especially while he was Kennedy's party leader in the Senate, would never be content to play second fiddle.

To the surprise of many who know the Vice President, he has taken a personal delight in emphasizing that he is the devoted errand boy for the Chief Executive. This uniquely self-confident man appears to have no other ambition at the moment than to spread praise for Kennedy and to do any little chore the President wants done.

This state of mind made JOHNSON the ideal emissary to Bonn and West Berlin. Maybe time will show that it was a waste of

effort, but, for the moment, the general judgment is that nothing could have helped the West German morale more than JOHNSON's visit and the simultaneous dispatch of 1,500 troops into the city.

For various psychological reasons, it had become imperative that Kennedy do something dramatic about West Berlin in response to discontent voiced there over what appeared to be our slowness to respond to Russian threats.

The President, of course, could not go. Nor did it seem adequate to send the Secretary of State. As a working Vice President with prestige of his own, JOHNSON carried enough weight for the purpose, especially when it was made clear that he traveled as Kennedy's personal spokesman, uttering words approved by the President.

It was a political situation that called for JOHNSON's special talents. In the first place, he had to avoid the appearance of taking sides in the political campaign between Chancellor Konrad Adenauer and West Berlin Mayor Willy Brandt. JOHNSON's adroitness in that area was demonstrated when he rebuffed an effort to get Adenauer aboard his plane on the flight from Bonn to West Berlin.

In the second place, the JOHNSON "folksy" approach went over well with the emotionally stirred West Germans. There has been some suggestion that he played just a little too hard the role of Senator Sorghum while he was in Asia last spring.

CONVINCING WITNESSES

But none of that criticism has come back from Germany. The West Berliners seemed eager to "press the flesh"—as JOHNSON calls handshaking. Those who witnessed their greetings to JOHNSON reported that it was a scene to stir the emotions.

The Germans themselves are the most convincing witnesses to the success of JOHNSON's visit. How pleased President Kennedy was with his lieutenant was clear in his unstinted praise at the White House ceremony marking JOHNSON's return.

Considering the bitterness that had developed in the preconvention campaign between JOHNSON and Kennedy last summer, the strong personal relationship between the two is amazing. The Vice President is just as close to the President as are any of the "kitchen cabinet" who went into the White House with him as a result of having served with him either in the Senate or in the 3-year search for the presidential nomination.

Old Kennedy friends like Adlai E. Stevenson and Chester Bowles occupy no such close place as does the man who many predicted would be unhappy and homeless in the administration.

The personal relationship between the two men has been strengthened by the willingness of Mrs. Johnson to take on many of the wearing and arduous duties which fall to the wives of Presidents, but which Mrs. Kennedy has not assumed.

[From the Louisville Courier-Journal, Aug. 29, 1961]

THE GREAT USEFULNESS OF LYNDON JOHNSON

Alben W. Barkley of Kentucky, became the Nation's first working Vice President. Harry Truman had learned what it was to be thrust unexpectedly into the Presidency, with little more than a general knowledge of the job facing him. Mr. Truman had Mr. Barkley attend Cabinet meetings and got from Congress legislation making the Vice President a member of the National Security Council.

President Eisenhower continued this policy, though Washington got the impression that Mr. Eisenhower and Vice President Nixon were never on really intimate terms. The same sort of standoffishness might have been expected of President Kennedy in relation to Vice President JOHNSON. They had been men of differing viewpoints and had contested bitterly for the Presidential nomination in 1960.

However, Mr. Kennedy's wisdom in tapping Mr. JOHNSON for the Vice Presidential nomination has been vindicated. LYNDON JOHNSON has turned out to be a working Vice President of the first order. His official visit to Bonn and West Berlin last week showed extraordinary diplomacy. His personal attitude, according to Robert L. Riggs, of our Washington bureau indicates "delight in emphasizing that he is the devoted errand boy for the Chief Executive. This uniquely self-confident man appears to have no other ambition at the moment than to spread praise for Kennedy and to do any little chore the President wants done."

IT WASN'T ALWAYS THUS

In his memoirs Alben Barkley recalls a time when a tiresome debate was in progress in the Senate and he was beckoned to the desk of Calvin Coolidge's Vice President, "Hell-and-Maria" Dawes. Mr. Dawes confided: "Barkley, this a helluva job. I can do only two things: One is to sit up here and listen to you birds talk, without the privilege of being able to answer you back. The other is to look at the newspapers every morning to see how the President's health is."

Mr. JOHNSON is adorning the Vice-Presidency in a much more useful way, which deserves the gratitude not only of the President but of the whole Nation as well.

PADRE ISLAND SEASHORE PARK

Mr. DWORSHAK. Mr. President, during most of this year the Committee on Interior and Insular Affairs has had before it a bill to establish the Padre Island National Seashore Park on an island 88½ miles long off the southeastern coast of the State of Texas.

The devastating Hurricane Carla during the past week resulted in deferment by the committee of consideration of this legislation until January 1962. In the meantime there has developed a controversy over whether Padre Park should be established by the State of Texas or created as a national park.

Within the past week, members of the Committee on Interior and Insular Affairs received copies of a letter which was sent on August 29, 1961, by Jerry Sadler, commissioner of the General Land Office of the State of Texas, to Gov. Price Daniel, calling attention to some of the vital aspects of the controversy which has arisen over the apparent desire of Texas to maintain supervision over the potential use for recreational facilities of Padre Island.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of the letter which Mr. Sadler wrote to Governor Daniel, and also an editorial entitled "It's Violation of Principle To Pass Padre Title to Washington," published in the Austin (Tex.) Statesman of September 7, 1961.

There being no objection, the letter and editorial were ordered to be printed in the RECORD, as follows:

GENERAL LAND OFFICE,
Austin, Tex., August 29, 1961.

GOV. PRICE DANIEL,
Capitol Station, Austin, Tex.

DEAR GOVERNOR DANIEL: Under provisions of the Reagan-de la Garza Act, which became effective Monday, the school land board is now authorized to begin industrial development of the 4,500,000 acres of tidelands and the 1,800,000 acres of bays and inlets.

This board, with myself as chairman, and you and Attorney General Wilson as members, is also charged with new and far-reaching responsibility for the protection, recovery, and dedication of this highly valuable submerged domain for the schoolchildren of Texas.

Our duty is clear in regard to all beaches of Texas, and we must consider that an emergency exists in the instance of the proposed Padre Island National Park, which would take some 200,000 acres of submerged lands which have already yielded $12 million to the permanent public school fund and which have shown an oil and gas potential of at least a billion dollars.

Obviously, our public schools should not be summarily stripped of such great wealth. At the same time, the natural beauty and recreational facilities of the Padre Island beaches should be made available to all Texans and to the world. The only solution, in my opinion, is development of the Padre beaches as a State park, which I believe can be done without additional appropriation and without impairing exploitation of the great offshore mineral wealth.

The beaches of Padre, which we are now charged to safeguard and develop, are dedicated school properties, and I cannot see how the school board can, in any conscience, surrender title or jurisdiction to any agency of the U.S. Government.

Did we fight and win the tidelands only to hand them back piecemeal? Are we to cast aside every principle of States rights because of hasty enthusiasm for a proposal which is strictly a one-sided bargain? What was the purpose of court and congressional campaigns to regain the submerged lands if we are to reject the benefits, responsibilities, and authorities of development?

I believe that it is imperative that you appoint a statewide committee to make a study and report on the feasibility of such a park area, and also to establish a predicate for all State beaches and the 81 islands with 21,802 surface acres which the State still owns.

I expect shortly that private investors will seek leases and contracts relative to these beaches and submerged lands, according to procedures set forth in the Reagan-de la Garza Act. It is imperative that the school land board act immediately and wisely to set aside beaches as State recreational areas and affirm our intention to hold the full billion dollars of potential mineral wealth for our future school generations.

I will be privileged to call an emergency meeting of the school land board to consider these affirmations.

Sincerely yours,

JERRY SADLER.

[From the Austin Statesman, Sept. 7, 1961]

IT'S VIOLATION OF PRINCIPLE TO PASS PADRE TITLE TO WASHINGTON

It is a nonsensical proceeding for Texas not to fight, with every resource with which it is capable, the attempt to federalize Padre Island, on the Gulf of Mexico.

For years the State of Texas fought Federal encroachments on its submerged lands, better known as the tidelands. The issue went finally to the Supreme Court of the United States where the rights of Texas were defined and restored.

Now it is proposed to condemn and give to the Federal Government great gobs of this land adjacent to the tidelands for development into a so-called national park, violating the very principle for which, in the case of the tidelands Texas fought.

There is no certainty in these days of budgetary priorities that the Federal Gov-

ernment, for many years, would ever develop any part of Padre Island.

Already the Interior Department has said that it will not build a road down the middle for access along its relatively narrow strip to beachside by cars. Yet it is being proposed that the Federal Government take steps to condemn Padre Island and jostle out private owners presumably for amounts far below actual worth.

The controversy has waged hotly ever since the proposal to get the Federal Government to develop a significant part of the area into a so-called national park.

An illogical propaganda barrage has been underway for several years trying to justify this barter by politicians and others anxious to give something away for purported use by the people, when the people have had before them the offer by the owners to dedicate to the State a substantial number of miles in the area for a State park that could really be a recreational public playground after proper development by State funds.

Gov. Price Daniel is quoted by Land Commissioner Jerry Sadler as saying that he will name a statewide committee of citizens to examine the feasibility of making a part of the Padre Island area a State park. Sadler, as are others, is opposed to the scheme to federalize Padre Island.

Bills in the Texas Legislature authorizing the transfer of title to the Federal Government have died in two recent sessions.

The State of Texas has jealously maintained its rights to the tidelands. Any proposal to nullify this principle by turning over Padre Island, abutting the tidelands, to the Federal Government is completely out of principle with the State's battle for its prerogatives in the case of the tidelands.

There is no factual assurance that the Federal Government would act quickly to develop such a park. There is a good assurance that the State of Texas, having preserved its rights in the matter without impairment of rights of owners, could do so in the situation which finds owners and developers already having proposed to dedicate a substantial part of Padre to the State for State park purposes.

To force these owners out completely and for obvious picayune payments as appear to be assumed is unjust and out of Texas tradition. Political vindictiveness is no safe or fair guide to official action.

TAX TREATMENT OF CERTAIN CLAYS AND SHALE FOR TAXABLE YEARS BEGINNING PRIOR TO 1961

The Senate resumed consideration of the bill (H.R. 7057) relating to the application of the terms "gross income from mining" and "ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products" to certain clays and shale for taxable years beginning before December 14, 1959.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments in the nature of a substitute for the bill.

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc, and that the bill as so amended be considered as original text for the purpose of amendment.

Mr. ERVIN. Mr. President, I reserve the right to object for the purpose of addressing some questions about the bill to the chairman of the Committee on Finance.

As I understand the problem, there is a conviction in the minds of a majority of the members of the Committee on Finance that if the committee had reported the House bill in its original form, without the amendments, and that bill had been passed by the Senate and sent to the White House, the probability is that the Internal Revenue Service and the Treasury Department would have recomended to the President that the bill in that form be vetoed.

Mr. BYRD of Virginia. The Senator from North Carolina is correct.

Mr. ERVIN. Am I also correct in assuming that the committee felt that due to circumstances which had transpired in the past, and the reliance which had been placed by the manufacturers of clay products on certain interpretations made by the Internal Revenue Service, and the decisions of the lower Federal courts, the manufacturers of such products were, in justice, entitled to some appropriate relief?

Mr. BYRD of Virginia. The Senator is correct.

Mr. ERVIN. Is it the opinion of the chairman of the committee that the relief which the bill grants is the fullest relief which can be granted at the present time without incurring the possibility of a veto?

Mr. BYRD of Virginia. That was the opinion of the majority of the committee; otherwise the committee would have given 100-percent relief.

Mr. ERVIN. Does the Senator from Virginia share my belief that if an effort were made at this time to amend the bill so as to grant some relief with reference to future income, that would probably result in the defeat of the relief which is granted by the bill?

Mr. BYRD of Virginia. I believe so. The Senator from North Carolina is correct.

Mr. ERVIN. Mr. President, having been satisfied by the answers which the able and distinguished chairman of the Committee on Finance has given, and also by my own investigation of the legislative probabilities of the situation, I do not interpose any objection to the unanimous consent request.

The PRESIDING OFFICER. Without objection, the request of the Senator from Virginia is agreed to.

Mr. BYRD of Virginia. Mr. President, the bill, H.R. 7057, deals with the base for computing percentage depletion for certain clays and shale for past years.

The bill as passed by the House provides in the case of brick and tile clay, shale, and other types of clay that insofar as the Supreme Court holding in the Cannelton Sewer Pipe case departs from the principles previously spelled out in the Cherokee Brick & Tile Co. and Merry Brothers Brick & Tile Co. cases, this Supreme Court case is not to be applied retroactively for years beginning before the Supreme Court granted certiorari in the Cannelton case on December 14, 1959. The effect of this is to provide in the case of brick and tile clay, shale, and the other clays, that percentage depletion for this past period is to be based upon the value of the finished end product where this is the first commercially marketable product.

It should be made clear that this is not a question of what is the proper base for percentage depletion in the case of these clays and shale for the present and future. Congress decided this quite specifically in the Gore amendment to the Public Debt and Tax Rate Extension Act of 1960. Rather the question here is, in view of all the circumstances, What were taxpayers justified in concluding their percentage depletion base was in the years before the Supreme Court handed down the Cannelton decision?

Most forms of clay were provided percentage depletion at a 5-percent or 15-percent rate in 1951. The percentage depletion rates were applied to what is called gross income from the property. This, under the law, is defined as "gross income from mining" which in turn under the statute includes "the ordinary treatment processes normally applied by the mine owners or operators in order to obtain the commercially marketable mineral product or products."

In 1955, the Court of Appeals for the Fifth Circuit, in the Cherokee Brick & Tile Co. case, held that in the case of brick and tile clay, this reference to processes to obtain the commercially marketable product meant percentage depletion was based upon the value of the finished brick since this was the first commercially marketable product. The Fifth Circuit again held this view in the Merry Brothers Brick & Tile Co. case. Similar decisions were also handed down in three other circuit courts of appeals as well as in the Tax Court. In addition, the Supreme Court in 1957 denied certiorari in the Merry Brothers case and also a related case dealing with cement rock. Following this, on October 18, 1957, the Internal Revenue Service issued a technical information release saying that as a result of this action by the Supreme Court the Service intended to follow the Supreme Court decision in the Merry Brothers case and the related case dealing with cement rock in disposing of pending litigation and claims involving the base for computing percentage depletion in the case of brick and tile clay and cement rock. Following this, for a period of 2 years the Internal Revenue Service in the case of brick and tile clay did follow these decisions and did allow percentage depletion on the basis of the finished brick or other product, where the end product was the first commercially marketable product.

As a result, in many of these cases depletion has been allowed on the basis of the finished product and the statute of limitations has now run. An industry survey in the case of brick and tile clay and fire clay, for example, estimates that this is true of 80 percent of the cases dealing with years prior to 1957. Thus, if the Service now is to apply the Cannelton decision with respect to those with open years, it will discriminate against these taxpayers with open years and in favor of those who computed their percentage depletion on the more favorable basis but whose years are now closed.

In addition, the retroactive application of the Cannelton decision would work financial hardships on many of the clay miners. They have made decisions as to the price that they will charge for their product, the extent to which they will expand their plants, and how large dividend payments to make—all on the assumption that they could depend upon the Court and Internal Revenue Service interpretation of how to compute their percentage depletion deduction. To retroactively change the base for their percentage depletion deduction will work real financial hardships since they cannot undo many of the financial transactions made in prior years. To retroactively impose a tax in these cases is especially serious in the case of an industry of this type, which consists of many small, independent businesses which traditionally do not have large financial resources.

The Treasury Department representative who appeared before the committee recognized that the issuance of the technical information release by the Internal Revenue Service in 1957 justified some degree of legislative relief because of the reliance which normally could be placed on such an announcement. On the basis of this, the Treasury Department representative stated that the Treasury would not oppose a provision which would provide that gross income from the property in the case of these miner-producers would equal 25 percent of the amount for which the finished product is sold, so long as this does not result in a gross income per ton of clay used in excess of $6 per ton.

Your committee concluded, however, that in view of the past assurances taxpayers had as to their percentage depletion computations, this constituted too great a cutback from what they then had every reason to expect was the correct base for these computations, and would have too serious an effect on the financial condition of the companies involved.

However, the committee has attempted to arrive at a compromise, or a legislative settlement, of this difficult problem. The compromise provided by your committee's amendments provides that in the case of brick and tile clay, fire clay and shale used to make certain products, gross income from the property for purposes of computing the percentage depletion deduction is to be 50 percent of the gross income from the finished product, but not in excess of $12.50 for each ton of clay or shale used in the finished product. The types of products for which the shale or clay must be used to be eligible for this provision are building and paving brick, drainage and roofing tile, sewer pipe, flower pots and kindred products. This is a category of products appearing in present law with which taxpayers are fully familiar. This provision is cast in the form of an election which taxpayers may make for all open years beginning before January 1, 1961.

As I have said, this provision is a compromise. Moreover, it is a compromise which in reality is much closer to the 25 percent of the value of the finished product which the Treasury is willing to allow, than to the 100 percent of the value of the finished product provided by the House version of the bill. Also, it is more restrictive than the House version of the bill, in that it is limited to brick and tile clay, fire clay and shale and is available only in these cases when this clay or shale is used for the purposes I referred to just a few moments ago.

The limitation of gross income from the property to $12.50 for each ton of clay or shale used in the finished product has the effect of limiting the percentage depletion to approximately 50 percent of the price for the cheapest clay product; namely, standard common brick, since this brick sells for about $25 per ton of clay used.

It is estimated that this bill will result in a revenue loss of approximately $20 million if the Treasury would otherwise be able to prevail as to its view of prior law. This, in my view, is none too certain; and, therefore, the loss may be much smaller. Moreover, this is a nonrecurring loss, since the provision applies only to prior years.

In concluding, I should like to reemphasize the fact that this in no way is an attempt to determine what the basis for percentage depletion should be in the case of these products for the present or future years. Instead, it is an attempt to provide taxpayers merely with one-half of the base in computing their percentage depletion for these prior years which the court decisions and Internal Revenue Service interpretation of the law before the Cannelton decision clearly appeared to give them. It, therefore, in effect merely reduces by 50 percent a tax increase which, under the Treasury view, the Cannelton decision made on a retroactive basis.

Mr. President, I submit and send to the desk a technical amendment. Under the terms of the bill, as approved by our committee, we intended to reduce the allowance provided under the House version of the bill for brick and tile clay, fire clay, and shale used for certain purposes, to 50 percent of the gross income from the finished products, but with a proviso that the gross income from the property may not exceed $12.50 for each ton of clay or shale used in these finished products. For example, if a producer of brick and tile clay were entitled to a 5-percent depletion allowance, he could never get a deduction in excess of 62½ cents a ton—that is, 5 percent of $12.50.

In the technical wording of determining how the taxable income was to be computed, the draft has the effect of reducing the allowance below the limit contemplated by the committee in the case of producers who sell their finished products at a higher price without deriving a corresponding higher profit.

This amendment corrects the technical defect in the draft, so that the allowance will not be reduced below that contemplated by the committee.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 3, in line 16, it is proposed to strike out "an amount which is the same proportion of the taxable income from the manufactured products sold during the taxable year which the gross income from the property (determined under paragraph (1)) is of the total amount for which the manufactured products are sold during the taxable year." and to insert "50 percent of the taxable income from the manufactured products sold during the taxable year (computed without allowance for depletion)."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. BYRD of Virginia. Mr. President, the distinguished Senator from Georgia [Mr. TALMADGE] is in charge of the bill, and I now yield to him.

Mr. KERR. Mr. President, if the Senator will yield, I send to the desk an amendment which I submit, and I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment of the Senator from Oklahoma will be stated.

The LEGISLATIVE CLERK. On page 3, in line 7, it is proposed to strike out the words "any manufactured product" and to insert in lieu thereof "such manufactured products"; and in line 10, to strike out the word "product", and insert in lieu thereof the word "products".

Mr. KERR. Mr. President, I ask unanimous consent that a statement in explanation of the amendment be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXPLANATION OF THE AMENDMENT

This is a technical amendment which is required in order to carry out the intent of the Finance Committee.

It was the intention of the committee to provide that with respect to taxpayers covered by this act, percentage depletion for their open years prior to 1961 will be based on "50 percent of the amount for which the finished products were sold but not in excess of an amount equal to $12.50 multiplied by the number of short tons used in the manufactured products sold."

That was the exact language used by the committee in the press release by which the committee announced its decision in this matter, and that was the basis of the compromise settlement to which the industry representatives agreed.

However, in the form in which it is now before us, the act could be interpreted to require that the tons of clay used in each manufactured product be tested separately against the $12.50 per ton limitation, rather than providing (as the committee intended) for the simple multiplication of the $12.50 limitation by the total tons of clay used in all manufactured products.

This amendment will provide the basis for a quick and easy disposition of all disputed depletion claims in past years and will avoid the controversies between taxpayers and the Internal Revenue Service that will arise under the act in its present form.

Mr. KERR. Mr. President, I may say that I have gone over this amendment with the distinguished chairman of the committee, and I hope he will be disposed to accept the amendment.

Mr. GORE. Mr. President, will the Senator from Oklahoma explain the amendment?

Mr. KERR. I say to the distinguished Senator from Tennessee that he holds in his hand the very brief explanation of the amendment which I have just obtained unanimous consent to have printed in the RECORD.

Mr. GORE. Does the amendment relate to the firebrick or refractory clay?

Mr. KERR. No, it relates to all of the manufactured products from the clay covered by this bill—to strike out the words "any manufactured product", and to insert in lieu thereof the words "such manufactured products", and in line 10, to strike out the word "product", and insert in lieu thereof the word "products".

I should like to say that I believe this amendment is technical in nature and effects what was agreed to by the committee when the amendment was offered and adopted.

Mr. GORE. Mr. President, will the Senator from Oklahoma yield?

Mr. KERR. I yield.

Mr. GORE. The amendment may be, as the Senator from Oklahoma says, technical in nature—as most tax amendments are; but, as I understand the amendment, from a quick reading of it, it would provide a larger retroactive deduction for many taxpayers than is provided by the bill as recommended by the committee. Do I correctly understand that to be the case?

Mr. KERR. I stated that in my judgment the amendment, as offered, carries out the intention of the committee; and I say to the distinguished Senator from Tennessee that he will recall that the amendment adopted by the committee was prepared by the staff of the joint committee, and the action of the committee was in effect approval of the amendment provided to us by the representative of the staff of the joint committee; and then the staff was directed to prepare the language to carry out the action of the committee. After that was done, it was discovered by the chief of the staff of the joint committee that the language of this amendment would be required in order to effectuate what he understood and what I understood was the action of the committee. That is the basis of the amendment; and, as I have said, the explanation which the Senator from Tennessee holds in his hand goes into detail with reference to the amendment.

Mr. GORE. As I understand the amendment—and I am not sure that I do understand it correctly—it would permit taxpayers to deduct a percentage depletion allowance on a base whose limit would be the figure in the Senator's amendment—namely, $12.50, multiplied by the total number of tons of clay used in the manufacture of all products sold, expensive as well as inexpensive.

I respectfully suggest to the distinguished Senator that, in my view, this amendment goes further than the intention of the committee, as I understood the intent of the committee.

Mr. KERR. The Senator has in his hand a copy of the press release issued by the chairman of the committee following the action taken by the committee. It is on the second or third page of the statement the Senator has.

Mr. GORE. I have only two pages.

Mr. KERR. Then it is on the second page. If the Senator will refer to the press release that was issued by the chairman of the committee after the action by the committee was taken, he will see that it reads:

> Fifty percent of the amount for which the finished products were sold but not in excess of an amount equal to $12.50 multiplied by the number of short tons used in the manufactured products sold.

The Senator from Oklahoma offered the amendment. It was prepared by the staff of the Joint Committee. The release was prepared for the chairman of the committee, in accordance with the instructions of the chairman of the committee. The amendment now offered carries out the identical purpose of the amendment offered by the Senator from Oklahoma. The language of the press release was issued by the committee after the action was taken, in the judgment of the Senator from Oklahoma, by the committee, with which, I am constrained to remind the Senator from Tennessee, he did not agree at the time.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. KERR. I yield.

Mr. GORE. It is true that I did not agree with the recommendations of the committee. It is true that I voted against reporting the bill. That fact, however, does not modify my understanding of what the expressed intent of the committee appeared to be. I respectfully suggest that, in my view, this proposal goes further than the bill. Is it the Senator's intention by his amendment to provide certain taxpayers with a larger reduction in tax liability than, in his opinion, the committee bill would provide?

Mr. KERR. I believe I shall have to ask the Senator to repeat the question.

Mr. GORE. Is it the Senator's intent——

Mr. KERR. It is the intent of the Senator from Oklahoma to provide language which, in the judgment of the Senator from Oklahoma, would carry out the intent of the committee. If the language in the bill as brought to the floor by the committee would do that, the amendment would not be necessary.

Mr. GORE. Since I was in the minority with respect to this bill, if the distinguished senior Senator from Oklahoma understands that his amendment now offered is necessary to implement the intent of the majority of the committee, and the distinguished chairman of the committee so understands it, I shall not object further.

Mr. KERR. I know the statement made by the Senator from Tennessee is correct insofar as the Senator from Oklahoma is concerned. I think it is correct insofar as the Senator from Virginia [Mr. BYRD] is concerned. That was the basis on which I requested his favorable attitude on the amendment.

Mr. BYRD of Virginia. Mr. President, that is my understanding, and also the understanding of the chief of staff of the committee.

Mr. GORE. I express no opposition to consideration of the amendment.

Mr. BYRD of Virginia. The amendment is acceptable.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment was agreed to.

Mr. GORE. Mr. President, the pending legislation culminates a long period of controversy in the administration of the internal revenue law with respect to certain specified minerals and products manufactured therefrom, clay in particular. The Senate will recall that last year an amendment which was offered by me was approved by the Congress and signed into law by the President, which made it clear that thereafter percentage depletion allowances could not be based upon the value of finished products. That question seems to be settled with reasonable certainty for the future.

The pending bill relates to tax liability and settlement of many pending cases of tax liability for prior years. I readily acknowledge that by reason of public statements made to taxpayers, and for the information of taxpayers, by the Internal Revenue Service, by reason of certain cases adjudicated in the lower courts, and by reason of settlements reached between the Government and certain taxpayers a situation was created in which the advisability of settlement was clearly indicated.

The committee recognized that fact. The Treasury Department recognized it.

Settlement of any issue is, in most cases, a compromise. Indeed, the bill before the Senate is a compromise.

My objection to the bill is based upon my view that it provides an overly generous concession in the form of retroactive tax relief, but it is a question of degree. As the distinguished chairman has correctly said, the Treasury Department recommended passage of a bill which would provide a legislative settlement of pending cases by allowing a deduction based on 25 percent of the value of the manufactured products.

The other body of Congress passed a bill providing settlement based on 100 percent of the value of manufactured products. It seemed to me that that was utterly unacceptable. Even those who advocate the principle of percentage depletion appear to me to be severely hard pressed to argue that a taxpayer should have a depletion allowance based not upon the value of the ore or mineral but upon the finished product.

The Senate voted 87 to 0 to make it clear that no such interpretation should apply in the future but Congress did not

settle, and in my opinion the courts did not settle, liability incurred in prior years.

This is a situation in which a settlement is indicated. Though the pending bill provides a more generous rule or standard of settlement than I think is justifiable, as the distinguished chairman of the committee has already pointed out, the bill recommended by the Senate Committee on Finance provides relief only 50 percent as large as was provided in the House bill. Settlement is needed. Settlement is justified. Compromise is indicated. I think compromise is justified.

If one must lean one way or the other from the hard standard of right, equity, and justice, I should say in this case that the leaning should be toward the taxpayers, many of whom understood that their cases had been settled and their tax liability fixed, and many of whom understood from informational releases of the Internal Revenue Service and from lower court decisions that adjudication had been made and that interpretation of the law had been finally settled.

I shall not ask for a yea-and-nay vote on the bill. I appreciate the attention of the Senate for these few moments, and I relinquish the floor.

Mr. TALMADGE. Mr. President, I shall be very brief because I think the able chairman of the committee [Mr. BYRD of Virginia], the distinguished Senator from Oklahoma [Mr. KERR], and the distinguished Senator from Tennessee [Mr. GORE] have covered the facts about as thoroughly as they can be covered.

The Congress of the United States, rightly or wrongly, in the year 1951 passed a law authorizing a depletion allowance in the clay industry. That depletion allowance varied in accordance with the end product which was sold. When the report was submitted by the Congress explaining in detail the purpose of the act, it contained language which provided that the term "mining" is "not merely the extraction of the ores or minerals from the ground but also the ordinary treatment processes normally applied by the mine owners or operators in order to obtain the commercially marketable mineral product or products."

That was the law which the Congress of the United States wrote regarding the depletion allowance. If an error was made, it was the error of the Congress and not of the taxpayers involved.

Shortly after the bill was approved by Congress, the Treasury Department insisted that there was a commercially marketable product before the end product was available. Litigation resulted therefrom involving a number of cases.

The first of any significance was the Cherokee Brick & Tile Co. case, which originated from my own State of Georgia.

The question was determined by the Circuit Courts of Appeals of the 3d Circuit, 4th Circuit, 10th Circuit, 6th Circuit, and 9th Circuit. Each court held adversely to the Government.

The Government was dissatisfied and contended it was correct, so it filed a writ of certiorari to the Supreme Court of the United States seeking to overrule the five or six circuit courts of appeals decisions.

The Supreme Court, in the Merry Brothers Brick & Tile Co. case, declined to review the several decisions.

After the Supreme Court declined to review these decisions it was assumed by everyone, including the Internal Revenue Service, that the law was settled.

Then what did the Government do? The Government issued what is known as Technical Information Release No. 62, which reads as follows:

> The Internal Revenue Service announced today that in view of the denial by the Supreme Court of the United States on October 14, 1957, of the Government's petitions for certiorari in *United States* v. *Merry Brothers Brick & Tile Co., et al.*, 242 F. (2d) 708 (1957) and in *Dragon Cement Co., Inc.* v. *United States*, 244 F. (2d) 513 (1957), it is taking steps to dispose of pending litigation and claims involving brick and tile clay and cement rock, as required under these decisions, and to conform Treasury regulations and outstanding rulings accordingly. This should permit the expeditious disposition of the great majority of such cases. Consideration is being given as to the applicability of these decisions in cases involving fire clay and limestone.

For 2 years after the issuance of TIR–62, the Internal Revenue Service followed the position expressed in that release, and on that basis did in fact settle many depletion claims for prior years.

In 1960 the Supreme Court of the United States handed down a decision in the Cannelton Sewer Pipe case. The Treasury Department claims that the Cannelton case reversed previous decisions.

The situation is clear that there was a distinction in some of the cases, but the Internal Revenue Service after 1959 came in to say, "Oh, yes. All of the long series of cases in which decisions have been handed down regarding an act of Congress from 1951 to 1959 must be reopened. We shall go back to every one of the taxpayers again and make them all pay taxes in accordance with what the U.S. Supreme Court says the law was, regardless of what Congress enacted in 1951."

What was the result? By and large, those in the clay business are small operators. Many of them have extremely limited resources. For years they had assumed that the tax bills had been paid. During all that period of time they had priced their products, expanded their industrial plants, paid out their money in wages or paid out their money in dividends.

That was the situation when the Ways and Means Committee of the House acted. The committee unanimously approved a bill which provided that all the taxes should be forgiven for the period in question, prior to the Cannelton case.

The bill came to the Senate. When the committee was considering the problem, the Treasury Department officials came before the committee and said, "We think these people are entitled to relief, but we think 25 percent would be fair and adequate, in the settlement of these cases."

The other body said it thought 100 percent would be fair and adequate.

What did the Committee on Finance do? The committee agreed upon a compromise of 50 percent, and that is the issue before the Senate today. The issue is whether the Senate, after a long series of decisions by the courts of this land and after action by the Internal Revenue Service, will go back to "pick a goose" regarding an act of Congress passed 10 years ago.

That is the issue. The equity is clear, Mr. President. I hope the Senate will pass the bill by an overwhelming majority.

Mr. ERVIN. Mr. President, will the Senator yield?

Mr. TALMADGE. I am delighted to yield to my able friend from North Carolina.

Mr. ERVIN. While it is not technically so, is it not true that, to all practical intents and purposes, in its interpretation of the Cannelton case the Internal Revenue Service is demanding ex post facto taxation?

Mr. TALMADGE. That is exactly what they are doing, and Congress and the Finance Committee time after time have disapproved of that philosophy.

Mr. ERVIN. What the bill does is frankly to relieve the taxpayer from 50 percent of the ex post facto taxation rather than 100 percent, which really, to do absolute justice in this world, the taxpayer would be entitled to.

Mr. TALMADGE. The Senator from North Carolina is entirely correct.

Mr. GORE. Mr. President, will the Senator yield?

Mr. TALMADGE. I am delighted to yield to my friend from Tennessee.

Mr. GORE. I wish to congratulate the able junior Senator from Georgia upon his able and eloquent statement of the issue. He and I have sat side by side on the Senate Committee on Finance and, more often than some might think, he and I have voted on the same side together. It is a pleasure to work with him. I consider the Senator has an extremely able mind. He has the public interest at heart. Though he and I have differed on this bill, both of us recognize that equities are involved and a settlement is indicated.

I cannot accept the statement of my distinguished friend, the senior Senator from North Carolina [Mr. ERVIN], that these tax claims involve ex post facto levies, nor can I accept the statement of the distinguished junior Senator from Georgia [Mr. TALMADGE] that Congress intended that percentage depletion should apply to the value of the finished product. I know that there are disagreements which eventually the Supreme Court must settle.

Mr. TALMADGE. Mr. President, will the Senator yield at that point?

Mr. GORE. Yes.

Mr. TALMADGE. First, I wish to express my deep gratitude to the Senator from Tennessee for his generous statement. He overwhelms me indeed with the generosity of his remarks.

I point out to the Senator that when the committee originally approved the depletion allowance, it stated in the report that it would be applicable to the first marketable product—not the finished product—and in the brick industry the first marketable product as a general rule is the finished product, because there is no market for a mass of wet, raw, clay.

Mr. GORE. I suggest to the able Senator that he uses the term generally. There are instances in which there is a marketable product before the finished brick or tile. I know that if we should explore the question we would get into a great many technicalities. I did not arise really to provoke such a debate, but to indicate my own disagreement with the ex post facto interpretation of the law. Indeed, if I held that view, as I am sure my distinguished friend from North Carolina does, then I would be in favor of the 100-percent figure provided in the House bill.

Not accepting that theory, I agree with my friend from Georgia that because of the informational releases, the public statements of the Internal Revenue Service, lower court decisions, and some actual settlements of cases between the Government and the taxpayer, a situation was created in which a legislative settlement was necessary. Although I think the bill contains a settlement more generous than is justified, I certainly will not undertake to make an exhaustive effort against passage of the bill.

Mr. TALMADGE. I thank the Senator.

The PRESIDING OFFICER (Mr. HICKEY in the chair). The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 7057) was read the third time, and passed.

The title was amended, so as to read: "An act relating to the determination of gross income from the property for tax able years prior to 1961 in the case of certain clays and shale which were used in the manufacture of certain clay products."

Mr. TALMADGE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. KERR. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on the motion of the Senator from Oklahoma.

The motion to lay on the table was agreed to.

Mr. WILEY subsequently said: Mr. President, I had been in the Chamber all day until a little more than an hour ago. I asked the majority leader if there would be any more votes. He said he did not think there would be. I went to the office, because I had some very important matters to attend to. I was then informed that the Senate had passed H.R. 7057.

This bill was before the Committee on Finance. I wrote the chairman of the committee, the Senator from Virginia [Mr. BYRD], a letter on August 30, which I shall read:

DEAR HARRY: The Finance Committee, of which you are chairman, will have before it today H.R. 7057. It is the purpose of this bill to restore an equitable definition of "gross income from mining" for clay and shale miners in accordance with the definition existing before the decision of the Supreme Court in the recent Cannelton case.

A parallel situation exists with respect to certain dimension stone miners, of which there are a number in Wisconsin, as well as in Virginia. For this reason, I believe the coverage of the bill should be extended to quarriers of dimension stone.

I believe it would be preferable to have the bill amended in committee rather than on the floor. I would therefore greatly appreciate it if you would bring the enclosed amendment to the attention of the Finance Committee today.

Sincerely yours,

ALEXANDER WILEY.

One of my assistants in the office went to the committee, and he was informed it would be better to have the amendment taken up on the floor of the Senate. So I submitted an amendment, which I shall later ask to have printed in the RECORD.

I received a letter which pretty well states, in a nutshell, the issue involved. The letter came from Richard R. Teschner, an attorney in Milwaukee, under date of August 31. The letter reads:

DEAR SENATOR WILEY: I have just learned of the passage by the House of H.R. 7057 which would, for years beginning before December 14, 1959, nullify the effect of the Supreme Court's Cannelton decision but only as to shale and clay.

Passage of this bill in its present form would be extremely harmful to the Waukesha County limestone industry.

The Internal Revenue Service is attempting to apply their interpretation of the Cannelton case to the Waukesha County limestone industry. They are saying that the rough blocks first removed from the quarry are the "commercially marketable product" upon which depletion must be computed. While this is apparently a satisfactory method when dealing with pure limestone deposits, such as Indiana limestone, the Waukesha County limestone deposits are such that at least one-half, and generally more, of the rough blocks are waste which must be removed before a product which is in fact marketable is obtained. The result is that the application of the Cannelton decision as presently interpreted by the Internal Revenue Service, to the Waukesha County limestone industry practically eliminates any depletion allowance. I am informed that if this position is sustained the resulting increase in the costs of quarrying Waukesha County limestone—in a market where competition from stone quarried in Indiana and elsewhere sets a ceiling on the price which can be obtained for the product—may result in closing over half the quarries in Waukesha County. Some, as you doubtless know, have already closed within the past year because of the cost-price squeeze. The impact of these further closings on the economy of Waukesha County, not only through loss of jobs and profits, but also loss of local tax revenues, is obvious.

The bill which was passed, and which applied to certain clays and shales which were used in the manufacture of certain products, was amended to include those terms. The decision in question changed the rule in relation to computing the tax. As a result, the bill was passed. It would apply to those who must pay taxes, on the basis stated.

The Internal Revenue Service made a decision. After that the circuit court of appeals made its decision. The Supreme Court reversed the decision. The question was whether back taxes would have to be paid.

I wish to make it plain that the companies were operating under the rules laid down by the Internal Revenue Service and affirmed by the courts.

The House and Senate agreed that the back taxes should not be paid, and passed the act relating to the application of the terms "gross income from mining" and "ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products" to certain clays and shale for taxable years beginning before December 14, 1959.

If the bill had not been rushed through, I would have offered an amendment. I think it is an equitable amendment and a fair one. It would place dimension or ornamental stone in the same category with shale and clay.

The bill has been passed. I suppose my remedy is to wait until another revenue bill comes before the Senate. I should like to have the opinion of the Presiding Officer on the question as to whether the amendment would be pertinent or relevant to such a bill.

The PRESIDING OFFICER. The ruling of the Chair, upon advice from the Parliamentarian, is that it would require unanimous consent for the consideration of any motion affecting amendments or any action on the bill which was passed today. It would be in order for the Senator to offer the amendment to some other revenue bill which comes to the Senate from the House.

Mr. WILEY. Only to a bill coming from the House?

The PRESIDING OFFICER. Yes, because revenue bills must originate in the House.

Mr. WILEY. I thank the Presiding Officer. If I correctly understand the situation, nothing can be done at this time unless I move to reconsider; and I assume that would not be in order.

The PRESIDING OFFICER. The Senator is correct. A motion to reconsider would not be in order.

Mr. WILEY. The motion would not be in order.

Mr. President, I ask unanimous consent that a copy of the bill, together with a copy of the amendment, may be printed in the RECORD, so that at the appropriate time, when a revenue measure comes to the Senate from the House, I can make an attempt to do what I had hoped to do today.

There being no objection, the bill (H.R. 7057) relating to the application of the terms "gross income from mining" and "ordinary treatment processes normally applied by mineowners or operators in order to obtain the commercially marketable mineral product or

products" to certain clays and shale for taxable years beginning before December 14, 1959, and the amendment were ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) ELECTION FOR PAST YEARS.—In the case of brick and tile clay, fire clay, or shale used by the mine owner or operator in the manufacture of building or paving brick, drainage and roofing tile, sewer pipe, flower pots, and kindred products (without regard to the applicable rate of percentage depletion), if an election is made under subsection (c), for the purpose of applying section 613(c) of the Internal Revenue Code of 1954 (and corresponding provision of the Internal Revenue Code of 1939) for each of the taxable years with respect to which the election is effective—

(1) gross income from the property shall be 50 per centum of the amount for which the manufactured products are sold during the taxable year except that with respect to any manufactured product gross income from the property shall not exceed an amount equal to $12.50 multiplied by the number of short tons used in the manufactured product sold during the taxable year, and

(2) for purposes of computing the 50 per centum limitation under section 613(a) of the Internal Revenue Code of 1954 (or the corresponding provision of the Internal Revenue Code of 1939), the taxable income from the property (computed without allowance for depletion) shall be an amount which is the same proportion of the taxable income from the manufactured products sold during the taxable year which the gross income from the property (determined under paragraph (1)) is of the total amount for which the manufactured products are sold during the taxable year.

(b) YEARS TO WHICH APPLICABLE.—An election made under subsection (c) to have the provisions of this section apply shall be effective for all taxable years beginning before January 1, 1961, in respect of which—

(1) the assessment of a deficiency,

(2) the refund or credit of an overpayment, or

(3) the commencement of a suit for recovery of a refund under section 7405 of the Internal Revenue Code of 1954,

is not prevented on the date of the enactment of this Act by the operation of any law or rule of law. Such election shall also be effective for any taxable year beginning before January 1, 1961, in respect of which an assessment of a deficiency has been made but not collected on or before the date of the enactment of this Act.

(c) TIME AND MANNER OF ELECTION.—An election to have the provisions of this section apply shall be made by the taxpayer on or before the sixtieth day after the date of publication in the Federal Register of final regulations issued under authority of subsection (f), and shall be made in such form and manner as the Secretary of the Treasury or his delegate shall prescribe by regulations. Such election, if made, may not be revoked.

(d) STATUTES OF LIMITATION.—Notwithstanding any other law, the period within which an assessment of a deficiency attributable to the election under subsection (c) may be made with respect to any taxable year for which such election is effective, and the period within which a claim for refund or credit of an overpayment attributable to the election under such subsection may be made with respect to any such taxable year, shall not expire prior to one year after the last day for making an election under subsection (c). An election by a taxpayer under subsection (c) shall be considered as a consent to the application of the provisions of this subsection.

(e) TERMS; APPLICABILITY OF OTHER LAWS.—Except where otherwise distinctly expressed or manifestly intended, terms used in this section shall have the same meaning as when used in the Internal Revenue Code of 1954 (or corresponding provisions of the Internal Revenue Code of 1939) and all provisions of law shall apply with respect to this section as if this section were a part of such Code (or corresponding provisions of the Internal Revenue Code of 1939).

(f) REGULATIONS.—The Secretary of the Treasury or his delegate shall prescribe such regulations as may be necessary to carry out the provisions of this section.

Amend the title so as to read: "An act relating to the determination of gross income from the property for taxable years prior to 1961 in the case of certain clays and shale which were used in the manufacture of certain clay products."

AMENDMENT

On page 2, line 6, strike out " 'shale' and 'clay' " and insert in lieu thereof " 'shale', 'clay', and 'stone (used or sold for use by the mine owner or operator as dimension stone or ornamental stone)' ".

Mr. WILEY. Mr. President, equitably and fairly the position here taken, I believe, should be sustained. The provisions of H.R. 7057 should have been amended to include the limestone products. That is the proper way to solve the dilemma.

For reasons I have already stated, because I was called to the office I was unable to be in the chamber at the time the bill was passed.

I think, in the closing days of the session, when amendments or bills are pending, Senators should be given notice, so that a situation such as this would not develop.

A PUBLIC SERVICE BROADCAST

Mr. KEATING. Mr. President, in these days when criticism is often directed at the broadcasting medium, I should like to invite attention to a singular example of alert and useful public service programing.

Last week the Senate passed by a vote of 73 to 14 legislation to establish a U.S. Agency for Arms Control and Disarmament. The bill is thought by many to be an important step toward our ultimate goal of arms control and the rule of law throughout the world.

An interesting and informative background program on the subject of disarmament was broadcast before the Senate action by radio station WNEW in New York as a seven-part series of explanations of the disarmament problem. The series was scheduled within regular newscasts so as to reach the largest possible audience. WNEW Radio enjoys a national reputation for the excellence of its newscasts, having in recent years won the Peabody Award, the Headliners Club Award, the Freedoms Foundation Award, the Ohio State Award—twice—and the Brotherhood Award of the National Conference of Christians and Jews—also twice, the only times any medium has won this award for 2 successive years—and the Alfred P. Sloan Safety Award.

These discussions of the disarmament problem included tapes of the actual voices of key figures in the history of efforts at disarmament, including Bernard Baruch; former U.N. Ambassador James Wadsworth; our special disarmament adviser, John McCloy; and Senator Everett M. Dirksen. It was a well balanced and highly informative discussion of a critical problem, which included even the propaganda pitch of Khrushchev wooing the uninformed.

Because this series was a valuable contribution to national thinking on this subject and because I believe that the contents of these valuable broadcasts ought to be given wider dissemination, I ask unanimous consent that the script of this series be inserted in the CONGRESSIONAL RECORD.

There being no objection, the script was ordered to be printed in the RECORD, as follows:

DISARMAMENT PROFILE

(A special WNEW news series on the disarmament problem as broadcast on WNEW radio, Sept. 1, 1961)

(Produced and edited by Lee Hanna with Dick Merson and Sheldon Hoffman; written by Lee Hanna, Henry Cassidy, Martin Weldon, Martin Caidin, and Russ Hearn; researched by Claire Racine; narrated by Henry Cassidy. Correspondents: Lincoln Harner, Martin Caidin, Russ Hearn (Germany), Martin Weldon (Washington)).

PART I. LIFE AND DEATH

Mr. CASSIDY. It was 16 years ago. A B–29, high over Japan, dropped the bomb. Martin Caidin recalls it.

Mr. CAIDIN. The officers and airmen of the 509th Bomb Group on Tinian Island in the Pacific assembled in a large shack. Outside the barred door a heavy force of armed guards patroled the area, with orders to shoot any intruders. The men of the 509th Group flew specially modified B–29 heavy bombers. That night they were briefed for a secret assignment, and they were shocked by what their briefing officer told them.

Officer's voice: Now, during your training period you were called upon to do many strange things. There was reason for all of that because this bomb that you're going to use is not an ordinary bomb. It's not a thousand-pounder. It's not a 10-ton blockbuster. This bomb has the strength of 20,000 tons of TNT.

Mr. CAIDIN. In the early morning darkness of August 5, a B–29 known as *Enola Gay* roared off the runway of Tinian Island and headed for Japan. Exactly at 9:15 a.m. the morning of August 5, 1945, the bombardier aboard the *Enola Gay* squeezed a release trigger. A heavy object fell away from the B–29, then 6 miles over the city of Hiroshima. Fifty seconds later atomic war was a reality.

(Tape: Atom bomb blast: Hold, then under and out.)

Mr. CAIDIN. A blinding glare of light flashed outward for miles and intense heat burst into Hiroshima. A shock wave with the force of a steel wall smashed the city's buildings into rubble, and a great ball of fire, a thousand feet across, roared its fury at the world and rose atop a pillar of atomic smoke to more than 50,000 feet. In the flames that followed this blast and the world panic that ensued, 80,000 Japanese died.

Mr. CASSIDY. The atomic age was born. And 1 year later Bernard Baruch stood before the United Nations.

Mr. BARUCH. We are here to make a choice between the quick and the dead. That is our business. We of this Nation, desirous

of helping to bring peace to the world, and realizing the heavy obligations upon us, arising from our possession of the means of producing the bomb, are prepared to make our full contribution toward effective control of atomic energy. We propose this: manufacture of atomic bombs shall stop.

Mr. CASSIDY. With the announcement on Wednesday that the Soviet Union will resume nuclear tests, the world once again has become very much concerned about disarmament. Statesmen agree that disarmament is one of the most important problems of our time—perhaps the most important. On its solution depends a future of peace or war, of life or death. Yet the world is taking the opposite course in an accelerated arms race.

Berlin today, not Hiroshima, has been making the headlines most recently. It's a trouble spot—one of many—in a troubled world. The experts say there will be no war over Berlin. I remember when they said there would be none over Poland. But, Berlin magnifies the problem of disarmament, because even if that single issue could be settled, or sidestepped, we know that the cold war can flare up hot in some other unexpected place. Disarmament is the overall problem that must be settled, if the world is to be assured of peace.

DISARMAMENT PROFILE

PART II. HISTORY

Mr. CASSIDY. Students of the problem of disarmament recall that in the early part of our century, before World War I, negotiations on disarmament were concerned with balloons—not missiles; with dum dum bullets—not warheads; with poison gas—not radiation sickness.

Disarmament was an important and seemingly insoluble problem then . . . as it is today.

What is it all about? You've read about it. Heard about it. But, what is it really all about?

Correspondent Lincoln Harner traces the recent history of disarmament talks * * * more than a half century of lack of progress.

Mr. HARNER. The modern history of disarmament, Henry, started with the peace conferences at The Hague in Holland during 1899 and 1907. Russia, Germany, and England were the signatories. We all know how successful those conferences were. We found out in World War I.

In 1919 disarmament was stressed in the Versailles Treaty, and the fourth of Woodrow Wilson's 14 points demanded that national armaments be reduced to the lowest point consistent with domestic safety. The League of Nations wrestled with that from 1920 to 1935 when the conference didn't really formally end. Nobody showed up one day and they tacitly agreed to call it quits. In July of 1932 it looked like they were getting close when France, Britain, and the United States agreed that air attack against civilian population would be prohibited and that tanks and artillery be limited in size and that chemical warfare be banned. Germany and the Sovet Union voted against. In 1921, there was an attempt at naval disarmament when a five-power treaty was signed limiting Great Britain and the United States to five battleships each and Japan to three. But in 1927, Britain and the United States disagreed. In 1931 Britain, the United States, Japan, France, and Italy decided on a 5-year holiday in the construction of capital ships and a limitation on submarines and aircraft carriers. Germanzy ignored it.

And this by no means covers all the talks, the conferences, the commissions and agencies set up to try to find the solution to the disarmament problem. By no means. Since 1900 scarcely a year has gone by without some attempt on the part of some major power to bring to pass some agreement on some phase or another of disarmament. By 1939, the only thing the world had to show for its disarmament efforts was World War II.

Mr. CASSIDY. And, following World War II more talk at the U.N. Why can't we agree? What are the problems?

Well, one of the problems is the general apathy disarmament generates despite its importance.

I happen to know that the ladies of East Fishkill in Dutchess County, N.Y., are holding meetings, but only to get ready for their fashion show this September. There is lively discussion around the bar of the Overseas Press Club in Manhattan, but it's about Roger Maris and Mickey Mantle.

The Congress is in no hurry to create the disarmament agency requested by President Kennedy. Right now it's more interested in pressing toward adjournment.

Disarmament? Well, it's a difficult problem to understand. It has been around for a long time and there is no solution in sight.

And, in the background, a buildup of armies and a threat of a bomb equal to 100 million tons of TNT. If that bomb goes off, talk of disarmament may cease forever. Disarmament in an empty world will cease to be a problem.

DISARMAMENT PROFILE

PART III. THE U.N. MAKES A TRY

Mr. CASSIDY. The United Nations would seem the likely place to take up the discussion of disarmament. It has been discussed there before and will be again in the 16th General Assembly beginning September 19. One wonders whether this attempt at reaching a solution to the problem will get any further than the one last September when more than 20 heads of state and chiefs of government made known their views on how to bring about disarmament. Among them, India's Prime Minister Nehru:

Mr. NEHRU. If within the next 3 or 4 years effective disarmament is not agreed to and implemented, then it may be too late. And all the good will in the world will not be able to stop the drift to certain disaster.

Mr. CASSIDY. But the question—what disarmament principles should be endorsed by the General Assembly? That's where the division of views comes at the United Nations.

The Soviet Union insists upon general and complete disarmament—as outlined here by the Soviet Deputy Foreign Minister Valerian Zorin.

Russian (fade under for translation): The Soviet Government proposes that all states should carry out gradually, in three consecutive stages, during an agreed period of time, the complete and final elimination of all their armed forces and armaments, and that this elimination should be carried out under strict and effective international control.

Mr. CASSIDY. Strict and effective international control is the key to disarmament. The Soviet Union, with its demands for complete and universal disarmament, has a slogan that is popular among many peoples. The United States has won less popularity, has seemed to be carping in its demands for a system of inspection to guard against a surprise attack.

This is the way former U.N. Ambassador James Wadsworth described the U.S. position:

Mr. WADSWORTH. It should be fairly balanced between the two sides giving neither a significant military advantage. It should have adequate inspection and verification thus assuring each side that the other side is keeping its promises. It should proceed step by step, building confidence as it goes, so that more and more far-reaching proposals may be put into effect.

Mr. CASSIDY. Control is the problem. If we disarm how do we know the Russians will. This has been the major stumbling block in disarmament negotiations down through the years.

Both sides say they are in favor of international control—the question is, How far should inspection extend? The West wants a neutral control observer. The Soviets insist upon a "troika"—a three-man team. One from their side, one from our side, and one neutral. Each would have veto power. And we see this as rendering the team powerless.

This September, at the U.N., we will present a whole new approach to the problem. Its provisions have not been made public in advance—but its details have been worked out at the highest levels of government. And its ultimate purpose will be an orderly world in which all nations can safely set aside their arms and cooperate in peace.

DISARMAMENT PROFILE

PART IV. IT SOUNDS SO GOOD

(Tape: Khrushchev, est and under.)

Mr. CASSIDY. This is the voice of Nikita Sergeyovitch Khrushchev, Chairman of the Council of Ministers of the Soviet Union. It's September 1959 and Khrushchev is addressing the General Assembly of the United Nations. It hears him make a startling proposal.

Khrushchev's voice up and under translator: Over a period of 4 years all states should affect complete disarmament and should no longer have any means of waging war.

Mr. CASSIDY. "General and complete disarmament," Khrushchev said, "down not only to the last nuclear-tipped missile but also to the last soldier's rifle."

It sounded so good. And it made good propaganda. Why don't we agree to the Soviet proposal? For an analysis of what Khrushchev would like to have us buy, here is Correspondent Russ Hearn reporting from Europe.

Mr. HEARN. Does the Soviet leader really want disarmament, general, complete or any other kind? The answer to that question seems to be yes—on Khrushchev's own terms. But the key points in his terms are that disarmament comes before control, first of all, and then, that there's no need for an international military force strong enough to police the peace in a disarmed world. On inspection of a disarmament pact, he thinks that "inspection" is just a fancy word for spying. The Kremlin wants control only after West and East have disarmed. In other words, during the months and years it would take to dismantle military might, in the event of an agreement to disarm, we would just have to take it on faith that Moscow was destroying its weapons too. At best, on the basis of past performance, a very risky bet. Now when Khrushchev urged general and complete disarmament at the U.N., he added that all countries would keep enough men under arms for what he called internal security. In such a disarmed world a truly international army to keep the peace would be an absolute necessity, and it would have to be stronger than any nation's internal police force. This is something the Soviet Union has never shown the slightest willingness to accept. Until it does, "general and complete disarmament" will remain just what it sounds like—a striking but largely meaningless propaganda slogan.

Mr. CASSIDY. We say work out a system of inspection and control and then disarm. The Russians say no. Trust us. Disarm first. Inspect later.

The safeguard the Russians want is control by a "troika" team, in which one man would represent the West, another the Soviet Union and a third the neutral states. That "troika" idea, which the Soviet negotiators have found useful in defeating international settlements, is named for a three-horse Russian sled or carriage which can be slowed to a halt when one horse sulks.

We don't plan to hitch our horse to their "troika."

What the West wants is a foolproof inspection system, and that would mean on-the-spot observation within the Soviet Union. The Russians call this espionage.

So, you can see why Khrushchev's disarmament proposal sounds so good—but looks so dangerous.

DISARMAMENT PROFILE

PART V. TWO SIDES OF THE STORY

Mr. CASSIDY. If you read Pravda or Tass or if you listen to the radio in the Soviet Union or any of the barbed wire nations—Bulgaria, Rumania, Czechoslovakia, Poland, Hungary—you get an altogether different side of the story of disarmament. They are right. We are wrong. They are for disarmament. We're against. They are for peace. We are for war.

Here's how, on Wednesday, the Soviet Union tried to justify the resumption of nuclear testing. This is an English language broadcast from Radio Moscow.

Russian (est and under translator): It is with regret that the Soviet Government has decided to carry out nuclear tests. It has been forced to take such a step because the policy of the foremost NATO powers, the United States, Britain, France, and the Federal German Republic, leave the Soviet Union no other choice. The Soviet people and the Soviet Government can't ignore the fact, that again, just as 20 years ago, sinister war clouds are gathering on the approaches to our frontiers and that West Germany and the present allies of the German military are in a fever of war preparation.

Mr. CASSIDY. The professed regret of the Soviet Government at its decision to resume nuclear testing is shared by the allied governments * * * one of the few things they do share with the Russians at this point. But it must be realized that it is the Russians, not the Allies, who have started this new lap in the arms race and they are the ones who have put up this new fever of war preparation.

Radio Free Europe monitors broadcasts from the Iron Curtain countries. Let's hear how the Communists have treated the subject of disarmament, and let's hear, too, the side of the story the Russians don't tell their captive peoples—our side. Here is the report from the Bulgarian radio.

Bulgarian (translated): The Western Powers have advanced a wholly unacceptable plan. While it aims at banning nuclear rockets, where the Soviet Union has an indisputable advantage, it permits the Western Powers to keep their atomic air forces.

Mr. CASSIDY. The truth? The West proposed cessation of production of all fissionable materials for weapons, and we called for immediate formation of an international disarmament organization to initiate arms reduction. Typical of Communist propaganda, is this report monitored from Soviet controlled radio in Czechoslovakia.

Czech commentator (translated): The West is clearly against any meaningful disarmament agreement. The Socialist delegation could not have stayed in Geneva because the West wanted only to exploit this meeting for propaganda purposes.

Mr. CASSIDY. The facts? The Communist action came at a point where new and constructive Western proposals were about to be presented, proposals that represented a significant advance toward a mutual agreement. We noted how they asked France detailed questions; how they requested replies from the United States, and then before these replies could be put on record, how they cut the meeting off in such a manner as to evoke from the French delegate the cry: "This is scandal. This is hooliganism."

That's the other side of the story * * * the only side the Soviet Union does not permit its captive nations to hear.

But, it's important to hear both sides of the disarmament story—theirs and ours; to determine our differences, probe for the truth, seek the answers, and find a solution; become warless men, before this outworn earth becomes as dead and cold as the moon.

DISARMAMENT PROFILE

PART VI. AN AGENCY FOR PEACE

Mr. CASSIDY. For years, in fact for centuries, disarmament has been left largely to the experts. They have evolved vast plans but they haven't done any disarming. Now, in this time of crisis, the United States is taking this problem to the highest level with a man of cabinet rank to be in charge, reporting directly to the President.

The Kennedy administration is pressing its bill for a separate, permanent Disarmament Agency. And, one man who is very much in favor of it is a New York banker, former High Commissioner for Germany, and now a special adviser to the President on disarmament, John J. McCloy.

Mr. MCCLOY. I'm coming to feel with each week that goes by and each headline that I read the need for such an Agency in the Government grows more urgent. Some say that it's a poor time to be talking about a Disarmament Agency when we're building up our Armed Forces and increasing the Berlin garrison. But with every threat of the use of modern weapons, it seems axiomatic to me at least, that now of all times we should have an efficient Government agency to deal with this problem of disarmament and of arms control for an effective means of keeping the peace.

Mr. CASSIDY. But, reaction to a new Disarmament Agency is mixed * * * it was that even before the Soviet Union announced it would resume nuclear tests. Now, it's doubtful that the bill for the new Agency will pass Congress in this session. And on that subject, this report from our Washington news chief, Martin Weldon, who attended Foreign Affairs Committee hearings on the proposed Agency:

Mr. WELDON. Speaking in favor of a permanent Agency for Disarmament, State Secretary Rusk told the House Foreign Affairs Committee that the cost of this proposed Agency would be only one-tenth of 1 percent of the money Congress recently appropriated to build up our defenses. Before the Senate Foreign Relations Committee last week appeared a parade of distinguished witnesses all in favor. It was a notably bipartisan group. They all spoke eloquently, sometimes it seemed desperately, for the idea of reducing or eliminating mankind's power to blow itself up.

These men know, despite all the discouragements, that a start must be made, for the plain fact is that disarmament is not really a popular idea. Some Congressmen and Senators report that their mail shows that public opinion is not in favor of the Peace Agency. Maybe what we need is a new slogan like "peace, it's possible."

Mr. CASSIDY. Although general approval of the plan had been expressed by Members of both parties in Congress—that was before the Russian announcement ending the test ban.

Now, there's talk of abandoning, at least for the present, plans for the Peace Agency. The reasoning being that a Disarmament Agency, a Peace Agency, is hardly justified at a time when an Armament Agency would seem more useful. But Secretary of State Rusk sees it differently. "Keep trying," he says. And this month we will try again at the U.N. If the Disarmament Agency is approved, it will try again—through research into all aspects of the arms race, through recommendations to the President, through more negotiations with foreign countries. If the Disarmament Agency is approved it will, as Mr. Rusk sees it, "apply our best talents to one of the most urgent tasks of our generation."

What we will be doing, despite the current Soviet provocation, is keeping the door open to disarmament. The alternative is not pleasant to contemplate.

DISARMAMENT PROFILE

PART VII. TEST BAN

Radio Moscow: It is with regret that the Soviet Government has decided to carry out nuclear tests. It has been forced to take * * *.

Mr. CASSIDY. This is the voice of Radio Moscow in its English language transmission. On Wednesday, it gave us the news the Soviet Union had decided to resume testing of nuclear weapons, ending the voluntary ban on tests that the Russians, the British, and the Americans have been observing since 1958—while they tried at Geneva to work out a permanent test ban treaty. Here is how Moscow explains the unilateral abandonment of the test ban.

Radio Moscow: The Soviet Government would not be doing its sacred duty by its own people, the peoples of the Socialist countries or the other nations that desire a life of peace, if, in face of the threat and war preparations of the United States and some of the other NATO countries, it failed to utilize the possibilities it has to improve the most effective type of weapons * * * weapons that can cool the hotheads in some of the capitals of the NATO powers.

Mr. CASSIDY. So here we go again, off to the arms race—and this time the stakes are higher. The Russians claim they can build a bomb with an explosive power equivalent to 100 million tons of TNT. In Western capitals reaction to the Soviet announcement has been one of some alarm. But to others the end of the test ban comes as a relief. There are those who believe, that in spite of the voluntary test ban that has been going on, the Russians have actually been conducting tests in secret. Now they feel it's out in the open. We know where we stand and we can start to rebuild our arsenal. Last month the Senate minority leader, EVERETT DIRKSEN, told the Foreign Relations Committee he had reliable information that the Russians had been conducting secret tests.

Senator DIRKSEN. We have had some conferences with various people and it was on that basis that we came to the conclusion that the Soviet Union must have been carrying on tests—notwithstanding the denial that was made by Mr. Khrushchev and others, particularly so when Mr. K. has been boasting about a hundred-megaton bomb.

Mr. CASSIDY. And military expert Martin Caidin raises the question, too.

Mr. CAIDIN. How do we know that they have not been secretly testing bombs all this time? The answer is: We don't know. We don't know because it's impossible to detect explosions if you're really trying to hide them. Now, small bombs can be exploded in deep underground caverns made of rock. They give off no radio activity or fallout that can be detected above the surface. There are no inspection teams in Russia. Our instruments cannot tell us if the Russians are testing bombs. So what it adds

up to is that for the last several years we have been trusting the Russians. We have been taking their word that no bombs have been exploded during this time.

Mr. CASSIDY. The United States has made a final, honest effort to reach agreement with the Russians on a test ban treaty. The Geneva talks have been suspended and the issue will now go to the United Nations beginning in New York, September 19, an institution that has had a notable absence of success in trying to stop the arms race. Instead of disarming, instead of turning weapons into plows and using atomic energy for peace, the world is rearming. Unless wisdom can prevail, the ultimate result is bound to be war—and this war might very well be the last.

STATE DEPARTMENT LETTER CONCERNING S. 2233, TO AMEND THE IMMIGRATION AND NATIONALITY ACT

Mr. KEATING. Mr. President, in consideration of some of the House amendments to S. 2237, an act to amend the Immigration and Nationality Act, I called upon the State Department for its views with respect to this proposed legislation.

A number of the provisions added in the House of Representatives to S. 2237 have not been considered previously on the floor of the Senate. For that reason, I am sure that my colleagues will find the State Department letter very informative.

I ask unanimous consent to have inserted at this point in the RECORD the complete text of the State Department letter to me dated September 12, 1961.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C., September 12, 1961.

Hon. KENNETH B. KEATING,
U.S. Senate.

DEAR SENATOR KEATING: In response to your request, I submit herewith the Department's comments on S. 2237 as passed by the House on September 6, 1961. As you realize, many of the provisions of this bill are similar in content to those contained in S. 1809, introduced by Senator DIRKSEN on May 4, 1961, on which this Department submitted its report to the chairman of the Senate Judiciary Committee on July 12, 1961.

ELIGIBLE ORPHANS AND ADOPTED CHILDREN

The Department is glad to endorse in principle the provisions of sections 1, 2, 3, and 4 of the bill, the main purpose of which is to remove eligible orphans from quota restrictions and to place the orphan adoption program on a continuing basis.

Referring to the procedures proposed for determining an alien's qualifications for status under section 101(b)(1)(F), it is recommended that consular officers be authorized and directed to conduct the necessary investigations abroad to determine whether the alien is an "eligible orphan," and also the qualifications of the petitioner and his spouse if they are residing abroad. Generally speaking, the question of whether an alien is classifiable as an "eligible orphan" can best be determined by those who have firsthand knowledge of the facts and circumstances which make him available for adoption. U.S. consular officers are able to make this determination because they are in a position to obtain the necessary information abroad and to know the facts and circumstances. When the personnel of another agency performs this investigative function overseas, it results necessarily in an increase of personnel assigned abroad with the attending budgetary demands, and it also militates against our Government's efforts to reduce the number of Government personnel stationed abroad. The Department also recommends the inclusion of language which would make it possible for a qualified Federal agency to offer guidance to consular officers in matters relating to adoption.

JUDICIAL REVIEW OF DEPORTATION ORDERS

Section 5 would provide for comprehensive procedures to govern the judicial review of deportation orders. While this section is of interest exclusively to the Department of Justice, this Department fully endorses its objectives.

RACE AND ETHNIC CLASSIFICATION

Section 6 of the bill would delete the words "race and ethnic classification" from section 222 (a) and (c) of the Immigration and Nationality Act. The Department strongly endorses the removal of this language from the statute because it serves no purpose in the enforcement of the immigration laws and has been a source of misunderstanding and irritation to visa applicants.

DEFINITIONS

The provisions of sections 7 and 8 and would redefine the term "veteran" to include persons who served in the Armed Forces of the United States during the Korean conflict, and prescribe the period of "Korean hostilities" as from June 25, 1950 to July 1, 1955. This would conform the "Definitions" section of the Immigration and Nationality Act to substantive amendments made in section 354 by section 2 of the act of August 2, 1959.
